Sardines, Shnozzles, and Sneakers

What do fish, non-human creatures, and sneakers have in common? Nothing except cream paper and micron ink.

TYLER WYNN

Looking Through a Different Lens

Since I was a kid I've always been fascinated with what's inside things; whether that be electronics, the body, or plant life. Being an electrical engineering major with an interest in photography, I'm always looking for ways to connect my two beloved hobbies. X-ray photography gave me the power to see into a whole new beautiful world, peeling back the layer of objects that people never thought to look through with x-rays. With my two machines in my basement, I am constantly pushing the limits of my equipment and physics, trying to look at smaller, more delicate objects. Watching people's excitement when looking into the world of macro x-ray photography is what keeps me going and keeps me exploring deeper and deeper.
