

# El Mustang

CALIFORNIA STATE POLYTECHNIC COLLEGE ★

VOL. XVIII NO. 13 SAN LUIS OBISPO, CALIFORNIA TUESDAY, JANUARY 22, 1957

LEADING THE FUN at Sunday's "Hootnanny" at the Temporary College Union, Hillcrest Lounge, were (left to right) Jim Sistrunk, Larry Litchfield, and Activities Advisor Joan Newcomer, at the piano. More than 30 enthusiastic golden throaters took part. Ambidextrous Dale Greasy spent the afternoon singing with the left hand and making popcorn with the right. (Photo by Mattie)

## 'Silver Chain' Idea Delayed: Chandler

Progress on the "Silver Chain," adopted by the Poly Royal Board for its 25th birthday has been postponed pending more detailed organization, according to Dean of Students Everett M. Chandler.

"While we think the idea is a good one," Chandler informed El Mustang, "it does not appeal to the administration as appropos in achieving anything as big as a two-million dollar college union."

He pointed out that it could possibly conflict with other plans under consideration and also create some ill-feeling among alumni and other promotional groups, if the plan was used before more thought could be given to details.

"The cost of such a project could mount into a considerable sum of money long before any revenue was returned," he added. "This excellent idea could very well be adapted toward goals more readily achievable, such as a scholarship, or additions to the union such as a bowling alley, pool tables and other things."

## Yearling Colt Sells For \$500 At Pomona

"Baycho," one of Poly's yearling colts, has sold for \$500 at the California Thoroughbred Breeders Association winter sale at Pomona, according to Bill Gibford, trainer. Baycho was sired by Zunchio and is out of Topsey Ann—last of the Zunchos.

A mare by Royal Charger highlighted the show by selling to Frank Bishop for \$80,000. Wally Wallace, making the trip with Gibford, cared for the colt at the sale.

## Krauter Will Head Hewson House

Harold Krauter, sophomore industrial engineering major, has been installed president of Hewson House.

Krauter, who was elected by a near unanimous vote, made a short speech thanking the members of Hewson House for their votes. He said, "I am looking forward to a quarter of increased social activities, including the annual Hewson House Formal."

Other officers installed were: Roderick Davis, industrial engineering, Vice President; Martin Grigg, agricultural engineering, secretary; and Bob Hillis, printing engineering, treasurer.

## Bills Before Congress May Lessen Student Income Tax

Additional income tax exemptions for college students may become law by 1958, according to a dispatch from J. W. Fulbright, Democrat from Arkansas. Two bills were recently introduced by Sen. Fulbright which he considered of vital importance to the development of our country's educational institutions and general educational standard.

### Miller Gets Emblem From Electricians

Eight engineering students found enough meaning in the nicknames of Harry Miller, state electrician, to present him with his very own insignia.

It all came about during Christmas vacation when the boys decided to clean Miller's truck, affectionately known as the "bomber". Seeing the truck shining like new inspired the boys into adding just a little extra.

Mrs. Sterling Bradley, wife of one of the students, was recruited to draw the design. This consisted of a bull riding a rocket, representing Miller and the truck. The bull bore the mark of a colonel on his shoulders, Miller's commission in the airforce reserve. In one hand of the animal was a bolt of lightning and he was cracking a whip with the other.

The gift-giving electrical and electronic men included: Sterling Bradley, Bob Grimo, Don Howell, Garth Cannon, Chuck Cummings, Ron Cowles, Len Oswald and Dave Walters.

## Rozzoni To Speak At Press Banquet

President of California's largest farm organization, Louis A. Rozzoni of the California Farm Bureau Federation, will be speaker at the fifth annual Agricultural Journalism Press Banquet here Poly Royal weekend.

Rozzoni will speak on "What California Agriculture Needs from California Journalists."

The banquet is sponsored by Cal Poly majors in agricultural journalism, and yearly draws farm editors and other communicators from throughout California. It will be held this year at Edna Farm Center, April 27.

Rozzoni was an Italian immigrant at 17, who became at first a San Francisco window-washer to rise as head of the 60,000 family-member organization.

Ken Tarbet, Concord, is heading banquet arrangements as Press Club president.

The first bill would allow an additional income tax exemption for a taxpayer or a spouse, or a dependent child under twenty-three years of age who is a full-time student at an educational institution above the secondary level. The exemption may be claimed by the taxpayer himself, or on account of a spouse or a dependent child under the age of 23, who is in attendance on a full-time basis at an educational institution above the secondary level.

**Deduct for Supplies**  
The second bill would allow a taxpayer, who is a student in an institution of higher learning to deduct expenses of books, tuition, fees, and other supplies necessary to the courses of instruction in which he is enrolled. This bill is primarily designed to assist those students who work their way through college, and it would apply to both full-time and part-time students, whether self-supporting or supported by outside sources.

Sen. Fulbright further added, "The continually rising cost of a college education varies, but I believe it reasonable to estimate the average cost at \$1,500 per year. The cost of the more specialized courses in science and medicine quite often are more than this, and yet the parent or the individual himself receives only a \$600 a year personal exemption."

**Fraternities**  
Another bill concerning colleges has been introduced in the State Assembly recently by Assemblyman Edward E. Elliott, Los Angeles.

Passage of the bill would prohibit state owned colleges and universities from recognizing or permitting use of school facilities to fraternities or sororities which restrict membership on the basis of race, religion, color or national origin.

## Spring Fashions Tonight

"Spring fashions" will be discussed tonight by Ada Lonborg of Riley's Department Store.

Tonight's meeting, under the direction of sophomore wives representative Mary Ann Judd, will be held at 8 p. m. in Lib. 118. All interested wives and coeds are invited to attend.

## Test Run Scheduled Tonight For Student Radio Station

The trial run of what may be Cal Poly's own student closed-circuit radio station is set tonight for 8:30 p.m.

Gordon Browning, electronics junior, is spearheading the project. He plans to go on the air tonight at 780 kcs on the dial and will probably play music for the first part of the test and begin voice transmission about 9 p.m.

Branded Station R V O P (Radio Voice of Poly), much student interest is being aroused on campus about the project. College Union officials are discussing arrangements to handle R V O P programming should the tests be successful. Other comments have indicated a desire to keep it out of the already activity-jammed College Union.

Student Affairs Council, meeting in regular session tonight, will tune 780 kcs during the evening. EL MUSTANG is taking part by collecting information on the test's success. All students hearing the trial run have been urged to drop in at the paper's office, Adm. 21, and tell the editors, "I heard the broadcast." Only in this way can the real success of R V O P be predicted.

Activities Officer Dan Lawson said "R V O P offers tremendous possibilities for the students." Faculty advisorship has already been offered R V O P.

## Big Brother Program Assured Mental Health Group Support

Complete support was assured the Big Brother program by the San Luis Obispo Chapter of the Mental Health Society according to word received by Co-chairmen Mike Hall and Bud Olson from O. B. Nereson, the society's head. There will be a meeting in Cu E tomorrow night at 7:30 p.m. and anyone interested in joining this organization is urged to attend.

## Air Conditioning, Refrigeration Applied To Modern Living And Industry Is Subject Of Address

Latest innovations in the air conditioning industry will be heard in Library 114, Jan. 24, in a talk by Carlyle M. Ashley, president of the American Society of Refrigeration Engineers. The public is invited.

Ashley is chief of the engineering staff of the Carrier Corp., one of the nation's leading manufacturers of air conditioning equipment, and has had far-reaching experience in the field of research and development.

His talk will center around the applications of air conditioning and refrigeration to modern living and industry both at the present and in the foreseeable future. Emphasis will also be put on the research given to developing and perfecting some of our most up-to-date creations along this line.

Cal Poly's Air Conditioning Club is sponsoring the program. The talk is scheduled to begin at 7:30 p.m. and free refreshments will be served afterwards.

Where possible, cases would be assigned for the convenience of the Big Brother, Hall commented. The selection of the Little Brother is based, insofar as possible, on common interests, special skills or hobbies, and where indicated, a mutual religious faith.

The time required for the first few meetings will be about one hour per week, said Hall. The first visit will be primarily to stimulate enough interest to cause the boys to look forward to the next meeting. From then on, the time the two devote to one another would be entirely up to them.

Co-chairman Olson added, "In the near future, a representative of the Welfare Department is coming down to discuss with the group problems the boys in the community have."

Both chairmen reminded that this program is designed to benefit both the Little Brother and the Big Brother as well.

## Assembly Desires Found In Survey

Results of the College Union survey on "What kind of assemblies do you like?" showed that Poly students show interest in everything from satire to strip-tease, but most students show higher interest in jazz, musical plays, educational films, exchange rallies, and variety shows," says Oral Kiphart, chairman of public relations Committee of College Unions.

"We sent out 2,000 sample questionnaires and received 884 valid returns," says Kiphart, "and we feel that this is a fair representation of the students' likes." The survey will enable planning for some of this year's assemblies and will provide some basis for next year's assembly scheduling.

## Troxel Is Queen Chairman; Petitions In ASB Office

James Troxel, Jr., architectural major, has been elected by the board as the Poly Royal Queen Chairman.

Carl Beck, Poly Royal Advisor, reported, "Any student can nominate any single coed with a full program and a 1.0 grade average. Petitions, which require 25 signatures, are now available in the ASB Office."

The contract for the Campus San Luis Sports Arena has been signed. The coronation ball will be held there.

## ACTIVITIES CALENDAR

THURSDAY—Young Farmers—Talent Show, 11 a.m. to 1 p.m. in the gym.  
FRIDAY—Dimes Drive, 10 a.m. to 4 p.m. in the gym.  
SATURDAY—It Came From Outer Space, 7 and 9 p.m. in the gym.  
Basketball, Long Beach State, here.

**International Relations**

Election of officers will be held by The International Relations Club, Monday at 7:30 p.m. in Room 209, Adm. Building.

Robert Holley, club president, says there will be a discussion of the constitution followed by refreshments furnished by the International Student Committee of the Poly Women's Club under the direction of Mrs. Glenn A. Noble, president.

**Riebel In 'Who's News'**

John P. Riebel of the English faculty, nationally-known expert in business correspondence, is listed in the January, 1957 issue of CURRENT BIOGRAPHY, Who's News and Why, published in New York. Riebel is one of 58 persons in this issue in recognition of his book, "How to Write Successful Business Letters in 15 Days." Others included are David Ben-Gurion, Jozsef Cardinal Mindszenty.

Here is something for your readers to think about—Ogden Nash's reflections on Levi's:

Sure deck your lower limbs in pants;

Your's are the limbs, my sweeting.

You look divine as you advance—

Have you seen yourself retreating?

Dick Cramer

**Here's College Union**

Dear Editor:

Many people wonder what and where is a college union. College Union is a program. Our present College Union is to the south of the mountain dorms and east of the architectural labs on Motley Road. It contains approximately 8000 square feet of floor space in the main lounge and recreation area. We have one or two ping pong tables, depending on demand, chessmen, checkers, decks of cards, puzzles, magazines, a piano, fireplace, a T. V. set (which won't stay fixed), and a snack bar. Also we have cribbage boards and a double pinhole card deck (to be checked out). The ping pong balls are available at no charge until they are removed by persons unknown at which time all others must fork over a dime a ball.

There is a poster room containing paints, paper and brushes. There is a block lettering set and ink dry pens that can be checked out from the resident manager.

The College Union building and the program in YOUR College Union are administered by the College Union House Committee. We try to see that the building is kept neat and orderly, that supplies are in stock, and present a program that is of interest to all students in some phase.

We, the House Committee, organized the College Union Camera Guild to take care of and directly supervise the darkroom which is to be ready for use in the next week or ten days. We are also responsible for organizing the Student Garage.

We would like all those who haven't been to our College Union—YOUR COLLEGE UNION—to come up and see what is available.

If you feel there is need of improvement, additions, subtractions, any kind of constructive criticism, we would appreciate your contacting us. We meet now in the C. U. at 7 p.m. on Friday nights.

Dale Cressley  
Resident Manager**What Happen' To Poly?**Secretary, Alumni Association—  
California Polytechnic College  
San Luis Obispo, California

Dear Sir:

I am, theoretically, a life member of the Alumni Association. When I graduated I was given a list of advantages in belonging as a life member. I was told, I joined for life and for a short time I was kept informed of alumni events and all sporting schedules.

Well, I have been out of school for over five years now and the story has changed . . . radically. I still get the Green and Gold a few times a year and occasionally I receive a notice of an activity at the Kellogg Campus. I have no idea when, where, or if the Mustangs are playing in the Los Angeles Area. It seems though the Association can not see their way clear to supply their members with team schedules regularly. I do not mean just football, but also the other sports that so many of us still like to watch.

What about newspaper publicity? The question is WHAT newspaper publicity? In the Los Angeles Times you only occasionally see even the scores of the Mustang games and when a small article is published it is indeed an occasion. Their Sports department tells us that they require a release from the college in order to include them in their coverage. What can be done about that?

So here we are in a big city, but cut off from practically all knowledge of how our team is doing. We, the alumni that I know and work with, are still interested in our school, its teams, and its team's success. There are getting to be more and more alumni in the field. Is it not about time for something concrete to be done to improve this situation or are we just the forgotten paid up alumni.

Dale R. Tompason M. E. '51

**Southern Campus  
Getting New Gym,  
Other Buildings**

More than one half million dollars in contracts for a men's gymnasium to be constructed on the Kellogg campus have been awarded by the State Division of Architecture, according to Hugh La Bounty, building projects coordinator for the Southern campus.

The new physical education facility is to be located on a 30 acre plot on the south edge of the Pomona campus and will be a steel and reinforced concrete structure. With a total area of some 28,000 square feet and a playing floor of 110 feet by 120 feet the gymnasium will have a seating capacity of 1500 spectators. Special features of the structure include a corrective physical education room, a 40-student capacity classroom, seven staff offices and a large stage suitable for assemblies and other student activities.

Although the gymnasium is designed as a men's facility it will also be used temporarily for women students when they are accepted for enrollment in 1958.

Work is scheduled to start on this new project within 30 days and it is anticipated that it will be completed and ready for use with the opening of classes next fall when an increase in enrollment is expected due to the offering of new majors in aeronautical, electronic, mechanical and industrial engineering.

Currently under construction on the college's Kellogg campus is a new cafeteria and several agricultural instructional buildings. "We anticipate the awarding of additional contracts for a football field with bleacher seating for 8000 spectators, track, baseball, softball, tennis courts, and other outdoor physical education facilities within 60 days" stated La Bounty.

**PLACEMENT CALENDAR**

Students interested in having interviews with the following companies should make their appointments in the Placement Office as soon as possible.

**Tuesday, Jan. 23**  
U. S. NAVAL ORDINANCE TEST STATION, China Lake. Interviewing seniors in engineering and physics.  
U. S. NAVAL ORDINANCE TEST STATION, Pasadena. Interviewing seniors in engineering, physics, math.  
U. S. NAVAL ORDINANCE LABORATORY, Corona. Interviewing seniors in EL, EE, ME, Phys Sci, Math. Also juniors in same majors for summer employment.

**Wednesday, Jan. 24**  
CALIF. STATE PERSONNEL BOARD. Interviewing seniors in Arch, ME, EE, AI.  
HYCON MANUFACTURING CO., Pasadena. Interviewing seniors in ME, EE, EL.

**Thursday, Jan. 25**  
INTERNATIONAL BUSINESS MACHINES CORP. Interviewing seniors in Arts and Sciences, engineering for sales positions, seniors in EE, EL, ME, EE, Phys Sci, for engineering, research and development, and manufacturing.

**Thursday and Friday**  
FOOD MACHINERY AND CHEMICAL CORP., San Jose. Interviewing seniors in ME, EE, AS Engineering. General meeting for interested students Thursday, Jan. 26, 11 a.m.

**Friday, Jan. 26**  
RADIOPLANE CO., Van Nuys. Interviewing seniors in EE, EL, ME, math. Phys Sci, juniors in same majors for summer employment.  
AGRICULTURAL INSPECTOR—Los Angeles County Civil Service Commission. Apply by January 24. Please come to the Placement Office for complete information and application.

## Mustangs Bow to Diablos 84-73 Play Host to Long Beach Next

After dropping an 84-78 affair to the Los Angeles State Diablos before the TV cameras, the Mustang cage crew is preparing for their next outing against the 49ers of Long Beach State. The Mustangs will be seeking their third win of the CCAA season Friday night in Crandall Gym. They defeated the 49ers 84-47 just a week and a half ago, and are hoping to do the same this weekend.

In the game at L. A. Friday night, Doug Taylor came off the bench to tally 25 points for the Poly cause with an unerring jump shot, but his efforts weren't enough. The Diablos proved to be too much for the shorties of Cal Poly with their deadly shooting and superior height. The L. A. team hit on 60 per cent of their field goal attempts.

The Diablos built up an early lead and were out in front 38-20 at halftime. The green and gold came out with a full court press following the intermission and closed the gap to 64-68 with just six minutes remaining in the game. But the height of the Diablos paid off at that point, and they steadily pulled away. It resulted in Poly's first loss in conference play.

Sonny Grandberry and Theo Dunn followed Taylor in individual scoring with 19 and 17 points respectively. Dunn is still the leading scorer with a season's total of 306 points in 15 games for an average of 20.4. Grandberry follows in scoreboard statistics with 206 tallies in 15 games for a 13.7 average.

Coach Ed Jorgensen's team now has an 8-7 won and lost record over all. In conference play they have won 2 and lost 1.

## Cagers Face Clowns In Exhibition Game

An amazing exhibition of ball handling and comedy will be delivered in Crandall Gym Saturday night when Al "Runt" Pullins and his Harlem Clowns do battle with the Mustangs. The Clown's hilarious antics on the court are well known all over the nation.

They are currently making a tour of the U. S. and will make a one night stand here at Cal Poly. Their bookings on the West Coast are handled by "Scoop" Beal of Eureka Newspapers, Eureka, California.

Admission prices for the game will be \$1.50 for adults, .75 for students with cards, and .50 for children under 12.

The number of high school graduates enrolling as freshmen in American colleges of agriculture decreased 7.5 percent last year over 1955 figures.

## Don Tsark Brings New Strength To Poly Boxing Team

Editor's Note: This is the second in a series of articles written on outstanding athletes here at Poly. These articles are written to familiarize the students with our athletes, their training and aspirations.

Cal Poly's boxing team is expected to be considerably strengthened this season with the addition of Donald Tsark, a transfer student from Pasadena City College and former featherweight champion there.

Tsark became interested in Cal Poly because of its boxing program, and to further his interest in obtaining a degree in Printing. Upon the recommendation of his instructors in Pasadena he enrolled here in September.

Weighing 125 pounds and standing 5'7", Tsark will most likely fight in the featherweight division for Poly, according to Coach Tom Lee.

Tsark's interest in boxing started at the age of 18 when he used to watch his brother-in-law, a former professional fighter, train at a gym in his home town of Honolulu. While visiting the gym he watched such greats as Bobo Olsen and Henry Davis. After he had come along in the Davis, who at the time was rated boxing game he sparred with one of the top 10 professionals in the featherweight division.

In August, 1956, Tsark was picked as a member of the Southern California College All-Star team which fought the Mexican Amateur Champions. In this contest he fought to a draw in the welterweight division. To date his record stands at nine wins (three knockouts), three draws and two losses. His latest victory was in the Novice Tournament here at Poly when he captured the 125 pound division trophy.

## Congress To Consider Peacetime G. I. Bill

Peacetime veterans may soon come to Cal Poly under a new GI benefits bill.

Rep. Olin E. Teague, chairman of the House Veterans Affairs committee, has announced that the group will hold hearings on a program to give schooling and other benefits to veterans of peacetime service.

GI benefits were cut off for those who entered service after Jan. 31, 1955.

## Mustang Grapplers Pinned By Spartans

Following an initial setback at the hands of the San Jose State Spartans, 83-3, the Mustang grapplers are now whipping themselves into shape in preparation for their match against San Diego Naval Training Station at San Diego, Jan. 25. Their next home meet will be against San Diego, Jan. 31. Coach Sheldon Harden's wrestling crew is out to improve last year's record of two wins and seven losses.

Harden has been building his young but spirited wrestlers over the past few years, and they are expected to capture a decisive number of victories this season.

A 10 dual match season was announced by Coach Harden. The tentative schedule follows:

Jan. 25 San Diego Naval Training at San Diego  
Jan. 26 Camp Pendleton Marines at Oceanside  
Jan. 31 San Diego State at Cal Poly  
Feb. 1 University of California at Cal Poly  
Feb. 8 Stanford University at Cal Poly  
Feb. 14 UCLA at Cal Poly  
Feb. 15 San Francisco at S. F. San Quentin Prison at S.F.  
Feb. 28 Santa Clara University at Santa Clara  
Mar. 1-2 Far Western Tourney at Oakland  
Mar. 8-9 Pacific Coast Intercollegiate Tourney, Eugene, Ore.  
Mar. 22-23 NCAA Tourney, Pittsburg, Pa.

The increase last year in full-time students in American colleges and universities as compared with 1955 is 0.5 percent, according to School and Society magazine.

## The Bells Were Ringing for All the Girls in Dorm Mayhem

The time was late Friday afternoon the day before registration. The scene of the crime was Jespersen Dorm. The boys were in the lounge visiting some of the girls (naturally.) Suddenly complete mayhem broke loose. The buzzer alarm was somehow set off. The only ones who seemed to take this all rather calmly were, of course, the visiting boys. The girls, Mrs. Nichols, their housemother, and Associate Dean Mary Etta Murray who was visiting at the time, were running around in a complete dither.

Under normal circumstances the buzzer system in Jespersen is not connected. But it seemed that the boys thought it should be, so they did. And the buzzer kept buzzing even after the girls had spent a few frantic minutes seeing that the doors were closed.

Ruthie came to the rescue (no one seems to remember which Ruthie), rushing in and heroically saying, "here's how you shut it off!" She pulled a red lever on the little red box marked "Fire." All they needed was a fire alarm to add to the confusion.

Chris ran into Mrs. Nichols' room, frantically telling her not to call the fire department and tell them not to come if they hadn't started yet. In the heat of all the confusion, no one seemed to remember that the fire department could know nothing about it, but Mrs. Nichols, a little excitedly, called them.

Thinking back upon the incident now, she said, "They must have thought I was completely nuts."

Upon investigation, two cool heads were found in Julie and Margaret, who pulled the vital wire on the buzzer system, while Mrs. Nichols' key in hand, shut off the fire alarm.

All things considered, it was a rather dull day before registration.

## College Men See Similarity Between Women & Tobacco

One of the latest, we think, little ditties to traverse the world of college publications is this bit stating the analogy between women and tobacco. It goes like this: Sophomores want their women to be like cigarettes, slender and trim, all in a row, to be selected at will, set aflame and when the flame has subsided, discarded only to select another.

A junior wants his woman to be like a cigar. They're more expensive, make a better appearance and last longer.

A senior wants his girl to be like his pipe—something he becomes attached to, knocks gently, but lovingly, around and takes great care of at all times.

A man will give you a cigarette, offer you a cigar, but will never share a pipe.

P.S. Freshmen are too young to smoke.

Almost 40 percent of June 1956 high school graduates in the United States were attending institutions of higher education last fall.

Mathematics

Interested  
in  
Missile  
Systems  
research  
and development

*The technology of guided missiles is literally a new domain. No field*

*of engineering or science offers greater scope for creative achievement.*

Research and development at Lockheed Missile Systems Division cover virtually every field of engineering and science and have created new positions for graduates possessing outstanding ability in the following fields:

**Electronics**  
Research and development as applied to missile systems and associated equipment.

**Computers**  
For solution of complex problems and missile guidance.

**Systems Engineering**  
Research and development in missile systems.

**Antenna Design**  
Related to missile guidance.

**Communications**  
In the broad area of information transmission.

**Electromechanical Design**  
As applied to missile systems and related equipment.

**Instrumentation**  
Associated with aerodynamics, physics and electronics.

**Physics**  
Theoretical and experimental aero-physics, upper atmosphere research, optics, nuclear physics and spectroscopy.

**Structures**  
Structural design and analysis of missile systems.

**Thermodynamics**  
Aerodynamic heating and heat-transfer problems.

**Aerodynamics**  
Concerning performance of missile systems.

**Dynamics**  
As related to missile body flight problems.

**Operations Research**  
Applied to tactical weapons operations.

### Advanced Study Program

Graduates in Physics, Electrical, Aeronautical and Mechanical Engineering are invited to contact their Placement Officer regarding the Advanced Study Program which enables students to obtain their M.S. Degree while employed in their chosen field.

The complexity of missile systems research and development has created a number of positions for those completing their M.S. and Ph.D. degrees. The positions carry immediate responsibility commensurate with the advanced academic training and experience required.

Representatives of the Research and Engineering staff will be on campus

**Mon. & Tues., Jan. 28 & 29**

You are invited to consult your Placement Officer for an appointment.
