CALIFORNIA STATE POLYTECHNIC COLLEGE ★

Vol. XX, No. 38

San Luis Obispo, California Summer Edition

Friday, July 3, 1959

BOYCAKES ANYONE? ... Chief chefs at the annual ranch-style breakfast for the ag-teachers last week are left to right, Julian A. McPhee, president of Cal Poly; Byron McMahon of Sacramento, chief, bureau of agricultural education; and Wesley Smith of Sacramento, state director of vocational education.

High School Students Here For Science and Math Study

A four week summer science training program for 50 high school senior students at Cal Poly is now underway. The program, sponsored by the National Science Foundation, is directed by Dr. Glenn A. Noble, head of Cal Poly's biological science department.

The students, 50 boys and 20 girls, are honor roll students from schools throughout the state. The program is to provide for secondary school students of superior ability in science and mathematics an opportunity to take part in a program of discussions, lectures, laboratory and field work in some fundamental aspects and modern applications of science.

The students, during the first two weeks, will spend mornings attending lectures and discussion periods in the field of mathematics, biological science, and physical science. Each afternoon will be spent in the laboratory in the subject in which he prefers to concentrate.

The second two weeks will be devoted to special projects for students interested in the biological and physical sciences and to a special program for those interested in mathematics.

Fees and expenses of students are paid by the foundation. Boys' counselor is William Cavanaugh, science teacher at the San Luis Obispo junior high school. Girls counselor is Mrs. Ralann Young, Cal Poly graduate in biological science.

The faculty consists of Dr. James T. Culbertson and William O. Bushman, mathematics; Dr. H. Thomson and Dr. R. A. Pimentel, biological sciences; Dr. Robert

Frost and H. G. Wight, physical sciences.

The science program is one of 110 being sponsored by the foundations in the United States and territories, says Dr. Noble, and one of seven similar programs being conducted in California.

College Jazz Competition Planned For Monterey

The Monterey Jazz Festival, October 24, will sponsor a college jazz competition for small groups and big bands to be held at Monterey Peninsula College September 27-28. All college jazz organizations and music departments are invited to take part in the elimination.

Winners of the playoff in the small combo and big band category will be invited to appear at the festival and will be admitted to all festival events. For information write Dr. Bruce Hubbard, Monterey Peninsula College, Monterey.

Four Week Quarter Enrollment—1068

On official count by I.B.M. machines, the enrollment of the Cal Poly four-week summer quarter reached 1068, slightly below the figure of 1177 registered one year ago.

There are approximately 480 in arts and sciences division, 480 in engineering, 160 in agriculture and 508 graduate students.

Final examinations are sched-

New Major Opens In Engineering

A new engineering program for Cal Poly has been adopted and will be put into operation this fall.

Cal Poly's metallurgical engineering course will be one of four offered in California colleges.

"We have an instructor who is well qualified," said C.E. Knott, assistant dean of engineering. George W. Whitney, head of the new department, has had several years of practical experience in the Los Angeles area with a large industrial firm.

The first two years of courses will be offered in the fall 1959. The junior and senior years will start in the falls of 1960 and 1961 respectively.

The metallurgical course which is closely connected with welding will hold its laboratories in the welding shops. Subjects of study will follow the usual engineering courses with metallurgical insertions.

"Depending on the industry that a graduate chooses, his problems will vary, but basically he will study the physical and chemical properties of metals under conditions of vibration, stress and strain, and heat," said Knott.

As of June 1 there had been two new student applications to the new department, but several transfers are expected from other departments.

uled for July 16-17.

Registration and class scheduling for the six-week quarter will be July 20 with classes beginning July 21.

Thomas Lambro, registrar, denied the rumor that the I.B.M. machines had caused a break down delay. "The 1068 students were registered in three hours," said Lambro, "Everything was perfect."

New Health Center Ready For Fall Quarter Students

Only two buildings, the agriculture and social science building, and the health center will be ready for use this September. The remaining four buildings now under construction will be finished during the winter and spring. One other classroom building under construction, the mathematics and economics

building may be ready by the winter quarter, says Chet Young, building program coordinator. It was originally scheduled for September.

Foreign Car Club Plans Road Race

The El Camino Foreign Car Club of San Luis Obispo will present the second running of the San Luis Obispo Sports Car Road Races at the San Luis Obispo County Airport, Sunday, Aug. 9.

James G. Anderson, president of the "El Camino" club and general chairman of the road races extends his invitation to those who are interested in sports car racing to come out and have a good time.

This year's race will feature prominent drivers from the Southern California area, although the main idea of the race is to give those Sunday sports car drivers a chance to get out and burn some rubber.

Anderson has termed the event a "fun type race" for the "occasional racer" and further stated that there will be no big league racing.

Last year's race had 96 entries divided into 15 classes. Among the entries, almost exclusively foreign were MG's, Porsche's, Jaguars, Austin Healey's Sprites, Morgans and A.C. Bristol's, and some American modified sports cars.

This year's race will feature sports cars but entries will be limited to production cars under 2.5 liters and modified cars to two liters piston displacement.

There will be 15 classes with (continued from page 4)

Ag Business Major Scheduled For Fall

A new curriculum in Agricultural Business Management will be offered in September, 1959, at Cal Poly announces the Agriculture Division.

The new program is designed to prepare graduates for the many agricultural business and government agencies serving the farmer. This includes preparation for organizing, managing, and representing agricultural businesses and public agencies engaged in providing products, supplies, credit, machinery and equipment as well as advisory and informational services to farmers.

The curriculum has been organized to prepare students for farm related positions such as agricultural representative, chain store manager, livestock feed business, marketing specialist, manager, agricultural cooperative, and sales manager, fertilizer and insecticide company.

The curriculum, which will lead to the bachelor of science degree in agriculture, includes training in such agricultural business phases as buying, transporting, processing, standardizing, financing, advertising and selling farm products. The agricultural business management major students may, through electives, specialize in one of several of the agricultural production areas offered in the Cal Poly Agricultural Division.

Students enrolling in the program will begin work in their major at the beginning of the freshman year rather than waiting until they reach the upperclassman level. The new department also will employ the "learn by doing" method of instruction which has

(continued on page 4)

The six residence halls, a subject of interest to all on-campus students, will be ready for occupancy by September, 1960. The two northern dorms will house girls. The remaining four dorms are for men. The buildings will be finished during winter quarter but landscaping and furnishing will take additional time, says Young.

Interior decoration will be limited. The walls will be the natural brick. Windows will have aluminum casings. The size of the rooms is 170 square feet.

Two persons will be assigned to a room. Each dorm will have a capacity of two hundred students, says Young, and large lounge and recreation rooms in each dorm provide a place to study, entertain or play.

There are thirty-eight dormitories of this type in California. Four of them are on the Kellogg campus of Cal Poly. Six are being built here. Twenty-eight are being used or constructed at other state colleges.

A total of \$5,219,000 was appropriated for the construction of the six dorms.

The Agriculture and Social Science Building, which will be ready in September, costs approximately \$1,791,800, says the building coordinator. It has fourteen lecture rooms and ten labs. Nine of them are agricultural, three animal husbandry, one dairy lab, one ornamental horticulture, three crops department, and one accounting lab. There are also forty-two faculty offices.

The mathematics and home economics building will probably be finished by winter quarter, at a cost of about \$1,259,000. It has fourteen lecture rooms and seven labs. One will be a mathematics lab. The remainder are home economics labs, three cooking labs and the child guidance and home nursing laboratory, and two clothing labs.

The health center will have facilities for six doctors and a thirty bed infirmary.

The gym should be completed by the first of next year, Young says. It will cost approximately \$1,700,000. The outdoor P. E. facilities (continued on page two)

Business Course Starts This Fall

A Business department which will offer course of study leading to the bachelor of science degree will be opened at Cal Poly in September, the Arts and Sciences Division of the college has announced.

The first three years of required work, together with necessary elective units, will be offered this fall. The fourth year of the program will be started in 1960.

Required courses will provide a broad base of training in the business field. In addition, students will choose a specialization in accounting, general business, labor-management relations, or sales and sales management.

Among interesting features of the new business curriculum is its requirement of two quarters of philosophy and logic and more than the usual amount of mathematics and statistics. Students also will have the opportunity to supplement business courses by electing courses in the agricultural and engineering divisions.

Swim Cards Go To 250; Workshops Planned In P.E.

More than 250 swim cards have been issued to students and faculty for the four week summer quarter.

Several hours are being offered each week for instructional and recreational swimming in the college gym pool. The physical education department has set up Monday-Friday mornings as water class periods and Monday-Friday afternoons 2-4 o'clock as recreational swimming.

"An outstanding event of the P.E. department's school year will start Aug. 3," says Edward Jorgensen, Cal Poly P.E. instructor. "The 12th annual physical education workshop for men, and the 10th annual workshop for women will run Aug. 3-14 and Aug. 9-21 respectively."

The workshop, sponsored by Cal-

Dance Scheduled At TCU On July 4

A record dance will be held in the temporary college union building tomorrow evening, July 4, from 9 to 12 p.m. The dress for the dance will be casual.

There will probably be a college union record dance each Saturday night during the ten weeks of summer session, according to Paul Wilson, chairman of the summer college union committee.

The temporary college union is located on the perimeter road next to the men's mountain dormitory buildings on campus.

ifornia Association of Health, Physical Education, and Recreation; California State Department of Education, and Cal Poly, will be attended by high school and college teachers of the state.

"We usually have 200-300 in attendance each summer," says Jorgensen.

The second week of the men's workshop and the first week of the women's workshop overlaps to allow on week to be devoted to co-educational sports such as archery, dancing, and golf.

Leader of the three weeks of discussions, demonstrations, lectures, and films will be: Jack Curtice, Stanford; Payton Jordan, Stanford; George Wolfman, California; George Ziegenfuss, San Diego State; and Dr. Jean Hodgkins, University of California, Santa Barbara.

Star Teachers Picked At Ag Conference

Six regional "Star Teachers" were named at the recent conference of the California Agriculture Teachers Association held here.

The "Star Teachers" picked on the basis of school and community service are: J. Sidney Johnson, Santa Rosa; Oscar J. Hollenberg, Watsonville; Gordon Woods, Santa Paula; Ralph T. Filson, Chico; Wallace Englund, Tracy; Mitchell Nidever, McFarland.

Recognition for being selected "Star Teachers" was made by the Sears Roebuck Foundation who presented each of the winners with a wrist watch.

Lloyd Graybiel, vice-president of the American Trust Co. and the Commonwealth Club of San Francisco, was given a certificate of recognition by the California Council of Vocational Associations. Graybiel was honored for his contribution to the field of vocational agricultural education. He has been instrumental in developing the farm program competition for the Future Farmers of America.

Also honored was A. G. Rinn of Fresno, regional supervisor for the bureau of agriculture education, who was given a retirement certificate. Rinn has been in agricultural education for 48 years.

Housing for Married Students Hard to Find

"Student families don't realize what the housing situation is here," says Mrs. Willy Richardson, housing office secretary. "They come here and expect to find some place to live, but we don't have anything to offer them."

Housing requests have been filled for the summer four week quarter, but there are not enough spaces for the six week quarter or next fall, she says.

"We have several calls for two or three bedroom homes for rent, but owners want to rent for the whole summer," says Mrs. Richardson.

Single students are easily placed, but married students are at a disadvantage to find places to live.

Mail or Female

Even the post office gets blamed for practicing discrimination and segregation these days—the Cal Poly post office, that is.

At least that's what some of the guys thought after girls were admitted to Poly, and then put in a separate post office building.

"The guys thought they were being discriminated against by having their boxes separated from the girls," says Margaret Hoyt, postmistress for Cal Poly's post office for the past seven years.

"There is no real reason for it and actually it would be much handier to have the boxes together," continued Mrs. Hoyt. "It would save running back and forth."

"But with all the pettycoats these girls wear," she laughed, pointing through the post office window to the narrow walkway along a long row of mail boxes, "they would never make it."

Golfers Win Letters

Six Cal Poly golfers were awarded letters for their efforts in registering a 3-2 won-lost record this year.

Ron Ankrom, Long Beach; Dan Froehnow, Long Beach; John Quinn, Santa Monica; George Montalvo, Mexico City; Dick Callin, Millbrae, and Owen Silke, San Luis Obispo, all received letters.

The Mustangs finished regular season play with an 8-3 record overall and were 3-2 in league play during Long Beach State, Los Angeles State, University of California and Santa Barbara once each and losing contests to San Diego State and Fresno State in CCAA action. Fresno won the league title followed by San Diego.

Coach Chuck Hanks said all of his men are eligible to return next year, but is unsure of the prospects of the 1960 team.

Health Center

(continued from page 1)
will cost an additional \$722,300. Outdoor facilities will not be finished until next spring. There will be ten tennis courts, six enclosed handball courts, four multi-purpose courts, and two turf playfields. The playfields are large enough to hold six softball fields or three intramural football fields, explained Young.

Although only one building will be ready for fall there is one bright spot, Young says. The network of roads through Cal Poly will be mainly completed by September.

The national collegiate tennis championships are the oldest of the championship series in the NCAA and the second oldest of the national tennis fixtures.

Originated in 1885 at Trinity college, Hartford, Conn., the first collegiate tennis championships were sponsored by the United States Lawn Tennis association.

Poly Swimmers Prepare For AAU Competition

Three Cal Poly swimmers are participating in the Yale University summer program in New Haven, Conn.

The trio—Gene Lenz of Santa Maria, Jack Adam of Redwood City, and Frank Brooks of North Hollywood—are working under Robert J. H. Kikhuth, Yale coach and seven time coach of the United States Olympic team.

The three will return early and enter the national Amateur Athletic Union swimming championships to be held in Los Altos, July 9-12. Lenz and Adam are entered in the distance events while Brooks will participate in the butterfly events.

This marks the third summer that Lenz has worked under Kikhuth. Lenz is one of the fastest American distance swimmers. He took third place in the 1500 meters in the national collegiate championships last season. The Santa Maria swimmer has used up his eligibility at Cal Poly. He hopes to place in the AAU event and make a possible trip to Japan. Lenz, an architectural engineering major, also hopes to participate in the Pan-American tryouts in August.

Adam, a sophomore majoring in animal husbandry, swims the butterfly. Brooks, a sophomore majoring in animal husbandry, swims the butterfly.

Coach Dick Anderson's Cal Poly mermen were undefeated in dual meet competition last season and won the state college swimming championship.

Student Polio Shots Offered On Campus

The hours the student health center will be open during the summer quarter have been announced by Dr. M. D. Lovett, medical director at the health center.

Hours that students may see the doctor, or sick call hours, are from 10:00 a. m. to 12:00 noon. A doctor is on call for emergencies. The doctors names and phone numbers are posted on the entrance door of the health center.

The health center clinic will be open from 8:00 a. m. through 5:00 p. m.; the infirmary will be closed during the summer quarter.

Polio shots are available to all regularly enrolled students Monday through Friday from 8:00 a. m. through 12:00 noon, and 1:00 p. m. through 4:00 p. m. Each shot costs the student \$1.00.

Laboratory service in the health center will be limited until further notice, and there will be no x-ray service available until July 15.

Counseling Center Sets Testing Dates

Dates for guidance testing during the summer have been announced by the Counseling center. During July the dates are Friday, July 17, and Friday, July 31. Guidance testing is offered once during August, Friday the 31st. In September the tests will be held Tuesday, September 15.

Advisors will be present on these dates to help students with program, housing, and financial problems.

California Poly scored five points in the 1958 national collegiate wrestling championships to place twenty-third.

Six institutions boast a national collegiate champion in six of the 10 university division sports in which the NCAA awards individual titles. They are: Michigan, Michigan State, Minnesota, Navy, Ohio State, and Princeton.

Room, Board, Hot Sulphur Baths All For \$9 A Month

By Ron Greenslate

How would you like to live in one of the finest hotels in the country for \$9 a month including room, board, and hot sulphur baths?

That was the going rate in Paso Robles in 1864, according to a book "The History of San Luis Obispo County" written by Senator Chris W. Jespersen and published in 1889.

Most residents of Paso Robles, except possibly the most recent arrivals, realize what the Spanish words "Paso Robles" mean. The rolling land around Paso Robles dotted with spreading oaks, led the first Spanish explorers to name the place "the pass of the oaks" or "El Paso de Los Robles."

Prior to any development of the area, padres from San Antonio, San Miguel, San Luis Obispo and Santa Ines Missions brought their congregations to the "pass of the oaks" to use the healing waters of the hot springs.

Stories were told of an immense grizzly bear that was in the habit of taking a nightly plunge into the hot springs, supposedly to cure a lame foot. The bear would get in and out of the pool by swinging on the branch of a cottonwood tree.

Paso Robles was one of the ranches given to the San Miguel Mission and included some 25,000 acres. In 1849 this land was granted to Don Pedro Narvaez.

In 1857, the 25,000-acre Paso Robles Rancho was purchased by D.D. Blackburn, James H. Blackburn and Lesare Godehaux for a total of \$8,000 according to "A Memorial and Biographical History of San Luis Obispo County" published in 1891.

In 1860, the rancho was divided and Drury W. James, an uncle of the outlaw Jesse James, bought in with the Blackburn brothers.

James and Blackburn realized the value of the hot sulphur springs and proceeded to commer-

cially develop the springs. In 1864, room, board, and baths could be had for \$9 a month with the free services of a physician.

In 1868, a rush of business pushed the rates up to \$12 a week.

The railroad came to the area in 1866 and Blackburn and other residents decided it was time to plan the town. So, F.P. McCray of Hollister was hired to lay out a town site. This took one year to complete and in 1867 an auction of town lots was held.

Two city blocks were donated by James and Blackburn for the present city park with the stipulation that no other use be made of the park or else the land would revert to the donors. An exception was granted in 1907 and the present city library was built.

Some of the "firsts" in the town according to the "History and Landmarks Section of the Women's Club of Paso Robles" include:

The first blacksmith shop was that of W.C. Henderson, who bought the old stage station at the corner of Pine and 15th Street, where the present Pioneer Garage now stands.

The first completed home was that of a Mr. Testerman on Pine Street opposite the city park.

And the first school was a private one built back of Pelton's Feed Store.

The greatest monopoly of national collegiate track championships in a single year was achieved by Ohio State in 1936 when it won six titles outright and two more of its competitors tied for a seventh championship. Jesse Owens, Buckeye sprint star, won four.

Cadet Summer Camp Starts At Ft. Lewis

Six weeks of rugged Army field training started June 30 for 15 Cal Poly R.O.T.C. Cadets at Ft. Lewis, Washington.

The students, all classified as seniors, will be under the command of Col. W.E.H. Voehl, Capt. Roland Kline, and M. Sgt. Henry Bradley. Before the end of the camp period, Kline, who has been ordered to Command General Staff School, Ft. Leavenworth, Kan., will be replaced by Capt. Dewey Brown.

"The camp is almost a basic training," said Mrs. Allison Tomlin, R.O.T.C. office secretary, "they're not officers yet, and in fact they're not as high as soldiers."

Most of the 1800 cadets are from the 6th Army operating in colleges of the Western states. All of the summer soldiers will be competing with each other for a final grade which will be a deciding factor in the command that they receive during the next year of school.

"They will see all of the branches work," said Mrs. Tomlin. "But the bivouacs and hiking will separate the men from the boys."

Production Managers: Edmund Kersten
Charles Mathews

Published weekly during the summer period except holidays and examination periods by the Associated Students, California State Polytechnic College, San Luis Obispo, California. Printed by students majoring in Printing, Division of Engineering. The opinions expressed in this paper in signed editorials and articles are the views of the writers and do not necessarily represent the opinions of the staff, views of the Associated Student body nor official opinions. Subscription price \$5.00 per year in advance. Offices, Room 21, Administration Building.

Literary Magazine Goes On Sale Soon

Cal Poly's own literary magazine, Poly Syllables, will go on sale next week for summer students.

Read about the mysterious John that had spring quarter students buzzing. Feel the tenseness of the young cowboy as he reaches for the rodeo bigtime. Read an animal husbandry student's impressions of Joseph Conrad's "Heart of Darkness."

A member of Cal Poly's beatnik crowd includes a "way out" story that started out down to earth. Take a glimpse into the past with a foreign student who could be writing for "Harper's."

Poetry, from skillful to cute, is also included in the first issue of the publication.

The magazine will be on sale in the basement of the Administration building across from El Corral.

Poly Syllables is published by the Associated Student Body under the sponsorship of Writers Forum.

seven trophies awarded for the first three places in each class.

Since the cars are divided into classes, every person entering the competition will have a good crack at taking home a trophy.

The San Luis course is unique among race courses, as the entire course can be viewed from the spectator area.

The course features nine turns and two good straight aways, one of which is one-half mile long.

It should be a great fun day for all, with the racing going on from 10 a.m. to 5 p.m.

Concessions will be located in the spectator area for anyone desiring refreshment.

Admission for the entire day will be \$1.50 for adults and 50 cents for children under 12 years of age.

Michigan scored in each of the 14 events it entered to win the 1958 national collegiate swimming championships.

RANCH HANDS Playing the part of ranch hands at the recent California Agriculture Teacher Association breakfast held on the Petersen ranch are Warren Smith, assistant dean of agriculture, left, and Lloyd Bertram, sales supervisor. College administrative heads acted as cooks and servers at the annual ranch-style family breakfast for ag-teachers.

Sonoma Agriculture Teacher Heads State Association

A Sonoma high school teacher, Earl Livingston, has been elected president of the California Agriculture Teachers Association at their 40th annual conference came to a close on the California State Polytechnic College campus.

Livingston replaced G. Allen Sherman of Pomona as president of CATA which has a membership of 400 agriculture teachers. Named vice-president was Helger Hansen of Bakersfield junior college with Kenneth Holmes of El Centro elected secretary and Jack Evans of Madera, treasurer.

During the last session of the week-long conference held Friday June 26, three 25 year pins, five 15 year certificate and six retirement certificates were presented to teachers.

Those receiving 25-year pins included Arthur Mellor of Lodi, P. D. Spillbury of Wasco, and Elmer Sullivan of Placer union high school in Auburn.

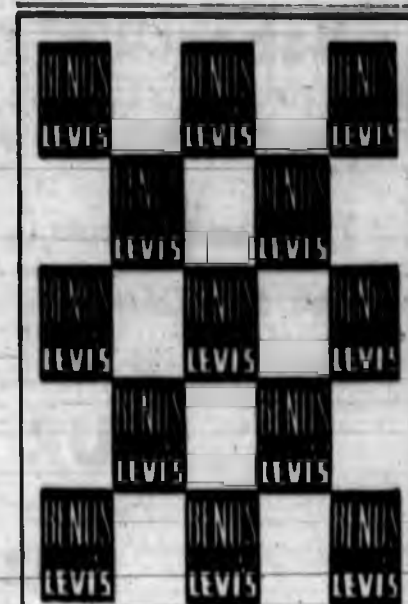

Receiving 15-year certificates were Emilio La Salle, Hanford; Edward Van Dam, Holtville; L. D. Keller, Santa Cruz; Marvin Wrightman, Tomales Joint union high; Fred S. Rohrbacker, Placer union high, Auburn.

Retirement certificates went to Walter E. Atwood, Central union high, Fresno, 35 years in vocational agriculture; Herman K. Diekmann, Lodi, 37 years; Dan Simpson, Rio Vista, 38 years; Louis P. Hillman, Los Banos, 39 years; A. M. Hardin, Lamore, 30 years; Ray Hale, Porterville, 38 years.

New Curriculum

(continued from page 1)
been pioneered at the college level by Cal Poly.

The agricultural business management curriculum at the San Luis Obispo campus will complement curricula in agriculture in much the same way that a similar agricultural business management program has done at the college's Kellogg-Voorhis campus since 1957.

Shark Attacks May Increase Before Summer Months End Many Kinds of Fish Move North As Temperature Rises

By John Campbell

If a shark sees you and wants you, there is no way to talk him out of it, according to Dr. Richard A. Pimentel, biological science instructor at Cal Poly.

Some persons believe the best way to avoid a shark attack is to stay perfectly quiet while others believe in making as

much noise as possible to scare the shark away. Dr. Pimentel says it is up to the shark and the action that would scare one may anger another.

The White shark, usually blamed for the recent attacks, is only one of a number of fish that have moved up the coast as a result of the rising water temperature. Dr. Pimentel continues. Barracuda and Grouper normally thought of as warm water fish, have been caught in increasing numbers along the northern Pacific coast regions.

Ichthyologists accept the zones from the United States-Canadian border to Point Conception, from Point Conception to San Diego, and from San Diego south as those zones where certain fish are commonly found. Dr. Pimentel says it is only natural for a few fish to move beyond these arbitrary boundaries but for the last few years rising water temperature has brought fish, common to the southern zones, farther up the coast.

If this warm water continues, he says, it may be necessary to revise the zones. This may mean the shark menace will be around for several years.

Several theories have been advanced concerning the reason behind the rising water temperature and Dr. Pimentel believes it may possibly be that the wind over the ocean has been calming down. These winds have been stirring up the ocean bringing the deep cold water to the surface. With the wind calming down, Dr. Pimentel says, the deep cold water doesn't have a chance to come to the surface.

Dr. Pimentel emphasizes the fact that valid information available on sharks is limited. Also, now anytime anyone is lost at sea, everyone cries shark, and he continues, "they're probably right."

Film Available On Worlds Most Mechanized Post Office

A sound, black and white film on the "World's Most Mechanized Postoffice," is available for showing to groups, according to William C. O'Donnell, San Luis Obispo postmaster.

The film shows the operation of machinery in handling the mail in the work room of the Washington D. C. postoffice. Part of the film shows the laboratory where mail handling machines are developed for post office use throughout the country.

The film can be obtained by contacting O'Donnell at Liberty 3-1881.

Olympic champion Ron Delany of Villanova ended his track collegiate career in the 1958 national collegiate track and field championships with the fastest double victory ever recorded, a 4:08.5 mile and a 1:48.6 half mile.

California Poly was 18th in the team standings of the NCAA swimming championships in 1958.
