

General Election Slated To Select PR Royalty

By Pat Keeble

For the first time in the 25-year history of the "country fair on a college campus" the students of Cal Poly will have the opportunity of choosing their own Poly Royal Queen.

A general election will be held Thursday and Friday, and one of the five queen finalists will be elected to reign over the Poly Royal festivities. For the past several years, the queens have been chosen by their own student bodies. The advent of Poly's first coeds since 1929 brought about the change.

The five "home-grown" finalists chosen by a reviewing board last week from a field of 16 contestants are:

- Janice Angell, 19, a sophomore elementary education major from Los Angeles;
- Val De Gues, 20, a junior elementary education major from Santa Maria;
- Karna Thorsen, 18, a freshman home economics major from Weiser, Idaho;
- Dorothy Tullock, 18, a freshman home economics major from Templeton; and
- Pauline Woods, 19, a sophomore agricultural journalism major from Fortuna.

The five will be presented at an assembly next Wednesday night at 8 p.m. in the Engineering Auditorium, said Jim Troxel, queen contest chairman. Also scheduled to be on hand are the Majors and Minors and the band.

Portraits of each finalist are displayed in the trophy case, Administration basement, along with the Queen's crown.

Firehouse 5 Plus 2
Signed to provide entertainment on Friday of Poly Royal were the Firehouse Five Plus Two, and plans are tentative to meet them at the railroad station in an old fire engine and escort them to the campus. They will play for an assembly and dance Friday afternoon, and the carnival dance Friday night, according to Julie Pratt, opening ceremonies chairman.

PR Hutton Designed
R. F. Johnson, animal husbandry instructor, has submitted the winning design for a Poly Royal

promotion button, and was awarded \$15 by the Collegiate FFA, which he donated to the Livestock Judging Team.

The button, which will be sold for 25 cents starting two weeks before the fair, depicts a girl, dressed as Poly Royal Queen, sitting on a horse and holding an engineer's T-square, on which is inscribed the dates of the celebration, April 26-27. The design is

Here are the five campus beauties from whom the Poly Royal queen will be selected by general student body vote next week. Selected by the screening com-

mittee were (left to right): Jan Angell, Pauline Woods, Karna Thorsen, Val DeGues, and Dorothy Tullock. Western hats courtesy of Mary Roberts' Garcia Sundry; photo by Al Sales.

representative of the three divisions of the college.

Indoor Barbecue

Other plans for the event have progressed as follows:

Plans for this year's barbecue include the addition of indoor as well as outdoor facilities, and for the first time there will be a choice of meals—either beef or chicken.

The Camp San Luis Obispo Armory will be the site of the Coronation Ball. The Collegians will provide the music.

A Science Fair, displaying projects of grammar and high school students, is tentatively scheduled.

Definitely on tap are the usual intercollegiate baseball game and races.

A total of 20,000 visitors are expected to be on campus for the fair, according to Madyn Lee, Poly Royal Board chairman.

El Mustang

CALIFORNIA STATE POLYTECHNIC COLLEGE *

VOL. XVIII NO. 19 SAN LUIS OBISPO, CALIFORNIA FRIDAY, FEBRUARY 15, 1957

College Play Braces for Weekend

"They Gave Him a Co-Ed," the College Union Drama Committee's 8-act play, will be presented Feb. 22-23 at 8 p.m. in the Temporary College Union, according to Bob Spink, director.

Jack Hennessy will play the part of Dean Brown, the boy from Palouse, who is "given" a co-ed, Adele Clifton. She acts as a good foil for Jack until Bill Crow, who plays Dean Charles Bradley Brown, arrives on the scene.

Claudette Fitzpatrick, Lucky Posey, Bob Bakeman, Phil Ritterband, Ken Bailey, Sunne Kunts, Dorothy Read, Joyce Joinville, Barbara Matushek, Sue Howe, Steve Keeney, and Joe Yrigoyen also add to the fresh, new quality of the play, commented Spink.

Setting

The setting is a lounge room in a college assembly building. The topic of the hour is the new Dean, Charles Bradley Brown, whose arrival is momentarily expected. In pops a new student with the coincidental name, Dean Brown. He is a plain, unvarnished American boy from Palouse, simply unmindful of his many educational shortcomings, yet frank and breezy.

Gets Secretary

His name electrifies the group of students—and then the fun begins. Dean is assigned one of the girls as his secretary. The Registrar persists in giving Dean an advance in his salary, and the poor boy is thrown overboard in a whirlpool of riotous happenings," says Spink.

At the peak of chaos, the real Dean shows up and is mistakenly thought to be an escaped lunatic.

A. H. Alumni Open Annual Meet Today

Animal Husbandry Department alumni from throughout the state are expected here today and tomorrow for a program that includes panels on "Opportunities in the Livestock Industry" and "Livestock Marketing Problems."

Principal guest speaker will be Louis Rockford, president of Tejon Ranch, Bakersfield.

Panel members will include Stan Martin of Martin Commission Co., Los Angeles; George Tucker, secretary of the California Feeders Association, Los Angeles; Robert Miller of Union Packing Co., Los Angeles; Harvey McDougal, feedlot operator at Collinsville and past president of the California Cattleman's Association; Dean Brown, Santa Maria and Betteravia feedlot operator; Leo Fitzgerald of the Stockton Union Stock Yards; and George Strathearn, widely-known cow-calf operator.

Campus Building Requests Presented to Sacramento

By John Lawler

"Step number one in securing many new buildings on campus by 1960 has been completed," announces Dr. Clyde Fisher, building program coordinator, who has returned from Sacramento after presenting the College's request for buildings to be funded in the 1958-59 budget.

The College has asked for six major construction projects. They consist of new corporation yard facilities; a Graphic Arts Building, which will take in the Agricultural Journalism, Printing, and Industrial Engineering Departments; an auditorium and music building; four three-story 100-unit dorms; facilities for the English and ROTC departments; and a cafeteria and Student Activity Building.

El Mustang Deadlines

El Mustang news deadlines are now Tuesday, 5 p.m. for the Friday edition and Friday 5 p.m. for the Tuesday edition. The editors welcome news contributions but priority will be given to items we feel are of most universal interest to the student body. El Mustang's editorial office is in Administration 31.

Salk Vaccine Still Available: Lovett

Cal Poly's Dr. Earl Lovett here-with urges a special nudge to Mustangs with unwilling arms.

"There's still time to secure a lot of help from Salk vaccine before the polio season," says the campus physician. "Every man, woman, and child around the place ought to have this protection and they can complete their first two shots if they'll come in before the end of April."

Two shots secured before polio season will give a lot of protection," stresses Lovett, "and further protection can then be picked up next fall."

Two opportunities for securing the shots are open to campusites: The San Luis Obispo Public Health Department will give free shots February 26, 27, and 28 at its offices on Johnson Ave. across from the General Hospital for all persons from six months to twenty years of age. Hours for administration of the vaccine will be 9-11 a.m. and 1-3 p.m.

"Since this will involve the inoculation of minors," says Dr. Lovett, "all who wish to secure their free shots must have the written consent of their parents or guardians."

Those who prefer may secure their shots at the College Health Center for one dollar per shot. These are available at any time during regular hours.

"I can't emphasize enough the wisdom of securing this type of protection," urges the physician.

March Grads Urged To Put Name on List

All seniors who plan to graduate in March are urged to sign up in the ASB office at their earliest convenience, according to Gordon Kennedy, senior class president.

The graduation exercises will be held in the Engineering Auditorium, with a post-commencement reception following in the library. A senior dinner has been set for March 10, free of charge to graduate seniors, Kennedy said.

Part of College Union

Dr. Fisher said that the cafeteria and Student Activity Building make up two major parts of a four-part college union program. The other two parts are the college store and similar aspects the state will not finance. Plans were laid out with the help of William Rion, college union director of the University of Florida, who came to Poly last fall for the specific purpose of making suggestions for the College Union. Many college boards and committees have been working and planning for this for the past four years.

Not Yet Final

Although the budget request has been submitted, to the department of education, it does not necessarily mean it will be accepted. Approval will have to come from four different state departments connected with state college building programs. Dr. Fisher says that Poly will not know until March of 1958 whether or not requested facilities will be funded by act of the Legislature. If it is accepted, the buildings, will be ready for use by the Fall quarter of 1960.

Brotherhood Theme Prevails This Week

Brotherhood week, set for yesterday through Friday, will be highlighted by a speaker during college union hour Thursday.

Rabbi Joseph B. Glaser, leader of the Ventura County Jewish Council, Thursday's speaker, has entitled his talk, "Brotherhood Or?"

A panel discussion entitled "Who is my Brother?" will be at 4 o'clock with four guest speakers.

"The purpose of Brotherhood week is to emphasize that all men are equal; equal in the sight of God and that they can learn to get along with each other," said Rev. Ray Heer, executive secretary of the Inter Faith Council.

Students are invited to take part in the Brotherhood activities next week by attending the assembly and panel discussion.

'ALL COME to the Dogpatch Social tomorrow night Chris Bayes (left) and Gretta Garion seem to be saying. Read what Polly Gadabout has to say about the doin's below. (Photo by Reische)

Dog Patch Social, Campus Events Told by Polly G.

By Polly Gadabout

Shades of Daisy Mae and Li'l Abner—Dog Patch is coming to Cal Poly tomorrow night in the Temporary College Union when the Dog Patch Social gets under way at 8:30. Although you don't have to come costumed, prizes will be given for the best costumes and the winners will reign over the social as Daisy Mae and Li'l Abner.

Dance Caller

There will be a real, honest-to-goodness square dance caller there, too. Malcolm DeYoung, electronics major, will do the square dance callin' to round records. Don't believe what El Mustang

said about the Poly Penguin Enduro supposedly being held last Sunday. I, Polly Gadabout, have first-hand information which says that it will be held THIS Sunday.

Exchange Rally

The talented students of Santa Barbara College will be here Monday in the Engineering Auditorium at 7:30 p.m. in the second half of the exchange rally.

The Poly Royal Queen's assembly will be held Wednesday at 8 p.m. in the Engineering Auditorium. Hint: Have you picked your favorite for Poly Royal Queen? If not, you better do so right away. Elections are coming up Thursday and Friday.

The Customers Always Write....

The editor welcomes your letters and comments. All letters must be signed, however, the author may request that his name be withheld.

El Mustang editors reserve the right to edit all copy for grammatical errors and to refuse material which might possibly give cause to libelous action against El Mustang.

Where Credit is Due

Dear Editor:
I am writing this letter so that you can give credit where credit is due.

Last Sunday, a little past midnight, I came upon two cars parked on the side of the road, on the southern part of Santa Barbara going north. I was heading for Cal Poly and I recognized one of the cars to be that of Hank Kula. I stopped to see if I could be of any assistance to them. There was nothing I could do because Hank had already helped this fellow change his flat tire.

The reason I am writing this letter is not because of a fellow student stopping to help a motorist but that a sick person was courteous enough to stop and help a distressed motorist. He had fever and was layed up in bed Monday and Tuesday with the flu. Although he endangered his condition by stopping in the cold of the night it was of no concern to him. I think that this can be a lesson to other motorists and stu-

dents on courtesy and unselfishness. I am not saying that if you are sick you should stop to help someone, but that courtesy on the road should be practiced more instead of just reading or talking about it. This would be just one of many ways we can cut down on the accident and death rate here in California and around the country. Too many people think that by being courteous on the road you will lose time in arriving to your destination. By being courteous you will actually gain time, by living longer on this earth.

I also understand that Hank doesn't only limit his help to people on the road. He helps many students save money, without any charge, by repairing and tuning their cars and by loaning out his tools to those who wish to do their own work.

By being unselfish in this manner and getting along with his fellow man, we should take a lesson from him on courtesy and unselfishness by practicing them.

(Signed)
A more learned student
(Name withheld on request)

Aggie Vs. Engineer

Dear Editor:
It is rather comical to read in each issue of El Mustang the letters from the engineers and agricultural students throwing mud in each other's faces.

The friction between the two divisions is becoming wider and wider due to the uncalled for efforts of a few students. Although I am an engineering student, I feel there should be no discrimination between any divisions on campus. I would like to suggest that the Engineering and Agriculture Councils set up committees to promote better relations between the two departments. I would also like to request that you, as the editor, deny space to letters degrading either division. This would help to aid in establishing better relations.

While I am writing, I would like to take this opportunity to commend you and your very able staff for publishing one of the finest college newspapers.

Sincerely,
Jerome Satuloff

Alumni Association

Dear Editor:
You recently published a letter in El Mustang written by an alumnus from the class of '51. He asked several questions dealing with the college's publicity and alumni activities which I would like to answer.

The problem of proper newspaper publicity in the Los Angeles area has been a constant complaint among alumni. The college news bureau has been doing an excellent job, but there's more needed to complete their job. One must remember

that a newspaper is in business to sell information that they think their customers want to know. Therefore, if alumni do not inform their editors that they want to hear about Cal Poly, then the intensity of Cal Poly publicity can not be expected to increase.

To operate and carry out the activities of a large organization such as our Alumni Association, it takes a great deal of effort in terms of man power and economics. The Association can always use more of both. Perhaps Cal Poly has given too much ability because it has been my experience in working with alumni in the Association activities that these alumni and others have been in constant demand for their attention by their employees and interests, not to mention their own time for their family. The Board of Directors is attempting to solve some of these problems and already has plans taking form. For example, the Association is studying the idea of hiring a full time executive secretary in the near future.

In conclusion, we always welcome an interest such as Mr. Thompson's.

Sincerely,
Herb Pearce
National President

Poultry Co-op Manager To Address P. H. Men

A San Francisco business executive who heads operations for the largest poultry cooperative in the western states will speak to poultry husbandry majors here Thursday.

He is Larry Thompson, general manager of the Poultry Producers of Central California. The organization has some 12,000 members and does an annual business of about \$55,000,000, according to Richard Leach, head of the poultry husbandry department.

In addition to speaking at the majors' club meeting, Thompson will inspect Cal Poly's new poultry husbandry facilities.

P. E. Men Host Guests

Arriving on campus Tuesday for a two-day visit will be Chief of the Bureau of Health, Physical Education, and Recreation Casey Conrad and his staff.

The student unit of the California Association for Health, Physical Education, and Recreation under the direction of President Tom Reynolds will hold a buffet dinner Wednesday at 5:30 p.m. in Lib. 118 and will host the visitors.

Calling All Girls!
General meeting of Tri-Theta, the newly formed girl's service club, will be held next Tuesday, Feb. 19, at 11 a.m. in Adm. 210. All girls interested are invited to attend.

Mustangs Downed; Bowling Club News Face Aztecs Next

Following their 61-53 loss to the Santa Barbara Gauchos Tuesday, the Mustang cagers will travel south tomorrow to do battle with the Aztecs of San Diego State. Coach Ed Jorgensen's proteges were victorious over the Aztecs in Crandall Gym earlier this season and are hoping for a repeat performance in tomorrow night's contest.

Cal Poly's bowling club reached its halfway mark this week with two teams tied for first place. In action last Monday night, Circle K and the M. F. Society both captured a 3-1 win over their opponents, El Mustang and the Fighting Cocks, to bring their win-loss record to 89½ wins and 16½ losses.

The two clubs will have a play-off in the near future to determine the first-half winner.

Observers claimed that the only thrilling factor in the Santa Barbara game was that Big Theo Dunn set a new individual seasonal scoring record as he turned in a 19 point performance. Every point he makes from this time on will be a new record since he tied the old record of 868 markers, two weeks ago. He now has a total of 887 points.

Intramural Sports Report

By Don Gwaltney

Plans for a future Womens' Athletic Association program have been announced by Mrs. Tom Reynolds. In the Wednesday night girls' basketball league, Horon Harom leads with two wins and no losses.

Below are listed the leading teams and scorers in the men's leagues:

Monday League

Top team: Moonshiners W. 3 L. 0
Leading Scorers: Garraton, AIA, 41; Kinsinger, AC, 38; Itzher, Moonshiners, 28; Piliaria, Lassen, 26.

Tuesday League

Top team: Ten Year Men W. 5 L. 0
Leading Scorers: Tortaglia, Tigers, 58; Rickansurd, Tigers, 58; McGlone, Ten Year Men, 51; Bravo, Ten Year Men, 48.

Wednesday League

Top team: Deuel Dorm W. 8 L. 0
Leading Scorers: Swerts, Mustang House, 58; Harver, Sonoma, 41; Johnson, IRE, 41; Peltser, Marsh Men, 32.

Thursday League

Top teams: Mat Pica Pl and Jokers W. 4 L. 0
Leading scorers: Warren, Jokers, 68; Rushing, Jokers, 51; McMahon, Mat Pica Pl, 45; Morios, Mat Pica Pl, 31.

Swim Lessons Offered

Swimming instruction, in both beginning and advance levels, is open for women students, according to Mrs. Alice Reynolds, physical education instructor. It is held Monday nights from 7:30 to 9 o'clock.

CAL POLY - SANTA BARBARA INDIVIDUAL CAGE SCORING
Santa Barbara, 61; Osborne, 6; Barkey, 1; Smelser, 8; Hargrove, 6; Hoopingarner, 7; Herrick, 4; Phil Rice, 10; Robitaille, 10; Whalen, 9.

Mustangs Outslug Bears; Punch Cougars Tomorrow

After gaining victory number three at the expense of the California Bears. Coach Tom Lee's "Leathermen" are working out last minute strategy as they prepare for their roughest opposition to date, Washington State, tomorrow night at 8 p.m.

Washington State's Cougars posted an unimpressive record of no wins, 8 losses and 1 tie last year; however, they will bring a power packed team for this year's bouts. Coach Lee commented, "Along with San Jose State, the Cougars will offer us our stiffest opposition of the season. Every member of their squad is either a returnee from last year's squad or a returning service man." Willard Ira at 112 pounds is a

PCI champ and NCAA runner-up. Dick Rall 182, is not only a PCI and NCAA champion, but holds the distinction of being undefeated in college boxing. His only defeat came in the Olympic tryouts. Joe Zeeben, 180, is another outstanding boxer who last year lost a close decision to Poly's Frank Loduca in the finals of the PCI tournament. At 165, Washington State has Jesse Krinkenberg who last year was runner-up in the PCI.

Engineering Speakers Here Talk on Variety of Subjects

Electroluminescent materials, purity and stabilization problems incurred in the manufacturing of silicon and germanium crystals, and the Instrumentation Digital Online Transcriber, also known as the "Idiot," were topics of recent speeches to Engineering students here.

AIEE

Speaking to students of the American Institute of Electrical Engineers on the "Idiot" was Frank William, superintendent of instrumentation engineering and electronics laboratory for Rocketdyne Corporation's Canoga Park division. William outlined the functions of the "Idiot," a machine designed to perform tests, gather and process data for use in computers. He also discussed extreme heat, pressure, acceleration, and other problems of instrumentation involving tests of rocket engines.

IRE

Dr. Van Winkle, head of the semiconductor laboratory of Hughes Aircraft, spoke to the student branch of the Institute of Radio Engineers on purity control and stabilization of design characteristics as main problems encountered during the manufacture of silicon and germanium crystals, used as semiconductor devices in electronic applications. Engineers are depending more and more on the progress of semiconductor research for the replacement of vacuum tubes with transistors and other such devices, Winkle said.

ME and SAE

A joint meeting of the Mechanical Engineering Society of Automotive Engineers featured D. W. Gunther, manager of Westinghouse Electric's materials engineering department at East Pittsburgh, Pa. Stressing electroluminescent materials, which may soon provide such items as "walls of light" for American homes, Gunther told the group that "only by continued development of such ideas can engineering expect to keep pace with the demands of the electronics, turbine and electrical industries."

Bravo and Sheriff Talk

Giving colorful views of professional football—American and Canadian—were former Cal Poly grid stars Stan Sheriff and Alex Bravo speaking before Shasta Dorm residents Thursday evening in the basement lounge.

The dorm occupants present at the meeting heard Sheriff, currently with the San Francisco 49ers, give descriptive accounts of his past experience in the big leagues—outlining and describing defense formations, plays, and training methods.

Bravo, formerly with the Saskatchewan Roughriders and now part of the Los Angeles Rams' backfield, told of his Canadian adventures, contrasting American pro grid methods.

Following the two talks, questions were directed to the two gridsters.

'Water' Is Topic At Farm Center

A noted state water expert, Bert Smith, speaking to the Cal Poly Farm Center Tuesday night, said that California is faced with the same old problem, "Too much water at the wrong place at the wrong time."

The editor of Western Water News and official of the Irrigation Districts Association, said "Every place we look our water problems are serious."

California has used and developed its water, but two things stand out clear: first, we finally are going to meet on a middle ground with regards to areas of origin and areas of deficiency, second, the idea should be abandoned that California should be a divided state. We must face the serious water problem as a united state."

When asked if California could go along and increase her water developments Smith replied, "It was never intended that California would go ahead on its own and the Federal Government has made substantial developments. We should not go it alone and we're not going to go it alone."

Smith reported that new developments are being made to reduce the water evaporation of reservoirs. "A thin layer of film over the water will decrease evaporation from 25 to 50 percent," he said.

Registered for the Winter Quarter are 164 students from foreign countries.

Stone Age Visitor Makes Appearance

"We receive all types of visitors at the college but perhaps the oldest person of them all came to call recently," disclosed Miss Sandra White, Cal Poly receptionist.

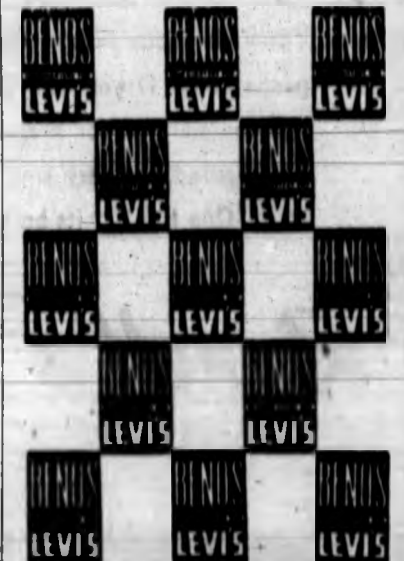

"She was a quaint old lady dressed in green. Her dress was long and boxy. Green cotton stockings added to the oddity of her costume. Her speech was almost unintelligible," divulged Miss White.

"The little old lady was a botanist and together with her husband was conducting a study of sea weed, the old lady said. To add to her peculiarity, she told me that she lived with her husband in an adobe hut on the Nipomo mesa in a style comparable to the stone age," said Miss White.

Upon further questioning it was discovered that Dr. Maurer, arts and science division dean, had talked to the little old lady and had referred her to the botany department.

The botany department had no recollection of seeing such a person and the stone age dweller disappeared as mysteriously as she had appeared.

Cal Poly currently has 542 persons on its payroll at the San Luis Obispo Campus.

Los Lecheros Name Calcagno To Head Club

Los Lecheros, Cal Poly's dairy club, elected new officers recently.

Louis Calcagno, junior dairy husbandry major from Moss Landing was elected president. Other officers elected were vice president, Paul Spitzer, senior dairy husbandry major from Long Beach; secretary, Paul York, sophomore dairy manufacturing major from San Luis Obispo, treasurer, Bob Abacheril, dairy manufacturing major from Rialto, and Joe Montes, junior dairy husbandry major from Fresno.

Average student last year borrowed 27.7 library volumes of which 9.1 were general volumes and 14.6 reserve.

Cantrill Gets Awards

Harold Cantrill, mechanical engineering senior, was presented a \$200 scholarship yesterday by the American Society of Tool Engineers in Los Angeles.

Awarded on the basis of scholarship and general promise in the field of tool engineering, machine shop head Francis Whiting presented Cantrill to the society.

We're reaching for the stars...are you?

You might call us "talent scouts." Certainly we're seeking talented young men—the kind that will star on our teams of engineers and scientists at Convair. Here is opportunity. Because Convair is engaged in the widest diversity of aircraft and missile projects in the U.S. today. Talk with the men from Convair (dates below). Let them explain the many advantages of working at Convair...of living in beautiful San Diego.

CONVAIR SAN DIEGO

Plan your career with America's top airframe builder. Here you'll find a wide range of opportunities for the graduate engineer. You'll work with a congenial group in the Company famous for such advanced aircraft as the 880—world's fastest commercial jet airliner; F-102A—first supersonic interceptor; Sea-Dart—first water-based jet fighter; and long-range research on nuclear aircraft. There is no ceiling on your chances to advance and make a name for yourself at Convair San Diego.

CONVAIR-ASTRONAUTICS

During 1957, groups of outstanding scientists and engineers, together with hand-picked young graduates, will occupy the new \$40,000,000 Convair-Astronautics facility. Here, in a unique environment, they will develop and design ATLAS—an Air Force top-priority Intercontinental Ballistic Missile (ICBM)—the forerunner of travel into space. You may qualify for a position with Convair-Astronautics' ICBM project—one of the most important of its kind in the United States.

Graduate and undergraduate students majoring in

AERONAUTICAL, ELECTRICAL, MECHANICAL, NUCLEAR, CIVIL, CHEMICAL ENGINEERING
plus MATHEMATICS, PHYSICS, METALLURGY

our Convair representatives will be conducting

INTERVIEWS: FEBRUARY 19, 1957
