## **NANA'S HANDS**

They say you can tell a lot about a person by looking at their hands. In my nana's hands, I see her unwavering faith. I see the love she had for my grandfather in her wedding band.

In every line and crease, I see strength and wisdom from a woman who has overcome all the trials and tribulations life has thrown at her. Her name is Amelia Sarinana and she is 94 years old.

## **FACE TO FACE**

Prosopagnosia is a neurological condition characterized by the inability to recognize the faces of familiar people, ranging from family members to your own reflection. Millions of people across the world including popular portrait artist Chuck Close live with this disorder. Through a mix of photography and drawing, I strive to capture the feeling of living in a world of strangers.

"A face is a road map of someone's life. Without any need to amplify that or draw attention to it, there's a great deal that's communicated about who this person is and what their life experiences have been." - Chuck Close
