Sometimes the thought of eating another salad seems about as fun as a root canal so my goal was to create meals that are anti-inflammatory, free of common allergens such as wheat, gluten, soy, sugar, corn and casein, and actually fun to eat. I know that sometimes the last thing we want to spend energy on is preparing food so I tried to make most of these simple and easy to prepare so even on our worst days we can eat well. I realize our families, friends, kids don’t live on carrot sticks and green juice so I created recipes that could be satisfying for everyone, minimize cooking time, and hopefully eliminate the need to cook separate meals for yourself! Enjoy! Here is the key: G = gluten  S = soy  Su = sugar C = corn  Ca = casein and W = wheat

(about 8-10 minutes).
3) Add chopped fresh or dried thyme into onion mixture.
4) Stir onions frequently, reduce heat to low and cook slowly for twenty minutes.
5) Remove onion mix from pan and let cool.

Classic dressing Free of G,S,Su,C,Ca and W
- 1/2 cup extra virgin olive oil
- 1/4 cup raw unfiltered apple cider vinegar
- zest and juice of one lemon
- 1-2 cloves garlic or you may substitute half a small shallot
- 1 tsp dried Italian or herbs de Province herb mix
- Himalayan salt to taste

You may make this dressing in a blender/food processor or in the bottom of a deep bowl.

To prepare in a blender:
1) Zest and juice one lemon, peel garlic clove, and pour apple cider vinegar all into the blender.
2) Add herbs and salt and blend until herbs are broken up into fine bits and garlic is minced.
3) Add olive oil and blend to a smooth consistency.

To prepare in a bowl:
Repeat steps one and two into the bottom of a bowl. Make sure to finely mince the garlic.
Slowly whisk in olive oil.

For a thicker consistency you may add more olive oil. For a thinner consistency or a marinade you may add more acid (lemon juice or vinegar) and extra garlic!

**Variations:** Many lymies have a sensitivity to citrus – in this case simply omit the citrus and the dressing will still taste great. You may also add a handful of fresh basil and or parsley for a burst of flavor. Instead of olive oil, try substituting high lignan flax oil or hemp oil for more omega 3s.
Try adding a cup of either soaked or toasted nuts to this mix for a delicious pesto.
Mix the classic dressing recipe with fresh basil – add chopped cilantro, the juice of one more lemon, ½ tsp cumin and ¾ cup raw sesame tahini for a smoky shrimp marinade.

**“Say Cheese”**
- 1/2 cup tahini
- 1 cup soaked brazil nuts
- 1/4 cup sesame seeds
- 1 bulb roasted garlic
- juice and zest of 1 lemon
- 1/2 tsp dry mustard
- 1/2 tsp onion powder
- 1/2 tsp sea salt

1) In a food processor or blender combine all ingredients and puree
2) Add several tsp water to thin as desired
**Raw Seed Mash** - It’s like a seedy hummus dip and it should be energizing. I use it like a condiment - you can put it on everything, is a good source of calories and it keeps in the fridge 4-5 days or you can freeze it. Basically you make a vinaigrette, and blend it with the soaked seeds to desired consistency.

- 3 cloves garlic
- juice and zest of 2 lemons
- sea salt
- splash raw apple cider vinegar
- olive or flax oil
- sunflower, sesame and flax seeds

1) Soak 1 cup raw sunflower seeds and 1 cup sesame seeds in filtered water for 1 hour or overnight.
2) In a blender pulse raw garlic, lemon juice and zest, sea salt and any other seasonings you like with a splash of apple cider vinegar and as much olive oil/flax as you like.
3) Drain and rinse seeds and add to mixture in blender.
4) Add ground flax seed and puree to desired consistency.

- It contains inulin - food for the health promoting friendly bacteria in our gut
- It is a good source of vitamin K,C,B and A, tryptophan and folate.
Better than Oatmeal:
- 1/2 cup quinoa
- 1 cup water
- frozen strawberries
- mixed berries frozen or fresh
- toasted nuts of your choice (I like walnuts - buy raw in bulk and toast at 350 in the oven for about 12 minutes)
- 1/2 tsp cinnamon plus a pinch of nutmeg (or just use pumpkin pie spice)
- dollop plain sheep’s milk yogurt

Quinoa takes about 10-15 minutes to cook so if you are usually in a rush in the morning just make it the night before - it stores well and you can reheat it in 5 minutes the next day.
1) Place quinoa and water in a pot and bring to a boil.
2) As soon as it boils, adjust the heat to low and let simmer 10-15 minutes.
3) In a separate pot heat strawberries with cinnamon on medium and puree or mash with a fork until a liquefied sauce is made.
4) Place quinoa in a bowl and mix in the strawberry sauce. Top with other fruit, nuts and yogurt.

Variation: Layer ingredients in a parfait glass and shave some 100% dark chocolate over the top for added decadence!
If you love oatmeal like I do check out Bob’s Redmill Farm gluten free oats and substitute them for the quinoa.

**Spring Salads:** If you’ve got Lyme, chances are salad has become your new best friend…or enemy depending. If you and your salad can learn to get along, it will go a long way help cleanse and balance your system.

**The Inevitable green drink** Free of G,S,Su,C,Ca and W
Our poor livers bear the brunt of detoxifying the Lyme critters from our system and must soldier on around the clock.
I’m not going to pretend that this drink tastes pretty…because it doesn’t, but it is a gentle way bathe your body in nutrients and your liver will thank you!
- 1 large beet and its greens
- 2 medium carrots
- ½ bunch dandelion greens, rinsed
- 2 cucumbers
- 1 lemon with the rind
- 1 tbs wheat grass powder (you can find this on vitacost)

1) Chop all ingredients and place into a juicer in batches.
2) Add powdered wheat grass to the juice and drink immediatly.

-Dandelion repairs liver function and increases the flow of bile helping our bodies detox the Lyme sludge.
-Carrots have antimicrobial properties.
-Beets are rich in antioxidants that produce glutathione and act as body guards for our liver. They also contain betaine which fights inflammation.
-Cucumber eases water retention.
-Lemons possess antibacterial properties and support the liver.
-Wheat grass contains high amounts of chlorophyll and has an alkalizing effect on our bodies (disease cannot thrive in an alkaline environment). The human body can easily transform chlorophyll into haemoglobin improving red blood cell count and increasing the transport of oxygen throughout the system.
