

## Newcomers Affected

### Annual County TB Checkup To Be Held In September

Throw out your chest, Mac!  
The anti-tuberculosis van is on its way!

Launching the annual two-week county-wide T. B. check-up, San Luis Obispo county's Tuberculosis and Health association will station its picture equipment on the campus September 13-14 to give free x-ray readings. Sessions will be 2 to 6 and 7 to 9 pm each day. Location: next to the medical center.

All new students, all campus food handlers, employees at the dairy and poultry plants will be required to take the examination. Other students, faculty, wives and families are invited, Dean Vern Meacham announces. Wives and families are asked to come at the 2 o'clock periods.

"We all know the importance of detecting tuberculosis in its

early stages," the dean points out. "And we ought to be educated by this time to the understanding that it's actually as important for us to know that we don't have it as to know that we do."

"Cal Poly's administration considers this such a practical project that the school shares costs with other participating agencies. You and your wives and children get this valuable protective service free for your coming."

Part of their regular physical examination, the tuberculosis check will be fitted in to new students' registration and enrollment schedules. The actual x-raying takes only a few minutes, Dean Meacham explains. Those with detected symptoms will be called back later for individual conference, enabling them to take proper medical measures.

### Fire Crew Answers First Three Alarm Blaze of Summer

The campus fire department last Monday answered its first alarm this summer, and extinguished a trash fire at a small disposal area adjoining the swine unit.

The blaze had spread to the nearby brush, and was out of control when the truck arrived. Water was being pumped onto the fire just three and one half minutes after it was reported, according to Bill Slayton, who was the student in charge. He said this was reasonably good time, since the crew had to first reach the fire truck from various parts of the campus.

Most of the crew was aboard the truck as it left the fire house, but two members, Harry Dearborn and Wayne Harris, caught the rig on its way to the fire. The longest sprint was made by Harris, who was working in the Architectural lab as the alarm sounded.

The fire was first reduced to a smoldering state by the use of the self-contained booster pump. Then a hose lay was made, and streams from the two 1 1/2 inch hoses were employed to finish the job.

This was actually the second time the fire department has been called this summer, if an earlier fire of a similar nature is to be counted. The call on this occasion was not urgent, however, and it therefore was considered routine.

### War Emergency Topics Discussed As Architects Meet

The part which architects and architectural students can play in a war-time emergency was one of the topics discussed by heads of West Coast architectural schools, reveals Ralph Priestley, Cal Poly's architectural department head, who just returned from the Berkeley meeting.

Attending the meeting were the following architectural department heads: Arthur Herrman, University of Washington; Sydney Little, University of Oregon; Professor Faulkner and Vic Thompson, Stanford University; William Wurster, University of California; and Priestley, Cal Poly.

Chairman Wurster, in writing to Admiral Luis de Flores on behalf of the group, stated: "Each and every one of us want our graduates and students to use their talents in the current emergency—with particular urgency should it worsen."

The group also discussed mutual curriculum problems, teacher training in the architectural field.

The other educators expressed a particular interest in Priestley's description of Cal Poly's unique "upside-down" educational system which provides the student with a maximum amount of professional training in his first two years, but not neglecting either the theory or general education courses, the bulk of which are given in the last two years.

### Electronics Majors Prepare For West Coast Show

A truck-load of demonstration equipment, photographs, and charts portraying the distinctive features of engineering education at Cal Poly is being prepared by the students and staff of the Electronic and Radio Engineering department. September 12 they head for the Long Beach Municipal auditorium, where they will set up their display along with the other southern California Engineering schools, government agencies, and over 800 manufacturers.

The event is the annual West Coast Electronic Manufacturers Exhibit and The Institute of Radio Engineers Convention on September 13-15. Since Cal Poly has an official branch of this national engineering society, the department has been invited to participate in the exhibit and convention.

This year will see several Cal Poly "graduate engineers" in attendance at the convention. These men now in industry become "liaison" workers for the undergraduates attending the convention. Students will get first hand word from graduates as to how they are doing and also through graduates and staff members meet representatives from industry.

In July of this year a questionnaire was sent out to each of the 1949 and 1950 graduates of the department. Returns have already come in from nearly ninety percent of the engineering graduates, giving important information on their employment. All but two of the 1949 and 1950 engineering graduates are working in the radio and allied industries. Word has been received from employers stating that they are highly pleased with the way the Poly graduate adjusts himself to the job. Two graduates have gone into high school teaching. Each year the department encourages one or more graduates to go into teaching. A practical engineering education is an excellent background for teaching sciences, shops, and mathematics in the high school.

A department news letter is now being prepared containing information on all graduates and will be mailed out to the graduates with a complimentary photograph of the 1950 graduation exercises.

### Administration Shift Moves Wilson To Poly

A new organizational plan for the California State Polytechnic College, with campuses at San Luis Obispo, San Dimas and Pomona, is being put into operation this week, it was announced Tuesday by President Julian A. McPhee. The new plan is a part of an extensive study of administrative

### Three Students Win Scholarship

Winners of three additional Sears student scholarships have been announced by Julian A. McPhee, president of California State Polytechnic college.

Each is effective September 13, when California's famous learn-by-doing all-men's college starts its fall quarter.

The winners are: Robert Louis Siewerd, who will major in poultry husbandry; John Okie Gay, who will major in animal husbandry; and Richard Alvin Gularde, who will also major in animal husbandry.

Siewerd will start school at Cal Poly's Voorhis Branch, San Dimas. The other two will start at the central San Luis Obispo campus.

While still in high school, Siewerd purchased some pullets from Cal Poly projects and began what he plans to be a poultry career. He has also worked for several poultry producers in his home neighborhood, caring for as many as 6,000 hens at one time.

Gay, whose farm home out of Porterville is near Strathmore, spent his early life on West Texas and New Mexico ranches, coming to the San Joaquin Valley with his parents at the age of 11. He has been active in Strathmore Union High school activities, serving as president of his Future Farmers chapter. His principal interest is beef cattle.

Gularde graduated from Gonzales Union high school at Gonzales with a high scholastic record, was a regional Future Farmers vice president, exhibited stock at five fairs and has helped develop 40 acres of alfalfa pasture on lease with a brother now attending Cal Poly. He also operates steer and hog feeding units of his own.

structure of all the 10 state colleges made cooperatively by the State Department of Education and the State Division of Finance. Cal Poly is the first of the state colleges to put the recommendations for reorganization into effect.

Several shifts in administrative by the new plan, according to personnel were made necessary President McPhee.

Harold Wilson, dean of the college's southern branch at San Dimas since 1948, has been transferred to the San Luis Obispo campus where he will take over duties of the newly created position of executive dean. The new position will put Wilson second in command to President McPhee, with administrative responsibilities for the operation and development of the college's three campuses, San Luis Obispo, Voorhis at San Dimas, and Kellogg at Pomona.

Wilson, a 1933 graduate of the University of California college of agriculture at Davis, was a cadet teacher at Cal Poly in 1933-34. Following three years of agriculture teaching at Excelsior Union High School, Wilson was on the Cal Poly animal husbandry faculty at San Luis Obispo from 1935 to 1941. From 1941 to 1946 he served as regional supervisor for the State Bureau of Agricultural Education. He was appointed Dean of the Voorhis branch campus of the college in 1948. He will move to San Luis Obispo with his wife and two sons, ages 13 and 16, before September 1.

Moving up to take Wilson's post at the Voorhis branch is J. Corder Gibson, assistant dean of the Voorhis campus since 1948. Gibson, a 1937 graduate of the University of California, was a regional supervisor for the State Bureau of Agricultural Education for the three years preceding his appointment to the assistant deanship at the Voorhis campus. Prior to wartime service in the U. S. Army, Gibson was director of Vocational Agriculture at both Downey and Whittier Union High schools. The appointment names him dean, Voorhis-Kellogg Units (Continued on Page Four)

### Students Receive New Low Rate Insurance Policy

New group accident insurance will be available to Cal Poly students on or after September 1, Dean Vern Meacham announced this week, and brochures describing the additional services will be mailed to students' home addresses within the next few days.

It comprises extra services not covered by the general student medical plan, the dean said, paying a maximum of \$500 medical expenses for each accident, no limit to the number of accidents, at a cost of \$3 per quarter. The policy covers "all accidents," he said, whether here, at home or en route. It includes accidents incurred while engaged in sports as well.

Certain accident instances already are covered by the prevailing medical plan which will remain unchanged. Value of the new policy lies principally in its coverage of accidents not already serviced by the present program.

Students already on campus and wishing further details may secure them at the dean's office.

#### VETS ATTENTION

Persons attending school under Public Law 246 and 16 and State Laws must purchase all summer quarter supplies before El Corral bookstore closes today, August 25.

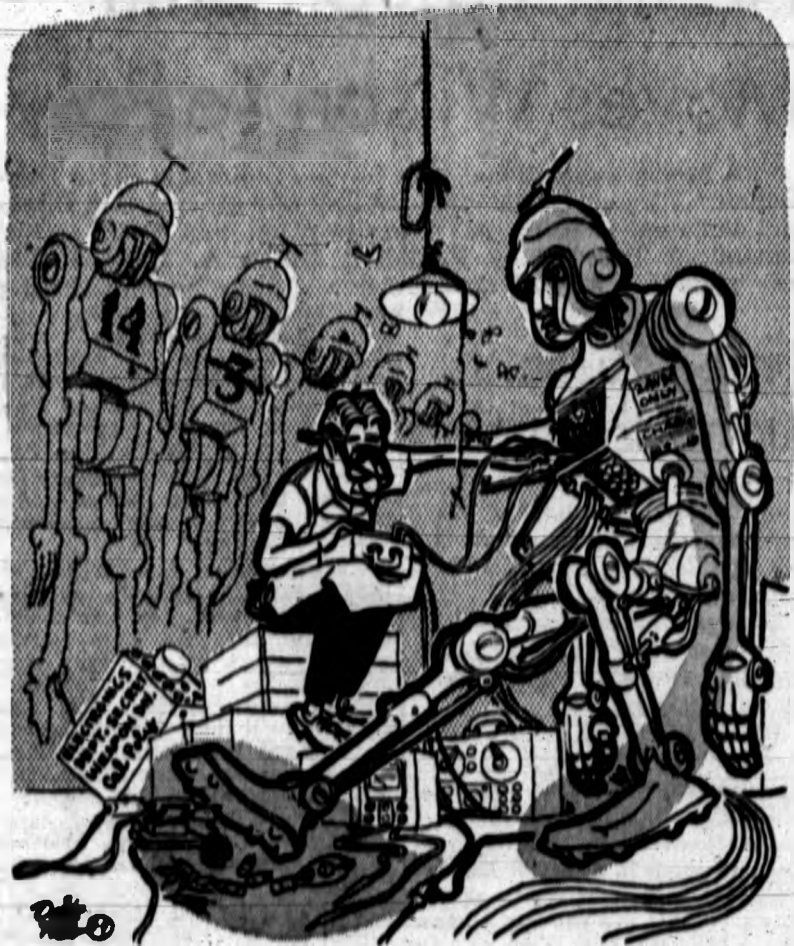

It happens every fall . . . Old king football takes his first foothold on the Poly campus next Monday afternoon when Coach Leroy Hughes sends his Mustangs into their initial grid action of the season. Pictured above are the local trainers and equipment managers going through their season rituals.

# El Mustang

CALIFORNIA STATE POLYTECHNIC COLLEGE

Published weekly during the school year except holiday and examination periods by the Associated Students, California State Polytechnic College, San Luis Obispo, California. Printed entirely by students majoring in printing in the "School for Country Printers." The opinions expressed in this paper in signed editorials and articles are the views of the writers and do not necessarily represent the opinions of the staff, the views of the Associated Student Body, nor official opinion. Subscription price \$2.00 per year in advance. Editorial office, Room 51, Admin. Bldg.

"Maybe this guy Hughes has something up his sleeve."

## Need Accident Insurance?

Somewhere amid the 60 odd inches of copy occupying the front page of El Mustang this Friday of August 25th in a small story telling of a new insurance policy being offered to Poly students. To some, this might appear to be just another space filler—it was that too. But to others, who realize the trouble to which certain individuals of campus have gone to obtain this premium, the story begins to mean a little more. Quite a little more.

For several years students who have met with campus accidents have complained loud and long about the absence of state coverage. To these people, it was not enough that the state furnished an education, but they also expected insurance against everything from a common cold to a football injury. The answer in form of the new low cost policy is now here.

For the small cost of three skins per quarter, or nine rocks per school year, a student can now be insured for all medical expenses up to 500 dollars, whether the accident occurs on or off campus. Another good point, so the story points out, your entitled to as many accidents as you can live through.

Dean of students, Vern Meacham, has worked long and hard to obtain this policy for the students. It is now up to only the students to furnish the rest. Three dollars per quarter. After all, what more could you ask. Insurance against the Selective Service?

## Stable Sweepings

Having taken most of my meals at old Mother Dan's during the summer, I was naturally caught unprepared for the sight that greeted my bloodshot eyes as I stumbled into Nuggle's beanery for a spot of chow. There before me sat scores of scantily clad females. Figuring that I had happened into a Turkish harem by accident, and being of a faint-hearted breed, I immediately bolted for the door but was restrained by the gentle application of a hammer-lock at the hands of an older and wiser Polyite.

It took considerable effort to restrain me and quiet my fears, but reason and strength combined to allay my doubts. These visions, I was told, happened to be the visiting P.E. femmes and would do me no harm. Their brief apparel was strictly the uniform of the day and met with the approval of all the brass hats. My piggish little eyes glittered at this orientation until I remembered the visitors would soon depart.

Girls, we're gonna hate to see you go. You've increased the attendance at the school cafeteria by at least 50 per cent and have again put El Corral in the black.

But, it's not only what you've done for Poly insofar as revenue is concerned. It's what you have done for the morale of those of us who have given up hope of ever seeing the opposite sex again. We know now that every cloud has its silver lining and its only a question of time until the sun breaks through. (Thanks, Jerome Kern.)

You see, girls, you represent the most important thing that this school doesn't have on the curriculum. Oh, we have sports, intramural games, pool tables, bull sessions, Olga, Al Gomes, old man Dilla, and various other entertainment. Don't get me wrong. We have plenty. But we ain't got dames.

Just ask any roguish looking young Polyite what he misses most and chances are he'll answer, blushing of course, WOMEN. Don't ask him during the weekend or you're liable to get slugged. What's more you would deserve to get

slugged.

It's not right to see these affection-starved young men wasting away to mere shells at the local pubs. What they're trying to imagine just can't be imagined.

Let's assume that the home of the Mustangs happened to go co-educational for a brief span. Why prosperity would boom. Women's shops would become a splendid source of revenue for good, old San Luis. Men would once again start ironing their Levi's. Better yet they would even try washing them. No more odor de sheep barn permeating the cafeterias. A worthwhile dance hall would prove a gold mine for some enterprising soul.

Maybe another theatre or two would give styles that didn't go out with the Hoover it a chance. The men's shops would feature administration. El Corral would try washing the coffee cups. School rallies would have that collegiate touch. Winning football games would have some meaning as well as proving a novelty.

The prospects are enough to stagger the imagination. Without doubt, the fair city of San Luis Obispo would enjoy a boom the likes of which has never been seen in central California. That sign on US 101 which reads, "California's next big city," would have some meaning to it. Man, oh man, a guy could get carried away with it all. Might even marry one . . .

After wading through all this it's easy to see that the local chamber of commerce is missing the boat as far as commercial expansion is concerned. Now all it would have to do is submit a petition bearing 100,000 signatures to President McPhes advocating the co-educational setup at Poly. If that wouldn't do the trick, give the place back to the Indians.

With better luck this coming fall, El Mustang will cease publication of this libelous column. We've been rather hard pressed on numerous occasions this summer and we've had to fill in with what we could. If all goes well, Stable Sweepings, in its present form, will trouble you good readers no more.

However, since the best laid plans of mice and Cal Poly students often go astray, it may again prove necessary to exhume the corpse of Stable Sweepings, breathe new life into it through the witticisms of some gifted writer, and once more go our appointed way.

See you in the fall providing the army gets enough volunteers.

## THE SPORTLIGHT

—By ISLER

Wonder why or how Pepperdine manages to sneak in an extra four days' practice in preparation for the CCAA opener here Sept. 16? Four days may not seem like a lot, but for a season's opener they can mean everything. No hard feelings, mind you, but why not us?

Speaking of that opener with the Waves, the locals will be seeking a bit of revenge. The southlanders have sent the Mustangs to the glue factory twice while the Poly boys have yet to bag a victory. Pepperdine defeated Poly 28-18 back in 1946 and really applied the crusher in 1947 — 47-0. But then in '47, who didn't apply the crusher?

If the Mustangs had won that game in '46, they would have been invited to a bowl game. Coach O' Daniels' charges did just about everything but win the game, at that. The locals rolled up better than 250 yards by passing alone in the second half and were sitting on the Wave eight-yard line as the gun sounded. Incidentally, Poly trailed at the half, 21-0. Who got the bowl bid? You guessed it, Pepperdine.

Incidentally, the Pops will be favored to make it three straight.

What's happened to the San Luis Blues, anyhow? A while ago Sandy Leguina's boys looked like a pretty solid ball club. Lately they can't seem to win anything. After a good showing at the Santa Maria tournament things haven't gone at all well for the Leguina men. Tavern talk, though, has it that this new pitcher, Bob MacDougall, is the McCoy, and should be of great help. The Blues could really stand a consistent hurler. No one member of the hill corps could be considered a stopper.

Maybe the heads we use aren't so lousy after all. I hope.

This edition throws the switch on the Sportlight and tucks it away until some other poor soul decides to leave himself wide

The head man...Coach Leroy Hughes, who takes over the reins of the Mustang this fall.

open for abuse. Before closing, I would like to express my thanks to the other two members who have swept out the sport's section of this paper every week. My gratitude goes to Don Hagan and Ken Wilson. Their effort, along with the other reporters of El Mustang, have made it possible for us to have a fairly complete school paper during the summer.

It also meant that the old Hawk, Russ Pyle, and Dirty Ed didn't have to take in laundry for meal money during the long summer days. Again, thanks.

## Big Grid Turnout Expected Monday

King football will rear his head from behind a cloak of summer activity on the California Poly campus Monday when Leroy Hughes, the Mustang's mentor, welcomes 70 aspirants for the first fall practice.

Hughes, looking forward to his first year as head of the Mustang pack, will direct his first practice Monday afternoon at 2:30 o'clock. Twice a day drill will be held the first week, the morning session starting at 10 o'clock.

Twenty-one varsity lettermen, eight freshmen numeral winners and fifteen junior college transfers are expected to be among those drawing suits Monday morning.

Hughes feels the Mustang first practice comes none to soon. Cal Poly opens the 1950 season on September 16 in Poly stadium, against conference member Pepperdine college. The Waves stated practice on Thursday, August 24, four days before the Mustangs.

Hughes is going along with the idea that no news is good news when speaking of military service and Mustang gridmen. The Mustangs have not been hit too hard yet; but Hughes is prepared for the worst.

Maybe yes, maybe no...maybe stay, maybe go. That's the status of Doss Sims, letterman halfback who is sweating out a call to the colors.

## Sims, Enos, Adams Called To Colors

Prospects for a good football season were dealt something of a body blow during the last week when it was announced that three fine grid prospects have been lost to the armed forces.

Doss Sims, letterman halfback, reported to Camp Stoneman for his physical early in the week. Sims may be deemed unfit for active service because of bad ankles. The speedy back would be sorry missed this coming season because he had the one thing so obviously lacking on last year's eleven—speed.

Tom Enos, a frosh guard who came into his own toward the close of last season, won't be able to lend his services to the Mustangs this fall.

Another potential star was Dick Adams, a fine prospect from the powerful Santa Ana JC squad. Adams was slated to transfer here, but was drafted before this could happen.

## Journalism Majors, Printing Students Get Photog Course

A beginners' course in the management of cameras and manipulation of photographic materials will be offered in the fall quarter, listed as PSc 481, it was announced today by William E. Bush, instructor in the physical science department.

This beginner course in photography will emphasize the use of cameras in the field of precision methods of exposure and the proper development of film in the darkroom. Continuous emphasis will be placed on the esthetic aspects of good photography. Bush stated that he will employ the zone system, which is a combination of the Archer-Adams system used in the photography schools on the coast.

The primary aim of the course is to produce capable technicians in the ag journalism major and to help them make greater use of their laboratory techniques and make the camera a useful tool. Other courses will be detailed in journalism photography, which will be taught by Ken Kitch, head of the journalism department, John Healy and Bob Kennedy. The PSc 481 will be open first to ag journalism majors and printing majors in the fall quarter. The course will consist of 2 lectures and 1 laboratory for 3 units.

## Wilson Moves

(Continued from Page One)

The new organizational plan also calls for the following additional changes: The present position of "Dean of Student Welfare" has been changed to "Dean of Students," and the responsibilities of the position have been expanded. Vernon Meacham, a member of the Cal Poly teaching staff since 1929 and Dean of Student Welfare since 1946, has been appointed Acting Dean of Students.

The position of Dean of instruction, held by C. O. McCorkle since 1942, has been retained without change of title. Dean McCorkle will continue to hold the position which makes him responsible for the coordination of instruction in all divisions and departments of the college.

Three assistant deans will become deans or acting deans of their respective divisions with the reorganizational change. Vard Shepard, now assistant dean of agriculture, will become dean of agriculture. Dr. Hubert Semans, assistant dean of science and humanities, will become acting dean of liberal arts. Charles Knott, assistant dean of engineering, will become acting dean of engineering.

## So Long Hawk...

We hear the "Hawk" has not been called. Such a shame? And so, we bid our erstwhile editor adieu. You haven't been too bad a guy Russ. As a matter of fact you've been pretty good—in your own fashion.

**PLASTIC  
Universal Seat Covers**

- Close-weave plastic fabric
- Plastic leatherette trim
- Attractive colors
- White plastic piping

Made of extremely tough,  
water resistant plastic  
that resists snagging and  
scuffing. Dirt wipes off  
with damp cloth. Attractive,  
fade-resistant colors.
