Poly Royal Queen Introduced At Valentine Dance

By Eugene Kemper

Highlight of the evening at the Valentine dance was the introducing of Poly Royal Queen Pat Walker, escorted by Gene Pimentel, to the students and faculty of Cal Poly by John Schaub, Crops club president. Miss Walker visited the campus over the weekend to have pre-Poly Royal publicity photos taken. Campus shutterbugs were kept busy capturing on film the charm and beauty of the Chico State college coed who was chosen by their student body as queen of the sixteenth annual Poly Royal to be held here April 30 and May 1.

While shutters snapped and pictures were being made of the queen in the various departments, members of the Crops club were preparing for their annual Valentine dance which was held Saturday night.

With the fragrance of a country garden, the gym was decorated with hearts, but also with almond blossoms picked from the hillside of the campus. In the center of the dance floor was a flowering almond tree under which was a fish pond complete with live gold fish. The pond was an arrangement into which persons could toss coins expecting their accompanying wishes to come true. Crops club Vice-president Bill Aldrich supervised the decorations which were used in carrying out the Valentine theme.

The Three Dukes, Stan Raymond, Skip Costa, and Ken Hawkins, provided entertainment during intermission. Dancing to the music of the Collegians, a sizeable crowd was in attendance at this dance which is becoming a tradition with the Crops club.

Home Concert Dates Set

April 1 and 2 are red letter days for the Cal Poly music department as well as for those people who are awaiting curtain call for the annual Home Concert of the Glee club and Collegians.

The men hope to be well seasoned from experience gained on their annual tour which starts March 7. This year's tour will take them to the Sacramento valley.

Each year H. P. Davidson and the members of the music department select a program varying from the classics to the latest in popular swing, in order to present two hours of varied entertainment.

Home concert tickets will go on sale March 18, and will be sold by the members of the music department.

Two nights have been chosen for the home concert in order to assure adequate seating accommodations.

'Sea Swirl' Dance To Be Presented By White Cap Tonight

The girls of the White Cap are presenting their annual sport dance this Saturday evening at the city Recreation building and invite the attendance of all Poly students.

The dance theme "Sea Swirl" will feature a nautical note in keeping with the White Cap or girl sea.

The dance arrangements are being handled by Miss Dora Serpa, general dance chairman.

Photo by Chuck Chapman

HER MAJESTY . . . Pat Walker, Chico State college coed and this year's Poly Royal queen. Queen Pat visited the campus this last weekend and was the principle subject of over 1000 publicity photographs taken by ten Poly photographers. She toured all of the industrial and agricultural departments and is shown here as she was entering the large walk-in freezing unit in the AC laboratory. John Patterson, Poly Royal publicity director, reports that everyone who met Pat during her tour, was captivated by her charm, poise, and personality. We view this photograph and see why.

Queen Pat Visits Campus; Loyal Subjects Overwhelmed

By John Patterson

Chico State college students selected Miss Pat Walker as their choice for Queen of the 16th annual Poly Royal last month. In order for Miss Walker to become acquainted with her subjects, the Poly Royal board of directors asked the "borrowed" sovereign to make a trip to the San Luis Obispo

Home Release Makes You News

It may have happened already.

Some morning not so long ago your parents or friends may have opened the local paper and read with interest and possibly surprise that you "were one of the 2144 men now enrolled at California State Polytechnic college in San Luis Obispo."

The public relations department has been working slowly but steadily at the task of sending news releases, based on the student's biographical data sheets to the various towns, cities and counties which Cal Poly men call home.

A large percentage of the stories are printed by hometown papers, either complete or in condensed form. Usually they tell what the man is studying, who his parents or relatives in the district are, and whether he is a graduate of the local high school. Special activities such as Glee club or athletic participation are also mentioned, and sometimes are printed as separate stories in themselves.

What are your chances of breaking into print? Very good, if you come from a town or a small city. Newspapers in large centers of population seldom use such stories, and the chances of your making the Los Angeles Times or the Chicago Tribune for anything short of triple murder are exceedingly remote.

campus. All of which means that the excited students so prevalent around this institution of higher learning last weekend had either just seen or were anxiously awaiting her royal highness.

Miss Walker's visit found more students with ties and clean socks on than any previous event this year. She also saw more flash bulbs and cameras than any previous visitor to the campus. Student photographers set a new record for exposing film which should stand for a good many months to come.

While here, Miss Walker appeared at the Crops Club dance, made recordings, appeared on an interview over radio station KVEC, visited every agricultural and industrial department on the campus and saw most of the science and humanities division. In short, she was a busy girl all of the time. Nevertheless, she kept her famous smile and managed to walk her squires into the ground. "Weaker sex? I'm so tired I don't remember what a chair looks like and there she goes, fresh as the proverbial daisy," quoth one of her party.

Highlight of the visit for the board of directors was a supper party Saturday night. Miss Walker met her retinue of princesses at the party and the board met the entire royal court for the first time.

Queen Pat was visibly impressed with the activities of this college and compared them with her own Chico State. When she returned to the northern campus Sunday afternoon, she said that she was looking forward to Poly Royal and could hardly wait for the dates for the country fair to arrive. All who met her here felt the same way.

Resolutions Accepted by Student Vote

The tabulation of the ballots concerning the Western College Congress resolutions which were voted upon by Poly students two weeks ago, showed a general acceptance of the majority of the proposals, according to Bob Rivers. However, there were a few of the resolutions meeting with negative favor with Mustang voters.

These failing to be accepted were: Art. 2, no. 4; Art. 4, no. 4; Art. 5, no. 2; Art. 7, no. 2. Opinion was more evenly divided on some of the other proposals.

The remainder of the resolutions passed by a majority of four to one or higher. The total number of ballots cast came to 321, which is 14 percent of the student body. This is a relatively high portion of the eligible voters. It is an encouraging sign that there are many students at Poly who are interested in international politics.

Rivers added that the results are in the process of being forwarded to Clifton Forster, chairman, Western College Congress, Stanford university, to be included with results from the 82 other western colleges. These final tabulations will be made public as soon as the information is received.

WINS POPULARITY CONTEST

NO, the man in this picture is not upside down! You must be reading this standing on your head. Little wonder you can't pass the Finger-Nail Test. Better straighten up and streak down to the corner drug store for a bottle or tube of Wildroot Cream-Oil Hair Tonic. Just a spot of Wildroot Cream-Oil grooms your hair neatly and naturally—gives it that neat, well-groomed "college" man look. Relieves annoying dryness and removes loose, ugly dandruff... It's non-alcoholic, so don't try drinking it. Remember, however, it contains soothing Lanolin. Get Wildroot Cream-Oil hair tonic today and see for yourself why it's "again and again the choice of men who put good grooming first." For generous trial supply free, send this ad with your name and address to Wildroot Co., Inc., Dept. C-D, Buffalo 11, N. Y.

State Rehabilitation Veterans Notice

Students attending this college under the benefits of either the California State Veterans Assistance or the California State Bureau of Rehabilitation laws should take immediate steps to contact the proper agency and request a letter of authorization for the Spring quarter March 15 to June 4. Winter quarter letters of authorization will expire, under both laws mentioned, on March 5.

Summer would be our favorite season if it were not for the heat.

Poultry Club Talks Turkey

J. J. Mac Ilraith, internationally known research worker in turkey breeding, is scheduled to speak before the Poultry club at a special meeting Feb. 24 at 7 p.m. in CR 14.

A field representative for the California Turkey Growers association, MacIlraith will draw from his 16 years experience as supervisor of the Ontario Turkey Research farm, Ontario Agricultural college, Guelph, Ont., Canada and try to discuss problems pertinent to the conditions facing prospective turkey men of today. He will also attempt to answer all questions put to him by the club members.

Mac Ilraith has had practical experience as a breeder, exhibitor, and judge as well as field and research work in breeding, type, production, fertility, hatchability, and other phases of the turkey industry. One of his many accomplishments is the ability to detect fertility in a fresh turkey egg. Many of the club members are anxious to learn how he does it. Dozens of other problems will be discussed during the evening.

A short business meeting will precede the talk and there will be an opportunity to meet the speaker personally after the formal discussion.

Ski Club Invades Badger Pass

Yosemite's Badger Pass was invaded by seventeen members of the Cal Poly Ski club this past week end. Leaving the campus Friday afternoon and arriving at Yosemite Lodge that night, the skiers found the accommodations a little crowded with nine men in a four man cabin.

The three tows operated all day, and with a variety of trails to choose from, the skiing was excellent. Outside of a few strained muscles there were no serious accidents. That evening, with their skies removed, the members enjoyed ice skating and dancing at the Ahwahnee hotel.

Intercollegiate skiing was witnessed Sunday and it is the objective of the Ski club to improve the skiing of its members so that they may enter future meets.

Gamma Pi Delta Holds Dinner Dance

The Gamma Pi Delta, honorary agriculture fraternity held their annual dinner dance Friday, February 13, at The Oaks, near Paso Robles. Twenty-five couples attended the steak dinner and danced to the music of the Three Dukes.

Honorary guests included Messrs. and Mrs. Chester O. McCorkle, Vernon H. Meacham, Paul C. Winner, and John E. Jones. Fred Morgan was chairman of the function.

Newman Club To Hold Breakfast

The monthly Newman club Mass will be held Sunday, February 22 at 9 a.m. This will be followed by breakfast in the Old Mission hall.

Students who wish to attend the breakfast are requested to contact Henry Valcarlos, Box 5, Cal Poly no later than February 20.

The regular meeting of the Newman club will be held on Tuesday, February 24. All Catholic students are invited to attend as a very interesting program is planned.

A.P.O. Club To Request National Charter

At the meeting of the proposed chapter of the National Service Fraternity, Alpha Phi Omega, twenty-four men decided to form a club called APO which must be active on the campus before we can be issued our charter by the National headquarters.

At the next meeting March 22, the club constitution will be voted on, and officers will be elected. After APO is accepted on the campus, and has accomplished

Mech. Eng. Club Changes Name

At the regular bi-weekly business meeting of the Poly Engineers club a new constitution and name were approved by the members.

The old constitution became obsolete with the approval by the student body of a new SAC constitution. Rather than amend the old constitution, a new one was drafted by a committee appointed by the president, Paul Weller.

The name has been considered inappropriate for a long time by the majority of the membership. With the need for a new constitution, a new name was also considered. The name was changed to Mechanical Engineering Society.

The meeting moved to the projection room where the members viewed three very interesting movies.

New members are welcome to all future meetings and to participate in the activities for the remainder of the year.

some service project, it will apply to the national headquarters for its charter. If you wish to be a charter member of this, the first national fraternity on the Poly campus, come to our meeting on March 22.

President Wes Wilson presided at the informal meeting, with W. B. Howes, and Dr. A. L. Houk attending as faculty advisors.

Iran in a Nutshell Is Topic for Crops Club

By Ernie Heald

Kalkhorasrow Soroushain, a student from Iran, spoke at the Crops club meeting Feb. 4. Soroushain informed the members on a number of things about his country that many of us in America were in doubt about. Iran was formerly called Persia. This nation is about 3000 years old, is three times as large as Texas, and is

located in southwestern Asia. Most of the 2 million people are Mohammedans and speak the Persian language.

Their government is a combination of the French and British systems. A king is at the head, but a parliament is elected by the people every two years. This parliament appoints the prime minister and governors of the ten provinces of the country. The central government also chooses the mayors for the cities. The capitol is located in Teheran.

The third largest oil refinery in the world is located in Teheran and as oil is free flowing, pumping is not necessary. This oil seems to be the cause of most of Iran's foreign affairs trouble. Britain has the oil concessions in the south and Russia wants concessions in the north. "This and other things led to

an undeclared war on the country by Britain and Russia in 1941."

A surprise to the agriculture students listening to Soroushain was the statement that Iran has a large diversity in agriculture, including rice, dates, fat-tailed sheep and citrus, which he believes superior to our own in both size and quality. A much needed canning industry is being built up to make fruits, etc., available the year around.

Iran's education is based on the French system. To help build up the country and the educational system of Iran, the government is sending students to various countries. These students are to get doctorate degrees before returning.

"If they don't make it," he said, "it's the army for them when they return." The University at Teheran has about 10,000 students enrolled.

BULLDOGS TO BARK TONIGHT

Aztecs Encamp Tomorrow

The Bulldogs from the Valley move into the Poly gym tonight in an effort to find out what makes the Mustang run. Fresh from an upset over COP last week-end, the Fresno club will be out looking for their third conference victory this season.

Led by Bob Voetberg at the pivot, and Len Sondergard at one of the two guards slots, Coach Dutch Warmerdam has come up with a sharp-shooting aggregation. Loss of Vern Riggins earlier in the season, removed a 6 foot 6 hunk from the Bulldog, but the Fresno cagers are evidently recovering but fast.

On the Poly side of the fence, the pasture looks a little greener for the first time in weeks. After the "close" against San Jose last Saturday, it looks like the night for Coach Jorgensen's boys to roll. The Poly lads are at top shape and with a couple of wins could pull themselves out of that cold dark cellar.

True enough, only one win can be garnered tonight, but the San Diego Aztecs will pitch their wigs here tomorrow night and who knows what might happen at a friendly little campfire meeting.

The Aztecs gathered one more warrior into the fold this week with the return of Dick Barnes to the line-up. Barnes has been high point man for the tribe all season and few tears will be shed at his return from Aztec eyes. Backing up Barnes will be Don Smith and Ken Wulfmeyer at guards; Tom Keasey and Don Nuttall at forwards.

Just to give you a rough estimate of how sharp Coach Charlie Smith's men have a total of 529 points between them.

In tonight's semi-windup, Coach Bob Mott's Frosh will go to the firing line against the Fresno Frosh. The CP frosh have already defeated the Bullpups once this year and will be looking for their second win over the Fresno aggregation. Tomorrow night will see the Native Sons, town team, face the Mustang juniors in the preliminary.

Grapplers Travel To SF State Meet

Coach Carl Voltmer's Poly twisters lost their first meet of the season last Thursday night when the Spartan grapplers edged them out 19-14 in the Washington Square gym.

Leading the Poly attack was Fred Adams who decisoned Jim Felice in the 175 bracket, Poly's Bob Hunt who pinned John Albright in the 165 division, Jim Dowe and Russ Cirincione who both took their men on decisions.

The bout score stacked up 5-4 in favor of the Spartans, with Mike Churillo, Jim Amos, Al Enfield, Dick Hutchinson, and Ken Karman dropping bouts for the Mustangs. Saturday night will find the Mustang grapplers at San Francisco where they will meet the 'Gators in a nine bout card.

When Noah sailed the ocean blue, He had his troubles same as you; For days and days he drove the ark Looking for a place to park.

Cross Country Men Enter And Place In Marathon

Cal Poly's five man cross country team possesses this week several trophies as a result of placing third in the first annual Excelsior Marathon race held in San Francisco Sunday.

Walter Boehm, covering two laps of the two and one quarter mile course in 30.22 minutes, took a fourth place to finish ahead of other Cal Poly entries. Also placing for the Mustangs and their times were: John Lesley, fifteenth, 32.35; Everett Johnson, sixteenth, 32.37; Rick Wilkinson, seventeenth, 32.45; and Bud Lee, twenty second, 33.45.

Forty six started the race which was open to any five men, any single unattached runners, or any man representing odd clubs. Five full teams entered the race with the Petaluma Spartan team club taking top honors followed by the Excelsior Marathon club.

Trophies were donated by Excelsior district merchants to the first 20 finishers, and others completing the course received medals.

Track Coach Edward Jorgensen stated that he was pleased with the showing of the Cal Poly runners for they were up against some of the best on the coast.

Jorgensen announced the first track contest has been set for March 22 on Poly's new track against Westmont college of Santa Barbara and he urges all track men to begin workouts immediately.

Doubles Teams Enter Tri-County Tournament

Four doubles tennis teams representing Cal Poly will enter the tri-county tennis tournament scheduled for this weekend in San Luis Obispo, it was announced today by Gene Smith, coach of the Mustangs.

Smith, former University of California net star and internationally known tennis player, stated he will team up with Cliff Johnson, former University of Southern California player, to make up another doubles team.

Representing Cal Poly will be

DON GARMAN . . . Returning letterman from last years Poly baseball nine. Don returns his port-sided pitching ability to the mound this year and will be one of the mainstays of Coach Bob Mott's pitching staff.

Mustang Nine Begins Practice

The Mustang diamond men turned out in full force this week for the first complete practice session of the spring season. Coach Bob Mott started the squad back to shape on Monday evening and by Wednesday had the men holding batting practice.

Some 45 men turned out for the various positions. From these men two squads will be formed with the varsity under the direction of Coach Mott and the JV's under the tutelage of Coach J. C. Duel and Hank Moroski.

Although several of the old veterans made another appearance on the diamond this spring it looks as if some hustling is going to be done to keep the rookies out of the line-up.

Dairy Herd Receives Quality Award

The Cal Poly dairy recently was awarded a 450 pound butterfat certificate by the Guild of Gopaths, an organization of dairymen interested in the Dairy Herd Improvement association who have had averages of 350 pounds of butterfat or more.

The Poly herd averaged 466 pounds of butterfat during 1947 for 73 cows.

Bob Redden and Art Chaffee, Irvin Suain and Greg Ebatt, Ronald Johns and Paul Charles, Don Seaton and Bill Curtiss.

Cornelius Slated To Box PCI Champ

By Jerry Carter

Kenneth "Rawhide" Cornelius is rumored to meet John Nikceovich, PCI heavyweight champion, at the Cal Poly-UCLA meet Feb. 28. "Rawhide" is a likely contender for the 2C2A heavyweight championship, and so far he has had trouble in finding fighters to climb into the ring with him. Nikceovich may prove to be too much competition for him, and again he may not. This remains to be seen, but either way, it should be a good scrap.

Olympic weights will be used instead of the 2C2A weights. These weights run about the same, with the exception that the Olympic's have two smaller weights, 112 and 118.

Cornelius is one of the best trainers on the Poly squad. For example, one of his stunts is a little jaunt up to the "P" and back; he does this in 17 1/4 minutes. Not only does he run, but he works on the light and heavy bags consistently, sometimes in the morning and sometimes in the evening, or whenever the opportunity presents itself. "Rawhide" is also a good wrestler. Besides boxing, and wrestling, he is rapidly developing into a fine guard on the football squad.

With all this, it is only fair to warn Nikceovich to be in shape for their coming bout.

Intramural Tourney By Culver

The intramural basketball tournament drew to a close this week with the Ball and Chain quintet copping the championship playoffs by downing the Jolly J's quintet 30 to 29 in a hard fought contest. The Ball and Chain "Champs" proved to have just too much height for the scrappy Jolly J's. Continual control of the backboard by the victors held the Jolly J's scoring chances down throughout the contest.

Harold Winslow was high scorer for the champs sinking six field goals for 18 big points. Winslow's team mate, Carnahan, playing guard, followed with 10 points.

"Have a pack of Dentyne. It's fine after meals!"

"Just as I reached my boiling point I gave the chef a pack of Dentyne. That got me out of the royal stew fast! Naturally—because Dentyne's keen, delicious flavor always makes friends fast! Dentyne also helps keep teeth white!"

Dentyne Gum—Made Only By Adams

HOOOF PRINTS

Ah, yes, but a faint aroma of something rotten has drifted down from the bay area these past few weeks. No sooner had the big iron gates of the Hilltop Institute squeaked shut on Chicago Rockets bound Ed "I got the cleaver" McKeever than all hell broke loose in the usually silent halls of old USF.

Big Ed, upon arriving a safe distance from the Don's retreat turned and took one last parting shot at his so-called buddies, and what a shot it was. In fact, Mac could well be compared with that gent that stood on the Concord bridge sometime back in history. "Griever" McKeever might or might not have been speaking the filthy truth, but nevertheless it was filthy and no matter what the reactions are to his booming accusations they're going to lean towards the bad side. Too bad! With the beatings we've taken from the eastern sports scribes since the Arroyo Seco affair plus the latest words right from Ed "the horse" McKeever's mouth—things look dark indeed tonight.

Latest results from the Hilltop track seem to be anything but favorable. The rolling ball of unpopularity was given its initial push last week with Uncle Willie Hubbard's announcement that San Jose will sever relations with the Frisco club. Hubbard went on to say that he was well aware of the situation that prevailed last season but he did not have any idea that so many Don players were ineligible—21 to be exact.

I can't picture Father Sullivan, Don athletic moderator, losing too much sleep over the loss of San Jose from his schedule—but where will it end? This seems to be the big question of the day. But let's get off the soapbox, Hubbard. It seems that Stanford stated they would play the Spartans only on condition that USF be dropped from the Washington Square schedule. But this does offer a good way out—doesn't it. Surley the mighty Cards can't be worried about the Hilltop boys outgrowing their jerseys, or maybe their independent status.

If Poly hasn't accomplished anything else these past few weeks it's certainly built up its name in the minds of a few San Jose chillians. The wrestling team started things off last week losing by a narrow margin to the Washington Square grapplers, and the Mustang quintet followed up by giving Coach Walt McPherson and his blue and white chargers the scare of their lives Saturday night. Quite the game, so say the San Jose papers. The impossible seemed to happen with even the Spartan rooters giving forth a couple of tonal vibrations when Coughlan and Moroski made some of their circus shots.

It seems there's a lot of griping going on around the campus lately concerning the basketball ducat situation. Although several complaints are floating around, the main dig seems to be that tickets are released in town while only part of the student body can get in the game.

Here's the gis. The gym holds approximately 650. 500 seats are released to the students or roughly 5 out of every 6 tickets. The basketball team receives one-half and only one-half of its expenses from the SAC in return. Fair bargain? No slide rule needed here to find the answers. In other words, the athletic department would be within their rights to issue only one-half of all tickets or 325 to the students. The other half could be sold to help defray expenses.

Out of the meager sum collected for these 150 pasteboards which are sold, or I should say given away, at 75c per, the visiting team gets their meals and lodging. And if the local casaba artists behave themselves on the road games, they collect a rock for an after-the-game snack. The season usually ends with the quintet selling their warm-up jackets to the baseball team at a reduced price in order to make the books balance.

No, fellow ulcer-sufferers, until the SAC gets rich enough to support the casaba five, or the team gets poor enough to get along on half the expense that that it does, tickets are going to be sold out of school, and that many more students will stay home, or wherever students stay on week-ends.

Close Encounters Repeated As Mustangs Drop Two

By Bill Roth

The Mustang hoopsters did it again last weekend, losing to COP 64-52 and dropping a close one to San Jose State 56-58. Both games were away from home and ended Cal Poly's road appearances for the season.

San Jose was the scene of Saturday night's game and the packed house almost witnessed one of the major upsets of the year. With the score 32-24 in favor of the Spartans at the half, Poly came back on the floor to almost burn up the court with baskets in the second half as they scored 29 points to San Jose's 24. But the eight point lead the Spartans had built up at halftime was too much to overcome.

Bobby Coughlan made a lone stand to keep Poly in the game at intermission time with his timely shooting. All Bobby did was to score 18 points in the first half. Hughes, leading point maker in the league, didn't do so badly himself as he dropped in 15 points in the first half to help San Jose's cause.

Spectacular Second Half

In the second half Coughlan and Moroski continually drew applause from the crowd with their sensational play. Moroski, who was held to three points in the first stanza, began to get his eye and Coughlan continued to hit the bucket to run the Spartans a merry chase.

With four minutes left in the game, San Jose was able to hold on to two point lead. But the height advantage and terrific pace began to tell and the hard fighting Mustangs could get no closer. San Jose did a good job of freezing the ball for the last three minutes as the game ended 56-58.

Coughlan, who could only garner four points in the last San Jose encounter, dumped in 24 points to beat Hughes for the high scoring honors of the evening by four points. Hank Moroski, who is currently in third place in conference scoring, swished in 16 points.

Poly has one consolation from the San Jose series anyway. They have given the Spartans the two hardest games they have had this season so far in conference play.

COP Wins by Twelve

Friday night at COP was the same old story again as Poly got off to a cold start. In the first ten minutes they were able to score but three points as the Tigers from Stockton ran up a commanding lead. The Tigers, led by Bud Proulx, went on to run up a 30-20 lead at the end of the first half.

As has been the case in so many of the games this year, the Mustangs came out in the second half and played right with the Tigers matching them point for point. But running according to the script, they couldn't make up the 10 point

Power for Poly EE and ME Co-OP.

Electrical engineering students, Robert L. Sagaser and Virgil Waldorf are working with the mechanical engineering department for the purpose of generating part of the electric power needed at Cal Poly.

This project was speeded up by the power shortage now in existence, Sagaser said. Everything has proved successful and generating units will go into operation in the near future.

FFA Judging Here May 8

The annual state final Future Farmer Judging contests will be held at Cal Poly May 8, it was announced today by J. I. Thompson, livestock specialist for the bureau of agricultural education.

Thompson states that only seven of the eight contests will be judged.

He lists them as livestock, dairy cattle, poultry, ag mechanics, trees, milk and agronomy. These different divisions are set up by the

individual departments at Cal Poly.

It has been suggested by Thompson that the students give their cooperation while the Young Farmers are visiting the campus.

Thompson also stated that the indicated number of schools to enroll for the contests is greatly increased over the 17 previous contests held here.

Another Side of Cal Poly

Ed. Note: We reprint the following editorial from the Feb. 9 issue of the San Luis Obispo Telegram Tribune.

Activities of the agricultural department of Cal Poly have become well known to the public through its many organizations and appearances of its prize stock at shows and fairs. Among 4-H clubs, Future Farmers of America, and agriculturists generally, we suspect that Cal Poly and championship bulls have become pretty much synonymous.

It was nice to learn, therefore, that the electronics and radio engineering department of California State Polytechnic college has attained national recognition from the Institute of Radio Engineers. Acceptance by this national professional society puts the Cal Poly department on a par with the leading universities of the nation in this field. The most careful study of Cal Poly scholarship and methods was made before the department was accepted by the IRE.

And so we have proof, if any were needed, that the cows and the bulls are not stealing the whole show at Cal Poly. The electronics and radio boys can't lead their projects around with a halter for everybody to see but they are not taking a back seat to anybody when it comes to department progress and national recognition.

Truman Signs Vet Bill

This being a "neighborly" school, we all go around calling everybody by their first names, or so they say. Harry, signed the Veterans training subsistence increase bill giving all veteran students a raise in their subsistence allowance.

As of April 1, single vets will pull a ten dollar bonus, or \$75. Married men with just a wife will get \$105, or a rise of fifteen bucks, while those men with a brood will now receive \$120.

The bill did not raise the total amount of money that a student veteran can receive, through subsistence allowances and part time jobs. The present ceilings of \$175 for single men and \$200 for married men have remained the same. Therefore, a man earning \$200 a month or more would get no allowance, while a vet earning \$150 would receive only enough from the VA to bring his total up to the ceiling.

The general consensus of opinion among the long haired vets that I approached was that it was about time. Most of them have been in school for a year or two and they are beginning to need a haircut. Naturally, every veteran's wife has the new raise spent already, especially, when the local merchants pick this time to put out their big sale of the year.

—D.W.G.

School For Country Printers Attracts Wide Interest

By Don Chatters

Progress in Cal Poly's "School For Country Printers" has aroused international interest. It was announced today by A. M. "Bert" Fellows, printing department head.

Applications have been received from men in Iran, Hawaii, Canada, Washington, D. C., Missouri, Utah, and Arizona. "But," Fellows stated, "the course is still primarily to train California men for work in the printing industry in California."

The course, under the supervision of Fellows and his assistant, Guy Culbertson, now has 14 majors enrolled, with a present maximum set at 25 students.

Students are instructed in all operations of the trade, and completion of the course will qualify the graduate to operate a country

newspaper and job shop, or work as a specialist in any other branch of the trade he chooses.

The shop now has as its main equipment, three linotype machines, a Whitlock cylinder press, a Kelly high-speed job press, a new power paper cutter and all the hundreds of other miscellaneous pieces of equipment necessary for a country shop.

In addition to publishing the school's weekly newspaper, El Mustang, men of the printing department produce the monthly edition of the Future Farmer magazine and also miscellaneous job work for the different student organizations of the college. All of this is done in addition to the regular class work the majors are required to do each week.

From Early School Days

By Phillip Nasrallah

As was the prevalent practice then, all the mission schools in the Orient used to devote the lion's share of their curriculum to what they modestly called, "spiritual enlightenment" or "Bible study."

But to us boys of less than ten years of age, these "spiritual sessions" had come to mean corporal torture. Day after day we memorized and recited fluently pages and pages from the Bible. Of course we hardly understood a word.

Very often as mild an error as a mispronunciation of the name of one of the deities or the sudden lowering in tone at a place where it had to be gradual was settled by nothing less than ten lashes.

Lashes Administered

The penalty was contracted in a cold blooded, business-like manner, the number of lashes varying directly as the intensity of the error.

And so, we decided to stick together and ignore the Ten Commandments by cheating when the need arose.

I well remember that day when my friend and desk neighbor was called upon to recite Psalm III. He went smoothly like a parrot through the first half of the assignment, but was stuck at the verse that read, "The works of his hands are verity and judgment . . ."

He blushed and trembled and simply could not recall that verse. The alert attention of the teacher and his large flapping ears frustrated all my attempts of whispering or signalling.

Opportune Assistance

Right in this tense moment, however, my hand semi-consciously sneaked unnoticed and pressed my friend's hand under the desk.

He caught it, and his smile shone again as he exploded with "The works of his hands are verity and judgment . . ." and he ran through the rest of the Psalm.

Before we had time to rejoice, a back seat boy who had seen it happen rose up in protest: "Sir, sir, he prompted him!"

When the teacher inquired surprisingly for clarification the boy went on to say, "I saw him press his hand to remind him of the word 'hands' and so he remembered the verse of 'The works of his hands are verity and judgment' . . ."

Caught Off Guard

The teacher was surprised, and luckily enough looked pleased. After a very hearty laugh in which we joined rather cautiously, he remarked, "I wonder which one of you boys is the brightest?—the originator of the idea, the one who readily picked it up and made use of it, or the one who detected it! ! !"

Sometimes a smart violation does pay off.

FROM THE DESK OF THE EXCHANGE EDITOR

With Dick Simpson

Student cigarette borrowers fall into four categories; they are—the good natured creep, the thrifty soul, the apologist, and the shrewd character.

The good natured creep will wait until you offer him a cigarette, at which time he will eagerly help himself. Then in a good-natured way turn to the others assembled and holding out your pack of cigarettes ask, "Does anyone care for a smoke?"

The thrifty soul will never refuse your kind offer of a smoke. He will in fact, take two or three telling you he would like save them for his next class. He will then produce an almost full pack from a hidden pocket and carefully proceed to place your cigarettes among his own.

The apologist more than any of the others always gets my dander up. His insincere qualms will continue day after day until you can almost recite with him all his bromide-like apologies.

You don't dare ignore the shrewd character when he wants one of your weeds. He will wait until you produce a pack from your pocket and then begin to stare at it as if it were a bar of gold from Fort Knox. If you fail to offer him one, he will begin to cough and wheeze until you are forced to recognize him and ask weakly: "Oh, did you want one?"

If a congressman ever introduced a law to the legislature, making the nonpayment of cigarette debts a capital offense, he would have no difficulty in obtaining unlimited support.

"For two and a half cents a day a student can be covered with a complete accident insurance policy, stated Barney Carmen, graduate manager.

This policy may be obtained in the registration line and the cost is \$2.50 a semester for students and \$2.75 for faculty and college employees. It insures the holder against accident of any kind occurring any place, with the exception in an ath-

LETTERS to the EDITOR

Dear Editor:

I have talked to several people concerning Cal Poly's campus. There is one question which puzzles almost all of them.

Why is the large area in front of the Administration building only diased and not landscaped? If the plot was seeded and made into lawn it would not only improve the appearance, but also give the student body a little more pride in their school.

In the college catalog a course in landscaping is listed. If this course is actually offered, why doesn't it use the front of the campus as a lab instead of some back lot?

Chuck Meinhart

P.S. Where was that picture taken of the beautiful fish pond and coeds which appeared on the cover of the bulletin sent to me about three years ago?

Ed. Note:

As all the following letters are supporting the idea of a Student Union building, we have taken the liberty of printing excerpts from each.

Dear Editor:

After reading your editorial in last week's El Mustang I feel convinced that something should be done to promote the building of a Student Union.

What we should do is run raffles, lotteries, parties, dances, and dinners and anything else during Poly Royal at a price, and put all the proceeds into the fund for the student building.

Why don't we get some big name radio program to broadcast from our campus and sell tickets for the building of a Student Union.

If it takes too much money to build a fancy structure, why don't we have a barn as you suggest, only lets get the barn by buying one of the Army service clubs out at Camp San Luis Obispo, move it to the campus in pieces and put it up ourselves. The biggest cost would be labor and we have lots of that here.

Bob Williams

Dear Editor:

I do not know of any normal college which does not have a Recreation building. I believe that this kind of building which you discussed in your last editorial is especially essential for Poly. We are so widely distributed as to living areas and departments and ways of living that we need a place where we can all meet like a huge family, bring our veins together, and agree or disagree.

Furthermore it would be a good idea to be able to have more fruitful contact with the town residents through a different medium than the football field and the wrestling arena.

Don Torsey

Dear Editor:

If you were living in the camp or downtown you would then wonder what to do like I and many others do at a time when all classes stop. El Corral and the snack bar close, and even the library shuts its door in your face. Nevertheless, you are compelled to stick around and wait for supper time.

If for no other reason than that I am for the Student Union building. . . .

Bill Martin

File Thirteen - - -

Reading over the other school papers sent to us each week is a good way of keeping up with school trends around the nation. Noticed one article about Lehigh College in Penna., where they're starting a new plan for grading the teachers.

The scheme was voted on by their student body and goes into effect after the final student grades are recorded. Instructors are graded "above average," "average," or "below average."

The Lehigh faculty seems to like the plan which would mark them according to clarity of presentation, individual help, promptness, and general ability to get their point across. Other measurements include stimulus to thinking, quality of texts used, and fairness of quizzes.

It might be interesting to see how such a system would be accepted by the faculty and student body here at Poly. Any citizen of the campus who has ideas on the subject might voice them through the "Letters to the Editor" dept.

For the use of all citizens of this institution of higher learning, El Mustang has put a box for your contributions. Said box is located on the corner of post office lane and El Corral alley. It would be appreciated if this box were used for contributions and not a waste basket or as a mail box.

As long as I'm stomping on the beanery, this would be a good time to suggest that the sandwich and coffee section of the line be switched so that there might be some chance of getting a HOT cup of coffee.

letic event. These men are covered by a separate policy.

Accident in which there are medical bills up to \$500 will be paid by the insurance company, American Employee's Insurance.

Since 1944, \$2,157.45 has been paid to policy holders at State College.

Exc. Ed.—Sounds like a good deal to us—let's hear your comments.
From San Diego State's Aztec.

Union Pacific Ag Program Aids California Students

Joe W. Jarvis, supervisor of agricultural development of the Union Pacific railroad, was the principle speaker at a banquet of the Cal Poly chapter of Young Farmers, held Thursday night, Feb. 12 at cafeteria No. 1.

Jarvis presented a picture of the late Carl Raymond Gray, originator of Union Pacific scholarships to worthy agricultural students, to the college. In making his presentation Jarvis stated that Cal Poly was one of the few agricultural colleges he has seen which makes it a practice to train farmer boys and return them to the farm.

He said, "The weakest point in the program of other agricultural colleges is that sending farm boys to college is the quickest way to get them off the farm. Colleges can train them to return to the farm and I have observed that Cal Poly is doing that."

Jarvis reviewed the history of the Carl Raymond Gray scholarship plan.

The scholarship plan started in 1921 in Nebraska and since that time has spread to every state served by the Union Pacific. Scholarships to worthy Future Farmers in California started in 1931, and 41 have now been used by California boys.

California Polytechnic President Julian A. McPhee thanked Jarvis and UP President George Ashby for the picture of Gray and stated that he was happy to hear approval of the college program.

Vernon H. Meacham, dean of student welfare, introduced to the railroad representatives, and the guests at the banquet, six past winners of the Gray scholarships—Avon Carlson, Ralph Cogan, Wayne Keast, C. N. Plester, Alex Benjestorf, and Ronald Dunlap.

Toastmaster for the evening was Bob Bowman, past national president of the Future Farmers and president of the freshman class. Young Farmer President Jim Jessup and delegate Ray Vernon reported on the Young Farmer Convention held recently in Modesto. Dean of instruction C. O. McCorkle, introduced members of the bureau of agricultural education and other deans of the college.

Entertainment was provided by the Symphonettes, the vocal group of the Student Wives club and the Variety quartet.

TRUTH OR POETRY

The following took place in Mr. St. Clair's Econ class the other day.

Prof . . . "and the U.S. has been off the gold standard since 1933."

Student . . . "Well what sort of standard are we on now?"

Voice in the rear of the room . . .

"Standard Oil".

'Pacific Poultryman' Contains Feature Story

As the result of a recent visit to the California State Polytechnic College campus by Roland C. Hartman, editor of the "Pacific Poultryman" magazine, the February issue of the magazine contains a feature story on the poultry department, and a cover picture showing Department Head Dick Leach and student Ted Cope.

The magazine, with a circulation each month of more than 50,000 copies, reaches practically all of the \$800,000,000 poultry industry of the Far Western states.

With a display of four pictures which help to tell the story, the article by Editor Hartman, titled "They Learn By Doing," emphasizes the fact that at Cal Poly students learn the poultry business by running a plant, having 4,000 mature chickens and that they share in profits that may be earned.

As a rule, anything shouted or whispered, is not really worth listening to.

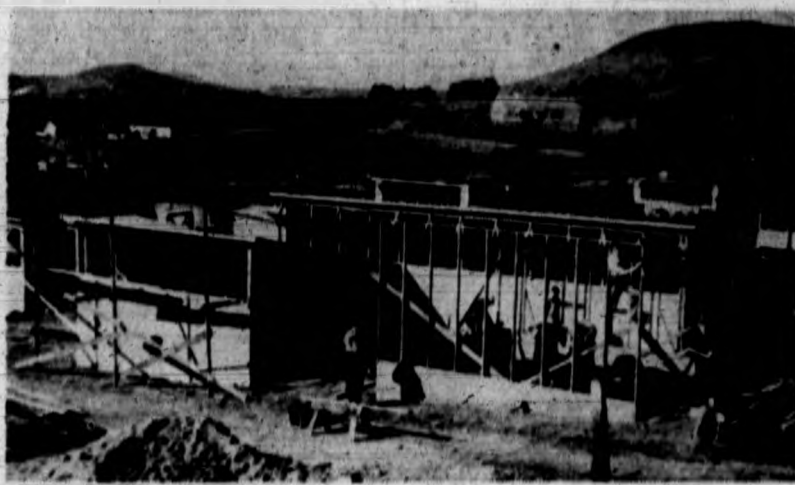

Photo by Johnny Mayer

LUCKY CHICKENS . . . The absolute best is none too good for Poly poultry. Shown here under construction are the new brooder-laying houses which are included in the general expansion of the poultry plant. The new houses, constructed by farm carpentry and poultry students, are heated by radiant hot water coils buried in the concrete floor. There will be natural gas, water, and electrical outlets in both houses. The versatile houses can be used for either brooding or laying depending on the season. One house awaits only the floor heating coils and the other will be completed soon.

ANDERSON HOTEL BUILDING

**"I'll be
up there soon!"**

UP WHERE the ceiling's unlimited and the horizon's as wide as the world! Up where there's freedom and adventure—and a man can dare to do what no man's done before!

You're on your way up there when you join the Aviation Cadets. After a year's pilot training, it's silver wings for you—and a commission as Second Lieutenant in the U. S. Air Force Reserve.

You are eligible if you're single, between 20 and 26½, and have completed at least half the requirements for a degree from an accredited college or university (or can pass an equivalent qualifying examination).

You'll fly the very best planes during your 12 months of pilot training. Then, after graduation, you'll pilot jet fighters and bombers. And you'll get a starting salary of \$336 a month. During your three years on active duty you'll be given a chance to win a commission in the Regular Air Force.

This is a priceless opportunity for alert young men with the urge to carve their future in American aviation. Ask for details at your U. S. Army and U. S. Air Force Recruiting Station. Or, write to Headquarters, U. S. Air Force, Attention: Aviation Cadet Section, Washington 25, D. C.

SAC Okeh Poly Royal Subsidy Boost

An increase in the budget for the 16th annual Poly Royal was approved by the Student Affairs Council last Tuesday night. The increase boosts the subsidy from the Associated Students from \$1400 to \$1800. The additional funds were requested to meet rising costs in many phases of the show.

Major increases were made in the traffic control department, transportation costs for queens and princesses, and an additional outlay for more publicity. The latter was made necessary by the decision to publish an additional 15,000 copies of the Poly Royal Pictorial.

Other Business

Ed Durbin, member of the interdepartmental council presented a revised plan for the awarding of activity keys. Following discussion of the revisions, the plan was tabled until the next meeting.

John Connors, president of the Boots and Spurs, presented a request to the SAC for partial support of the rodeo team for their forthcoming trip to the intercollegiate rodeo in Arizona. The Student Affairs council voted to authorize \$30 expense money to each member of the team going, stipulating that there would be a maximum of six members on the team.

John Wright was authorized to investigate the costs and possibilities for cleaning and fixing many of the college trophies before they are put in the new trophy case.

"New Far East" To Be Discussed By Chinese Historian

Dr. Yu-Shan Han, eminent historian and orator, is in San Luis Obispo and will present an open forum tonight at 7:30 p.m. in the library of the local junior high school according to Fred L. Petersen, principal of the night school.

The topic for his discussion will be the "New Far East" and will incorporate the United States' role in the Japan-China-Manchuria locality, explained Petersen.

Petersen added that Dr. Han is said to be well acquainted with Generalissimo Chiang Kai-shek and is at present on leave of absence from St. Johns university, Shang-

hai. Dr. Han received his Ph. D. at Boston university and previously attended Harvard. At the present time he is a member of the faculty of UCLA as a professor of history. Petersen concluded with the fact

that Dr. Han is highly recommended as a speaker and his subject is one of great importance to the world today, it is imperative, if possible, that you attend. Admission is free.
