

POLY ROYAL PRINCESSES . . . . . Lovely Eva Brebes, Louise Kirk, Jo Ann Martinsen, and Carolyn Walte, left to right, have been selected as Princesses of the Fifteenth Annual Poly Royal.

## Four S. L. O. Girls Chosen As Poly Royal Princesses

Milton Brown, general superintendent of the Fifteenth Annual Poly Royal, announced today that Princesses for this year's "country fair on a college campus" had been selected by the local high school and junior college. As Poly is non-co-ed, an invitation is sent each year to one of the state colleges to select one of its co-eds to reign as Queen over the two-day festival. At the same time an invitation is sent to the local high school and junior college to select four co-eds as Princesses of the Poly Royal.

This year two co-eds were selected from the Junior College and two from the Senior class of the high school.

The Associated Women Students of the Junior College nominated ten girls and from this group their student body elected the two girls to become Princesses at the Poly "open house." Selected this year were 18 year old Eva Brebes, art science major.

The Senior class of the SLO high school selected two co-eds from their feminine students by having each Senior officer nominate, and Louise Kirk, social ate four girls and then having the Senior class vote on this group, the two girls with the largest votes be-

coming the Princesses. Carolyn Walte, 18 year old music major, and Jo Ann Martinsen, 17 year old Senior also majoring in music, were selected from the Senior class as Princesses for this year's Poly Royal.

## A.C. Club Plans For Field Trips

By Robert F. King

Top subject matter at the last A. C. meeting was the field trips which will take place in the near future.

The first field trip that will be taken after final will be the one to Fresno where the A. C. club members will go through several of the large refrigeration companies there and also see the air conditioning system of one of the larger hotels in Fresno.

The second trip that will be made will be the one to Los Angeles where the members of the class will go through factories such as Carrier, York, and many other large air conditioning factories. This trip will require at least three or four days.

There will be an air conditioning club party the first Sunday following final exams; this party will also be for the initiating of five new members into the club.

The test and measurement class of Jim McGrath has been running experiments on fuel at different altitudes and also tests on the dehydration unit to figure the amount of moisture that the silica gel dryer will remove and the efficiency of this unit at different temperatures.

The sheet metal shop will be moved from the rear end of the A. C. Lab to the new unit outside of the laboratory.

## Up and Down; Poly Skiers Vie With Tricky Slopes

A week-end in the snow was enjoyed recently by ten members of the Ski Club. Leaving Poly last Friday evening, these enthusiasts traveled by car to the Badger Pass winter sports area.

The snow was in fair shape, although it stormed all day Saturday and the skiers left many a beautiful "slits-mark." None-the-less, it did not dampen the interest, and the members were able to participate further with their skiing when the weather cleared Sunday.

Several members are planning trips between quarters to Badger Pass, Sugar Bowl, and Lassen sports areas and are anticipating some excellent skiing.

As yet the club has not been able to enter any competitive skiing, but by next year members hope to field a team for down-hill and slalom racing.

## McAdams Is Soph President

The Sophomore class held its organizational meeting last Thursday night. At that meeting, class officers were elected and plans started for participation in extra-curricular activities. Leon McAdams was elected as prexy of the class. Jim English was elected vice-president and Ted Haskell was elected secretary. English was made SAC representative in addition to his other duties as vice-president. Dick Williams was appointed to handle the class write up in El Rodeo.

Norman Sharpe, class advisor, presented to the class several ideas concerning activities for the class including the possibility of athletic competition between classes.

The next meeting for the class is tentatively scheduled for March 25. All sophomores are urged to attend this meeting.

## Instructions For Vets Changing Curricula

On February 13, 1947, a notice was posted to the effect that any veteran enrolled under Public Law 346 must clear through the Veterans Administration Office and receive permission to change his major curriculum or level of instruction.

The Veterans Administration has now ruled that the recommendation of the California Polytechnic School through the department heads involved will be accepted in cases where a Public Law 346 veteran wishes to change his major curriculum or his level of instruction, except where such change is made as a result of the student having received sufficient failing grades to prompt him to make the change. In all cases where the changes mentioned above are made as a result of failing grades, the Public Law 346 veteran must obtain permission from the Veterans Administration Training Officer.

The information above does not apply in any way to veterans enrolled under Public Law 16.

## Edward Kennedy Addresses Poly Press Club Meeting

By R. W. Saunders

Edward Kennedy, famed journalist and foreign correspondent, was the honored guest at the Poly Press club meeting held last Monday evening in the Gameda Tea Room. Kennedy gave an informal talk on foreign affairs and answered many questions from the members of the club.

Kennedy, who is now with the Santa Barbara News Press, was for ten years a correspondent for the Associated Press in Europe, and was widely publicized when he scooped the world by releasing the VE Day news prior to the scheduled time.

When asked how he was able to by-pass the censors in releasing the story, Kennedy stated, "I simply picked up the telephone." He then explained that for some time he had known of a direct telephone line to London, and as the VE Day news was being held for purely political reasons, in violation to an agreement between the news services and the Allied governments, he considered it his duty to release the news. Kennedy was later cleared of all charges made against him, and was reinstated as a correspondent.

The press club was also honored at the dinner meeting with the presence of President J. A. McPhoe.

Prior to Kennedy's talk, a short business meeting was held in which the club adopted a new constitution and reinstated the temporary officers for the remainder of the school year. These officers are: John Patterson, president; Lawrence Rossi, vice-president; Paul Madge, secretary; Kent Freeman, treasurer; and Robert Saunders, publicity manager.

Other business discussed at the meeting was the national Red Cross drive, and plans for the coming Poly Royal.

Also attending the meeting were R. E. Kennedy, and "Bert" Fellows, who are the club advisors, and twenty-nine members of the club.

### IMPORTANT NOTICE

No more credit sales to either veterans under Federal Laws (No. 346 or 16), or men under any of the state laws after 12:00 noon, Wednesday through March 17.

## FINAL EXAMS and REGISTRATION

The entire Final Examination schedule and registration procedures are on page 6.

### STUDENTS SHOULD ALTER DIRECTORY CARDS

Students who have made program changes during the Winter quarter and who have failed to go to the Information Booth, Administration Building, to have their directory card corrected should do so immediately.

Many calls are received for students who cannot be located because they have not kept the people at the Information Booth informed as to program changes made. Students should assume the responsibility of seeing that their directory cards at the Information Booth and in the Recorder's office are accurate.

## Chicken Fry for Feather Merchants

The Poultry club's annual chicken fry will be a cause to which many fryers at the plant will dedicate their lives, and will be served to members of the Poultry club and their guests at the No. 1 Cafeteria on the evening of March 8, at 6:30 p.m.

This has always been one of the bright spots on the Poultry club calendar, as it leaves to the discretion of the individual how much chicken he can consume. Plans for the decorations have nearly been completed and it promises to be a colorful affair.

Dick Leach, head of the Poultry department, who has recently recovered from an operation undergone here in San Luis Obispo, will be there to greet the members of the Poultry club, who have not seen him since the start of the quarter.

### HISTORY TEST

The state test in history and government will be given on March 20. In order to take this test a student must have successfully completed both U. S. History and American Government.

If a grade on the test is desired a self-addressed postcard must be left with the person giving the examination. The grade will then be mailed to the student after the test has been corrected.

## Steiner Handles Police and Fire Control

Ernest A. Steiner, Poly's security officer, took over duties of police and fire protection supervision on the campus this week. He announced that plans are being put into immediate effect to eliminate some of the dangerous driving practices which some students use on the college grounds.

Steiner, recently released from the Navy with the rank of Lt. Commander USNR, saw active duty in Africa, Sicily, and the Salerno invasion. He also served as security officer, fire protection officer, safety officer, harbor fire marshal, and as an instructor in fire protection training under Bureau of Ships. In the latter capacity he supervised the training of 30,000 men and officers in fire protection.

He is a veteran of both wars, having served in the Marine Corps during the first World War, and is a retired fire department instructor of the Long Beach Fire Department.

Steiner stated that his plans were to do everything possible to promote the safety of students, and to prevent loss of life and property on the campus. In addition to his duties as security officer he will instruct classes in fire prevention, accident

prevention and safety. He said that in this dual role he felt he could do a great deal to eliminate the causes for actual police work on the campus, and would also be able to give worthwhile instruction in the elimination of fire hazards and fire damage.

His program for traffic control and allied problems on the campus depends primarily on the co-operation of the entire student body. He emphasized that he would try to accomplish his tasks with a minimum amount of regulations, and that such regulations as are needed for the protection and general welfare of the student body would be fostered by the students themselves.

One of his first requests was for volunteers to act on a fire crew. He asked that anyone who is interested in this job to contact him at his office in the warehouse building. He also plans to form auxiliary fire protection crews in each living unit as soon as is possible.

Steiner is married and has two children. He said that his principal hobbies were rebuilding radios and instructing first aid classes. He hopes to inaugurate first aid classes in the future and is in fact a recognized Red Cross First Aid Instructor.

## Hasta la Vista

This is our last issue of the winter quarter. Our next issue will be March 20.

We wish you all the best of luck in the finals and hope that your vacation is a merry one. The staff wants to take criticism and praise that you have given us during the this opportunity to thank all of you readers for both past quarter. *Hasta la vista.*

## Red Cross Drive

March is the month of the national drive of the American Red Cross. This worthy organization has done a great deal of good with contributions made available to it from the nation. The local directors decided that this year they would not have a drive on the campus to collect donations from the students. We feel that this worthy organization still deserves the support of the students at Cal Poly. How about it, fellows? A little goes a long way.

Congratulations to the Students' Wives Club for handling the collection drive at the two local banks. We think the girls deserve a heartfelt thanks for doing a great job.

If any of you have a spare shekel or two that isn't in immediate use, why not invest it with the Red Cross. The price of two big ones at Joe's will buy the penicillin that could save the life of some kid, somewhere.

Donations will be accepted at the chapter office at 991 Osos Street; or the students' wives will be glad to receive your gifts at either bank. Why not drop in this afternoon?

## Campus Safety

This editorial concerns the lives of every student on this campus in a most direct manner. The editor takes this time to say something about safety for several reasons. First, last week we had a serious traffic accident on the campus. The only wonder to the writer is that there haven't been a dozen similar ones earlier in the year. Secondly, California Polytechnic College now has a security officer who has certain plans for our future. In the third place we can't help but feel that perhaps our small protests might sometime help alleviate the bad traffic situation that exists here.

Earnest Steiner, the security officer, plans a drive to eliminate accident causes which centers around the primary objective of teaching the students here that safety pays. Don't misunderstand us, or him. He holds a badge from the Sheriff's office, and is fully empowered to hit repeat or dangerous offenders where it will hurt. Again, he has the backing of the administration. Never-the-less, Steiner says that he feels that best results can be obtained through working with the students.

That is a compliment that the student body ought to do its best to deserve.

We hope hat the students here will do their best to live up to the security officer's expectations. In the process perhaps they will learn that safety pays.

## CHEMIST ATTEMPTS SCIENTIFIC ANALYSIS OF THE FEMININE GENDER . . . ?

Element: Woman.  
 Chemical Symbol: WOE.  
 Accepted Atomic Weight: 120 pounds.

Occurrence: Found wherever men exist. Seldom in the free state. With few exceptions, the combined state is preferred.

Chemical Properties: Very active. Possesses great affinity for gold, silver, platinum and rare stones. Violent reaction when left alone. Possesses ability to absorb great quantities of expensive foods at any time. Sometimes yields to pressure. Turns green when placed beside a better looking specimen.

Ages rapidly. Highly ornamental. Physical Properties: All colors, sizes and forms. Usually found in disguised condition. Boils at nothing and may freeze at anything. However, melts when properly treated. Very bitter if not used well.

Uses: Wide application in the arts of domestic science. Useful as a tonic in the event of sickness, low spirits, overly high spirits, etc. Equalizes the distribution of wealth. Most powerful income reducing agent known. Caution. Explosive!

## DOWN THE MIDDLE

### with YOUR PREXY

At the last SAC meeting, a committee consisting of John E. Jones, student manager, Al Quist, and Leo Rogers was organized to determine the value of student body cards for the next school year. Something interesting should develop from their deductions.

Poly's new security officer took over on March 1, just a few days after a collision occurred on the campus. The results of the accident could have been more drastic, but were bad enough. We have been lucky so far this year in not having had accidents prior to this time. Yes, I'm driving slower too!

E. A. Steiner, security officer, is well qualified in his line, and has some very good ideas on improvements on the campus. As he explained to me this morning, if we don't do something about conditions here on the campus the high-way patrol will, so it's up to the students to back Steiner's safety campaign to be effective.

Congratulations are in order to Dick Lavery and Gus Beek of their fine assembly of last Friday. The program was well received, and showed signs of being well prepared. Archie and Mrs. Stinson upheld my ravings about them by their excellent vocal selections, and Mrs. Kay Morgan surprised more than one student by playing boogey-woogey instead of long hair selections.

Not as an afterthought by any means goes this recognition to Davy and his musicians who start and end all of our assemblies. Without their "spirited" music our assemblies would not be what they are.

## Dear John . . .

Dear Editor:

As a general rule improvements and additions to our school are a welcome asset for my money. However, I believe that the present plans for establishing a department of Aeronautical Design Engineering at Cal Poly can stand some investigation from the student's viewpoint.

A short poll of Aero students has drawn me to conclude that less than 10% of our present students are interested in such a course. Most of the students polled were of the opinion that existing Universities could better meet the needs in this field.

Also a majority of the students feel that improvement of existing facilities would be more desirable than attempting to branch into new fields. The improvements that could be effected are pretty obvious to those in the Aero Department. If such is not the case with the powers that be, I would be glad to furnish them with a committee of men who have been in building, operating and maintaining aircraft for the last six or seven years. This committee can furnish definite constructive criticism for a better Aeronautical Maintenance Engineering course.

## WHAT'S DOIN' - -

## LOOKIN' ON . . .

with GLENN ARTHUR

By the time this issue hits the streets the "P" should have a new coat of whitewash, weather permitting. Maybe I'm being a little optimistic in writing about it now, but I have faith in Bill Othart and his administration of the freshman class. Keep up the good work, Bill, and maybe you'll get more than just a handful at your next meetings.

The road coming into the campus up Hillcrest way is in sad shape. There are a lot of ruts knee-deep to a tall giraffe. There is enough traffic on this "boulevard" to warrant a repair job. If the right person would speak to the county, I think that a little black-top could be diverted in that direction.

One of the biggest improvements we've had around here in a long time, at least to my estimation, is the trimmed palms along California. It not only makes for better appearances but also easier to see any on-coming trains. The wheel turns slowly but keeps turning at any rate.

Last Saturday afternoon three of us were standing on the lawn in front of the dairy barn when a bloke came zooming up the hill passing three cars at once and nearly clipping a white post just below the units. It seems that some guys never learn or never think that they aren't the only people on this earth. Just last week there was a serious accident on the campus, and if such driving keeps up there will be more. I have a car, but never have yet found any need to drive fifty miles an hour from the Aero shop to Hillcrest dorm. So you in the dark blue roadster from Hillcrest, watch your driving.

I'm ashamed to admit it, but I missed the fights last Saturday night, but I have a good excuse—I was job hunting. (As much as I hate to work, I have to start sometime.) Looks like we can't even get a square deal on our home stamping grounds. Have heard rumors to the effect that the first referee couldn't see thru the haze. Tsk, tsak, such a situation. The townspeople I have talked with say these fights were the best they have seen around here in many a day.

I just can't turn this column in without saying something about that basketball game last Saturday night. To put it in a nutshell, it was wonderful. The boys really put out and came home with the bacon. The display of enthusiasm by the students was great. It was a great tribute to a great coach and a real guy, Bob Mott.

This Week's Kettle of Fish goes to whoever censored my column of last week.

... Wait a minute Coach—Look what I've found . . . ! !

## The Ozarks Are the Berries Says Voorhis

"The more strawberries you raise in the Missouri Ozarks, the more kids you have to raise, to raise more strawberries, to raise more kids, to—." Well, anyway, that's what Ralph Voorhis said in his "Fruit Growing in Missouri" lecture to the fruit production club. In addition to describing Missouri fruit growing practices, Ralph told an interesting story of how the immigrants who streamed in from Europe had to be shown the hard way that vinifera grapes couldn't be raised in Missouri. That, they say, is when the expression, "You have to show me, I'm from Missouri," originated.

# Hort Club Announces Plans For Poly Royal Exhibition

By Paul Tritenbach

The Ornamental Horticulture department has completed plans for its Poly Royal display. The Poly Royal committee of the department, after a discussion meeting Monday, announced a three-point program.

First is a general polishing up of the Landscape unit.

This will include reorganizing stock, weeding stock and paths, trimming hedges and shrubs, and cleaning the buildings. A flower arrangement contest will comprise another part of the program. It will be open to all this year, and an expert judge will be selected. A third feature will be the usual plant identification contest, to be held at the Propagation House. Some of the more beautiful plants will be given as prizes for both of these contests.

Chuck Burroughs, chairman of the department's Poly Royal committee, stated that the Landscape unit would, as usual, be open to all visitors during the two day show. Students will be on hand to answer questions and explain phases of the nursery business.

At the Horticulture club's last meeting, a poll was taken to determine the type of social activities desired by the club. It was found that club members wanted a beach party, werner roast, swim and social, and another barbecue. The poll also included suggestions and opinions concerning club business. President Jim Coleman stated that he was forming plans to carry out the activities voted for by the club.

The practice of having student speakers was continued by Al Charney's discussion of "Plant Patents". Dave Graves spoke briefly on "Nursery Wage Rates", as set up by progressive nurseries in order to avoid unionization of the industry.

## Guidance Center Has Veterans' Aids

The Advisement and Guidance Center, located in Room 23, Administration Building, has announced receipt of numerous books and pamphlets describing opportunities in various occupations, and these are available for the use of all veterans.

Featured in these booklets are such items as job requirements, opportunities for advancement, average salaries, preparation required, etc.

Among the titles of particular interest to Cal Poly veterans are the following:

- "Opportunities in Farming"
- "Jobs in Rural Service"
- "A Career in Engineering"
- "Jobs in the Aircraft Industry"
- "Employment Trends in the Printing Trades"
- "Jobs in Rural Journalism"
- "Jobs in Horticulture"

Paul Hylton, Acting Chief of the Guidance Center, states that all veterans whether under Public Law 16 or 346 are entitled to the use of these materials. The center is open from 8 a. m. to 4:30 p. m., Monday through Friday.

## Drumm to Class Scudder Jerseys

George M. Drumm, head of the Dairy Department, has been asked to classify the Jersey herd owned by the Scudder Farms, at Puente, California, by the California Jersey Cattle Club.

The Scudder people, well known as the makers of potato chips, mayonnaise, peanut butter and various other food products, have built up one of the finest Jersey herds in California.

Editor's Note: When you are down there, George, I wish you would find out if it is true that they make peanut butter by feeding a cow peanuts and then taking her for a ride in a roller coaster.

A beauty by the name of Henrietta, Dearly loved to wear a tight swetta. Three reasons she had, To keep warm wasn't bad, But the other two reasons were betta.

## 1947 Yearbooks Now On Sale

Yearbook sales are now in full swing with Avon Carlson, asst. editor and John Jones, student manager, handling all sales from the Student Manager's office. Letters have been sent to those students who have only a \$7.50 or \$11.25 student body card, telling them to take advantage of their interest in the yearbook by paying the additional amount that is required. Students with the \$7.50 card must pay an additional \$2.75 for their yearbook, and those with the \$11.25 card need to pay \$2.00. Any \$3.75 card holders will have to pay \$3.50 for their book. Extra copies are on sale at \$4.00 each.

## Aero Club Holds 1st Social Meeting

The Aero club recently held its first social function in order to acquaint the wives and friends of the club members with the purpose of the club and to promote a general interest in aviation on the campus. After a short business meeting, several films were shown. The first, "South America with Disney", was a technicolor film showing the staff of the Disney Studios gathering material for one of their feature length cartoons on South America. The second film "Freedom Rides on Rubber", presented the development of the synthetic rubber industry. The final film was "Flying to Bermuda". After the last film, refreshments were served. The club is planning to make these social meetings a monthly affair if the members show enough interest in this type of meeting.

## Field Trip to Nearby Dairies

The advanced judging and dairy herd management classes enjoyed a very interesting field trip through the Santa Maria - Guadalupe area. The farms visited were those of Primo Fredi, Arthur Alacough, and Cancellini and Clanshan. Cancellini and Clanshan are former Poly students.

Latest equipment in both farming and dairy operations was examined by the students. Some of the herds seen averaged around 450 pounds of butter fat which is a very good average. Primo Fredi had a cow that produced 156 pounds of butterfat last month.

## Welders Plan Field Trip To Include Metals Congress

By R. C. Wiley

Fifty-five students from the welding classes with the instructors, R. C. Wiley and C. C. Richards will make an extensive industrial field trip to the San Francisco Bay Area from March 23 to March 26.

The group will attend technical sessions of the Western

## Poly Phase Club To Meet Today

The Poly Phase club will hold its meeting today in the A. C. Aud. at 4 p. m. All members are urged to be present. This will be a business meeting.

Last week the club decided to postpone its excursion to the northern part of the state until after "Poly Royal". The club had previously planned to go to Shasta Dam as well as visit the Bay Area. However, it was decided that this would be too expensive and too time taking. The idea was discussed and it was finally concluded that a trip to see the cyclotron on the Berkeley campus of the U. C. and some of the electrical manufacturing plants in the bay area would be a more practical excursion. A committee was appointed to make all of the arrangements.

Ice cream, soft drinks and movies were enjoyed by all the members attending last week's meeting.

### POLY BAND PLAYS

Poly's substitute for the Ranch Boys, the Mustang band, opened student body assemblies Friday, Feb. 28 playing their usual variety of musical selections. They made their first evening appearance at the Fresno - Poly basketball game adding spirit, music and noise to the game and support to the team.

LOST—One brown zipper binder, physics book, and college algebra book. Zipper binder contains engine log on an engine in the Aero shop. This is extremely important to me and my crew. If anyone finds the above articles, please contact Richard Hall at the Aero shop or Tom Deckman at Chase Hall.

Metals Congress and Exposition being held in the Oakland Auditorium. Here the latest developments in machinery and methods are being shown under the sponsorship of various engineering societies including the American Society for Testing Materials, American Petroleum Institute, and the American Welding Society.

Also on schedule are inspection tours through the industrial plants of Victor Equipment Company, manufacturers of welding supplies; Enterprise Engine and Foundry Company, manufacturers of heavy machinery and diesel engines; Wooldridge Manufacturing Company, builders of heavy earth moving equipment; and Joshua Hendy Iron Works, manufacturers of diversified machinery products.

At the Metals Congress and in the industrial plants, the group will see welding technique and engineering methods used in industry.

PRESENTING PART OF THE MUSTANG BOXING TEAM . . . Poly will be represented by a six-man boxing team in the Winter Carnival this weekend at Santa Barbara. Bottom row from left to right: Schuster, Day, Pimentel, Guglielmelli. Top row: Ljunggren, Sanchez, Barr, Rosen, Rising.

## Mustangs in 2C2A Winter Carnival Meet

The Athletic Department has announced the list of men who will represent Poly in the 2C2A Winter Carnival to be held in the Santa Barbara Armory this weekend, March 7-8. Santa Barbara college will act as host for all member teams of the conference. This tournament will include boxing, wrestling, and gymnastics.

Charles Pavelko, coach of the boxing team, has announced tentatively the men who will wear the Green and Gold. They are as follows: Art Guglielmelli at 120 pounds will be out to bring home the championship of his class. Art, in his last bout, won a clean cut victory over La Roy Hooge, of Santa Barbara.

Jim Lawson, from Santa Rosa, will represent the Mustangs in the 135 pound class. Lawson will be fighting his first inter-collegiate match, but has shown plenty of spirit and the will to fight in all of his workouts.

Lou Martini will weigh in at 145 pounds. He will be out to gain prestige and attempt to box his way to the winners circle.

Russ Barr, Poly's outstanding boxer at 155 pounds, is the Mustang choice to win honors in the tournament. Barr has proved that he has plenty of ability and ring experience in all of his fights to date.

Howard Rosen, from Cleveland, will weigh in at 165 pounds. He will carry the hopes of Mustang fight fans in this division. Rosen has yet to suffer a defeat in inter-collegiate boxing.

In the light-heavyweight division Gene Pimentel will wear the Green and Gold of Poly. Gene will weigh about 170 pounds and may spring the surprise of the tournament by capturing high honors.

The wrestling team will be headed by Fred Adams of San Diego. Adams has a lot of experience, and Polykes are hoping for a championship in the 175 pound division. Adams will weigh in at about 174 pounds.

George Clark will be a leading contender in the heavyweight division. George placed second in the recent Senior A. A. U. tournament.

Other Poly wrestlers whom Pavelko believes will place high in the Winter Carnival are: Hutchinson at 125, Endigman or Howard at 135, Don Martin at 145, Barnes at 155, Hunt at 165 and Croce at 190 pounds.

The gymnastic team, coached by Howie O'Daniels will be represented by a five man team. None of Poly's contestants have participated in a meet this year. Therefore the outcome cannot be forecast. The following men will, however, represent the Mustangs:

Repe Climb — Gene Wellman  
Parallel Bar — Tom Boland  
Long Horse — George Porter  
Side Horse — R. Thrasher  
High Bar — Tom Boland  
Rings — George Porter

## Poly Boxing Team Loses To Santa Barbara 5-4

The Mustang leather pushers lost a close 5-4 team score to the Gauchos from Santa Barbara college last Thursday night in the Poly Gym. More than 700 enthusiastic fight fans witnessed a program packed with thrills, cheers, and boos.

The cheers were for the contestants and the fine spectacular performance that the men presented. The boos were for the first referee, Leo Longly.

Beginning with the sixth fight, Joe Repose, of Arroyo Grande, took over the duties of referee, and did a very good job of officiating.

Raising the curtain for the evening's festivities were Leroy Hooge of Santa Barbara and Art Guglielmelli of the Mustangs. Guggie punched his way to an easy three round decision.

Les Rising then stepped into the ring to oppose Cormier of the Gauchos. Les showed plenty of class and boxing skill, and the fight was close all the way. In a split decision of the judges, referee Longly awarded the fight to Cormier.

Ex-Marine Bebe Mathews, of Santa Barbara proved that he had too much experience for Howard Poason by scoring a T.K.O. after 1:50 seconds had elapsed in the second round.

Next Lou Martini of Poly opposed Tommy Gressett, who was a Golden Glove champion of Denver. Martini won the first two rounds by using his left jab to a great advantage. Gressett, in the third round, floored Martini with a hard right to the head. Martini rose once but Gressett following up with a barrage of blows scored a K. O. with only five seconds remaining in the fight.

Russ Barr, of Poly, then stepped into the ring and showed the fans

real boxing talent by winning a clean cut victory over Sam Cathcart. Referee Longly first awarded the fight to Cathcart, but both judges jumped to their feet as they had awarded the fight to Barr. Russ was then declared the winner. At this juncture, a change in officials was made, and Joe Repose took over.

Dave Rising, opposed by Jimmy Watt, put on a fine performance. After three hard fought rounds, Rising was adjudged the winner in a close decision. Rising's ring experience and defensive ability, plus a good first round, won the bout for himself.

Howard Rosen, of Cleveland, fighting his second intercollegiate bout, had an easy time with Charles Tomayo, of Santa Barbara. Rosen caught the back peddling Tomayo in the second round with a barrage of lefts and rights. Referee Repose halted the bout in 1:35 seconds of the second round.

In the light-heavyweight division, Billy Steele of the Gauchos was awarded the verdict over the local favorite, Gene Pimentel. Steele one of the outstanding collegiate boxers of his weight, was more aggressive and won on points over the three round limit.

The main event brought together Billy Quimby, of Poly, and Roy Steele, of Santa Barbara. Quimby, weighing in at 175 pounds, spotted Steele 25 pounds. The fight fans were for Quimby all the way. In a hair line decision, the judges awarded the fight to Steele.

The entire program was well received by the spectators and all those present want to know when another intercollegiate boxing meet will be held.

Possible teams that Poly may meet in the very near future are the Cal Aggies and Fresno State.

## SPORTS ROUNDUP

By JOE GRIFFIN

Last week I stated that I would bring up some of the problems facing our Athletic Department, and some of the possible solutions. I had everything all planned out as to just how and where we were going to get the money, and about 15 minutes ago I ran into Johnny Jones. John is the student financial wizard. You would be surprised at what he can do with a dollar bill.

This subject is one that is debatable and Jones was in a debatable frame of mind. It could be that the hour was a little early. I have talked to a few people concerned with our future in athletics and the general trend of thought is the fact that we need \$20,000 for our next year's athletic program. That is on black and white and is a minimum. It seems that conversation is at a premium around here with just about EVERYBODY agreeing that something should be done.

What is going to happen is this—We are going to end up talking a good football game or a good basketball game unless someone makes a move and there is definite concrete action taken in the near future. We have committed ourselves to entering the 2C2A to give the students a better program in the field of athletics and to possibly put this school, or I should say, help put this school on the map. When someone asks you where you go to college and you answer; they will know what you are talking about.

At the present time each event, whether social or athletic, costs each student approximately 20 cents. We absolutely cannot go on at that pace. It just can't be done. Your student body card next year will not cover these costs, so the sooner we get this thrashed out, the better. Generally speaking, the students are the first ones to crab when the teams take a nose dive in the won and lost column. The only reason they take this dive is because the team hasn't the manpower or ball players of the calibre needed to meet the class of competition we are presently playing.

In case you are not familiar with the trouble and incidents that go with getting a ball player to go to Poly, I will attempt to enlighten you. Most of you know the facts. We will take these examples.

Let's take a mythical John Doe. He, in the future will not be a G. I., and will not be entitled to the benefits of the G. I. bill of rights. He is 18 years old, has played four years of high school basketball and football, and has the potentiality of becoming a good college ball-player. By the time this boy is ready to graduate, he has had offers from probably a half dozen colleges, including Cal Poly. Podunk College comes up with the offer of a training table and a room along with a decent job in the off season. Jonesville Center College comes in with just about the same offer, but just a little better. Now who comes up but one of the Poly coaches or alumni. The way things are now, about all we can do is offer a good handshake, a slap on the back and a job in the cafeteria during the season. Taking into consideration that this boy is of average intelligence, I will ask you a simple question. Where is this fellow going to go to school? He will very likely go to Jonesville Center and in about two years come down to San Luis Obispo with his squad and stomp the Poly boys into the ground. If you look him straight in the eye and give him a general idea of what will be done to help him, a non-veteran will end up wearing the Green and Gold. When fellows like Bud McDougall, Hank Moroski or Pinky Bebernes graduate and in their neighborhood come across a good prospect, they will have something to talk turkey with. Howie O'Daniels has said that as far as obtaining ball players goes, he depends a lot on the men who go to Poly or who have graduated.

This is something for you all to think about and to consider. Something big is going to blow off in the near future, so in order to prepare yourselves it would be a good thing to do a little thinking. Take everything into consideration and draw your own conclusions, because as sure as I'm sitting here now, you're going to be affected.

Cal Poly's tennis team is under the able guidance of Eugene Smith, Political Science instructor at Poly. Smith has a very broad background in the tennis field, and has traveled in some of the best company as far as stateside and international tournaments go.

A graduate of the University of California in 1934, Smith captained the tennis team in his senior year. After graduating he remained as the freshman tennis coach, bringing the Bears through a successful season.

Upon leaving his alma mater, he teamed with Don Budge and they took the Pacific Coast championship in 1935, holding the title one year. The same year while traveling with a U. S. team, he toured Canada and annexed the Canadian National title. In 1936, Mr. Smith went to Asia with a U. S. team, and in their tour of the Orient they went undefeated. Returning to the U. S., he joined the Junior Davis Cup squad, and took the Northern California cup and held it from 1937 through 1939.

Besides having held the Canadian National title and several state titles, Mr. Smith has taken the Finnish, German, Swiss and the Philippine Islands national titles at one time or another. After all the tennis Mr. Smith has played and all the titles he has won (185 trophies), he remains to the present day in the amateur field never having turned professional.

Thursday night's fights were all very good, and Santa Barbara took home five wins to Poly's four. In an earlier column I ripped Santa Barbara for por officiating. The first referee Thursday night wasn't anything to write home about, but it was remedied in time. You have to make mistakes to profit by them, and I'm sure this won't happen again.

A mistake we students make is this. When something goes wrong we are very unsportsmanlike in our attitude. When things get our hand like that, you can blow your stack, but don't carry it too. Those Santa Barbara boys will remember things like that, and when you down there it will be the same story. The Athletic Department asks that you be just a little more considerate, even if it hurts a little.

# Study Group

## Hears Lecture

What to eat and why was the topic of the third Parenthood Study Class held last evening at the junior high school.

One of the facts stressed was that the food a woman eats during pregnancy must keep her well, give her baby what it needs before birth and supply it with enough of certain food elements to last it for the first four months of life.

It was pointed out to husbands that their food likes and dislikes have a bearing on what their wives may eat.

Prior to the meeting, a half-hour knitting class sponsored by the Junior Matrons was held in the Junior High library.

Topic of the next meeting, to be held Wednesday, March 12, will be Layette and Baby Equipment. All expectant parents are cordially invited to attend the meeting.

# STUDENTS' WIVES

Students' Wives club will meet in the Hillcrest building Thursday, March 6 primarily for the purpose of holding an election of officers for next quarter. A program is planned for the members following the business meeting.

Other meetings scheduled by the club include a weekly meeting of the drama section on Wednesdays. This section is now under the direction of Miss Mary Stewart, Junior high school teacher. Miss Stewart is well qualified by a Master of Speech degree from U. S. C. in addition to other training. The section will welcome interested thespians.

March 27 has been set as the next date for the folk dance group.

Last Thursday's meeting was presided over by President Jo Roney. Mrs. Roney and the group heard reports from the various chairmen of the recent fashion show. A vote of thanks was extended by the club to co-chairman Irene Rogers and Olive McElvain for the success of the affair.

Treasurer Jane Sousa announced that the club has the largest number of active members since the club was organized. Payment of quarterly dues of 75 cents is all that is required for any student's wife to become an active member of the club.

Failure to stop at "stop signs" endangers life—be careful.

# Spring Quarter Registration

## Info for All Students

Registration instructions and procedures for Spring quarter for Students now enrolled at California Polytechnic College.

March 13, 1947

The time you will report to the west door of the west wing of the administration building to register will depend on the beginning letter of your last name in accordance with the following chart:

U-V-W-X-Y-Z	report between	8:00 & 9:00 A.M.
S-T	" "	9:00 & 10:00 A.M.
N-O-P-Q-R	" "	10:00 & 11:00 A.M.
I-J-K-L-M	" "	11:00 & 12:00 A.M.
F-G-H	" "	1:00 & 2:00 P.M.
C-D-E	" "	2:00 & 3:00 P.M.
A-B	" "	3:00 & 4:00 P.M.

Students will be accommodated in the line only in the order listed above.

Steps to be completed in registering and preparing individual schedules will include:

- 1—Secure permit to register at the west door of the west wing of the administration building.
- 2—Pay necessary fees at the accounting office.
- 3—Secure schedule forms at desk on second floor of administration building at head of the stairs at the south end of the building.
- 4—Report to department head and complete schedule.
- 5—Turn completed schedules in to instructors in Room No. 204.
- 6—All students who plan to use any motor type of private transportation must register their vehicles. In the registration line you will be provided with necessary registration forms which must be completed and turned in before registration is complete. These forms will be collected after you have turned in your class and registration cards. Students not owning a car or motorcycle are still required to complete the form and provide the information that they will not be driving on the campus during the spring quarter. Students who acquire a motor vehicle during the quarter must register it in the office of E. A. Steiner, security officer.
- 7—Report to classes beginning at 8:00 A.M. on Tuesday, March 18, 1947.

Spring Quarter Registration Instructions for NEW Students, California Polytechnic College.

All new students should have made arrangements for their rooms and meal tickets previous to entering the registration line.

MARCH 14, 1947

Report to the north door of the administration building beginning at 8:00 A.M. Steps involved in completing registration and schedule procedure include the following:

- 1—Secure permit to register at the north door of the Administration Building beginning at 8:00 A. M.
- 2—(If you are a veteran) Complete and sign your letter of entitlement, secure change of address and transfer of case file forms.
- 3—Report to the accounting office to make deposit and pay fees.
- 4—Report to the Engineering Building Auditorium to take entrance examinations. (An examination schedule will be provided you in the registration line that will list hours for both the entering examinations and for the physical examinations.)

MARCH 15, 1947

This day will be devoted to the completion of entering examinations.

MARCH 17, 1947

- 1—Report to the second floor by south stairs of the administration building beginning at 8:00 to secure your permit to register, examination reports and secure schedule forms.
- 2—Report to the department head and complete your schedule.
- 3—Turn completed schedules in to instructors in Room 204.
- 4—All students who plan to use any motor type of private transportation must register their vehicles. In the registration line you will be provided with necessary registration forms which must be completed and turned in before registration is complete. These forms will be collected after you have turned in your class and registration cards. Students not owning a car or motorcycle are still required to complete the form and provide the information that they will not be driving on the campus during the spring quarter.
- 5—Report to classes beginning 8:00 A.M. on Tuesday, March 18, 1947.

Eugene Egan, assistant dean in charge of admissions, announced today that unless current students register at the scheduled time, March 13, in accordance with procedures outlined, they can be given no assurance that all classes in which they plan to enroll will be open. Late registering students must take their chances on filled classes and sections.

# FRUIT CLASS HEARS CARTER

Dr. Dean Carter, soils instructor, spoke to the fruit production class recently on soils and fertilizers. Dr. Carter discussed the importance of soils and soil fertility to the growers. He also discussed clean culture. This is a method of weed eradication by means of oil spray. Clean culture is used extensively in Southern California citrus groves.

Dr. Carter has spent many years testing soils and running surveys on soils and soil fertility in different districts of California. At that time he was employed by the United States government.
