The library partnered with Campus Dining to replace aging carpeting. This project included shifting all existing furniture to best take advantage of library spaces. Since this endeavor was completed, there has been a noticeable increase in foot traffic and student satisfaction. The library is currently working on additional renovations to the area.

**Outcomes:**
- Enhanced foot traffic and happy studiers!
- Increased awareness ofCal Poly.
- Logo contest was held, and a Kennedy Library Science Café logo was selected.
- In order to foster inclusiveness for the entire Cal Poly community, the library has developed a program for community participation and engagement.

**Lessons learned:**
- To promote campus participation and engagement, the library partnered with several non-academic campus entities that we had never worked with before. Participation in the Science Café has been successful because of the interdisciplinary nature of the program.
- Successful programs have the following features: (1) they are interdisciplinary; (2) they are inclusive; and 4) to create opportunities for student participation. The Café supports university-wide initiatives and programs that encourage interdisciplinary interpretation of the word "science."
