Travel Regulations For Campus Groups

Travel policies and procedures concerning student groups have been released by Clyde P. Fisher, dean of the college.

Fisher explained that the regulations covering off-campus travel of student groups are being distributed at this time to provide guidance and direction on an interim basis until such time as the total college regulations concerning such travel have been discussed by the President's Cabinet and approved by the college president.

Covered are all organized student groups, instructional classes, divisional or departmental groups, including individual members of such classes or groups while engaging in official activities approved by the college.

Types of vehicles used shall be limited to college controlled, commercial scheduled carriers or private cars. All drivers must carry a current operator's license and all drivers who drive state vehicles must have a current college-issued driver's permit in addition to a California operator's license.

The supervisor has the responsibility of a prudent person for the general welfare of the group at destinations during the time that the group is officially conducting the business for which the trip was made, Fisher said, and he shall also be alert to the general welfare of the group and the safety of the vehicle. When students travel in separate vehicles or apart from the group accompanying the supervisor, the supervisor must designate a student or another staff member as a sub-supervisor for each sub-group and must delegate appropriate authority to each sub-supervisor, but responsibility for the group is not delegated to the sub-supervisor, the dean outlined.

In the evenings and at other times during which official business of the trip is not being conducted, all the members of the group are independent persons for whom the supervisor has no direct responsibility. All members of the group are expected to maintain the same standards of conduct as are required in the college community, Fisher said.

Specific Regulations are:

1. The department head or activities advisor must review the schedule of trips to ascertain that they are within budgetary limitations and in accordance with college policies and regulations.
2. All instructional field trips which occur outside the regularly scheduled laboratory period must have the approved trip plan signed by the division dean.
3. All trips of Associated Student Body sponsored groups must have an approved scheduled event form. If the trip involves more than 800 miles, approval of the dean of students must be obtained.
4. All passengers must be covered by at least \$500 medical insurance and \$1000 accidental death benefits.
5. Use of private cars will be approved only if no suitable college controlled vehicles are available.
6. Commercial scheduled carriers may be used.

Poly Graduate Honored

Cal Poly graduate, Robert Neal, San Luis Obispo insurance businessman, was named "Young Man of the Year" in San Luis Obispo at the annual Chamber of Commerce banquet last Saturday.

Neal was an agriculture major and a backfield star on the Cal Poly football team. He is now active in several community projects, youth programs and the Cal Poly Alumni Association.

CAMPUS QUEEN

REIGN TIME—Evidence of rain was seen about the campus in forms of raincoats and umbrellas, but another reign started, this time for Anne Miller, Poly Royal Queen for 1961. Queen Anne, 20, sophomore Elementary Education major hails from Pasadena. (Photo by Taylor)

Airplane Crash

Key Personnel Named In Civil Damage Claim

Notice of civil damage claims totaling nearly \$4 million have been filed against the State of California as the result of the Oct. 29 aircrash. The claims filed in groups by various attorneys name employees of the college and the student body.

The largest group of claims handled by a single law firm

totalled \$2,500,000 in 17 separate claims. A spokesman for the San Francisco legal firm reported they had two additional claims in progress. Deadline for filing a claim against the State as a result of the accident is Jan. 29 to be within the 90 day limit set by the Government Code.

A college spokesman said today that the claims filed are not lawsuits nor are they complaints. A lawsuit against the state as a result of the accident can be filed against any of the college employees within one year, but claims had to be filed with the employees and the governor within the 90 day limit before a subsequent lawsuit could have any chance of success against the state.

Those served in the \$2,500,000 series of claims Wednesday were President Julian A. McPhee, Graduate Manager Robert L. Spink, Student Body President Tom Bragg, and coaches Leroy Hughes, Howard O'Daniels, Sheldon Harden and Walt Williamson.

The State of California's Governor Edmund G. Brown and the State Controller's office also are named in the claims.

Eight other claims served on Cal Poly college officials and the governor total \$1,450,000.

The Attorney General's office of the state will provide legal representation for state employees and the Associated Student Body in any lawsuits growing out of the claims. The Attorney General's office has assured college officials that this legal service will be provided to Cal Poly personnel without cost to the individuals.

The Civil Aeronautics Board will

hold a hearing Feb. 1 in Oakland to determine, if possible, the cause of the airplane accident. The hearing officer requested that Cal Poly officials notify Hughes, O'Daniels, Harden, Williamson and Dr. Arthur James, team physician, as well as six of the Cal Poly football players who survived the accident to attend the hearings as witnesses. The Federal Aeronautics Administration will give technical testimony at the hearing on their findings as a direct result of investigation over the past three months.

Bromley Assumes Administrative Job

Directing the curriculum coordination program between Cal Poly and the state's junior colleges is the new assignment of J. Phillip Bromley, instructor in Farm Management.

"Approximately one-half of the new incoming students transfer to Cal Poly from junior colleges," Bromley said. "In view of this, the college has initiated the program to facilitate the transfer of the junior college student to Cal Poly's campuses located at San Luis Obispo and Pomona."

Bromley has been an instructor in the Farm Management Department for the past four years. Prior to that time, he taught in the Social Science Department. During his 18 years at Cal Poly, he has served on many faculty committees, and acted as an advisor to a number of student groups.

Voting Day Is March 7-8 To Decide Fee Increase

Elections to decide the Associated Student Body fee increase will be held March 7-8 as final authorization was received this week from President Julian A. McPhee. President McPhee previously had received letters from student body presidents Tom Bragg of San Luis Obispo and D. K.

Sawyer, Kellogg-Voorhis Campus. He congratulated both student governments on reaching mutual agreement on the issues.

The election will be under the supervision of members of the faculty designated by the president. Voting will be by secret ballot. A faculty member will be present at each of the polls during the time the polls are open and when the ballots are counted. Faculty members will supervise the conduct of the election at the polling stations. A two-thirds majority of "Yes" votes will be needed to raise student fees.

Polls will be open from 8 a.m. to 4 p.m. and only full-time students are entitled to vote.

The ballot used at the election will read: Shall the President of the College request the Director of Education to fix a membership fee in the student body organization of California State Polytechnic College at \$80 per year — Yes — No. Only one ballot will be allowed each eligible voter.

Immediately after closing the polls the ballots will be counted by faculty members or designated members to the polling places. The number of "yes" votes and the number of "no" votes cast will be certified to the president of the college. The president will determine if a majority of yes votes were cast on each campus and if two-thirds of the total votes cast at the election are "yes" votes.

Study Room Open Day And Night

"Administration 209 is available to students who want to study," Dean Roy Anderson announced. The room is open 24 hours a day on Saturdays and Sundays.

The room is supplied with adding machines and is available to students who want to have quiet discussions, study for tests or do homework.

The room was requested by the Business Department for study. It is convenient for students who wish to get out of the dorms or who wish to study in groups.

The room is on a trial basis but is proving to be very successful," Dean Anderson added.

Increased Traffic Control Necessary To Protect Students

"Safety of the students on campus must be maintained with more concern for pedestrians as well as automobile traffic," college officials announce.

An example cited is the dangerous situation developing on South Perimeter Road caused by cars coming down the hill.

The following changes in traffic control and parking will be in effect beginning January 30, announces Don Nelson, business manager. Two pedestrian crossings will be provided on the new entrance road, one north of the intersection of the new entrance road and South Perimeter Road and one near the north entrance of the Music and Little Theater Building. A third crossing will be placed between the Men's Gymnasium and the snack bar at the cafeteria.

A stop sign will be installed at the intersection bounded by Parking Lot O, the Mechanical Engineering Laboratory, the cafeteria, and the Men's Gymnasium area, Nelson says.

Relieving the congestion caused by construction of the Graphic Arts Building is the elimination of all parking from the east side of the South Perimeter Road between Cuesta to the east end of Parking Lot O. These parking spaces will be converted into a sidewalk area. Making up for the loss of these parking facilities are two new parking lots, one north of the Music and Little Theater Building with a capacity of 467 cars and one on the east of the fire station with capacity of 110 cars.

In addition to the above, off-campus students will be permitted to park along the north side of the State St.

Resources, Population Is Topic

"Technical Bootstraps" is the title of a talk to be delivered Monday, Jan. 30, at 7:30 p.m. by Dr. Nelson Smith of Pomona College. The talk will be given in Science Building room E-22, and is open to the public.

Dr. Smith will be the main speaker at the Visiting Scientist Program in Chemistry which is sponsored by the National Science Foundation, the American Chemical Society and Cal Poly's Physical Science Department's "Phy Sci" Club. Dr. Smith's talk deals with the problem of natural resources and population growth and the kind of technical education which might help solve the problem.

Limelights Back Again

"They're coming back!" The Limelights will give a performance on Feb. 1 in the Men's Gymnasium at 8:30 p.m. The group is returning because of the many requests prompted by their successful performance last year.

The Limelights are coming here directly from an engagement at Squaw Valley.

They have been top attractions at San Francisco's "Hungry 1," New York's "Blue Angel" and Chicago's "Mister Kelly's." They have appeared on the Ed Sullivan Show and the Dinah Shore Chevy Show, and have made a national tour with Mort Sahl. They have also appeared at the Hollywood Bowl with Eartha Kitt.

"They are rapidly becoming one of the leading groups of their kind in the country," says Arlene Vokoun, College Union activities advisor.

Tickets are \$1 general admission and \$1.50 for reserved seats.

Warner Issues Call To 'Welcome' Aides

"Application blanks for Welcome Week counselors will be available Monday, Jan. 30," announces Dick Warner, chairman of the 1961-62 camp which will be held in Cambria next September.

Students who wish to apply for a counseling position may obtain questionnaires in the Associated Student Body office until Feb. 10. All applications must be in by Feb. 13, which will be the first day that interviews will be conducted. "A schedule for interviews will be posted in the ASB office, and should be signed when the applications are turned in," says Carol Ann Rizzo, camp secretary.

Johnny McSwain, camp treasurer, reminds all candidates that they must have at least a 2.0 Grade Point Average if they wish to be considered. A good activities record is also helpful.

Wrasse's Life Was Simple, Frugal

By ADELE WOODS

"A bronzed little man with skin like seasoned leather! He loved the Herman on the Mount," were descriptive phrases used by Arthur Selland, Mayor of Fresno, to relate the colorful life of Leopold Edward Wrasse.

The Agriculture Council hosted a dinner in honor of Wrasse Tuesday night in the Staff Dining room, where Mayor Selland, one time financial advisor to Wrasse, was guest speaker.

Unfolding the dramatic and seemingly eccentric life of Wrasse, Mayor Selland recalled his close friendship with the now deceased benefactor and related vivid accounts of Wrasse's life in the San Joaquin Valley at Caruthers, near Fresno.

A German immigrant, settling first in the southern part of the nation, he moved West, as his savings dissolved in failing banks. He built a fortune to be set aside for the day that he would marry, have a family and hope to provide for them the benefits he never knew.

Wrasse spending much of his time storing funds for his dream family, realized too late that he was much advanced in years to marry and begin a family, so through Selland's advice, Wrasse set up scholarship funds for, as Wrasse once put it, "Mr. McPhee's school," having by 1948 become acquainted with President McPhee and Cal Poly.

Communing with God, through nature and living in the open, Wrasse had a most simple and profound philosophy, and through Wrasse, Selland "learned to listen, and listened to learn."

The simplicity and frugality through which Wrasse lived could be exemplified by his living on less than seven dollars a month - bread and water or milk and his own (continued on page 4)

"Me? I can't believe it."

"I don't know what to say."

"I have never been so happy."

"All I can say is, Thanks."

X-Rays Verified Safe

"The college's X-ray equipment has been surveyed by competent radiological persons and is considered not to be hazardous," says Dr. Earl D. Lovett, head of the college health center.

"All new students receive a minifilm X-ray of the chest and the question has come up at times on the safety factors of radiation exposure, and the center now has proof to dispel any fears of hazard from the procedure," explains Dr. Lovett.

RCA Plans Recording Session

When Cal Poly hosts the return of the Limelights on Feb. 1, in the Men's Gym, the RCA-Victor Record Co. will record the group for a new album. The recording will be made during the concert that evening.

GETTING DOWN TO CASES...WITH AN ELECTRONIC COMPUTER

A young lawyer may spend many years searching through the countless volumes in a law library before he ever gets a chance to plead a case. His job is to research the cases which may provide legal precedent. It's a very necessary but tedious task.

Recently it was demonstrated that an IBM computer could accomplish electronic retrieval of statutory law. Nearly 2,000 statutes pertaining to a specific area of the law were stored in the computer's memory. In response to inquiries, the computer searched its memory at electronic speed and on instructions pointed out either citations or the full text of relevant statutes. This was accomplished in minutes. It might have taken a young lawyer the entire day.

Putting computers to work in unusual ways is not new at IBM. Computers are now doing remarkable jobs in interesting and important areas of business, industry, science and government.

If you are interested in a company that offers you an exciting career with virtually unlimited growth potential, then you should investigate IBM. Positions are open in research, development, programming and manufacturing.

The IBM representative will be glad to discuss any one of these fields with you. Your placement office can give you further information and arrange for an appointment. Or you may write, outlining your background and interests, to: Manager of Technical Employment, IBM Corporation, 590 Madison Avenue, New York 22, N. Y.

You naturally have a better chance to grow with a growth company.

IBM will interview Feb. 21, '61

IBM

Mustangs Surprise Dons; Meet Fresno Tonight

A surprising, never-say-die Mustang five accomplished the "impossible" Tuesday night when they downed an impressive USF Don team 60-51. Before one of the most boisterous crowds seen in the Men's Gymnasium in a long time, the Mustangs—down nine points at halftime—came back late in the final period to strike hard at the dumbfounded Dons.

The Dons—rated fifth in the nation defensively—exhibited one of the strongest defenses seen in Mustang-land in a long time until two of their starters fouled out.

The foul outs enabled the Mustangs to hit quickly and potently coming from eight points behind late in the last period to net the nine point victory.

A defense set up by Mustang guard Jim Clark coupled with a last minute scoring spurge by center-forward Theo Dunn were enough to upset the highly rated San Franciscans.

The Mustangs struck first to take a quick 6-0 lead. Don's head mentor, Pete Petella, then sent in a "full-court defense sign" which allowed the Dons to grab off the lead.

Behind 32-24 at the mid-way point—partly due to a poor 5 for 18 hitting percentage from the free throw line—the Mustangs rallied for seven quick pointers after the second half tip-up.

Again the pressuring defense was sent in by Petella and the Dons held a six to eight point advantage for some ten minutes.

Thunder then struck. Dunn, after a relatively dull offensive first half of play, got hot and hit four straight free throws and two long hook shots.

Forward Joe Rycraw tied the tilt with a little jump shot and guard Rally Rounsaville contributed with four straight free throws and the game was "on ice."

The arms-up, heads-up defense displayed by the Mustangs in the last five minutes was truly a wonder—as they held the Dons scoreless for the last two-to-three minutes of the game.

High point man for the contest was Dunn, who netted 17 and grabbed off nine rebounds. Two other Mustangs hit in double figures—Jerry Shackelford with 12 and Joe Rycraw with 11.

John Gulien, a 6-5 Don forward, was their high pointer with 15.

The Mustangs hit for 19 of 37 from the field and 22 for 40 from the charity line while the Dons connected on 20 field goals in 47 attempts and 11 for 20 free tosses.

Tonight the Mustangs—with a break-even 3-2 league record—go on the road for the second weekend in a row. First, they head to the valley to meet the Fresno State Bulldogs, then go north to meet St. Mary's Gaels at Moraga in a non-league tilt.

Fresno is currently in the cellar in CCAA play and hold a 0-5 overall slate. They are one and three in league wars. Bulldog center Mike McEerson, however, is the leading CCAA scorer with 89 points netted in four contests for a 22.3 average.

Mustang head coach Ed Jorgenson is expected to start Joe Rycraw (6-4) and Jerry Shackelford (6-2) at forwards; Mal McCormick (6-5) at center, along with Rally Rounsaville (6-1) and Jim Clark (6-0) at guards.

Next home contest for the Mustangs is scheduled against San Fernando Valley State, Feb. 4.

Latest Football Player Reports

Al Marinal, one of the football players injured in last year's accident, has returned home to San Francisco.

Roger Kelly was visiting campus earlier this week from his Bakersfield home and reports on his college for the Spring quarter.

Bill Ross remains under care in Mercy Hospital, Bakersfield.

Walt Shinak, apparently is still under care at his home in Picture Butte, Alberta, Canada. No word has been received from him in reference to his injuries.

Marinal, last of the players to return home from Toledo, arrived in San Francisco by train earlier this week. According to United Press International, he was placed aboard a special stretcher inserted through a train window. He is at the University of California Hospital, San Francisco.

He still has one leg in a cast. Accompanied by his parents, he boarded the train in Chicago to avoid transferring en route.

Marinal said upon leaving Toledo hospital that he had more than 3500 Christmas cards from persons in the Ohio area in addition to many gifts and telephone calls during the holidays.

John Nottleship, sports editor of the Telegram-Tribune remains under care in a Toledo Hospital. Reports say that he may be able to return to San Luis Obispo within the next month.

Wrestlers Hosting Huskies Tomorrow; Boxers Journeying

Varsity wrestlers and boxers got the travel-bug this week as they departed for matches in northern California.

Couch Sheldon Hardan's matmen—who've posted three wins and no losses—departed yesterday for a bout with the Stanford Indians last night in Palo Alto.

Tonight they were expected to complete their northward trek to arrive in Chico for a match versus the Wildcats.

Tomorrow night at Stanford, Coach Tom Lee's pugilists go against a formidable Indian boxing squad.

Also tomorrow evening the wrestlers return to Mustang-land to do battle versus the tough University of Washington Huskies. Mat time is set at 8 p.m. in the men's gymnasium.

Hardan notes that Stanford will be looking for revenge after the Mustangs knocked them off here a week ago to the tune of 20-16.

Mustang boxers have yet to be tested in the California Collegiate Boxing Conference and have but two experienced starters on the squad—Bobby Gow and Gerald Gebble.

Bobby Gow, 147-pound champion in the defunct Pacific Coast Intercollegiate Tourney in 1957, has just returned to the squad.

He packs a quick-hard punch and meets one of the coast's best rated fighters in Stanford's Bruce Hollows who represented Stanford at the NCAA meet last season.

A two-year letterman, Gebble is able to compete in two weight classes—at 135 and 139.

Other team members making the trip were: Darrell Fletcher (132), Frank Godines (139), Clayton "Cowboy" Ollar (147), Bob LaBelle (165), and Al Muro (175). The team is without a heavyweight contender.

Swimmers: Intramural Meet Two Weeks Away

Swimmers are reminded that the intramural swim meet is less than two weeks away, by Dale Owens, meet manager.

Deadline for signing up is Feb. 6, stresses Owens. Dates set for the diving and swimming competition are set at Feb. 7 and 8. Signing up should be done at the pool between 3 and 5 p.m. or at the men's gymnasium towel cage.

Individual trophies will be awarded to the winners of each of the ten events in addition to a perpetual class trophy to the class with the highest number of points.

Out Of The Din

Dear Editor:

In regard to Mr. Norum's urgent plea to do something about the dating situation on campus which was published in the Jan. 20 edition, may we remind him and others who possess the same attitude that there are a few students on campus who are more interested in being graduated from this college with their names on a diploma than a marriage certificate. This includes, in many cases, positive thinking plus much restraint concerning participation in school activities.

Mr. Norum's previous letter is just one example of the multitude of students who would rather be seen at a college dance than in the study room or in the library. Anyone who has narrowed down his "range of vision" to entirety of life by becoming so overly obsessed in the opposite sex does not belong in this college. We have other institutions to protect society from these mentally ill (or better yet, mentally depleted) homo sapiens.

Many male members of this college are concerned about the unkempt physical appearance of the coeds. Perhaps this bird's eye view of our Poly playboy will answer that problem: a dusty Stetson hat, levis which haven't been washed since they were purchased (if that would improve them anyway),

Wrasse

(Continued from Page 2)

raisins. He used several tied-together water soaked sponges for a shower and dried himself with a barley sack.

Wrasse would not accept a Christmas present of a pair of \$3.50 socks, but turned around and gave Belland a \$4,200 check, and left him a richer life through spiritual, as well as material wealth. "Young man, there is no limit to thy success, be honest, tell the truth, live with God and follow Christ Jesus."

The stirring speech was received by a captive audience of past and present recipients of Wrasse scholarships, Agriculture Division and department heads, deans, San Luis Obispo Mayor Fred Waters, President McPhee and their wives.

boots that contain all sorts of organic materials from the beef units, plus the unmistakable odor of perspiration resulting from the lack of use of soap.

And finally, concerning Mr. Norum's absurd idea that the girls are "just waiting to be met," may we suggest that he move his bed and other belongings to the Trinity Hall doorsteps. Thus he would be able to meet the coeds as they depart for classes the next morning. After all, Mr. Norum, the early bird always catches the worm.

Books At High Noon To Discuss "The Town" by Conrad Richter

Discussing the Pulitzer prize winning book, "The Town," by Conrad Richter will be Mead Johnson, English instructor. Johnson will speak at Books At High Noon, Jan. 30, in the staff dining room.

The book deals with the effects of a town on the people, and how it affects their lives. The setting of the book is frontier life in Ohio.

Last quarter Johnson discussed two other books written by Richter, "The Trees" and "The Fields." This book, "The Town," completes the trilogy of his works.

One-Stop Shopping makes it easy to make the right buy at your Chevrolet dealer's!

No need to look farther than your Chevrolet dealer's to find the car you're looking for. There under one roof you can pick from 30 models—almost any type of car for any kind of going. A whole new crew of Chevy Corvairs for '61, including four wonderful wagons unlike any built before in the land. Thrifty Chevrolet Biscaynes, beautiful Bel Airs, elegant Impalas and six spacious Chevy wagons—all with a Jet-smooth ride. Come in and choose the one you want the easy way—on a one-stop shopping tour!

New '61 Chevrolet IMPALA 2-DOOR SEDAN

Here's all anyone could want in a car! One of a full line of five Impalas with Chevy's sensible new dimensions, inside and out.

New '61 Chevrolet 4-DOOR BISCAYNE 6

NOW—BIG-CAR COMFORT AT SMALL-CAR PRICES

These new Biscaynes—6 or V8—are the lowest priced full-sized Chevies. Yet they give you a full measure of Chevrolet roominess.

New '61 Corvair 500 LAKEWOOD STATION WAGON

One of Corvair's wonderful new wagons for '61, this 6-passenger Lakewood gives up to 68 cu. ft. of storage space.

New '61 Chevrolet BEL AIR 2-DOOR SEDAN

Beautiful Bel Airs, priced just above the thriftest full-sized Chevies, bring you newness you can use. Larger door openings, higher easy-chair seats, more leg room in front, more foot room in the rear.

New lower priced 700 CORVAIR CLUB COUPE

Corvair brings you space, spunk and savings in '61. Thriftier sedans and coupes with more luggage space. That rear engine's spunkier, too, and there's a new gas-saving rear axle ratio to go with it.

See the new Chevrolet cars, Chevy Corvairs and the new Corvettes at your local authorized Chevrolet dealer's
