

## Frat to Open Lab Next Monday For Study Help

Opening of a tutoring lab for engineering students was announced this week by Charles Fa, chairman of the Tau Sigma sponsored project.

"The lab will be staffed by junior and senior engineering students," said Fa, "and geared primarily to serve freshman and sophomore engineering students." Lab hours are scheduled for 7 to 9 p. m. weekdays except holidays and days before holidays, added Fa. It will open next Monday in classroom 19.

Aims of Tau Sigma, honor society for engineers, Fa pointed out, is to further the recognition and promotion of scholarship in the engineering division. Future plans include the sponsoring of a division-wide student paper competition and will also grant an award for outstanding scholarship in the engineering division by class.

Members of Tau Sigma are selected on a basis of scholarship, sociability, and practicality. They must rank in the upper third of their class scholar-wise. Currently, members and pledges number over 100.

## State Health Chief Honored at Buffet

Man's physical fitness and its importance today received the attention of one of the state's authorities this week in an address to approximately 100 physical education students and staff at a buffet dinner in his honor.

Stressing the progress and work on both the state and national level in the field of physical fitness, Casey Conrad, Chief of the State Bureau of Health, Physical Education, and Recreation, told the group at a meeting of CAHPER that the Bureau was interested not only in the physical part of the program, but also the social and emotional aspects.

Conrad introduced three of his staff members who also spoke to the members. Miss Patricia Hill, consultant on health education, revealed that many regional conferences throughout the state are promoting better relations between physicians and schools.

Louis Means, consultant on recreation, pointed out that there are four major trends in the field of recreation. They were: outdoor education, strides in recreation, junior college and college relationships, and re-evaluation of recreational leadership.

Building of bigger and better physical education facilities were discussed by Miss Genevieve Dexter, consultant on physical education, as one of the big steps in new school construction.

Following the dinner, the group attended the Cal Poly-Santa Barbara basketball game.

Mrs. Alice Reynolds, physical education department instructor, was staff advisor of the program.

## 'Dome' Building Discussed; Will Be Erected Tomorrow

By Gil Peirce

The practical merits of the Architectural Engineering Department's ribbed geodesic dome, a product of Bill Roth, Sam Peterson, Don Tanklage, Dick Neil, and Don Mills' concentrated efforts, has a spirited controversy going between the Architectural and Refrigeration and Air Conditioning Departments.

Both parties agree that today's erection of this new type of building, a holdover from the defunct campus chapel program, will be interesting if not spectacular, but points of view differ sharply from there on.

As Norman Sharpe, Air Conditioning department head, puts it: "This thing could very well boom-erang, comfortwise, once they get a covering on it. The internal conditions would be subject to very drastic changes according to the immediate weather picture."

Richard Evans and Robert Gibson, two Air Conditioning seniors, are calculating heating and cooling loads for the structure. They will be ready to back up Sharpe's remarks with what they say are facts and figures in the near future.

Another Air Conditioning staff member and licensed professional engineer in the field of heating and air conditioning, Howard H. Witmer, also has comments to

# 'They Gave Him A Coed' Tonight, Tomorrow in TCU

## Poly Cross Section To Appear in Cast Of Tonight's Play

Tonight's production of the College Union Drama Committee play, "They Gave Him a Co-ed" to be presented in the T.C.U. free of charge, will contain cast members who are studying eleven different majors and come from three corner states of the Union, says Bob Spink, director.

Also unique is the method of production employed in presentation of the play, Spink points out. It's to be given as a "horseshoe production where the audience sits on three sides of the stage. This is a variation of "theater in the round" and is the first time this type of production has been presented to the public in San Luis Obispo, comments Spink.

Starring in the production are Jack Hennessy, senior aero major, San Gabriel, and Adele Clifton, sophomore, home ec major, Santa Barbara. Co-starred are Claudette Fitzpatrick, freshman El Ed, Oakland; Bill Posey, sophomore, EL, Orlando, Florida; Bill Crow, freshman, AH, San Bernardino; and Bob Bakman, sophomore, FC, Gorman. Supporting players are Barbara Matushek, freshman math, Glendale; Sunne Kunta, freshman, bio sci, Santa Cruz; Steve Keeney, freshman, EL, Santa Clara; Dorothy Reed, sophomore, El Ed, San Luis Obispo; Ken Bailey, sophomore, PBe, Sacramento; Sue Howe, junior, El ed, San Luis Obispo; Joyce Joinville, sophomore, El ed, Los Altos; Phil Ritterband, junior, Pr, Los Angeles; and Joe Yrigoyen, freshman, FM, Midway City.

Production manager is Pete Tyler, freshman, El Rosada, and director is Bob Spink, senior, AH, Spokane, Washington.

**GIVING AWAY COEDS** are these cast members of tonight's and tomorrow night's production "They Gave Him a Coed". Under the direction of Bob Spink, the show will be presented in the Temporary College Union in a variation of "theater in the round" and is scheduled to start at 8:00 p.m. both evenings. Left to right are Claudette Fitzpatrick, Joe Yrigoyen, Adele Clifton, Ken Bailey, Bobby Matushek, and Bill Crow. (El Mustang photo)

## New Government Gets SAC Go-Ahead

By Alton Pryor  
El Mustang Editor

A new form of student government received a "vote of confidence" from Student Affairs Council Tuesday night, with a recommendation for the Student Government Committee to proceed on the proposed plan.

Basically, the plan calls for representation on SAC to come from departmental clubs. To do this, each division would be assured of two members, plus one additional member for each 500 enrollment in that division.

For example, the Engineering Division has eight departmental clubs and an enrollment of approximately 2,000 students. This would mean that in addition to the two assured representatives, four additional representatives would be elected. Departmental clubs of the division concerned would vote for the six men from eight originally nominated to sit on SAC, while all eight would hold a seat on the divisional council.

### Committee Head

Spearheading the government committee is Burt Tunst, junior electronics major from San Bruno, who claims the plan was formulated through a joint meeting of the officers of all three divisional councils.

Benefits of the plan, disclosed Tunst, is that each department is represented either by a representa-

tive which it nominated or by its representative to the divisional council.

The five board members would serve in an ex-officio capacity, holding a seat on SAC but without a vote.

### Questions Welcome

Tunst requests interested persons to sit in on their meeting any Tuesday, 4 p.m. in Lib. 206, as well as submit their questions to him. El Mustang will be happy to receive your questions and relay them to the committee to be answered through these columns.

Other action by SAC included approving the constitution of the Volkswagon Club. Snickers escaped both members and visitors when questions arose concerning the club's purposes. One conspicuous member suggested that one of the purposes could be that Dean of Students Everett Chandler owned a Volkswagon.

### Motions

Two motions by Chuck Cummings were referred to the Board of Athletic Control. They were: 1. To revoke SAC's authority to charge students for athletic events. 2. That rates for student wives be lowered to the same rate charged other outside students when their husband's card is stamped with a red M. (This charge is 75c) Finance Committee's recommendation to appropriate \$185 to pay for room rent of the three student managers of the hobby garage was also approved.

## Two EE Contests Offer Cash Prizes In Display, Theme

Two Poly Royal contests have sparked interest in the Electrical Engineering department. Twenty-five dollars will be awarded to the most original display during Poly Royal, April 26-27.

The Electrical Engineering Department's display will deal with some aspect of magnetism or electricity, depicting some phenomena or application. Guest ballots will determine the winner.

Entries for the presentation of theme contest, consisting simply of "ideas," will be submitted to the Poly Royal committee before April 8 and judged by the committee and George S. Furimsky of the Electrical Engineering Department. A \$10 award will go to the winner of this contest.

## New Rules Affect Constitutions Of Campus Clubs Now Forming

New clubs in the process of forming, are advised that new regulations regarding the writing of a constitution are now in effect, according to Don Walker, vice-president, ASB.

"The rules," said Walker, "require the constitution and by-laws to be incorporated into one document."

## Skin Diving Tonight In College Swim Pool

Skin diving instruction and practice will be held tonight in Crandall Gym pool from 7:30 to 9 o'clock, according to skin diving publicity chairman Mrs. Ila Atwood.

Members and others interested have been urged to bring masks, fins, and snorkels if they have them. Special events scheduled include mock treasure diving, and a strength test with a scale and harness rigged up under water. Underwater pictures will be taken of the group and its various soggy activities.

## Time Limit of Three Weeks on Club Drives

A time limit of three weeks is placed on club donation drives, it is announced by Don Walker, chairman of the donation drive committee.

In order to clarify the ruling on club drives, Walker says that drive dates will be staggered in order to allow a maximum of two drives at a time, but with not two termination dates will be the same.

Application for drive dates should be turned in to the student body vice president not less than 30 days before the start of the drive, says Walker. All drives will terminate during a student body function such as a dance or assembly.

## 'Nothing-to-Do'ers' Foiled by Big Week Of Campus Events

By Polly Gadabout

If you didn't vote for your favorite Poly Royal queen candidate yesterday, be sure to do so today. The polls, located in front of the post office and library, will be opened from 9 a.m. to 3 p.m. today. As you vote, your student body card will be punched, so it might be a good idea to bring it along. If you still haven't decided which girl you want to win, there will be pictures of each candidate at the polls. The winnah will be announced in Tuesday's El Mustang.

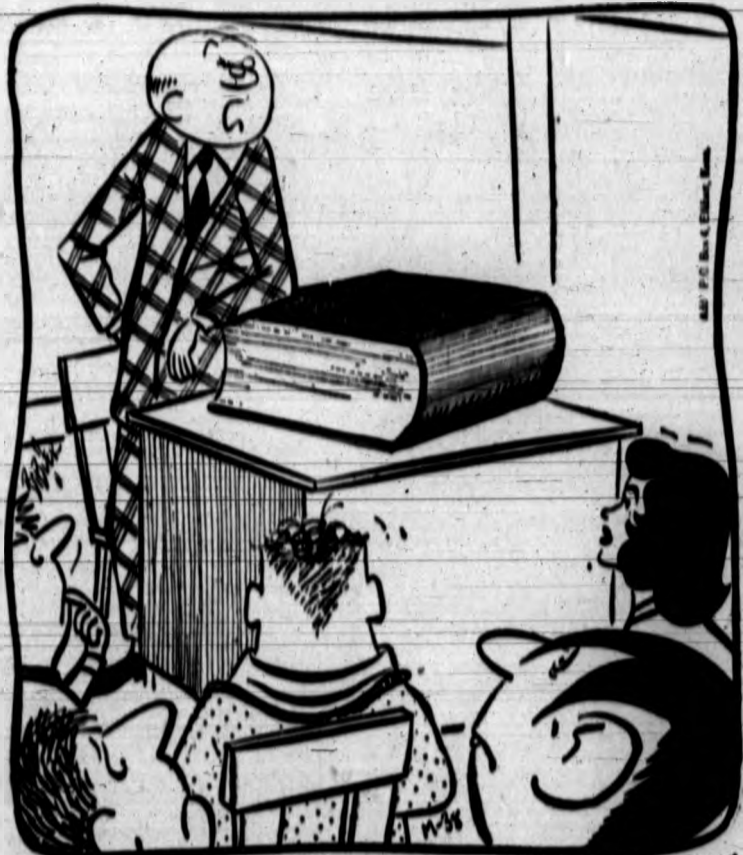

A play, entitled "They Gave Him A Coed" will be presented by the College Union Drama Committee in the Temporary College Union at 8 p.m.

"Magnificent Obsession", College Union movie of the week, will be shown in the Poly Bijou, Eng. Aud. at 7 and 9 p.m.

The Collegians Dance, sponsored by the Poultry Club, will be held in Crandall Gym tomorrow night from 9 to midnight. The following Thursday, College Union Assembly will feature Poly's own Women's Glee Club, at 11 a.m. in the Engineering Auditorium.

LITTLE MAN ON CAMPUS

by Dick Bibler

"ONE NICE THING ABOUT THIS COURSE—YOU ONLY HAVE ONE TEXT TO BUY."

President's Tour

(continued from page 1)

five years. We are trying to do something about it at Cal Poly. But I am convinced that students in the elementary and secondary schools will study English courses seriously only if we can convince them that such courses provide high priority 'occupational skills', McPhee declared.

"Top many boys and girls today get the mistaken idea that if they can get to be forest rangers, construction engineers, chemists, or a hundred other technical or 'out-door-type' of jobs that I could mention, they will never have to be bothered with writing, spelling, or giving talks.

"That's where they are wrong. The road to the top in any business or profession requires technical know-how, but it also requires the ability to 'communicate' with others and to get along with others. Somehow we've got to get this idea over to our young people before they come knocking at the door of a college.

"Certainly, if a student in college is intelligent and ambitious, he can take 'refresher' courses in English and make up deficiencies, but it takes up valuable time for something he should have mastered before he graduated from high school," McPhee declared.

PLACEMENT CALENDAR

**Today**  
BEONTEL CORP., S. F., interviewing seniors in EE and ME.  
FEDERAL TELECOMMUNICATION LABORATORIES, San Fernando, interviewing seniors in EE, EL, ME, phys sci.

**Monday and Tuesday**  
NACA AMES LABORATORY, Moffett Field, interviewing seniors in aero, EE, ME, phys sci. General meeting Monday, 4 p.m. in Lib. 114.  
NACA HIGH SPEED FLIGHT STATION, Edwards, interviewing seniors in aero, EE, EL, ME, phys sci, juniors in same majors for summer work. General meeting Monday, 4 p.m. in Lib. 114.

**Monday**  
SOUTHERN COUNTIES GAS CO., L. A., interviewing seniors in engineering, math, phys sci, juniors in ME for summer work.

**Tuesday**  
BANK OF AMERICA, L. A., interviewing in banking, appraisal, etc.  
SHELL OIL CO., interviewing seniors in EE, ME, math.

Livestock Writer John Chobila To Talk at AN Majors' Dinner

Field writer for the Western Livestock Journal, John Chobila, will be the guest speaker at the annual Boots and Spurs Awards Banquet, Thursday, 6:30 p.m. at the Veterans-Memorial building, reports Roger Linton, program-chairman.

The schedule of awards includes the presentation of silver belt buckles to this year's judging team members; the five outstanding senior members will receive plaques; and the honorary Boots and Spurs membership will be presented, adds Linton.

Officers of the Boots and Spurs Club are selling tickets for \$2.50 per plate.

On Activities

Dear Editor:  
I was one of the few that were present at the "Dogpatch Social" held last Saturday evening in the TCU. I counted the number of couples on the floor now and then, there were never more than about eight couples dancing. I'd say the total attendance was below 25. Present were two members of Heron, one member of Jespersen, three or four married couples and several high school girls along with the usual stag men.

I realize that the boxing matches were that evening, but even after 10:00 there was no increase. For a school with a population of approximately 4,000, that's only about five-eighths of one per cent of the student body interested in joint activities. The Boots and Spurs western dance was that evening too, but that's less than 100 people, I'd venture to guess. Where is everybody else???

Another excellent example is the blanket rally held a while ago. About 25 people showed up for that and only six or eight even had blankets. They had a very nice program planned. Who won the contests? The couple prize went to a Poly student and his little daughter and the individual award went to a little boy whom I doubt is even in school.

Normally at any other school, a blanket rally or a "Dogpatch Social" would draw a crowd and be loads of fun. I'll say one good thing, there are tremendous turn-outs for sports events, but that's about the end of it.

Anybody any suggestions????  
J. Bradley Flippin

'Dirty Politics'

Dear Editor:  
During the past week of Poly Royal Queen campaigning, it was noticed that some people indulged in a type of "dirty politics." One girl running for queen had her posters and other campaign material defaced and torn down completely.

This seems very unfair and the people who participated in those activities certainly don't belong here. It is too bad that certain persons can't comply to the rules and make the contest a fair and honest one.

We all have our favorite candidates, but there are limits, and we should give everyone the same chance.

Sincerely,  
Ruthie Holbrook

Chemistry Hint

Dear Editor:  
This is a little item I found while rummaging through my books. I picked it up while taking chemistry at Vallejo J. C. Since most students here must take chemistry sooner or later, I thought this might interest them.  
Subject—women; Element—W; Assupied atomic weight—115; Os-

surence—found wherever man exists, seldom found in single state; Physical properties—boils at nothing, may freeze at any moment, melts when properly treated; Chemical properties—very active, possesses great affinity for gold and silver along with platinum and precious stones. Violent reaction when left alone, able to absorb great amounts of expensive food, turns green when placed beside a better looking specimen, ages rapidly.

Uses—highly ornamental, useful as a tonic for low spirits, is probably most powerful (income) reducing agent known; Caution—highly explosive; Variations—all present day specimens are isotopes of the original Eve.

Yours,  
James Quetta

SIGN OF GOOD TASTE

## Poly Hoopsters Topple League Leading Gauchos

Playing one of their best games of the season the Mustang eagles toppled the Santa Barbara Gauchos from the unbeaten ranks by downing them 78-68 in Crandall Gym Tuesday night. The Mustangs led from start to finish and were never seriously threatened by the visitors.

Their next game will be a non league affair with Westmont College at Santa Barbara Saturday night.

The Tuesday victory was a costly one as the Green and Gold suffered the loss of forward Mike Simmons for the remainder of the season. Simmons tripped early in the game and pulled the ligaments in his left knee, but not before he made the first six points of the contest.

Poly's eagles jumped off to a quick start as Simmons dunked his six points before the Gauchos even came close to the bucket. There were fears that Poly's spirit might leave with Simmons, but there was no evidence of it.

The Gauchos provided little competition for Jorgensen's quintet in the first half. The Green and Gold administered a tight man to man defense on the visitors that allowed them very few shots. Poly led 40-27 at halftime which was an indication of their sizeable lead throughout the first half of play.

Following the intermission the Gauchos came out with an improved offense that caused Poly rooters some anxious moments, but it soon died and the Mustang dominance again took hold. At that point the Gaucho players started falling like ten pins in a wasted effort to get fouls called on the locals.

## Mustang Tumblers Open at San Jose With SJS, Indians

Coach Glenn Noble's Cal Poly gymnasts swing into competition Saturday in San Jose in a three-way meet with Stanford University and San Jose State College. Activity begins at 8 p.m.

The six-man Mustang squad will be headed by Harman Farlough who won first place in the rope climb last week during the Southern Pacific Association AAU Novice Gymnastics championships held at Pasadena City College.

Farlough, a freshman from Los Angeles, scooted up the 20 foot rope in 8.9 seconds, slower than his record of 8.55 seconds.

Other members of the local squad are Don Shoop, freshman from Grover City; Roger Booth, sophomore from Los Angeles; Bill Silva, sophomore from Riverbank; Don Hardy, sophomore from Watsonville; and Gordon Wall, sophomore from Winterhaven.

## Rookies Strengthen Poly Nine; Play Stanford March 1

With the start of the baseball season just around the corner, Coach Howie O'Daniel's horsehiders are oiling their gloves and limbering up their throwing arms in preparation for what looks like a good year for the Mustangs. The Poly diamond men open their season March 1 at Palo Alto against the Stanford Indians.

The team has nine returning lettermen from last year's squad plus many promising newcomers. Although it is still a bit early to tell what the outcome of the season will be, this year's squad will be much stronger than last year's, which had somewhat of a hard time finding the win column.

John Freddi, Ken Matson and Paul Spittler are three fine chuckers returning from last year's squad. Giving them support behind the plate will be veteran catchers Walt Gurney and Art Dyer. The outfield will be strong with the return of Lou Gentry, Chuck Remund, and Dick Rogers. All three of these men will see a lot of action with the Mustangs this spring and should be the backbone of a hard hitting outfield.

## Mustang Grapplers Prime for Broncos, Tourney

Despite having a number of outstanding grapplers on his squad, Coach Sheldon Harden's wrestling Mustangs are having their troubles as far as getting into the win column is concerned. However, they downed the San Francisco State Gators and San Quentin Prison last weekend for their first wins of the season. They are now warming up for their next meet with the Santa Clara Broncos at Santa Clara on Feb. 28.

The Broncos edged the Mustangs last year, but Harden will be taking a much stronger squad to face them this season, and it may be strengthened by the return of John Allen to the heavyweight ranks. Allen is a doubtful starter for the Santa Clara bouts, but he will definitely be ready for the PCI tournament at Eugene, Oregon, March 8-9. Allen is making a late start because of an operation for water on his knee.

Harden has a number of stand-out performers that are not eligible for varsity bouts because of their freshman standing, but they will be available for duty next

year. They include Howard Bryant, 115 pounds; George Yasukuchi, 130; Romeo Rivera, 147; Fred Ford, 167; and Pat Lovell, heavyweight. Lovell has not been defeated in collegiate wrestling this year.

Norm Gomes of the varsity squad has not been beaten in his own weight division yet this year. His only defeat came in his first match when he stepped up one class. Lynn Dyebe, 177, has also won a majority of his matches this season.

In the recent Northern California AAU meet, Bryant won first place in the 115 pound division while Ford took third at 177, Yasukuchi fourth at 135 and Wayne Womer came in third in the heavyweight division.

Harden will take his entire team to the Far Western Tourney at Oakland, March 1-2, but he will have to select the cream of the crop to represent Poly at the PCI tournament. The wrestlers must at least be runners-up in their divisions at Eugene to be eligible for the NCAA National Tournament at Pittsburgh, Penn., March 22-23.

## Intramural Sports Report

By Don Gwaltney

**TRACK**  
A ten event inter-class track meet will be held on March 1 at 4 p.m. All non-lettermen in track are eligible, and each contestant will represent his class. Each competitor is limited to four events, and will be awarded a medal with each victory.

**TENNIS**  
Darrel Stewart and Bill Jibby have progressed to the finals in the tennis tournament. They will play for the championship on a and convenient for both.

**SWIMMING**  
The freshman class emerged victorious in the recent inter-class swimming meet with 108 points. The sophomores were second with 81 followed by the seniors with 24 and the juniors who had 5.

Records were set in the 50 yd. breast-stroke, 50 yd. back-stroke, 50 yd. butterfly, and the 200 yd. relay. The sophomore team of Gogins, Davis, Samarraie and Wright set the relay mark with a 1.44 clocking. Dan Gottlieb set the butterfly record, Yissh Hayash set the backstroke mark, and Ed Clements went 50 yd. on his back in 20.2 seconds.

**TENNIS**  
Tennis practice starts Monday, Feb. 25, in preparation for the first match on March 8. Anyone interested in joining the team, meet with Ed Jorgensen on Monday at 4 p. m. in the gym office.

## IMPORTANT.....

### memo to graduating seniors

**POWER is the key to our national economy. That's why it will pay you to hitch your future in engineering to a company that's strong in the field of products for power . . . a company where young engineers are given every opportunity to learn and grow into leaders of tomorrow!**

### ALLIS-CHALMERS gives you many advantages

- Exceptional training course (two years maximum) prepares you for the career of your choice.
- You work on a variety of products: Nuclear work . . . electrical equipment . . . steam and hydraulic equipment . . . construction and farm machinery . . . processing machinery . . . internal combustion engines . . . and many other products.
- You get training on a variety of jobs: Scientific and industrial research . . . design and development engineering . . . manufacturing . . . sales . . . service.
- You get many extra benefits — including: Opportunities for post-graduate study (fully paid by company) . . . liberal health and life insurance plan . . . outstanding social and recreational programs.
- Excellent opportunities are open for electrical, mechanical and agricultural engineers.
- Openings also for chemical, civil, industrial, and mining engineers . . . or math and physics majors.

**Here Kitty, Kitty**

Bea Adams, agricultural journalist major who lives with her daughter, Mary, 13, in Poly View was more than a little distraught when she received a letter from H. D. Watts, Cal Poly housing officer. It read:  
 "It has been reported by several people living in the trailer units that you have a cat.  
 "While we realize that you may be very attached to your

cat, but we have no choice but to request that you either dispose of it by March 1, or find off-campus housing by that date."  
 "The main trouble is that Bea doesn't have a cat.  
 A quick search of her trailer home produced as many kinds of stuffed animals as one could hope to see, but not even a stuffed cat was in evidence.  
 How the mixup occurred, Bea doesn't know. There are quite a few stray cats in the area, she said, but none that frequent her home. However, after a few conferences with Watts, she is confident that it can be straightened out.  
 "At least, I plan to stay in the 'Silver City.' I'd sure hate to tell Mary that we couldn't keep our stuffed pets, though," she says.

**Mardi Gras Dance**

**ENGINEERS**

and

**SCIENTISTS**

*we'll be on  
 the campus  
 Tuesday, March 5  
 to discuss  
 your future at  
 Boeing*

*... where you can rise to the top*

Right now you're in the process of making one of the most important decisions of your life.

Your decision is important to us, too, because we are interested in engineers and scientists who want to get ahead. We're coming to the campus to give you the facts you need to judge whether Boeing can help you reach the goal you have in mind.

The fact that Boeing is an "engineers' company" is important to your success. At Boeing, you'd work with, and for, engineers—men who talk your language, understand and appreciate your work.

Boeing encourages graduate study, reimbursing full tuition and fees, plus an additional amount for incidentals. Every six months, each Boeing engineer is given a merit review—a personal opportunity for recognition and ad-

vancement. The company's steady, rapid growth assures plenty of opportunities to move ahead. At Boeing, engineers hold positions right to the top.

Another advantage: Boeing assignments are interesting. You'll work on such famous projects as the 707, America's first jet transport; the intercontinental B-52, the nation's principal long-range jet bomber; the supersonic HOMARC guided missile, and top-secret programs that probe beyond the frontiers of the known. At Boeing, you'll be in a young, expanding industry, one with its major growth still ahead.

So whether you plan a career in civil, mechanical, electrical, aeronautical or industrial engineering, physics or mathematics (or related fields), drop in for a person-to-person discussion about your future at Boeing.
