

# Chris Jespersen To Be Given First Honorary Degree

The first honorary degree ever to be granted by the California State Polytechnic college will be conferred upon Senator Chris N. Jespersen, of San Luis Obispo county, at the 42nd annual commencement exercises of the college on June 4, it was announced today by President Julian A. McPhee.

"In recognition of the outstanding service which Senator Jespersen has rendered to this county and to the state through his unselfish devotion on behalf of education in general and the California State Polytechnic college in particular, the college will on June 4 confer upon him the honorary degree of Bachelor of Science in the field of public service," President McPhee stated.

Taking part in the presentation of the honorary degree to Senator Jespersen will be commencement speaker William L. Blair, of Pasadena, president of the State Board of Education, and Roy E. Simpson, state director of education and superintendent of public instruction.

## Legislated For Poly

"Few people realize that without the able services of Senator Jespersen in our state legislature, the California State Polytechnic college would have been abolished in 1933. The Suzzalo commission on higher education recommended the abolishment of the institution to the legislature at that time and five bills were presented to carry out the committee's proposal. Senator Jespersen single-handedly prevailed upon the members of the legislature to give the school another chance to continue on a limited budget under the administration of the Bureau of Agricultural Education," President McPhee recalled.

"It was the persuasive ability of Senator Jespersen which convinced me at that time that I should continue in my capacity as chief of the state bureau of agricultural education and at the same time accept the presidency of the school," McPhee stated.

## Initiated Degree Grant

"Not satisfied with merely saving the school from being abolished, Senator Jespersen, chairman of the Senate committee on education and chairman of the senate committee on Universities and State Colleges, was responsible for the action which made the school a four-year, degree granting institution and has been the author and proponent of many other legislative acts essential to the continued growth and welfare of the college," McPhee added.

"Senator Jespersen not only has worked for the welfare of Cal Poly, but his intense interest in the educational program of this state, and the welfare of the veterans has been evidenced by his sponsorship and support of many bills for education and for veterans who are now on our statute books. He was author of the bills that set up the state machinery for handling veterans education, the veterans vocational education training under the apprenticeship program, the funds for the site preparation and actual housing for veterans attending schools and colleges, the funds for handling surplus war equipment for schools of the state, and many others," he continued.

## Aided County

"We are granting the honorary degree to him not only because of his service to education, but because of his devotion to the interests of this county, of which he is a native son, and his ability to mold intelligent legislation for the best interests of the greatest number of people in the State of California," President McPhee concluded.

The honorary degree will be conferred upon Senator Jespersen as a part of the June 4 evening commencement exercises at the Cal Poly stadium at which time more than 100 candidates will receive Bachelor of Science degrees. In addition to the degrees, presentation will be made of 28 certificates to three-year technical students, and 22 certificates to two-year vocational students.

CHRIS JESPERSEN, State Senator from San Luis Obispo county, will receive the California Polytechnic's first honorary degree at the 42nd annual commencement exercises on June 4. Jespersen's work for Poly and California education in general at the state legislature will be rewarded with the degree Bachelor of Science in Public Service.

## Presidential Poll Results In 'Smashing' Success

The Presidential Poll run in last week's El Mustang was a rousing "success." Exactly 24 students took the time to drop a ballot in the paper's contribution box, and this with an enrollment of approximately 1500 students of voting age, several hundred of whom are registered locally.

"Favorite Son" candidate from California, Earl Warren polled six votes with Arthur H. Vandenburg a close second with five ballots. Wallace won four votes, Stassen had three, Dewey two, and Truman two. Eisenhower had one ballot and Sumner Wells one, the latter a write in.

Ten of the ballots were from members of the Democratic party; eight were from Republicans. Two ballots were marked Progressive party; one was marked Communist; three were from independents.

It would be dangerous to draw any conclusions from such a small sampling of collegiate opinion; in fact the only evident trend is apathy.

Some interest may be attached to the fact that Warren drew exactly two thirds of his strength from members of the Democratic party while Vandenburg was the favorite of the Republicans.

## Radar License For Radio Station

Word was received on May 24 from the Federal Communications Commission in Washington, D.C. assigning an experimental Class 1 radar license (W6XDM) to the electronic and radio engineering department, according to Clarence Radius, department head. Kenneth J. Watson, department instructor and former AAF radar officer did the preliminary work on preparation of the application. Acquisition of this license permits the department to start construction on the Navy Mark XVI search radar set.

The 70 foot steel tower supporting the rotating antenna will be erected behind the aero engine shops at the present site of the two trailers which house the power plant and the transmitter-receiver equipment. The trailer units will be converted to laboratories for the course in "Principles of Radar."

In keeping with the "learn by doing" philosophy of the school, the students will actually install, operate, and maintain a commercial radar set, Radius stated.

FRIDAY, MAY 28, 1948

## Nurserymen Meet On Campus For 2nd Annual Meeting

On Friday, May 21, Poly was host to the Tri-Counties Chapter of the California Association of Nurserymen, gathered here for the second annual meeting. Among the 60 members present representing Santa Barbara, Ventura, and San Luis Obispo counties were a faculty group from Poly including Howard Brown, Wilbur Howes, Paul Dougherty, Ralph Vorhies, and Stanton Gray. Monthly meetings are held alternating between Santa Barbara and Ventura with Poly chosen as the annual meeting place.

The main purpose of the Nurserymen's Association is to discuss promotion of sales, problems of nurserymen, and promotion for the welfare of the nursery trade. This year discussion and inspection centered on Poly and what is being done in the way of nursery instruction.

Beginning with a tour of the Ornamental Horticultural department, the group moved over the campus to other units, the machine shop, Aero hanger, Print shop, Farm mechanics shop, Sheep unit, and the Truck crops department.

A business meeting, held at 5 p.m. was conducted by L.T. Clearwater of Santa Paula, president of the association. State President, T.A. Sand of McFarland, spoke on "How Nursery Trade Can Be of Service To the Public" and Elmer Mers of Sacramento, executive secretary of the State Association discussed "What the Nursery Association is Doing for Nurserymen."

The group assembled in the college cafeteria at 6:30 p.m. for a dinner of steaks and a special ice cream prepared by the Dairy department. During the program they were welcomed by Julian A. McPhee, college president; Chester O. McCorkle, dean of instruction, who gave a history of Poly and its objectives and Logan S. Carter, soils instructor, presented a talk on soils in relation to nursery development. The meeting was adjourned after entertainment by the Majors and Minors.

## Willet Waits For Winter With Hopes

Some time around the end of April, Bob Willett of the Poly Ski club was up at Badger Pass indulging his favorite sport. As he was coming down a hill, he spied a gorgeous gal rolling in the snow. Bob was so taken by the sight of this damsel that he failed to notice that a small Sequoia Gigantia was in his path.

The cat has just been removed from Willett's left leg which was slightly broken at that time. The ski is in fine shape and ready for the next year's show.

## "Cavalcade" To Be Presented

The Fiesta de las Flores association of San Luis Obispo is presenting a pageant entitled "Cavalcade of California" in the Poly stadium tonight, tomorrow and Sunday at 8 p.m. This is the largest production of any kind ever presented in the county. The three night stand will stage numerous and colorful scenes portraying the history of the state of California, and appears to be well worth the \$1.50 admission fee. We urge all students to attend.

## Commencement Exercises To Graduate Largest Class In Poly History

By John Blesse

Commencement exercises for graduating students of the year 1948 will be held June 4, at 8 p.m. This program will spell finis for more than 150 students who have completed their required subjects, and when the last nostalgic strains of "All Hail Green and Gold" fade away they can consider themselves alumni of Cal Poly.

## El Rodeo To Be Distributed Soon

The 1948 El Rodeo will be available for distribution on or before June 4. These year books will be distributed as follows:

1. Students holding full year SAC membership cards will be issued their El Rodeos without additional charge. They may obtain their books at a table in the north end of El Corral.

2. Those holding semester SAC membership will pay for and receive their yearbooks in room 16, Adm. building. Two quarter card holders will pay \$2. One quarter card holders will pay \$4.

3. Those holding associate SAC membership will pay for and receive their yearbooks in room 17, Adm. building. Full year associate card holders will pay \$2. Two full year associate card holders in the same family are entitled to one book free. Part year associate card holders will pay \$4.

4. Those who do not hold SAC membership may purchase El Rodeo for \$5 per copy.

## Sears Foundation Men Visit Campus

Robert LaFollette, former United States Senator from Wisconsin, and now vice-president of the Sears Foundation, and Edward Condon of Chicago, president of the foundation, visited the Cal Poly campus Wednesday.

With them were S. W. Pettigrew, public relations director of the Sears Foundation, and the manager of the local Sears store.

## Athletic Awards Made At Assembly

Thirty three athletes were presented certificates of award, at an assembly held Wednesday, for their participation in baseball, track, tennis, and swimming.

Baseball, with 18 participants, made up the bulk of the list of awards. Those receiving an award for baseball were: Ray Brocker, Lee Rosa, James Luker, Robert McCutcheon, Robert Coghlan, Vern Bebernes, Robert Bennett, Eugene Fraser, Carl Jacobson, John Williams, Don Garman, Don Crawford, Paul Platz, Russ Christensen, Richard Bulert, Ralph Ricci, Wayne Gill, and John Morosky, manager.

## 'Bubble Dance' Slated For Tomorrow Night's Engineer Hop

The Mechanical Engineering Society is presenting, tomorrow night, the last student body dance of the school year when they are giving their "Bubble Dance."

Balloons, hundreds of them, are being used to carry out the "bubble" theme of the sport dance. Ed Marble, dance committee chairman, has promised a colorful and uniquely decorated gym for the enjoyment of the dancers.

The melodious and rhythmic Collegians are to be featured with their own distinctive "Sophisticated Swing."

The dance starts at 9 p.m. Admission is by student body card for students and free to ladies.

The exercises will be held in the Cal Poly stadium and will begin with a column of men headed by Loren Hillman and William Kent Freeman marching in from the east gate in rhythm with the "Coronation March" by Meyerbeer as played by the school band. Following Hillman and Freeman will be the degree candidates, technical three year candidates, technical two year candidates, and vocational candidates in the order named. In line behind these men will be the Reverend Father Andrew Carrabin, Dr. Roy E. Simpson, William Blair, President Julian A. McPhee, Senator Chris Jespersen, C. O. McCorkle, and C. Paul Winner.

This program concludes years of brain-racking, sweat, and tears for a number of our fellow students and is the ultimate goal we as students all seek. It will include several numbers by the Varsity Quartet and Glee club, the invocation by Father Carrabin, and farewell address by Loren Hillman, presentation of the senior class gift by William Kent Freeman, and an honorary degree to be presented to Senator Jespersen. President McPhee will introduce William Blair who will give the commencement address. The senior class will be presented by C. O. McCorkle and the final, paramount moment will be reached when President McPhee hands out "our hearts desire" the diplomas.

Father Carrabin will conclude with the benediction and "All Hail Green and Gold" sung by one and all will launch the graduates on their road to success.

## Fiesta De Las Flores Features Music Makers

When you attend Fiesta de las Flores in San Luis Obispo this weekend, you will find the Poly music department well represented.

On Friday, Saturday and Sunday nights of this week, the Glee Club will sing during the pageant, "Cavalcade of America," to be presented at the Poly stadium. The Majors and Minors will perform Sunday evening during the program presented at the Mission grounds. The Three Dukes, a piano and string trio, will perform at the same program.

On Saturday at noon, Poly's green and gold uniformed band will play an hour-long concert during the barbecue at the Mission grounds.

## What's Doin' . . .

Friday, May 28  
8:15 p.m.—"Cavalcade of California," Stadium.  
Saturday, May 29  
8:15 p.m.—"Cavalcade of California," Stadium.  
9 p.m.—Poly Engineers "Bubble Dance," Gym.  
Sunday, May 30  
8:15 p.m.—"Cavalcade of California," Stadium.  
Tuesday, June 1  
7 p.m.—Mustang Flying club dinner, El Corral.  
7:30 p.m.—Int'l. Nat'l. Relations club meeting, Adm. 213.  
Wednesday, June 2  
6:30 p.m.—YMCA meeting, Adm. 213.  
Thursday, June 3  
6:30 p.m.—Ag. Inspection club meeting, Ag. Ed. 103.  
Friday, June 4  
8 p.m.—Commencement exercises, Stadium.  
9:30 p.m.—Graduation semi-formal dance, Gym.

EXAM SCHEDULE CONTINUED ON PAGE 3

## CHECKOUT PROCEEDURE EXPLAINED FOR STUDENTS LEAVING SCHOOL

Summer has rolled around once again and most of you will be going home, but you can't go until you have checked out. Follow the procedure below and you will be free to go. Students enrolling for the summer quarter need not check out. Check out sheets may be secured from the Recorder's office, room 102 at any time. Signatures from the library and the accounting office cannot be obtained until June 4.

Those not expecting to be in attendance during the summer should not send out laundry after May 28.

For room check outs, students should go to their dormitory superintendents and get a check out card (blue card). This must be signed by the dorm superintendent the day the student leaves. Before checking out of the dormitory, rooms must be vacated and cleaned. The door is to be left locked when the room is vacated. Students who plan to return in the fall and wish to reserve the same room must leave requests with both the dorm superintendent and Major Deuel. Reservations will be made only where a full deposit of \$10 is left on file.

The last step in the check out procedure is to report to window two of the accounting office. There the amount of charges against students for room, dairy products, etc., will be determined. These charges must be paid before the student can leave school unless satisfactory arrangements for payment are made with Donald Nelson, comptroller.

After completion of business at window two, students go to the cashier, turn in room key and room card, and pay whatever is owed. The cashier will determine the status of each deposit, at that time.

If a student is leaving school permanently and wants his deposit sent to him, he must indicate this to the cashier and leave a self addressed envelope. If any checks, such as State or Foundation pay checks, are to be sent on, the stu-

dent should leave an addressed envelope with the cashier.

The accounting office requests that those persons with dairy and other accounts, who are leaving school for at least the summer quarter, do not use their account during the few days in June they will be on campus.

### Grades Ready June 14

Students may obtain Spring quarter grades by calling for them in the recorder's office around June 14. For those students going home, a stamp self addressed envelope can be left in the recorder's office and grades will be forwarded.

Then there was the one about the lightning bug that backed into a fan. Delighted, no end.

## Top Jersey Cow Sells For \$3,000

A week ago El Mustang carried an article on G. M. Drumm's classification of a cow called the "Fire-cracker" cow. Drumm classified this cow, whose real name is Fire-cracker Design, the highest he had ever classified a cow.

A week ago this cow was sold at the California State Jersey sale at Sacramento, California for the sum of \$3,000. This is believed to be the highest price ever paid for a Jersey cow at public auction in California.

## Local Naval Reserve Takes Cruise

A Navy submarine chaser will cruise into Morro Bay, Friday, May 28th and make one-day trips up and down the coast, Saturday and Sunday, with local Naval Reserve personnel in charge of the ship. Advance interest in these one-day cruises has been high and a total of 85 San Luis Obispo county men will participate in this training activity.

Captain D. N. Cone, USN, district director of Naval Reserve has offered the local Naval Reserve unit complete command of the ship and if sufficient interest is shown, a ship will be sent down to this area whenever requested by local authorities.

Any man over 15 years old is offered an opportunity to take one of these one-day cruises. He does not have to enlist in either the Navy or Naval Reserve. Anyone interested is invited to be on the dock at the former naval section base in Morro Bay either Saturday or Sunday at 8 a.m.

The next regular naval reserve meeting will be held in the Cal Poly Engineering auditorium Monday night, May 31 at 8 p.m. Several recent developments regarding location of the unit and advancements in rate will be discussed. An official navy film will be included on the program.

## Alpha Phi Omega Initiates Chapter

The results of several months preparation were completed last Monday evening with the formal initiation of the Zeta Omicron chapter of Alpha Phi Omega National Service Fraternity. A dinner meeting was held in the JC room of cafeteria no. 1, where C.J. Carlson, official member of the National Board of Alpha Phi Omega, was introduced to the group.

On completion of the dinner, the group adjourned to CR 6 where the formal installation was held under Carlson's direction. Assisting Carlson in the installation and initiation service was a ritual team of California at Santa Barbara, headed by Al Sigmund, president, from Psi chapter of the University and consisting of officers of the Santa Barbara chapter.

After the local chapter had been initiated by the Santa Barbara group, the officers of Zeta Omicron chapter were installed as follows: Wesly F. Wilson, President; Leon Mc Adams, Vice President; Bill Neild, Secretary; Bob Kimball, Treasurer; Robert Williamson, Historian; Dr. A.L. Houk, Senior Faculty Advisor; and Edward Saxton, Scouting Advisor.

The chapter charter was presented by Carlson to C.O. McCorkle, dean of instruction, and the official Cal Poly representative present at the meeting.

## Inter Varsity Conclave Draws Many Students

California Polytechnic was well represented at the spring conference of the Inter-Varsity Christian Fellowship, Central California division, held last weekend at Monte Toyon, near Santa Cruz. Seventeen northern and central California colleges were represented at the conference.

Representatives from Poly were: George Sampson, Virgil Larson, Allen Marshall, Don Caswell, Lucius Tilden, Marlin Ray, Andy Jensen, and Jasme Baggao.

More people are smoking **CAMELS** than ever before!

## Spirited Mustang Nine Clinches Second Spot In 2C2A Diamond League

By J. T. Moroski

Coach Bob Mott's fighting Mustangs clinched second place in the 2C2A conference by taking three games in a row from San Diego State last weekend on the Poly diamond. Needing all three games to take the second spot, the spirited Mustangs again played heads-up ball in all of the games to nose out Fresno in league standings.

In the opening game Friday it was all Lefty Garman as the tiny portside blanked the Aztecs 5-0 with only six hits. This marked Garman's second straight shutout in conference play. He white-washed San Jose the preceding week. The Mottmen scored four runs in the second inning, the two timely blows of the inning were contributed by "Slugger" Garman and Jim Luker. Both men connected for triples with men on. Three fast double plays by the Mustang infield kept the Aztecs from denting the platter.

In the first game of Saturday's twin bill, the battling Mustangs came from behind to nose out San Diego 8-6. In the eighth frame Don Garman stepped up to the plate as a pinch-hitter with two men on and the score tied at six all, and poked a double into left field to win the ball game for big John Williams.

In the season's final, Don Crawford outlasted three San Diego pitchers to win a close 7-6 decision. This game marked the final appearance of Crawford in a Cal Poly uniform, because the big left-hander graduates in June.

Hats off to Coach Bob Mott and his entire squad for their fine showing this year, and with almost the entire team returning next season it wouldn't surprise me to see Cal Poly at the top of team standings in 1949.

### 2C2A Baseball Ends

Cal Poly climbed from an early season cellar position to a prominent second place in the California Collegiate Athletic Association's baseball conference in 1948. College of Pacific clinched the flag early in the season, letting the rest of the league battle it out for the second spot.

Cal Poly swept three games from San Jose and San Diego to finish the season strongly and forge ahead of Fresno State in the final standings.

#### FINAL STANDINGS IN 2C2A

Team	W	L	Pct.	G.B.
College of Pacific	11	3	.786	
CAL POLY	8	6	.572	3
Fresno State	8	7	.533	3 1/2
San Diego State	6	9	.400	5 1/2
Santa Barbara	6	9	.400	5 1/2
San Jose State	5	10	.333	6 1/2

### Thinclads Hopeful For Next Season

The Mustang track and field team made their debut in the 2C2A this year. A small but anxious group of cindermen answered Ed Jorgenson's call. Inexperience was the main factor in the Mustang's slow start, but they gradually improved as the season progressed.

Ed Jorgenson believes that Marsh Samuels, who took second in the 2C2A meet, will toss the shot 48 feet or better next season. Morgan with a little work should toss the platter around 140 feet. He also feels his distance runners: John Leslie, Everett Johnson and Bud Lee, with cross country experience, in the fall will run a close 4:30.0 in the mile and 10 minutes flat in the two mile. "880" man, Bill Coffee, who chopped 7 seconds off his time during the season, is expected to run it at a consistent 2 minutes.

Late classes kept Kieth Widdle from getting enough practice, with more work next year Widdle will fare better, Jorgenson believes, in the high and low hurdles. He feels Widdle is capable of hopping the 220 lows in :24, and the 120 highs in :15. Also hampered by late classes was Jim Howard, who has broad jumped 22 feet. Ed believes Jim can do better with more practice. Frank Lawhorn who suffered from a bad ankle the first of the season has cleared 6 feet and Ed is looking for Lawhorn to better it next year.

Bettering his javelin throw by 40 feet as the season progressed was Cosmo Juarez. With the same sort of improvement next year he should be a big point getter.

Ed Jorgenson stated that he had great hopes for the freshman cindermen. Dick Wilkinson who runs the 100, 220, and with more endurance should run the 440 in :51. flat with Marvin Hughes pushing him all the way. Promising freshmen pole vaulters are Chuck Hatfield and Ray Stewart. Both boys have cleared 11 feet 6 inches and with a little added shoulder strength should do 12 feet or better.

With the vast showing of improvement by all the boys during the season, Coach Jorgenson is looking for a better season, with help coming from junior college transfers to strengthen his squad.

## El Mustang

### ★ SPORTS ★

#### 2C2A To Hold Conference Today

Members of the 2C2A will hold their second meeting of 1948 May 28-29 when they sit down to talk business in Pleasanton, California. Among other things on today's menu will be the plea of George Pepperdine college to enter the conference circle.

Other entries on the blue plate special will be the discussion of schedules for 1948 and new rules

which might be placed in effect.

Making the trip from Poly will be Coaches Ed Jorgensen, Dick Anderson and Gene Smith. From the executive department will be John Jones and Dean Vernon Meacham. Coach Bob Mott will be acting athletic director for Poly while John Healey will handle the Poly side of the publicity.

### Garman And Fraser Win Honors As Mustang Diamond Stars

With the close of a successful baseball season, the Mustang baseballers bestowed honors on two of their brightest stars. Don "Lefty" Garman was chosen the "Most Valuable Player" and Gene "Pee Wee" Fraser was elected Captain for the coming baseball season. Both boys were unanimously chosen and rightfully deserved their honors.

Lefty Garman was the ace of the Mustang pitching staff, besides being a pinch-hitter and outfielder. He set a new strikeout record by fanning 15 Santa Barbara men in our first conference series and ended up by leading the league in strikeouts. His record in league play reads 4 wins and 1 loss, batting average .444 to lead the squad in batting.

His role as pinch hitter is incomparable. Against Moffet Field with the Mustangs losing 5-3 he hit a homer with two men on to put Cal Poly in the lead 6-5. Against San Diego last week his pinch single with the bases loaded once more gave the Mustangs a lead, and in the following game against the Aztecs his triple with two men on, broke up the ball game and enabled Poly to win their sixth straight conference game.

He was by far the best left handed pitcher in the league and is a sure fire bet to make all-conference.

Next we have the back-bone of the Mustang squad. Last year a first string all-conference center fielder and almost a cinch to be a repeater this year, Gene "Pee Wee" Fraser (claimed by this reporter to be the smallest man on the squad) was one of those "never say die ball players." He patrolled the outer garden like a big leaguer and more than once brought the crowd to their feet by his spectacular catches. For the entire baseball season he batted a healthy .320, besides leading the team in walks, stolen bases, and runs scored.

Once on a base he was a demon at base running. More than once he broke up double plays by taking the second basemen out of the play, if not the game. (Ask Santa Barbara.) Fraser is one of the best liked men on the squad and I am sure that with his leadership next year the Mustangs will be hard to beat and will settle for nothing less than the championship.

### Season's Final Batting Averages

Captain "Pinky" Bebernes, the Mustangs star third baseman, finished the season with the highest batting average among the regulars with a mighty .382 in 25 ball games.

	AB	R	H	Pct.	Lea.
Bebernes, 3b	94	28	36	.382	.312

# Hoof Prints

By Pyle

Last week, Herman. Get the bag packed and the boat in the water. Bonn says we can write anything we want this week, just so we keep it clean. This of course eliminates any conversation on San Jose, but there must be something else to write about.

The little matter of next year's football team for instance. Seems we have a starter at every position but the coaching spot. Only 120 days until we open against COP, and not many coaches wandering around loose during these hot summer months. Something about contracts. But why worry about this situation; no one else seems to be losing sleep over the matter, and some of them are getting paid for it. Lot of good teams coming up in the conference. With nothing to do for the next three months but treat our ulcers right and bang our heads against a brick wall, we ought to be in great shape come Fall.

Since Doctor Voltmer went north a couple of months ago it's been rumored that every one from Dud Degroot to Miss Marston was after the Athletic Directorship. Degroot is now in Virginia; as for Miss Marston, the last we heard, she was still confining her coaching duties to English and the local folk dancing classes. It might be interesting to note what changes are made over the summer, but don't be too surprised, gents, when you walk in the locker room next year and see the same faces looking you over—not that we're complaining.

As a second add, there's the little matter of the athletic plant that has been growing little by little here at Poly. All in all the teams have done great this year. San Jose can laugh at us finishing last in football, but the eluvit is, look who is last in the great national pastime, or do they have enough Americans up at Washington Square to play the game? Right down the list Poly teams have finished near the top in boxing, swimming, tennis, baseball, and gymnastics. Can't complain about this. The headmen of the green and gold stable made a pretty wise move when they hired Coaches Ed Jorgensen and Dick Anderson to whip the horses into shape this year. As explained elsewhere in this paper, this stuff just paid off in small dividends this year. The jack pot will really come in a couple of seasons hence, when the reserve material is built up.

For a third add on this final menu, there's the baseball team and their spectacular finish, not that it doesn't speak pretty well for itself. Greatest thing I've seen since Big Bill Lee pitched the Cubs into the '38 pennant. But as the big schmoze would say, "This is neither PK, nor Wrigley." Great finish though. Garman, getting the most valuable player award, really ended the season on the upbeat. If Pop would pitch right handed he could double for Claude Passeau in any Chicago Cub uniform, and no matter how many times he gets beat, they don't make them any smarter. Pee Wee Fraser, being elected captain, also got an honor which he has deserved for the past two seasons. No man on the team wanted to win more than "Pants" and no man tried harder than he did.

As for a final go at the key-board. The big wheels are in a meeting up at Pleasanton today. Main subject of the confab seems to be whether Pepperdine will be allowed to enter our happy circle or not. Among other things, the schedules for '49 will be filled out, and new rules discussed. Not much to say on the discussions, but it's almost as safe as putting your money on Citation to bet that Pepperdine won't be admitted into the 2C2A.

Can hardly wait until September 15. Something about San Jose meeting Stanford that day, but as one Spartan said to the other Spartan, Herm, "we must be off."

## Tank Coach Views Swimming Records As Season Closes

By Bob Babich

With the 1948 swimming season nothing but a memory, Coach Dick Anderson is looking forward to the coming year with a little more confidence than he had at the beginning of this season. The entire team will return with the exception of August Motmann and Jessie George.

August, who was chosen captain for the year, will graduate, and Jessie, who was involved in most of the record breaking that occurred this year, will pack his bag and head east to attend the Naval Pre-flight at Pensacola.

This year's team won three and lost six, but they needn't hide their faces when explaining their losses. They were beaten by Stanford early in the year, but who didn't lose to the Indians here on the Coast? Next loss was to Fullerton J.C. Fullerton won the National J.C. title and beat such schools as U.S.C. and U.C.L.A. In the 2C2A, the Mustangs placed second only to College of Pacific and San Jose State. All in all, it's a vast improvement over last year's team which wasn't able to make a good showing because of the shortage of instructors.

In the win column, our most impressive victory was obtained at the hands of the San Francisco Gators. The Gators came down to the Mustang's pool with an unblemished record and a tone of confidence in their talk. What happened that afternoon shouldn't even happen to Santa Barbara, at least not more than every other day. Final score of the fracas was Cal Poly 59, San Francisco 16.

As far as record breaking is concerned, eight pool records were broken while four remained intact. The summary of the events that were bettered and the men that did the record breaking are listed below.

150 yard Medley—Old Poly record 1:29:6 New Poly record 1:28:2 Ed Motmans, August Motmans and Jessie George.  
300 yard Medley—Old Poly record 3:24:8 New Poly record 3:22:2 Ed Motmans, August Motmans and Jessie George.  
100 yard Back Stroke—Old Poly record 1:14:5 New Poly record 1:13: Ed Motmans.  
200 yard Relay—Old Poly record

## Spring Football Shows Promising Gridiron Talent

By Jim Murphy

The spring football season started off with a big turn out and ended with the same big and rugged gang. The grid men were given a vigorous training in all departments; blocking, tackling, running and chalk talks.

In each practice someone showed improvement and aggressiveness. Some rugged practices and game scrimmages were held in preparation for the Poly Royal play off.

Spring football was bogged down with the rest of the sports because of that old man rain, but all in all the season was very successful. The men showed a lot of grid talent and that's what we can use.

The Golds were the victors but the Greens made the Golds earn every yard they made.

So ends the spring football; but the gang will be back this fall preparing for their rugged schedule.

## Football Schedule

Not that we wish to worry the Poly football fans to death over the summer, but here's what you can expect to face in the way of grid entertainment next fall:

Sept. 18—open  
Sept. 25—College of Pacific at Stockton, night.  
Oct. 2—Cal Tech at San Luis Obispo, night.  
Oct. 9—Fresno State at San Luis Obispo, night, homecoming.  
Oct. 16—San Jose State, at San Luis Obispo, night.  
Oct. 23—open  
Oct. 30—Whittier College at San Luis Obispo, night.  
Nov. 6—San Francisco State at San Francisco, night.  
Nov. 11—Santa Barbara State at Santa Barbara, day.  
Nov. 20—San Diego State at San

1:49:5 New Poly record  
1:46:8 Noell, Lowe, Frye, George  
400 yard Relay—Old Poly record 4:05:6 New Poly record 3:59:2 Davis, Lowe, Frye, George  
100 yard Breast Stroke—Old Poly record 1:13:7 New Poly record 1:10:2 Tom Boland

## Welding Dept. Head Speaks to Welding Society

Richard C. Wiley, head of the welding department, presented a lecture to the San Francisco chapter of the American Welding Society at their regular monthly meeting last Monday night according to C. E. Knott, dean of engineering. Wiley's lecture, "Training Welding Technicians on a College Level," was accompanied by slides showing operations in the Poly welding shop. His talk consisted of a description of the college and the application of welding in the various courses of the college placing special emphasis on its application in courses of the agricultural and engineering groups.

A carload of students accompanied Wiley to San Francisco where they visited a number of the industry's representatives as well as attending this meeting.

The students, Dexter Dorgan, Charles Meinhart, Robert Conkling, Richard Simpson and Don Johnson, spent an interesting and enlightening afternoon talking to N. Davis, regional sales director of the eleven western states for the Linde Air Products company, who gave the students much general information concerning the welding industry as well as specific policy of his company.

After the vigorous training society, the students had further opportunity to question manufacturer's and supplier's representatives who in turn questioned the students.

"The American Welding Society is composed of men working in the industry, supervisors of welding departments, engineers dealing with welding design, and salesmen in the welding fields," Knott said.

She: "You remind me of the ocean."  
He: "You mean wild, romantic, restless?"  
She: "No, you make me sick."

## MUSTANG FLYERS

All members of the Mustang Flying association who will not be in attendance for the summer session, must file a waiver releasing them from the required one-hour flying time per month. All waivers must be filed with Ken Taylor, secretary.

## THE UNSUPPORTED MIDDLE

As a school paper, El Mustang has always tried to steer a middle of the road policy on politics. In order to get proper background for this policy, we read many of the country's newspapers, those that back the right as well as the leftist elements. Its a toss-up as to which turns our stomach the most.

One side, calling themselves either Democrats or Republicans, supports American imperialism throughout the world. The other, the Independent Progressive party, falls all over itself bucking for true democracy here in the States, but fails to notice that it is supporting American isolation, and thereby backing Russian imperialism.

About the only thing that the average citizen can do is hope that by fighting each other, both sides will be forced to compromise and get back to our Unsupported Middle policy of trying to bolster democracy throughout the world without forcing it down any other country's throat. We can also hope that a candidate will be found somewhere in our political world who will go all out for the ideals he claims to stand for, and in doing this, find men for his cabinet who represent neither the Communist element nor the large economic imperialist, but will follow the lines that the majority of the population desires.

—D. W. G.

## BRICKBATS AND BOUQUETS

This has been a big year for El Mustang. A long year that went quickly due to much work and a lot of fun getting out the sheet. We look back on a lot of laughs and many good debates with the members of the student body who took the trouble to visit us. It has only been through your constructive criticism that the paper has improved to your liking.

We have tied to put out a newspaper that would be acceptable to the majority of the students. We hope that you have been pleased with our efforts. Nothing would have been possible without the help of many people. The editors, reporters, business managers, and printers from the student ranks worked hard and long to bring you El Mustang every week. They deserve a friendly pat on the back, especially those men who worked until the wee hours of the morning to hit the press deadlines.

The advice, guidance, and chewing outs from Bob Kennedy, Bert Fellows, John Healy and Guy Culbertson were invaluable to the staff. Not only to help us get out a better paper, but also to help us to become better journalists.

Lastly, we want to thank the student body for reading and commenting on the merits of El Mustang. We hope that this year's paper was a success, and that next year, with your further cooperation and backing, we will be able to turn out an even finer school newspaper.

—The Staff

## HERE WE GO . . .

This is it lads, the last editorial of the quarter. Time to stack away the rusty old typewriter until the fall. Also time to think back over the past months and sum up all that's happened. Time to ask ourselves if we've gotten everything out of a year of college that we expected. And if not, is the fault in ourselves? Did we put in our share towards a successful year?

We came to college primarily for an education. Did we get it? Are we in the right field? Do we like what we're doing? Or are we just in an old rut that we wish we were out of, but don't know just where to jump?

Have we been getting into school life? Are we mixing in clubs and other extra-curricular activities? Or will we look back on our school life as just one steady bore? Have we sat around and griped about conditions here at Poly, the lack of events that we like, or have we done something about the situation to satisfy ourselves?

—D. W. G.

## File Thirteen - - -

by Davey W.

I had an experience last Saturday that hit pretty hard at my emotions. Just thought it might be of interest to some of you.

I hitched a ride into town with a couple of local citizens, the John Murphys. They took me as far as their house on Chorro. When we got there, there was a crowd of people and children around a small red-headed boy of about five years of age. The lad was crying and seemed quite upset. The people there did not know him and figured that he was lost and too scared to tell them who he was, or where he lived.

When I picked him up, he bit my arm until he realized that no harm was meant to him. Then he cuddled in my arms and cried profusely. We took him into the Murphy house and phoned the police. The radio car arrived within a few minutes.

No one knew the boy. At first we had thought that he was the Christenson boy who had been reported lost, on the radio, during the afternoon, but the police told us that the boy had already been found. We tried to put the lad into the police car to take him down town, but he cried even harder than usual and fought us all the way.

A passer-by, seeing the police, stopped to see what the trouble was. This man, by a strange quirk of fate, recognized the boy as the son of a Mr. Brown, who lives on the other side of town. This man knew the boy and also knew the child was deaf and dumb. This last fact was what affected me most.

As the boy was taken home to his parents, I thought about the spot this boy was in; lost, hungry, scared, and yet unable to hear us talking to him, or to tell us who he was. Just a scared little boy who fought with his teeth, the only weapon he had. The mark on my arm is still visible, but I know that the impression in my mind of the sight of the boy's face, will last for a long time after the scar heals. Just another little child who would have been licked without the natural friendliness of the average person.

## FROM THE DESK OF THE EXCHANGE EDITOR

GREENCASTLE, IND.—(ACP)—Professor A. Reid of DePauw University classifies students.

"After 15 years of lecturing in a typical small liberal arts college, one collects an astonishing array of interesting types. Several weeks ago, after a delightful dinner of crabmeat and pickles they all returned to haunt me.

"1. The athletic type—The academic processes hold no terrors for the hero of the gridiron. His fraternity brothers have a complete file of my notes and examinations. It's a rare treat to find him in class. So nice of him.

"2. The playboy type—The morning after finds him in class in his roommates shoes on the wrong feet. He drops his pipe but never quite recovers it. I hand it to him after class.

"3. The academic type—Probably the most objectional of all. The head is attached to the spine on a hinge and nods back and forth during the entire lecture and the mouth and eyes utter continually, "Yes, professor. Yes, professor."

"4.—The negative type—All right brother, you put me in this class now just try and teach me something. You would put me in the front row. I can hear him uttering under his breath, "For gosh sakes let's get this over."

"5. The lovey dovey type—Must be taken together for they are inseparable as two Siamese twins. Hearts and music, violets and poetry, these two love birds are majoring in Marriage and the family.

"6. Camouflage—He always brings an armload of books to class to impress me, I guess. The boys are on to him however, and someone is always picking on him. At the moment he's sitting on a tack and trying to get some one's feet off his back.

"7. The popular type—She had four fraternity pins this semester, three lost, and spends her class hour twisting the ends of her beautiful hair. This little stunt is sure to drive any instructor insane.

"8. The wholesome type—Wears what every college girl should wear, acts like every college girl should act and talks like every college girl should talk—constantly. She's at it now.

"9. The clock watcher—I suppose she has wound her watch three times already. She always starts shuffling her feet and putting on her coat about 15 minutes before the end of the class.

"10. The sexy type—This would-be campus queen just loves the boys, all the boys, all the time. She doesn't care what the other girls think of her clothes, they're just jealous.

## Biological Science Department Adopts Four "Stinkies"

The Biological Science department now has four more animals to add to its collection. These animals are four skunk kittens that were dug up by Eugene Erwin near Poly village. The kittens are about four weeks old and are of the striped variety.

The department plans to make pets of the animals. They have been de-scented by Dr. Glenn Noble, of the science department. The skunks, at full growth, are about the size of a regular house cat.

Skunks are usually found on the borderline

## Rank &amp; File...

—BY JIM CARLEY—

Basking in the sun a few hundred miles south-east of Miami, Florida, there exists a dictator who is every bit the equal of Franco, Hitler, or Mussolini, though not on as large a scale.

He is none other than General Rafael Leonidas Trujillo Molina, who rose from the role of forger and cattle thief to El Presidente of the Dominican Republic. On October 1, 1937, the good General had his soldiers, disguised as farmers, cut down between 15,000 and 20,000 Haitians with machetes.

In his official explanation to President Vincent of Haiti, Trujillo stated that "it was a deplorable incident, one he greatly regretted. But his soldiers did the killing—No, his soldiers did not. The killings were done with machetes and knives by angry Dominican farmers. His soldiers use rifles."

The Dominican Government paid the Haitian Government \$750,000 and the "regrettable incident" was considered closed. Taking 15,000 as the figure for total dead, the settlement meant that Trujillo paid \$50.00 for each dead Haitian.

According to Albert C. Hicks, veteran newsmen, who investigated the affair, the name 'Jamon Pescado' is fondly remembered in the Dominican Republic. 'Jamon Pescado' in English means 'Ham Fish'. Now Ham Fish was one of Washington's leading apologists for Hitler's Nazidom. Yet in November, 1937, he rose on the floor of the House of Representatives and speaking of the massacre by Trujillo, cried out: "This is the most outrageous atrocity that has ever been perpetrated on the American Continent." Fish was slightly confused geographically.

He concluded: "I should like to see the Government of the United States withdraw our recognition of the Dominican Republic." On order from President Vincent's Government, Haiti's ambassador to Washington, Elie Lescot, decorated Congressman Hamilton Fish as a gesture of gratitude for sympathies shown the Haitian people.

The man who could find excuses for Hitler's treatment of the Jews was among the loudest to condemn Trujillo's sadistic acts against the Haitians.

In little more than a year we find both Ham Fish and Elie Lescot in the arms of Rafael Trujillo. In February, 1939—there came to the United States a mysterious figure called George Jamhor Djungaroff, known as the "White Russian mystery man." He fled with the United States Department of State as an agent of the Dominican Republic who received an annual salary of \$50,000. And he gave as a reference, Hamilton Fish, the same 'Jamon Pescado' who had been denouncing his employer.

About a month later Congressman Fish, in company of Agent Djungaroff, set out for a visit to the home of General Trujillo. All the congressman's expenses were reputedly paid. Further enlightenment on this subject may be found in a book written by Hicks, called "Blood in the Streets."

Space does not permit mentioning all of Trujillo's monopolies but I have attempted to list a few of the more important ones, and his reported income from them.

Salt monopoly—\$400,000 yearly, from national treasury—\$500,000 yearly, Rice monopoly—\$3,500,000 yearly, Rafael as publisher—\$150,000 yearly, payment from slaughter houses—\$500,000 yearly; for importers to get goods moved off of docks Trujillo is paid—\$1,000,000 yearly, sugar monopoly—\$500,000 a year, milk monopoly—\$300,000 a year, from bootleg liquor—\$100,000 yearly, lotteries—nearly \$500,000 a year.

It is estimated that he clears \$50,000 a day. It should be remembered that none of this is taxable.

In September, 1934, the dictator sold his own ranch to the Government for the tidy sum of \$100,000. He had paid \$10,000 for it. In October he was honored by the University of Santo Domingo, the oldest university in the New World, with the honorary degree of Doctor 'honoris causa' in the Economic and Political Sciences, which, one can almost believe, he richly deserved, for here, truly was a rising master of these sciences.

The above statements were taken from Mr. Hicks' book, "Blood in the Streets." Hicks is doing a good job of trying to bring about a greater understanding between the people of the United States and those we call "Good Neighbors."

"11. The tardy type—Always burst into the room in the middle of your most important statement. Of course, her seat is taken and the battle begins in earnest."

## Printers Travel To San Jose For NGAEA Convention

Twelve students of the Cal Poly "School for Country Printers," accompanied by A. M. "Bert" Fellows, director of printing, and Guy K. Culbertson, printing instructor, traveled to San Jose State College last Saturday to attend the regional conference on printing education, sponsored by the National Graphic Arts Education Association.

Highlight of the conference was an address by G. Henry Henneberg, manager of the Printing Industries of America, Los Angeles, who spoke on "What the Printing Industry offers the youth of today." Henneberg stated that the printing industry is looking with great interest towards the graphic arts courses being offered by schools today.

The main conclusion derived at the conference, after a lively discussion, was that printing courses offered in high schools are not intended to train students as skilled printers, but intend merely to cultivate the interest in printing that some students have, and who later seriously take up printing as an occupation.

An interesting feature of the conference was the showing of three color movies on printing processes and equipment. Films shown were: "Type Speaks," the story of the design and manufacture of type; "Look to the Years Ahead," a film produced for the Miehle Press company, showing interesting techniques in printing processes that lie ahead; and another film showing development of lithographic printing presses.

An inspection of the plant of the San Jose Evening News concluded the field trip for the Cal Poly future printers.

The NGAEA chose to hold their next annual meeting at the Cal Poly campus, date to be announced later.

### GOOD JOBS NOW OPEN

Job opening with chemical company in Los Angeles. The applicant must possess a knowledge of organic chemistry, entomology and plant pathology. The position open is formulating and testing insecticides and fungicides. This position requires a graduate student with experience or an instructor that has taught these courses.

Men who desire summer employment and have not found a job should contact John E. Jones, rm. 125.

## Summertime 52-20 Membership Closed To Vet Students

G.I. unemployment benefits are not intended as summer vacation pay, Martha E. Smith, unemployment insurance manager in the San Luis Obispo office of the California Department of Employment, today advised veterans attending California Polytechnic College. The Department of Employment administers the readjustment allowance program provided in the Servicemen's Readjustment Act of 1944 for the Veterans' Administration.

Even if he is otherwise qualified, a veteran is not eligible for readjustment allowances for unemployment if he is receiving subsistence allowances for education or training under the act, or is not available for suitable work, Miss Smith said.

"This means," she explained, "that in between school terms and during vacation periods, veterans should make sure that their federal government school subsistence allowance payments have been discontinued before claiming veteran unemployment benefits."

"Further, the veteran who is planning merely to rest and play between school terms is not eligible for readjustment allowances. Among other things, he must be available for employment, looking for work on his own behalf, and willing to accept a suitable job during each period for which he claims jobless pay."

The law provides that further rights to readjustment allowances shall be forfeited by a veteran who knowingly accepts an allowance to which he is not entitled. In addition, misrepresentation or fraud are punishable by fines and jail sentences.

## Dirty Fingers, Splinters Featured at Roman Feast

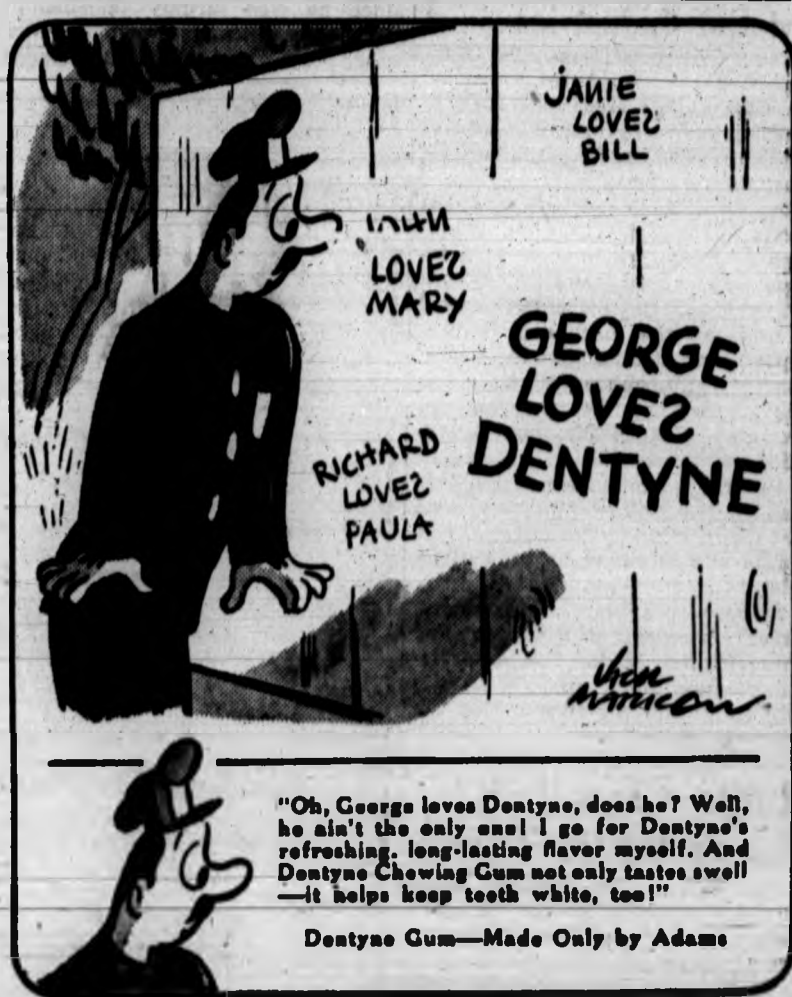

Did you ever eat at a banquet without the aid of knives, forks, or spoons? The architectural club held a Roman banquet at the Monday club of San Luis Obispo on Friday night, May 21. Attending were members and their guests including Mr. and Mrs. C. E. Knott and Mr. and Mrs. Ralph Priestley.

The group, attired in roman tunics, were seated on pillows on the floor and ate from low tables using their hands only. The feast, served in five courses, consisted of crab, fish, various meats, cheeses, pickles, fruit punch, and wine. Entertainment was provided between each course.

The group was entertained by Katie Marsh, singer, and her accompanist, Frank Barrenchea and Anastasio De la Garza, who pre-

sented a dance, Rodrico Martinez, guitarist, and a castnet dance by Mary Ellen Wise.

Lou Litzle, master of ceremonies, gave the introductory message, introduced the entertainers, and called for the courses to be served.

### Aero Department Tours Southland Aviation Industries

Forty students from the Aero department accompanied by L. W. Gustafson, Roy Metz and Richard Hall, instructors, toured several Southern California aeronautical plants May 16 and 17.

On the first day of the tour, the group visited the Aviation Maintenance Corporation plant at Metropolitan airport, Van Nuys.

The second day's events featured a tour of the Lockheed Service department, Pacific Air motive Corporation at Lockheed air terminal, and a visit to the experimental division of Bendix Aviation Corporation.

Several graduating students making the trip were interviewed by the personnel departments of plants visited and some were given jobs.

Monday evening, Leo Rodgers, Darrel Rumley, Bill Carter and John Walker, under the supervision of Roy Metz, made a special trip to inspect the runways at the Glendale Follies.

### Radio Class Lab Tours KPIK Tower

The second year technical class in radio transmitters did its laboratory work last Thursday morning at station KPIK, according to G. B. Peterson, electronic and radio instructor.

The commercial Raytheon transmitter used at the station was first studied in class. Out at the transmitter chief engineer Chuck Squires, took over and gave a detailed stage by stage analysis of the circuits both at the transmitter and later at the studios on Garden street.

The data acquired on the field trip was made part of the lecture discussion at the next meeting of the class. This trip afforded an opportunity to study the special features of a specific commercial transmitter, Peterson stated.

### Electronics Department Gets New Instructor

C. E. Knott, dean of engineering, announced this week that Ellis Ronney of Palo Alto has been appointed as a new instructor in the electronic and radio engineering department.

According to Clarence Radius, department head, the staff and the students are looking forward to Ronney's arrival on September 1. At present, Ronney is completing his graduate work in communications at Stanford university and comes to Poly with eight years of indus-

trial experience in radio.

Indirectly, his influence has already been felt in the department, since he was largely responsible for the complex illustrations in the 1000 page text entitled "Radio

Engineering" by Dr. Terman used by third year engineering students, Radius said.

Ronney was engaged to assist in the advanced work in the engineering curriculum.

### J. Paul Sheedy\* Switched to Wildroot Cream-Oil Because He Flunked The Finger Nail Test

All panda-monium just broke loose for this little guy with the hairy ears and two black eyes. Somebody snatched his Wildroot Cream-Oil! You may not be a panda — but why not see what Wildroot Cream-Oil can do? Just a little bit grooms your hair neatly and naturally without that plastered-down look. Relieves annoying dryness and removes loose, ugly dandruff. And Wildroot Cream-Oil helps you pass the Fingernail Test! It's non-alcoholic . . . contains soothing Lanolin. Get a tube or bottle of Wildroot Cream-Oil hair tonic at any drug or toilet goods counter today. And always ask your barber for a professional application. In case there's a panda in your house — keep some Wildroot Cream-Oil handy for him!

\* of 327 Burrroughs Drive, Soper, N. Y.

Wildroot Company, Inc., Buffalo 11, N. Y.

**You can take the high road**

**H**ave you made up your mind on what you'll do when you graduate this June? If not, consider the opportunity available to you in the Aviation Cadets.

Few jobs anywhere can match this offer. When you win your wings and a Second Lieutenant's commission, you're paid as high as \$336 per month to start. The training you get before and after you're commissioned is recognized as the world's finest — and it equips you for a well-paid lifetime career in military or commercial aviation.

You're eligible for appointment to the Cadets if you're single, between 20 and 26½ years old, and have completed at least one-half the require-

ments for a degree from an accredited college or university (or pass an equivalent examination).

Talk the program over with men in your class who have been Aviation Cadets. And for full details, ask at your nearest U. S. Army and U. S. Air Force Recruiting Station. Why not drop in today and discuss it?
