

THE POLYGRAM

Volume XI

SAN LUIS OBISPO, APRIL 22, 1926.

No. 12

Letter From Alumni

Los Angeles, Cal., April 12, 1926
Mr. Ben R. Crandall, President; Margaret H. Chase, Vice-President; California Polytechnic School, San Luis Obispo, California.

Dear Sir and Madam: I was directed by those assembled at the Polytechnic reunion dinner in Los Angeles, Saturday evening, April 10th, to convey to you the greetings and best wishes of those present and to assure you of our desire to cooperate with you in every way possible to the end that Polytechnic may better function in the service of education.

We desire to place in the library at the present time a book, suitably inscribed, of technical nature which will be of genuine service to the students in their work and we ask that you give us some suggestions in order that we may properly select such a book.

Our dinner was attended by about fifty, of whom five were former instructors and about thirty five were alumni. I will forward to you in the near future a complete roster of those present, with their addresses, and in return I would like to have you send me such names and addresses as you may have of Poly alumni in Southern California.

H. H. Cox,
Sec'y. C. P. S. Alumni of So. Cal.

Editor's note: I am sure a book of this kind would be greatly appreciated by the student body.

Seniors Win Rifle Shoot

The Senior rifle team was the winner of the inter-class rifle shoot. Elven Hansen did especially well with a score of 97. He made the best score of any of the classes, making him the winner of the medal. Anholm, another senior, made a fine score of 96.

The Senior rifle team was made up of Hansen, Anholm, Reed, Louis, H. Ferry, W. Miller, and C. Davis.

The Senior score was 624; Sophomores, 479; Freshmen, 466; and the Juniors, 436.

The Jolly Speakers Picnic

Last Wednesday afternoon the members of the Jolly Speakers lived up to their name. Armed with wienies, buns, ice cream, and pie, they journeyed up Poly Canyon for a showdown. Soon after they had settled down in the desired spot, the air began to be scented with the smell of wienies and coffee. While they were enjoying the hot puppies, a cowboy of yesterday came upon the scene. After an exchange of a series of hot words between the jolly speakers and the mad cowboy, they were left alone again. However, he left words which, when interpreted into English, meant for them to get off of his premises.

They could not take heed immediately because of the fact that supper was being served. During the slaughter of the hot dogs, everyone, including the chaperon, was trying to learn the latest dance creation, the "St. Louis Hop." By the time the third hot wienie had been put to bed, everybody was doing it; and then the fun began.

When the mirth was at its height, the fifth member of the four horsemen appeared again armed with lock and chain. The fastest cleanup committee on record then went into action. For a little ways down the road was a gate that was about to receive the present of his lock and chain. After that episode was finished the party moved to the field adjoining the horse barns.

Attention!

We would like to call the attention of the student body once more to the scholarships which are available here. From now on everyone will be receiving inquiries concerning the school and will have opportunities to talk it up to their friends who may be interested in entering. Don't forget to tell of the seven scholarships which are given. Although you may not be interested in them, to some one else they may mean a way of getting a better education than they had hoped for. Some of the scholarships have been spoken for already by boys that see in them a great chance.

Aviation Plans Made

Within a week equipment will be installed here at school for the teaching of the fundamental mechanics of aviation. This work will offer a practically unlimited field to the boys who wish to enter it.

Because of the great growing need of mechanics in the aviation world the administration of the school has deemed it advisable to install a course to fill that need here at school. This is one of the first schools in the state and nation to offer work along this line.

In accordance with the policy adopted by the school three aeroplane motors have been secured and will arrive shortly. There is to be a large De Havolin motor and two of the Liberty type. If all plans carry the school will have its own plane before next Christmas. A landing field will be arranged for back of the shops. Mr. Warren, our instructor in auto shop is himself a stunt flier and is greatly interested in aviation. He will have charge of the course and there will probably be another teacher added to the faculty to assist him in the work.

The installation of the course is a result of the extension work done in all parts of the state by Mr. Tennant. Numerous enquiries for work in this course have been received from all parts of the state. From the present correspondence it seems that aviation and electricity will be the most popular courses here in the future.

The great opportunities in this line lie in the fact that both the government and commercial interests are building more and more planes and growing so rapidly that at present there is little or no attention being paid to training mechanics. A well known stunt flier of Southern California made the statement that too many aviators are learning to fly without a working knowledge of their planes. He confessed that, although he is considered an expert in aviation fields, should he be forced to make a safety landing, after making it he would be helpless as far as repairing his plane. He also said that if the course was installed, he would be most anxious to come up here and take it.

So tell your friends about this new opportunity. "The sky's the limit" so let's go.

Separator Given

The Agriculture department is the recipient of a fine motor-driven separator which is the product and gift of the California Hydraulic Engineering Company. The machine is one that is well thought of by all the leading dairies and agriculturists in the state. It will not be just a display machine but will be installed in the dairy for use within a short time.

Play to be Given

On May 11 the school will present its annual play at the Elmo Theater. The play chosen for this year is "Adam and Eva" a very clever comedy by Guy Bolton and George Middleton. Plans are rapidly going forward for the successful production of the play.

The story of the play is that of a very wealthy business manager who is worried to distraction by his family of parasites. His South American business manager, who has a very high ideal of family life, arrives upon the scene and decides to take matters and Mr. King's family into his own hands. With the aid of Dr. Delameter who is finding Mr. King less agreeable about paying bills, he sends Mr. King off to South America for his health. Then Adami, the business manager, breaks the news to the family that Mr. King has failed and that they are without a cent.

Many amusing lines are given to the efforts of the family to secure work. They finally find work and happiness on a farm raising chickens and beans. By his plan Adam saves Eva, Mr. King's daughter, from such fortune-hunters as Lord Andrew and Dr. Delameter and proceeds to fall in love with her himself.

Ervin MacMillan in the part of Mr. King, will play a part similar to that he took in the operetta and from his excellent work there we may expect a great deal of him.

Wilbur Miller, in playing the part of Adam, has lots to do in the play but from past experience we know that he may be trusted to put it over successfully.

Mary Hughes in the part of Eva has a chance to do some very good acting and will be sure.

Ruth Smith as Julie, Mr. King's second daughter, plays the part of a socially inclined young woman and will play the part with credit.

Jack Babcock as Clinton DeWitt, the husband of Julie, will again have a chance to show us what he can do.

Chester Davis as Dr. Delameter will play a very interesting part and will undoubtedly do it very successfully.

Whirley Dinning will play the part of Aunt Abbie who is supposed to be Mr. King's housekeeper but who is so interested in social service work that she is but another burden to the poor man.

Grace Sterling will play Corintha and in the part of the tender-hearted little maid will do very well.

Walter Horace, the bachelor relation who came to spend a week-end and stayed eleven years, will be played by Harold Miller and promises to add mirth to the play.

Burt Harris will take the part of Lord Andrew, the Scotch lord who is interested in Eva's millions. You all know Burt so can expect a great deal. Committees on stage and advertising have been appointed and are doing their part to put the play over. When the time comes everyone turn out and help by selling tickets and this can be made even more successful than the operetta.

Dr. Crandall Goes South

Dr. Crandall left Monday to attend the annual convention of Principals in Pasadena. He will be absent the entire week. Dr. Crandall is on the program for a talk both at Pasadena and at the Santa Barbara State teachers College on his return home. While in Santa Barbara he will talk on the industrial phase of education.

Keep Off The Lawn

It is surprising to note the number of students who remember to ignore Dr. Crandall's request for them to stay off the lawn in front of the Ad. Building.

Students, wake up. That lawn was planted there to beautify the school and it is your duty to stay off of it and give it a chance to be beautiful.

If you will notice around the edges the grass is nearly all walked off where students have been too lazy to walk around and just cut across to save a few steps.

The next time you start to walk across the lawn remember about Dr. Crandall's request and walk around instead. The exercise will do you good and you won't miss the small amount of shoe leather worn off.

Miss Jordan Ill

It is with regret that we write of the illness of Miss Hope Jordan, instructor of mathematics and hygiene.

Miss Jordan was taken ill the last week of school and left here Friday afternoon for the Children's Hospital in San Francisco where she was operated on, the following Wednesday. She is improving rapidly and expects to return next Sunday. She will resume her duties at school as soon as her health safely permits.

Miss Chase left Friday afternoon for a week-end visit with Miss Jordan.

Mr. R. B. Sherman of New York is taking charge of all of Miss Jordan's classes during her absence. Mr. Sherman has had a wide experience in high school mathematics science and engineering and we are fortunate in securing his services.

May Day Picnic Plans

The Students Affairs Committee recently met and discussed plans for our annual May Day picnic. There was some doubt as to our being able to have it due to the many other interruptions the school work has suffered from this year.

It was finally decided to have it on Friday, April 30 after having the four periods of classes. This plan was decided upon in preference to having it upon a Saturday.

The location has not been selected as yet but committees will soon be appointed to handle location, transportation, entertainment and refreshments.

Aerial Conference Held

Of direct bearing and interest to the new work being installed here is an aerial conference which will be held in Los Angeles on April 30 and May 1.

At the conference there will be gathered bankers, manufacturers and business men of all types to discuss the establishment and maintenance of commercial landing fields. Central locations, service stations, shops, hangers, etc. will be points of discussion at the meeting.

There is to be established air service between San Diego and Seattle. The town and our school are ideally situated for a regular landing place. The town is centrally located between San Francisco and Los Angeles and it is quite possible that a field will be placed next to our own field in order to secure the advantages of the various shops for repair work.

Have you got the golden fleece?
No, do they bite?

Respecting School Property

Should school property be respected? I don't think there is a doubt in any one's mind what the answer is. We all know that something that is made for use is not to be destroyed. Then why do we unwittingly mar and ruin property that really means a great deal to us, more than we can fully realize at present?

Why were schools built? Of course we know that they were built for the education of the younger generation.

Why does the younger generation need an education? Because if they were not educated the whole country would deteriorate and all the other nations would overrule us. Now, just stop to think a minute what that would mean. It means that we would not be considered capable of making our own laws, therefore some one else would make them for us, which is not a thing any true American would stand for. We would not be the strong, happy, carefree, healthy nation we are to-day.

It probably enters your mind now, what has this to do with respecting school property? It has just this: if we take care not to destroy the desks, chairs, tables and walls of our school, there will be less money needed for repairs, and new furnishings. This money can then be spent for a new school, for the purpose of educating some people that do not already have the opportunity, or else it can be used to improve the advantages of your school. We all want our school to appear it's best, so it will be respected by other schools and make others want to come to our school, thus increasing its standing in the outside world.

I am sure we are all of the opinion that we need schools, and need good ones, so let's each one of us try not to be as thoughtless in the future as we have been in the past, and preserve our school property. L. S.

Courtesy

How many know the correct meaning of courtesy? Courtesy means civility, good breeding, politeness. Therefore one who is courteous should be civil to his fellow beings, should respect their wishes and consider them at all times.

One who is well-bred and courteous always does his utmost to be kind and respectful to his companions. For instance, when he meets a stranger instead of drawing away, and ridiculing him he shows his every effort to make that stranger feel at his ease.

Politeness—too many are unaware that politeness should be used every day and in the most common events that take place. Too many want to pack their politeness away and just use it on special occasions or on certain people. This is ridiculous and if every one would observe the meaning of courtesy we would all be much happier. P. F.

Poly's Campus

Poly's campus is one of the most beautifully located campuses in the state, situated in the valley of wonderful, picturesque ranges of coast mountains. The cool sea breeze that blows over the campus from the great Pacific Ocean, a few miles to the west, is most invigorating. The main buildings are located on the tops of the rolling hills throughout the campus, overlooking the progressive city of San Luis Obispo. The Southern Pacific Rail Road running by the campus, adds to its attractiveness. Travelers passing by on the trains are amazed by their first impression of this great institution. The beautiful green fields

POLY CHATTER

Al Hedstrom says that they didn't play fair with him. He says they should have notified him two years ago, so he could have a mustache and sideburns raised, for the Fiesta.

It is rumored that two aspiring Poly "necker" went to the Emerson school grounds with two of the fair sex. The two lights on the grounds were extinguished by the two Romeos and darkness reigned supreme. Suddenly someone appeared on the scene and the party broke up immediately. Ask Larry Henry and Glen Charles for further particulars.

Bill Lee is going wrong again. For further information see Hank's sister.

Dan Wright is up to his old tricks again. He was seen at Ellen Margaret's. What does he do there?

Jacobson says women are the ruination of him. They had to lift him into the car to get him back to Poly.

The dog of San Roque, Of tail. He hasn't a bit. Because Raymond Ramorus From him has stolen it.

A few days ago Avalyn Schlicht had a very close call by sliding off a hay wagon and falling on the ground with a thump and sprawling out in a critical position. There is a little more to it but you'll have to ask her that.

Spindola has another Leaping Lena to his credit, bought it because it had a carburetor and multi-lifts on it.

In English I Larry Henry can't be himself. Why! Because he comes from Long Beach where they can't help themselves.

The new math teacher is making strong physques out of the boys and girls in class by giving them the air.

Avalyn Schlicht wishes that some of the Dorm boys who saw her miss her footing when getting off of a hay wagon would keep it to themselves.

We wonder why Harriet Wright was unable to attend English Wednesday.

What's happened to Little Willie Lee? What was going on in front of the Dorm Sunday P. M.? Where is Mary? What's the matter, Mary? You shouldn't allow such things.

Where did Thornton Lee go when he was in Arroyo Grande? What store did he raid?

Anabelle is her name. Further particulars, ask Sparks.

Why is it that Roy Bradley never goes anywhere? We hear he is a married man. Is it that brunette in Escondido?

with the patches of evergreen trees show the wonders of nature. Around the main buildings are plants and flowers of almost every description. The campus is not without its country feature of creeks, for, throughout the campus many springs add to its beauty. There are a few days in the year when you will find a disagreeable day on the campus, in climate of spirit. The days are all June days with a cool breeze that is just enough to inject into every mind a happy thought and vigor. F. L.

Dorm Doings

Lutsow is now known as a "false alarm." How come? Did some girl give him that handle?

There seems to be quite a vogue about the dorm. Several of the boys wear jewelry belonging to the fair sex. Boys, let's be boys.

Shortly after Easter Spindola acquired a Ford roadster. The Ford looks like his old one but does not run as well.

Spear, our shiek from Long Beach, has quit school and is now employed down town.

On Tuesday evening, March 28, Dr. and Mrs. B. R. Crandall entertained the band boys after band practice. When band practice was nearly over the boys were invited over to their home for hot chocolate. When they arrived they were treated to hot chocolate, two kinds of cake, and fudge. Afterwards the boys enjoyed playing different games. Some of the boys played their musical instruments which was enjoyed by all. The party adjourned after the lights went out in the Dorm.

Some time ago there was in this paper a mention of the Dorm Club giving a Jinx. Frank Quinones and Orvis Hotchkiss were put in charge. Owing to the lack of interest there will be no Jinx this year.

You should see little Al Hedstrom in his baloon overalls.

During the Easter vacation most of the boys went home. Some of the less fortunate stayed here. On account of the stormy weather most of the week was spent in reading or playing pool.

When the explosion occurred at the tank farm during vacation Jeppeson said the wall of the Dining Hall came in a foot and then went back out again. Mustn't eat so much Jap or you will have nightmares more often.

What was the great excitement at the girls' interclass basketball game? Ynes B. can furnish you with any information you want to know in regard to it.

Larry Henry can sure "throw a great line," but is there any girl that is dumb enough to bite? Well, one poor fish did.

Glenn Charles, Larry Henry, Charles Demarest and Lewis Thorpe had quite a time while visiting in Los Angeles. Their favorite pastime was visiting some of the sorority houses near Glenn's home. From reports, they gave a party while there and had a very sociable evening.

New Preacher: Say little boy, do you know where the boys go when they fish on Sunday? Wilbur Miller: Betcher life I do! Down back of the old sawmill.

Mother: Why in the world are you feeding the baby yeast? Thorpe: She's just swallowed my dime and I'm trying to raise the dough.

Larry Henry and Bernice H. seem to be the latest pair to become well acquainted. They have been seeing each other quite frequently.

Charles Demarist is now having quite a time with all his co-eds. He has to carry battle axes around with him to fight them off. The question is, which will win "Charlie the boy?"

What is all this about "taking the air?" We hear that quite a number of students have had to take to it.

We wonder why Wilbur Griffith wanted to see Ynes H. in the dark room. Look out, Andy.

Another nut came off of Fernando Alba's Ford cut-down. Edward Schmidt was trying to play an ukelele on back of the ford while Fernando was going around a corner. Schmidt fell off and was knocked cooco. He's still in the same condition.

Arroyo Grande Hi vs. Poly

Wednesday afternoon the Baseball team motored over to Arroyo Grande. As the visiting team had their choice we took our outs. The battery was Isola and Harper. Sparks held down first, Montano played second, and Baxter third, while Graves held down the short stop's position. In the out field there were Zinoll left, Reed center, and Traver right.

The game started out with a bang. Arroyo played a very good game up to the end of the third inning when the pitcher went in the air.

In the first inning Rogers hit safely for Arroyo Grande. Beat flew out to Traver. Then Patchet hit safely, stole second while Rogers was on third. It was fielded clean by Baxter, making a fine one hand stop, who threw it to Isola to stop the man from going home. Isola made a bad error allowing Rogers to come home.

Graves hit to center, stole second. Baxter hit safely. Montano hit to the infield forcing Graves at third. Baxter was also forced at third. Sparks got on base by errors and Montano came home.

Second inning. After Harper struck out the first two Oliver made a two base hit. Rogers followed with a single. Beat hit to Reed who had an easy out but fumbled the ball, allowing it to go over his head, allowing two runs to be scored for Arroyo.

Poly scored one more run. Traver got on base by errors followed by Harper's hit.

Third inning. Arroyo failed to score thereafter. Harper was relieved in the fifth inning by Lee, who walked two men, allowed one to hit, but they made no score.

Poly scored two in the third inning. Montano getting on base through error followed by a slashing hit through right field by Sparks for a home run.

Fourth inning. Poly scored four more runs through a series of errors, bases on balls and hits by Montano, Isola and Harper.

In the fifth, Poly scored again through a series of errors by Arroyo. In this inning Lee knocked one of the longest drives ever known on Arroyo's field.

Sixth. After Zinoll struck out, Traver hit, Lee hit by pitched ball, Graves scored both with a two bagger. Baxter on base through error, Pickard wound up the game with what looked like a single to Center field, but Rogers made a nice one handed catch that brought the game to a close.

Box Score—

Arroyo Grande	A.	B.	R.	H.	O.	A.	E.
Rodgers cf	3	2	2	1	0	0	0
Beat 2b	4	0	0	1	1	0	0

Total	32	15	11	21	5	4	0

SPORT BRIEFS

Stanford won the big track meet against California last Saturday by the score of 69-62. Several coast records were broken during the meet by both teams. Stanford had the edge on the meet but with only the broad jump and relay left, she needed both first places to win.

The track team of the San Jose State Teachers College defeated the Fresno State team last Saturday by the score of 71-51. San Jose has one of the best track teams in our conference. She beat St. Mary's and won the conference meet at Santa Barbara. Jess Regill whom we met during basketball and football, is also their star track man.

The local high school lost a baseball game last week to the grammar school "Trojans." These lads are developing a good team. They have won all of their games this year.

Poly Loses to Paso Robles

Poly's baseball team lost its first game this year to Paso Robles by the score of 11 to 4. The players seemed to lack pep and seemed to be lost without Lee in the box.

Quite a number of errors were chalked up against both teams. Another thing that was lacking was any ability to connect with the ball. None of the players seemed to be in their regular stride and for some reason they had lost their batting eye.

Traver was the hero of the day. He was the only one who made a home run. Pete pitched a fairly good game, striking out four men. Harper did good in the box. He struck out three men.

Paso Robles seems to have a good baseball team this year. They will probably win the county high school championship.

Poly's lineup is as follows: Baxter, 3 b; Pickard, 2 b; Traver, rf, and p; Sparks, 1 b; Reed, cf; Harper, p; Charles, rf; Isola, c; Zanolli, lf; Montano, ss; Gingg, ss.

Babcock's Car Burns

Jack Babcock was the loser in an early morning fire at the Creamery. The fire was discovered about 2:30 a.m. Wednesday. Capt. Deuel was notified and all six of the fire extinguishers were gathered and the fire put out within an hour.

The origin of the fire was probably due to ignition troubles as the car had been standing nearly three hours.

Score by innings—
 Arroyo 1 2 0 0 0 0 0—8
 Poly 1 1 2 4 3 2 0—13
 Summary: Two base hits—Oliver, Graves, Lee. Home runs—Sparks. Bases on balls off Harper, 0, off Lee 2, off Loomis 4. Struck out by Harper, 3; by Lee 3, by Loomis 5. Stolen bases, Patchet, Williams, Montano, Sparks, 2, Traver, Reed, Isola, 2.
 Umpires: Pearl and Langenbeck.

Poly Swamps Local High

Poly's baseball team swamped the local high school before vacation to the tune of 33 to 4. Poly had no trouble at all in walloping the High baseball team who hardly seemed to know they were playing baseball.

Harper did some good pitching for Poly and fanned a number out. Lee replaced Harper and showed up to good advantage. Several Poly fellows succeeded in lamming out home runs and scoring whenever they wanted to.

The High School started out with one pitcher, but before the game was over they had used every one on the team as a pitcher, but none of them were able to keep Poly from making run after run.

Poly's and High School's lineups were as follows:

POLY	HIGH
Isola.....C.....	Melohn
Harper.....P.....	Throop
Charles.....1st.....	Adams
Pickard.....2nd.....	Righetti
Baxter.....3rd.....	Willet
Graves.....S.S.....	Daniel
Zanolli.....L.F.....	Bruce
Reed.....R.F.....	Carver
Traver.....C.F.....	Cager
