

## TESTIMONIALS

"I've always heard people talk around and ask about senior project ideas. So I thought about why there wasn't a website that shared senior project ideas for students to collaborate on. Neal and I decided that this would be the perfect opportunity to use our senior project collaboration as the forefront of an example. Then BAM! Poly Projects was born."

**-Carolyn Ward, Coms '12**

"Since I came to Cal Poly, I've heard students older than me complain about senior projects and dread the process. I've also heard the success stories of many projects like 'Jamba Juice', 'KCPR', or 'Punch'd' and was inspired that they could take their senior project to the next level. And I think that's why many of us love Cal Poly, the whole learn by doing aspect. Carolyn and I just wanted to bring the campus together to make senior projects easier and hopefully more enjoyable."

**-Neal Donahue, Coms '12**

*Bringing Cal Poly students together through a university-wide social network for sharing, collaborating, and searching for projects-- committed to all majors, all ideas, and all advantages.*

## How We Started

Poly Projects began as a senior project collaboration between Communication Studies students Carolyn and Neal Donahue. During their four years at Cal Poly, they consistently heard about the lack of senior project collaboration from upper-classman. Now, using their project as an example of what Poly Projects promotes, they want to bring all majors and colleges together for open communication about senior project collaboration for future students.

## Project Collaboration

This is a place for Cal Poly students to collaborate with one another on senior projects that have been pre-approved by each individual's advisor in order to guarantee senior project credit to each participant. No pre-approval means no credit. By incorporating cross-disciplinary communication and project collaboration, students will be able to combine their abilities to create a project that will impact more than just their grade, but potentially benefit others around them as well.

## Who We Are

Poly Projects is a network of Cal Poly students who are looking to collaborate or search for a senior project, or work with other students on independant projects. Poly Project's goal is to bring students together to ensure that they have the knowledge and resources from other students to create and finish a senior project or innovative project successfully. Poly Projects is designed to incorporate all majors between and within colleges for individuals to either find a collaboration partner(s), or as a search site for Cal Poly students to find other students who need assistance with independent projects. With a focus on student success, Poly Projects is *the* place for Cal Poly students to get involved in projects around campus; for senior project collaboration, class credit, portfolio building, résumé boosting, payment, volunteer work, or any other type of incentive. Poly Projects is uniting all Cal Poly Majors to the forefront of multidisciplinary innovation.

## Student Cooperation

Looking for someone to assist you with a task beyond your capabilities? Want to find a way to expand your resume or portfolio by gaining more hands-on, tangible experience? This is a listing of various tasks and projects that do not guarantee senior project credit, but instead offers a variety of other great incentives, including, but not limited to: resume boosting, portfolio building, monetary compensation, pre-approved class credit from a professor, and/or volunteer work. These incentives are to be worked out between the students privately. Student Cooperation provides students with opportunity to combine their skills and knowledge to gain crucial experience and truly demonstrate Cal Poly's "Learn by Doing" mindset.
