

# Students Get Break; Fall Term Card for \$7.50

Student Body cards, good for all student activities during the fall quarter, are now on sale for \$7.50. These cards were authorized last Tuesday night by the Student Affairs Council to help out those students who wish to make use of activity cards and yet could not afford the price of \$15 at one punch.

John Jones, acting student manager, announced that these cards offer all of the benefits of the regular full year card during the fall quarter. He stated that these fall quarter cards could be converted into full year cards at any time during the quarter by paying the balance of \$7.50.

Gene Pimentel, student body president, announced that student body membership is required if any student wishes to join an organized club or society, if any student wishes to participate in either inter-collegiate or intra-mural sports, or if any student wishes to take part in any of the activities of the Associated Students.

He also pointed out that student membership allowed a student to attend inter-collegiate home games free, inter-collegiate games away from home at the same scale allowed host students, fifteen cent reductions at shows at two local theatres, similar reductions from certain other merchants in town and elsewhere.

Full year cards or fall quarter cards may be purchased in the student body office during the following hours:

Monday - 8:30 a.m. to noon  
Tuesday - 8:30 a.m. to noon;  
1 p.m. to 4 p.m.  
Wednesday - 8:30 a.m. to noon;  
1 p.m. to 4 p.m.  
Thursday - 8:30 a.m. to noon  
Friday - 8:30 a.m. to noon;  
1 p.m. to 4 p.m.  
Saturday - 8:30 a.m. to 11 a.m.

Student Manager Jones stated that Associate membership cards are now available for student wives, faculty members, their immediate families, and regular employees of the college. These cards sell for \$7.50 and entitle the owner to admission to all student sponsored activities free or at a reduced rate. Additional privileges and schedule of rates and/or free admissions will be announced in the near future.

Don Seaton, student vice president, requested that all students who have signed promissory notes for student cards please come in and redeem them. Seaton stated that if such students felt that they could not afford a full year card, the fall quarter card could be substituted.

Seaton continued, "The student body membership is the year's biggest bargain at Poly. We are

## Fresh Announce Plans For Coming Meeting

The freshman class will call a meeting of its members sometime in the near future, it was announced today by the student body office. A definite date has not yet been chosen because of the still unsettled conditions of the freshman students.

The purpose of the meeting will be to help the freshman get acquainted, to answer any questions, and to begin organizing the freshman class. Either student body officers or a committee of freshmen will be in charge of the meeting.

## Egan Honored at Faculty Club Meeting

The first Faculty club meeting of the year was held last Tuesday afternoon to honor Eugene A. Egan, outgoing dean of student welfare. Harry Wolf, president of the faculty club, presented Egan with a memento of Cal Poly from the entire faculty.

President Wolf also introduced the officers of the club to the new members. They are: Vance Lewis, vice president; Emmet Bloom, secretary; Ray Longberg, treasurer; Dave Thompson, sunshine committee chairman.

## Club Leaders Plan Poly Events Soon

The Inter-Club Council held its first meeting of the year last Tuesday evening. Jim Jessup, president and council representative of the Young Farmers was elected as the Inter-Club Council's first delegate to the Student Affairs Council.

The council heard a discussion concerning the privileges of associate membership in the student body. Chairman Don Seaton, student body vice president, announced that a joint meeting of the Inter-Club Council and the Inter-Departmental Council is planned for the near future, at which time a calendar of students will be figured out.

Hans Hansen, Block P; Al Filippini, Gamma Pi Delta; Charles Pierce, Bowling League; John Patterson, Press Club; E. A. Egan, dean of student welfare; Jessup, Young Farmers; and Seaton, constitutional chairman were present at the meeting. The Inter-Club Council is composed of the presidents of each recognized social club and society, the vice president of the Associated Students, who acts as chairman, and two faculty members, elected by the council.

Several clubs had no delegates present at the meeting and Seaton requested that the president of each social club attend future meetings of the council in order that a more representative group may help shape the policies and activities of the council.

The members present were asked to make sure that their respective club constitutions are revised to fit the provisions of the new Associated Student constitution, and that these revised constitutions be submitted to the SAC for approval.

## Speech Specialist On Campus Friday

Hubert Semans, dean of the division of science and humanities, said today that students interested in overcoming speech impediments should report to room 116, Adm. Bldg., from 1 to 3 p.m. Friday.

At that time Mrs. Simmons, speech specialist for the city schools, will be available for consultation and will make arrangements for special speech correction classes.

## FALL GRADUATES NOTE

Senior students who expect to complete the requirements for graduation at the end of the fall quarter should go to the recorder's office for a final evaluation, and make application for their degree or certificate.

Non-veteran students are reminded that they are required to pay a \$6 graduation fee at this time.

## New Poly Medical Service Grants Care, Protection

By Guy Thomas

Under a revised medical program now in operation, all resident students and those living at Camp San Luis Obispo, will receive medical care including major and minor surgery, according to information received from Eugene A. Egan, dean of student welfare. A doctor will be on call at all times and will make emergency calls to dormitories and homes within a radius of five miles. All necessary aid equipment and medical supplies will be furnished. No illness is exempt from medical care except chronic diseases of one year's duration before entering Poly. The Poly nurse, Mrs. Imogene Gow, will be on duty at all times in the infirmary to take care of minor complaints and treatments.

Students living off campus who wish medical coverage will be required to pay a medical fee of three dollars per quarter.

Egan further stated that a medical examination is required of all new students and that an additional examination is required of all students participating in any sports.

## SQUARE DANCING WEEKLY

An old fashioned square and folk dance is held every Wednesday evening starting at 7:30 in the city recreation building.

Free instructions are given and all Poly students, wives, and faculty members are invited to attend.

## Directory Card Changes

Paul C. Winner, recorder, announced today that any student who has made a change of local address, or a change of program, should make certain that his directory cards have been corrected in the Recorder's office, Rm. 102 Adm. building, and at the information desk. On many occasions emergency calls are received for students who cannot be located due to their failure to keep their directory cards corrected, he said.

## Sports Spectators Spark Proposed Construction

By Dick Simpson

It was announced today that the architectural division of the public works department is preparing estimates for many additions to the campus.

New football bleachers are to be constructed on the east side of the present football field. Construction will be of concrete and the bleachers will extend the full length of the field.

## 42 New Trailers Ready Soon

New trailers for which married veterans have been anxiously awaiting, will be ready for occupation soon, it was announced today. The first block of 42 units will be opened some time next week.

Those students who have made applications for trailers prior to March 1, 1947, should go to the Hillcrest housing office where discharge papers will be recorded and registration forms completed. This office is open from 9 a.m. to 1 p.m. Monday through Friday.

It is important that these applications and registration forms be completed as no one can be assigned a trailer until all records are cleared.

The operation of the new 188 trailer housing project will be carried out by the San Luis Obispo county Housing Authority.

## Pomology Students Visit Almond Plant

The beginning fruit production students taking Stan Gray's pomology course spent an interesting afternoon on Tuesday looking over the new plant belonging to California Almond Orchards, Inc., at Paso Robles.

The plant is still under construction but parts of it are being used to care for this year's almond crop. It will be one of the finest plants of its kind when it is completed, and is understood to be worth well over half a million dollars, according to Stan Gray.

Assistant Manager McAndrus showed the students through the new plant and also the old one, and explained the various processes involved in preparing this most typical of all California nuts for the commercial market.

Seating capacity will be approximately 4000 people. Showers, locker rooms, and rest rooms will now be provided under the seating area for use of both home and visiting teams. The present bleachers on the west side of the field will also be extended to a field length structure with a seating capacity of approximately 1500 people, making the total seating capacity of the field approximately 5,500.

A crescent shaped wooden bleacher is planned for the baseball field with a seating capacity of approximately 800 to 900 people. Rest rooms and storage space will be provided under the seating area.

A wooden bleacher, seating approximately 600 spectators, is planned for the west side of the new track and a portable unit will be used to handle the overflow to the east side of the track.

The present basketball court will be modified as follows: The floor of the stage will be lowered to the playing level and the present wall will be moved back to what is now the rear of the stage. This addition will extend the entire length of the building. The additional space will be equipped with a folding bleacher section, seating approximately 900 people. When the bleachers are in the folded position

(Continued on page 4)

## Record Enrollment Fills Both Branches

Topping the enrollment of last fall by 633, registration for the current quarter is the largest in the history of Cal Poly, totaling 2207 students, said Paul C. Winner, recorder. Of this figure 1040 are new students and 1167 old students.

The final enrollment figure for the Voorhis Unit at San Dimas has not as yet been determined, but it is estimated at 890 students, which would make a total of 2597 students at both units.

MODERN VERSION OF "LITTLE RED SCHOOL HOUSE" . . . This Curtiss Commando (C-46A), formerly a cargo and glider tow ship used by the Air Transport command, is now a classroom used by the aeronautical engineering department. The ship, which was flown here recently from Ontario, Calif., was purchased from the War Assets administration for the "token" price of \$100. When the big ship landed on the airstrip, it was her last flight. Although she is airworthy, government regulations stipulate that her airborne days are over and she is to be used for ground instruction only. Tied down on the airstrip next to the new 100 by 140-foot all-metal hanger with three other war surplus planes, including a P-59 twin-jet plane, it will be used by students taking aeronautical operations and maintenance engineering. In the background can be seen a portion of the campus housing units.

## New Welding Lab Methods, Equipment Modernize Shop

By Dick Simpson

Utilization of present equipment and new equipment soon to be installed will give Poly one of the most modern and best equipped welding shops in California, recently stated R. C. Wiley, welding instructor. Instruction is given in both oxy-acetylene and arc welding as related to the four major engineering courses. "This study covers the practical and theoretical approach to the subject and the aim is not merely to train welding operators but that each student shall be trained as a welding technician," Wiley said.

Modern production equipment in use at the present time, or soon to be installed, includes the following: A production weld positioner and a production spot welder. This is in addition to the gas welding, arc welding and cutting equipment already in use. Two new welding processes are to be introduced. First is Atomic Hydrogen Arc welding which is used in the fabrication of stainless steel. This process operates at a flame temperature of approximately 6000 degrees centigrade, and due to the close control possible, may be used to weld materials as thin as .008" to .005". Another is the inert-gas-shielded welding process which is one of the latest major developments in the welding field. It was developed in 1942 for magnesium fabrication. It may also be used for the fabrication of both ferrous and non-ferrous metals.

A very important addition to the welding shop to be completed in the future is a strength of materials lab. Equipment to be installed will include a Rockwell Hardness tester, a metallurgical microscope and other related metal testing equipment. This will facilitate testing of materials, welds and weld ability of steel and alloys. It will also enable the welding shop to duplicate welding tests given welding operators in industry.

Also of interest to welding students is an article by R. C. Wiley entitled, "Welding as a Related Engineering Course," soon to be published in "Welding Engineer," a welding trade magazine.

## Aero and Agriculture Scholarships Open

By Herb Winn

Scholarships are available to those students, both freshmen and advanced, who need financial assistance in order to complete their college education, announced J. I. Thompson, agricultural coordinator and technical advisor to the Bureau of Agricultural Education.

Freshman scholarships are granted to those students who have had home farm projects in connection with their high school F. F. A. training. Advanced students may be eligible for awards if they have completed one or two years of outstanding work here at Poly. These are available to aeronautics and agriculture students. Applications should be made through the student's department head.

Ex-G. I. and civilian students are eligible. Awards are based on actual need and scholastic performance," said Thompson.

## Cafeterias Feed Capacity Crowd

By Don Chatters

Poly's two cafeterias are now serving 1100 students, or approximately a 500 student overload, A. R. Noggles stated this week. Noggles, with the help of 100 students, and about 15 regular cooks, meat cutters, and pot washers, sends the chow lines through in about 35 minutes. "The lines could be sent through quicker," Noggles said, "but where are we going to seat them? Cafe No. One has a seating capacity of 275, and No. Two, 336 seats." Noggles says he knows of no future plans to enlarge the facilities of the mess halls, but said he would continue to serve the students to the best of his ability.

## Seaton Seats Reps Inter-Dept. Meet

Don Seaton, student body vice-president, presided over the first meeting of the Inter-Departmental Council, held September 12. The membership of the council is composed of the president of each departmental club, the vice president of the Associated Students, who acts as chairman, and one faculty member from each division of the college curricula.

Robert Moore, Ag. Engineers, and Stanley Thompson, Mechanical Engineers, were elected to serve as temporary delegates to the Student Affairs Council. These delegates will serve until the clubs form a permanent council.

Present at the first meeting were Jay Tucker, Poultry club; Chuck Burroughs, Ornamental Hort; Edward Durbin, Poly Phase; Roland Wentzel, Los Lecheron; Jack O'Connell, Aero; Loren Hillman, Boots and Spurs; Moore, Thompson, and Seaton.

## Collegians, Glee Club, Band Clear for Action

The three major organizations of the music department started the year in a big way last week when all of them had large turnouts. The "Collegians," Poly's own dance band, the Glee club and the Cal Poly marching band make up the music department's main organizations.

The Glee Club reported the largest turnout with over 100 students trying out for entrance. Selection of the final 65 voices will be made by the 25 returning club members. Many fine new voices were heard at the tryouts.

The band got off to a flying start with 49 new members reporting plus 27 old men returning. H.P. Davidson, music department head, reported that a few more clarinet and trumpet men are needed. "Anyone who has played or enjoys playing, regardless of how rusty, is encouraged to apply," Davidson stated. "If you don't have an instrument, apply anyway, as we have some school owned instruments including a new french horn and a baritone."

The band will play for the five home football games and will probably play for the Fresno and Santa Barbara games.

The band meets in CR 1 from 4 to 5:30 p.m. on Mondays, Wednesdays and Fridays.

The "Collegians" are looking forward to a crowded but successful year with a good number of experienced musicians on hand. The "Collegians" will play for all of the student body dances the first of which will be given on September 27, and will play numerous other engagements.

The following men have been picked for the "Collegians" this year. On the sax: Wally Clark, Milton White, Harry Lowe, Dominic Pugliese, Paul Linebarger and Wayne "Young" Smith. The trumpet section boasts, Fred "Bucket" Waterman, Bill Hunter and Bob Raybourn. On the Trombones are: Bob Romey, Darrol Davison, Bob Sprague and Darrel Rumley. Jim Cox will beat the traps and Kenny Hawkins will be the guitar. Don Bottenberg is on the bass and Jack Heller at the piano.

## Auto Wash, Repair Ramp Opens

By George Tallman

The long standing need of a suitable place for students to work on their cars has been alleviated, according to Eugene A. Egan, dean of student welfare. Recently the student foundation has allocated funds for the establishment of an area where students may do any necessary work on their automobiles. The newly designated repair and service lot extends from the storage garages east, and directly south of the old horse barn.

Equipment furnished by the school will include a concrete slab for washing or hosing, work benches with ample room for your tools, electricity for power tools and light and large drums for oil rags, and refuse.

It is requested that no student drain oil or grease, or make any adjustment or repair on his vehicle away from this authorized repair and service lot. The use of the facility is open now.

Cars found on campus in a condition of repair will be moved to the designated area by wrecker and expense of moving charged to the owner.

morning to see the exhibits of the West Coast Electronic Manufacturers display.

## Radio Engineers Plan Bay Area Trip

Advanced students in the Electronic and Radio Engineering department are starting off the school year with a trip to the Bay Area to attend the West Coast Convention of the Institute of Radio Engineers from September 24-26. This is a national professional engineering society with a membership of over 20,000 practicing engineers in radio and electronics.

Many engineers and research scientists will address the convention on television, frequency modulation, radar, and industrial electronics.

Besides attending the convention, the students will also make field trips to manufacturing plants, Stanford University Microwave laboratory, and Moffett Field. Plans call for staying over Saturday

# Grid Team Tempe Bound

## Mustangs Meet Bulldogs In First Season Game

Three teams of spirited Mustangs will entrain at noon today for Tempe, Arizona where they will meet the Bulldogs in the initial grid game of the 1947 season. Head Coach Howard O'Daniels and backfield mentor Chuck Pavelko are expected to unleash an efficient passing and a quick-breaking running attack to smother the Arizona Staters.

Leading the air offensive will be quarterbacks "Pinky" Bebernes and Lee Rosa. Rosa last year sparked the Mustangs in their 21 to 13 upset of the San Diego State Aztecs. The running attack will be paced by two hard-driving halfbacks, Byron Culver and Gene Pimentel.

Kelly Bloom, varsity St. Mary's Naval Pre-flight player, has enrolled at Cal Poly and will bolster the forward wall. To add depth to the line, O'Daniels has been drilling Jack Bolton as a utility tackle and Chuck Hoffman as a center.

Whether the coaches will interchange two separate teams, offensive and defensive, remains to be seen. However, with such a preponderance of speedy backs, a wide open offensive show is slated.

The probable starting line-up finds Don Dulitz and Jack Bolton at the ends; Marshall Samuels and Don Van Harreveld, tackles; Joe Griffin and Bob Bennett, guards; John Fitzgerald, center;

**JACK BOLTON** ... A returning letterman, a rugged end, a hard worker, and a good blocker. This year Jack has been drilled as a utility tackle to bolster the forward wall.

"Pinky" Bebernes, quarterback; Byron Culver and Gene Pimentel, halfback; and Stan Nigg at fullback.

Cal Poly will be after a first when they meet Arizona State, having lost four games in previous years.

## Wanted... 500 Students

by the FOUNTAIN INN GOLF DRIVING RANGE 3/4 mile south of town on Hiway 101 to take part in our extraordinary golf instruction classes commencing Monday September 15th.

Two "Pros" for instructors, Graham Tenbrook, Pro of the Atascadero Country Club and Mr. Bill Sime of the McGregor Golf M'g. Co. Classes of 25 at a time can be held. These instructors will give you ALL the mechanics of golf, one lesson a week. One bucket of balls will be supplied with each lesson. We supply clubs free.

\$50.00 VALUE FOR ONLY \$10.00. Payable in two payments if required, \$5.00 with application and \$5.00 in 30 days.

These lessons will be weekly from Sept. 15th to Dec. 17th inclusive.

Read and digest the "sports" edition on golf in El Mustang, then decide to be a member; you can't afford to miss this very special offer.

Starting also on Sept. 15th, we are cutting our regular price of 50 cents per bucket of balls to 25 cents per bucket—for daylight playing, every day to 5 p.m.

We have flood lights—open until 10 p.m. daily. Open 7 days a week.

Turkey shoot every Sunday 10 a.m. to 3 p.m. bring your own rifle, nothing barred.

Memberships available now at the Golf Driving Range Special re-imbursement deal for members on all purchases of golf equipment.

Ladies especially invited for memberships.

Ken Conway, Prop.

**BULLDOG FULLBACK** ... One of Arizona's greatest athletes will face the Mustangs in Saturday's opener. Pictured above is Morrison Warren, a senior at Tempe, the outstanding ground gainer from the 1946 team. Weighing 200 pounds, Warren is termed a plunging, hard running, rugged fullback.

## Fall Baseball Brings Promising Candidates

Forty eager aspirants loosened up their arms and cast hopeful glances toward Coach Bob Mott as he greeted them for fall baseball practice. Mott expects to practice daily for six weeks or more, weather permitting. Frequent intra-squad games are scheduled as proving grounds for leading candidates of the 1948 season.

## Preview of Next Week's Grid Rival

Looking ahead a little to our first home game, pre-game dopesters have come up with the following scoop on Cal Tech. Members of the Southern California Intercollegiate Conference, the Engineers ended up in the cellar last season. However, their roster this year includes more than a full team of seasoned players.

Doug MacLean, whom Coach Anderson of Cal Tech considered his best player last year, will be back at fullback and Glenn Chaffee, outstanding punter and passer, will be at one of the halves. Four lettermen have returned to the forward wall. They are: Dennis Long, 200 pound tackle; Robert Walquist, 220 pound tackle; Don Hibbard, 180 pound end, and Gerald McKenna, 175 pound center.

No, no, Hubert! Just the ball!

## NEW ATHLETIC FACILITIES

## From The . . . End-o The Line

By I. Harry Endo

**ABOUT YOUR TEAM** . . . The process of "separating the men from the boys" actually got under way this past weekend. Yep, while you and I were generally dissipating, our rah-rah boys engaged in serious head "bashing." Sunday's scrimmage displayed a team which is fast approaching pre-game perfection. A wealth of excellent backfield candidates, predominantly of the "speed merchant" variety, has materialized. The shadow of doubt seems to hover over the guards and tackles where there is a lack of depth and experience. The shifting of Deane "spare tire" Anderson from center to tackle and Chuck Hoffman from the backfield to the line is expected to ease the situation.

Shunro Nomura . . . a fullback, outstanding . . . most conscientious man on the field . . . a piledriver on offense . . . a vicious blocker and tackler . . . the big question is, will he see much action? Nomura tips the scales at slightly over 160 pounds, and "Howie" favors his "beef."

Charles McKee . . . zealous tackle . . . 230 pounds and 6' 3" . . . he has bolstered the right tackle slot with his aggressive defensive play . . . a transfer from Reedley, J. C.

Bob Ashby . . . a potential star halfback . . . an extremely deceptive runner . . . as shifty as they come . . . runs with an explosive burst of speed . . . halls from Santa Ana, J. C.

SICK? LAME? LAZY . . . Nursing injured knees are Lew Bewley, end, and Bob McCutcheon, scabbard . . . Lee Rosa, quarterback par-excellence, is running signals in his gym shorts . . . Jerry Carter, Watson's nemesis, is still ailing.

## Frosh Oppose Salinas J.C. In Initial Grid Game

By Russ Pyle

The first frosh pigskin team in Cal Poly history will take to the road Friday morning for their initial game against Salinas JC Saturday night.

Dr. Carl Voltmer and Coach Ed Jorgensen, who handle the Colts' reins this year, report the team in top shape and ready for action.

Being a seasoned veteran at the game of coaching Voltmer shows no optimism whatsoever. "It's still too early in the season to say who is bad and who is good," stated Voltmer. "We haven't had enough equipment for all of the 76 men who reported for preseason practice and for this reason some of the men missed out on the scrimmage sessions. Even though we were handicapped in practice, we will take every man we can find room for to the game," he said.

The Colts will gallop on to the turf Saturday night with nothing but a few scrimmages with the varsity under their belts. Salinas, meanwhile, will field one of the best, most rugged JC elevens in local gridiron competition.

Tentative starting line up for the Colts Saturday night will be:

Ends—Charles Pittman, formerly of Carmel High, and Dave Martinez, who played football at Oxnard.

Tackles—Don Zachary, from Shafter High, and Tony Goldarde. Guards—Joe Osgood, a hometown

### Plan 15 Sports for Intramural Program

All dormitory and club representatives are asked to attend an important organizational meeting for the intramural football to be held this evening at 7:30 p.m. in the athletic office (gym).

The success of the initial intramural program depends greatly on the number attending this meeting. Coach Bob Mott has designated Hank Moroski, of basketball fame and a PE major, as student in charge.

boy, and Keith Mickelsen, import from Santa Barbara.

Center—Bill Matyko, who hails from Rankin, Penn.

The backfield, combining speed with power, will feature Big Paul Johnson, from Delano, at full, Herb Spitzer and his running mate Stan Evers at halves, and tricky signal caller, Gene Meserle, from Los Angeles, at quarter.

### NOTED MEXICAN MOVIE STAR IS CAL POLY GRAD

One of Cal Poly's more famous alumni members, Pedro Armendariz, Mexico's leading movie actor, was featured in a recent LIFE magazine advertisement by RKO as a co-star with Henry Fonda in the new picture, "The Fugitive."

## The Cadets are flying again!

The U. S. Air Force now offers you the chance of a lifetime to start your career in aviation.

If you want to learn to fly, you have one of the finest opportunities ever offered in peacetime. Aviation Cadet pilot training has been reopened to qualified applicants presently serving enlistments in the Army, and to civilian young men who can meet the same high standards.

In order to be eligible, each applicant must be: a single male citizen, between 20 and 26½ years old, of excellent character and physically fit. He must have completed at least one half the credits leading to a degree from an accredited college or university, or be able to pass a mental examination given by the USAF. He must now be living within the continental limits of the United States.

Upon successful completion of the training course, Cadets will be rated as pilots, commissioned Second Lieutenants, and assigned to flying duty.

Reactivation of Aviation Cadet pilot training is only one of the several choices open to outstanding men who want increased responsibility and advancement in the field of aviation. It is now possible for qualified men to apply for attendance at USAF Officer Candidate School—and thus be able to equip themselves for such important specialties as engineering, armament, administration and supply.

You have a real chance to make progress and build a sound career for yourself in today's U. S. Air Force. Talk it over with the Recruiting Officer today at any U. S. Army and Air Force Recruiting Station.

## Funerals Are Expensive

The subject of campus safety is an unpopular one and any printed material we see pertaining to safety is often hurriedly glanced at or receives no attention whatsoever. There are various reasons for this lax attitude, but the main reason seems to be because we have a feeling of well-being. We have been fortunate in that so far there has been no serious traffic accident on the campus, but a continued perfect traffic score is no small accomplishment.

The office of the security officer reports that they have registered over 1,500 vehicles on the Poly campus. The result of turning these cars loose on campus with no restriction whatever is obvious. The campus traffic rules and regulations are not too stringent or confusing. Essentially, these rules do no more than point out a consideration due to the other fellow. It is not fair play to deliberately flaunt a known regulation nor is there any specific gain in doing so. The job of the security officer and his crew of student volunteers is a difficult and thankless task entailing a lot of responsibility. For your own safety and well-being, as well as the other man's, see to it that your driving habits reflect what you are.

—D. J.

## Taxation With Representation

Have you bought your student body card yet? We know it is getting to be an old subject, but we think it an important one. Here is why:

The Associated Students is your organization. It operates for your benefit. Its operations and activities require funds, as do the operations, activities, and benefits of any government.

The major portion of the revenue of the Associated Students of California State Polytechnic College comes from the sale of membership cards.

Most of us are here at Poly to learn. To learn many things. One of the most important things any one can learn is how and why and for what his government operates. You have heard this here many times: Learn by doing.

We do learn government here by "doing," by participating in actual governmental activities. Associated Students, your government, is a major factor in your education. Associated Students needs your support, your membership. We admit that just joining the organization is not the sum of your responsibilities to your government. But it is the first step.

Learn by doing; join today.

J. M. P.

## Switch List By Donald Miller

"Write the book," said the trainmaster as he handed me the rule book, generally referred to as the Bible of the railroad industry. Every man, entering either train or engine service, must copy the entire book of rules on the blank yellow pages of a note book called the "yellow book." This job, I can assure you, is a major project, for it takes the average man 10 to 12 hours of steady writing to copy the entire book.

Why copy the book of rules? Sounds silly, but there is a very logical reason for doing so.

Just say, for example, you worked for the railroad company 10 years, and have been fortunate in keeping the "slate clean." As does happen to every railroader, the day comes when something goes wrong with the net result a couple of cars go on the ground.

The company holds an investigation; you are called on the "carpet," and the trainmaster explains that rule so and so has been violated. Standing your ground and staunchly protesting that you never heard of such rule you argue a losing battle, for from his desk the trainmaster picks up the "yellow book." It is then that your memory flashes back to the day when long hours were spent copying the book of rules.

With a stern look on his face, the man points to the exact rule which was violated. It's written in your own hand, and then the trainmaster places his finger on the dotted line where you signed your name under the printed statement which succinctly states that the undersigned knows every rule. The best you can do is lose;

## Hogs and Hawaii

By Everett R. Boles, Jr.

Chop suey may be a popular entree on the menu for the Chinese in Honolulu as 300 hogs have been shipped to Hawaii this summer. Embarking from San Francisco, July 2, aboard a Matson Line's cargo ship, Don L. Bower, animal husbandry student at Cal Poly, was official chaperone for a mixed herd of Durocs, Hampshires, and Poland-Chinas.

Neither the hogs or the crew were affected by a rough sea and sea sickness as the ocean was calm and good sailing enjoyed all the way. The animals were housed above decks in specially constructed pens with a shelter erected over half of each pen to ward off hot, tropical sun rays encountered on the voyage.

Self-feeders were arranged in the pens, so as to avoid handling the sacks of barley which was the primary feed that was used. Don fed the stock and watered them twice a day, early in the morning and in the evening. Cleaning the pens was not so much of a problem either as plenty of salt water and a fire hose was available to wash the decks thoroughly.

Occupying the same ship were 150 fighting cocks in individual crates above decks which gave the crew much amusement with their glowering and belligerent attitude. These fowls were being shipped to the Filipino's on the islands who go in for the sport of cock fighting in a big way.

Docking at 8:30 a.m., July 7, in Honolulu, the hogs were off the ship by 10:30 a.m. and turned over to an agent of Bailey Fairchild, shipper, who in turn delivered the herd to the Chinese. Bower stayed over in Honolulu four days looking the town over, and visiting the world's largest pineapple canning factory. He then booked passage on a returning freighter to the United States.

## Student Wives

By Herb Winn

Mrs. Cecile Heald, president of the Cal Poly Students' Wives club, has completed arrangements for the reception of all new students' wives. The first meeting of the fall season is scheduled for 8 p.m. this evening in the Hillcrest lounge.

"The entire meeting is to be devoted to a get-together and orientation program," Mrs. Heald said.

The new cabinet will be introduced and plans for the quarter's program announced. The baby clinic and campus facilities will be explained. A representative from the San Luis Obispo evening high school is slated to tell of the many recreational and educational opportunities offered locally.

Refreshments will be served by Madolyn Hiekman, hostess, assisted by Mrs. Heald and the members of her cabinet: the Mesdames Marjorie Jones, vice-president Jane Schultz, secretary; Ruth Arnold, treasurer; Cora Harris, reporter and Barbara Carter, membership chairman.

All new students' wives as well as those who have been away for part of the summer are urged to attend the meeting.

so 20 demerits are placed on your record.

Rules are the cardinal laws which keep the railroad industry operating with the minimum of accidents. Of the few accidents that occur most of them can be traced to violation of certain rules.

Thousands of dollars are spent yearly by the railroad companies, in teaching safety to their employees. For the lives of all people hinge on safety.

It is truly pitiful that rules of the highway are not enforced with the emphatic stringency as are the rules of the railroads. Many accidents could be averted and lives spared if only people would think safety. Next time you get behind the wheel of your car abide by the rules of safe driving. In the long run it always pays.

## Philling-in with Phillip S. Pace

There is a short remark credited to that sage, Virgil in the front of my chem book which goes, "Happy the man who, studying nature's laws, Through known effects can trace the secret cause." To this I add a hearty, Amen. The man is not only happy, he is the one man who can expect to pass the subject. It is my contention that Virgil never sidled-up against Chem. 321; if he had, he would not have found time to dash off remarks about the glory of it all.

Further on in the book one comes across the fact that the Greeks had this whole thing figured out so that the world and all consisted of four elements, earth, air, fire and water. Personally, I am still back with the Greeks. I got off when they started saying that, really this whole thing is very simple if one just thinks it out. I studied four pages carefully about the old boys trying to make gold out of lead which interested me more than somewhat, since I am familiar with a place where I can get a supply of low-priced lead. Then I find on page seven that the whole thing was a bust and the old boys became winemakers doing a small business of welding on the side.

Not only do we garner such gems of knowledge three hours a week in lectures, but also we take-off the better part of an afternoon weekly to prove it all to each other in lab. My lab-mate is quite a boy, name of Pasteur . . . Louie, I call him. He is a dairy major and all hooped up on a pitch he wants to try out on milk. As far as I am concerned he is a total loss to me as his notes are in French which means I have to do my own work.

I have figured but what my whole trouble is—Science has been stepping right along since I bent glass and concocted stink-bombs back in high school. In those days people were naive enough to think that one couldn't carve up an atom (guess they showed those guys, didn't they). Yes sir, I am going to pay attention from now on. At the rate things are going they are sure to get around to that trick of making gold. And when they do, old Pace will be right in there with some surveyed sewer pipe he's been saving.

# Iowa State Becomes Loser While Poly Dairy Gains

By Edward O. Boettcher

"Cal Poly shows a very definite trend of progress and a bright future ahead of it," stated Elmer N. Hansen, Cal Poly's newest addition to the Dairy Production staff, who arrived here on September first, from Iowa State college.

Mr. Hansen was born in Minnesota and received his education at University of Minnesota, College of Agriculture. World War I interrupted his college career when he entered the U. S. Marines as a member of the Second Division. At the end of the war he returned to college, working his way through, milking test cows.

In 1928 Mr. Hansen came to California and was employed by the Golden State Milk Products Company for a period of 18 months. He returned to Iowa State College at Ames, Iowa on a scholarship for his graduate work. In 1925 he accepted a position on the Dairy staff at the University of Nebraska. He held this position for four years, leaving there in 1929 to go to the Dairy Department at Michigan State College. In 1930 he returned to the Dairy Department at Iowa State College where he remained until this year.

Just before coming to Cal Poly on September first, Mr. Hansen spent six months with the American Guernsey Cattle Club at Peterboro, New Hampshire in organizing their type classification program, classifying 7000 head in forty different states. He has judged four times at the National Dairy Show and several times at the Dairy Cattle Congress and at state fairs throughout the country. Since 1926, Mr. Hansen has coached twenty dairy cattle judging teams for the National Dairy Show. Fourteen won first place at the Cattle Congress with eight teams placing first at the Dairy Show.

ELMER N. HANSEN . . . Left staff of Iowa State college to join Cal Poly's Dairy Husbandry department.

Mr. Hansen had this to say about our school. "I am very enthusiastic about Cal Poly and the practical set up that you have here. I have seen college herds at Cal Poly better than those found at almost any other schools. The Holstein herd is superior to any college herd I have seen. My entire family is enjoying the fine climate, courtesy and hospitality of the people of California."

# Mustang Flying Club Starts Year

The Mustang Flying Association is again in operation as a campus club, it was announced today by Crispin Wood, president. "This group, membership in which is open to all Poly students, has two Piper L-4-J aircraft for the use of its members and also two licensed flight instructors available to assist members in gaining their aeronautical ratings," Wood said.

Membership fee is \$100.00 which is returnable when the member withdraws from the club. Solo flight time costs members three dollars an hour and dual time is six dollars an hour.

The Association meets every second Tuesday of each month in classroom 6 at 7 p.m., Wood said.

## New High Speed Press Installed In Print Shop

by Donald Miller

A new Kelly press, the most recent addition to the Poly printshop, has begun its operation by rolling off football schedules. The new press embodies the latest in press design and is capable of making 5,000 impressions an hour.

The press will be used for high quality work heretofore impossible in the Poly printshop, such as color work and close register work, and will be used to print this year's annual, "El Rodeo."

According to A. M. "Bert" Fellows, printing department head, the new press does not take the place of any of the present equipment, but actually enlarges the scope of work taught in the printing course and definitely increases the printshop facilities.

Fellows stated further, "The erection of this precision machine was supervised by Dan H. Crowley, who works directly out of the factory. Crowley, better known as Dan, was extremely helpful in reorganizing the relocated printshop as well as being invaluable in giving instruction on the new press."

## Change Of Program Deadline Announced

Students wishing to change their programs for the fall quarter must do so before 5 p.m., Sept. 30, it was announced this week by Paul C. Winner, assistant dean of admissions, guidance and placement.

After this date students should not plan to add courses to their programs, but will be allowed to withdraw from any course with a grade of "W", provided the student is passing in the course at the time of withdrawal. Any student who drops a course in which he is not passing will receive an "F" in the course.

## Reserve Officers Dine, Dance Tonight

The mid-coast counties chapter of the Reserve Officers Association will hold its regular bi-monthly dinner and dance tonight at 8 p.m. at Mattie's, in Shell Beach. Refreshments will be served from 5:30 p.m. Dress is optional for the ladies, but gentlemen are requested to wear class "A" uniform.

The \$2.25 per plate cost will include tax and tips. All reserve officers, whether ROA members or not, are cordially invited to attend.
