SAC Sees Possible Vote On Fee Increase Soon

BY JIM MALIN, Editor, El Mustang

Another fee increase was talked about by the works for the Associated Student Bodies of both the Kellogg-Voorsla and San Luis Obispo campuses, it was tentatively decided by the Student Affairs Council Tuesday night.

Although no official action was taken, ASB President Lee Freeman appointed a committee to study the possibilities of holding another fee election.

The proposition, which was defeated in an election last year, would raise student body fees five dimes to $1.25 for the current college maximum.

Again, both meesures will have to vote simultaneously if an election is to be held.

This ruling was set by the ASB Rules which calls for student body elections in the same election.

A decision was made to submit the student fee increase issue to the ASB Rules Council, as part of the ASB Student Senate.

If the election comes on, there will be called a combined two-thirds vote on both measures, and any one of them needed for the proposition.

If the SAC memmber were to form the opinion that another attempt at the same fee increase will not be made—then what they will do.

Consideration of the group was that for the SAC to twice fail the same fee increase would make the fee increase seem a sure thing. They felt that the students could be made more to the students, so that they will be more

Registration Day Near, Nelson Tells Students

Richard B. Nelson, Dean, issued a reminder that registration day for spring quarter is set for March 29, or 4:00 to 9:00 p.m. on Saturdays. It is doubly important to have the correct amount of cash if expenses aren't going to be paid by check for the want amounts," he emphasized.

He reminded students to have the policy of accepting cash or personal checks, except for registration credits.

For students who do not have student accounts are $2.50, non-resident students must pay $7.50. All students must pay $5.00 for each 15 units and limited students must pay $13 if enrolling for less than 15 units.

Paul Jacobson, director of Student Services, said that those students signing petitions might have to look for other ways to get the money necessary for registration.

SAC Sees Possible Vote On Fee Increase Soon

Music to Talk by: 'Don’t Call Me—I’ll Call You'

BY JUDY MEBANE, Staff Writer

"Only a week and a half cause saving for the spring quarter," replied the telephone company when Betty Blaker asked if a certain campus telephone could be "used for awhile." With that news from San Luis Obispo and Santa Barbara halls got underway. It began Monday at 6:30 p.m. It's still...

The continuous conversation on a typical residence hall telephone in the ident of the hall, began that phone ringing, or in the activity. A brief silence has been heard. The conversation..."This will be a practical test of the talking habits of students," said J. H. Ward, who has been in charge of the talking habits of students..."This will be a practical test of the talking habits of students," said J. H. Poly Switchboard

Hears All, Sees All

Cal Poly's switchboard operators sometimes feel like the Pied Piper, Almanzo, Hardy Boys, and show book yellow pages all wrapped in one.

Located in the hall of the Ad

mission Office, the switch-

board is a communication cen-

ter for Cal Poly. When students or faculty need information, all they have to do is call the switchboard and ask for help.

The switchboard is open 24 hours a day, seven days a week, and is staffed by trained operators who are ready to assist with any questions or concerns.

EDITORIAL

I would like to express my de-

light to the student and faculty par-

ticipating in the Future Intern-

tional Festival on the Poly campus.

As a parent, I was grateful to

the students and faculty par-

ticipating in the festival, and I

was proud of the United States

that was on display.

The festival was a success, and

I would like to thank all those

who helped make it possible.

I believe future programs will

be successful as well.

Campus Placement Lists Summer Jobs

Summer job opportunities for

students are now listed in the

Placement Office in Administration Building. Openings are listed in the College Placement Annual for 1962, official occupational directory for regional placement associations. Over 800 corporate and government employers have indicated they will employ summer students in the U.S. and the world. A complete list of jobs is available in the Placement Office.

Federal Government student trainees positions for the summer are available for undergraduate students in the following fields: Agriculture, Agricultural Economics, Chemistry, Civil Engineering, Electrical Engineering, Economics, Engineering, Fisheries, Forestry, Mathematics, Philosophy, Political Science, Social Science, and Business Administration. Full-time positions in 2,000 different occupations are available.

For example, civil and electron-

ic engineering students may be

employed at the NASA Manned Space Flight Center, or at the Los Alamos Project. Aerospace students may be employed at Aerojet General Corporation, or at the Boeing Aircraft Corporation.

Further information on these, as well as many other opportunities, along with application kits, are available at the Placement Office. Assistance in preparing applications is also available. Applications should be submitted to the Placement Office, 130 Loud Hall, Annex.

The Placement Office is open

Monday through Friday from 8:00 a.m. to 4:00 p.m.

“WHAT'S YOUR MAJOR... HOW DO YOU LIKE THE WEATHER?... All sorts of chatter is "chatterers" the telephone between Tenaya and Santa Lucia residents halls as students in the two dorm areas attempt to break a 207-hour talkathon record set by "chatterers" at San Jose State recently. The talkathon started Saturday, and as this is written, still going strong. Ken Lewis talks with Pam Powell. (photo by Esterine)

Student Wins Bell Scholarship; Continues Study at New York

Herman Bohrmann, senior Electronic Engineering student, has been chosen by the Bell Telephone Laboratories in Murray Hill, New Jersey, to continue his education at the firm's expense.

Bohrmann, secretary of the Institute of Radio Engineers club, was one of three seniors who flew to New York from Los Angeles last week to interview with the company's executives.

He will attend the University of New York for three days and work two days, and will receive full time pay while undergoing a graduate study program for two years. He has been selected for his outstanding scholastic record, for study at Cal Poly, and will leave for the East soon after graduation in June.

Physical Therapist Treats Students

Physical Therapist Elizabeth Michelle guided the usual sound machine into a student's injected foot while directing another student in the use of the whirlpool bath.

There are just two of her duties helping to complete on average day for her at the Health Center.

"Physicians are occasionally of assistance from emergencies, to treat to move muscles."

"Our greatest amount of injury result from accidents," she reports. "The percentages is very high during football season, but surprisingly low during basketball season."

"Other injuries are caused primarily from falls, lifting too much weight, or whip-lashes resulting from automobile accidents. Last year we had quite a few back and neck injuries that occurred on the trampoline."

"We have also treated injuries on occasions resulting from uncommon viruses such as students who have had polio.

Sprained ankles, knees and joint pains are high on the list for treatment, but acne, the wrath of the teen-age, continues to be the "main pain" for the physical therapist, but can be controlled by an ultra-violet treatment.

Of the latest developments in physical therapy, there is the treatment of plants worn with ultra-violet light, heavy resistance exercises, and with vitamin injections."

"The average patient spends three hours a week. In four from them fast," grinned Miss Michelle.

Approximately 3000 visits this year, equipment including whirlpools, ice, ultra-violet light, heavy resistance exercises, indoar, distraction, etc. and interest in more training."

"We have more equipment than most other college health centers," commented Dr. Earl Lovett, Dean of Students.

"But we treat more students."

"We are not a dispensers' school and have very few students who nominate, therefore we handle many cases that probably could otherwise be alleviated at home if mother were around supplying two aspirins and a hot water bottle."

"We are particularly proud of having a well-trained, registered physical therapist. This is something that many other colleges are lacking," he concluded.

Hayes Will Attend Engineering Confab

Dean of Engineering Harald P. Hayes will attend the annual conference of the Engineering and Operating Section of the Pacific Coast Electrical Association (PCEA) in San Francisco March 25-28.

Dean Hayes will be an invited guest at the PCEA luncheon, Thursday, March 27. During the luncheon, speakers, panel discussions and "parallel papers discussions covering wide range of subjects. Topics to be discussed range from transmission and distribution to hydro generation."

H. G. Harper, public information manager, Southern California Edison Company, is scheduled to speak at the luncheon Thursday, while Howard G. Vesper, president of Standard Oil of California, will be "An Unbiased Story of Electric Power... From the Government's Point of View," and Vesper will speak on "Fuel Oil Facts." Friday, H. Warren, chairman of the PCEA convention, has invited all members of the Electrical Engineering department.

U.S. Air Force

FOR AMERICA'S FUTURE AND YOUR OWN... JOIN THE AEROSPACE TEAM!
Intramural hoopatara wound up their tournament play last week, leaving only the tied games to be oonteated. Monday's 7 o'clock league produced Fremont Haights as the victors, with Sequoia Heights and Palomar's Pirates as second and third place winners. Nevada House and Tumans had floor were disabled for first place in the 8 o'clock league after a tie. Hewaon House and Tenaya 8rd floor were deadlocked for first place in the 8 o'clock league at rea, and the Fokopa of Deuel Dorm cinched third place. Also knotted for first place were the Untouchablea and the Mastic of Thursday night's 9 o'clock league: Sequoia won and moved into the third place slot. The fast-fighting Snakes Next, Sequoia II, and the Unpredictables will play off tonight and tomorrow night to decide the first place winner in their 9 o'clock league competition. An unexpected result in Tuesday’s 9 o'clock league recorded the Decoys as winners and the Mastic as runners-up. Each team scored seven points, with the Decoys registering the nail-biting 7-6 victory in the second game.

Wednesday night's league competition saw the constituency return the Technical Arts league as they came out of the fire with a 5-0 tally. Max Pino vs El Dorado for second place, and the Industrial Engineers finished in third. A thunderous registered Tumans 6th floor in the position with a 5-0 record. El Dorado took second place, and Sequoia 6th floor good third.

Opportunities for advancement at General Telephone are particularly promising because communications is one of the nation's foremost-ranking growth industries.

To help you grow with the company, the General Telephone System provides planned training programs, and encourages and aids an individual in self-development.

Many college graduates have earned early advancements with General Telephone within the areas of their own interests and attributes. If you majored in Engineering, Mathematics, Physics, Business Administration, the Liberal Arts or the Social Sciences, then there are many fine opportunities in numerous locations where you can count on a management career. We invite you to explore your own possibilities at General Telephone. As a start, ask your Placement Director for a copy of our brochure.

Modesto's Pedestro

"Pedestro from Modesto" is the new president of AIA student chapter. Following election of officers on March 19, Pedro was named to replace Tom Matthews as president. Art Klahman, Haywood Ford, is outgoing secretary and new vice president Bill Miller is new secretary.

The office of treasurer is still open, however, so any interested students can contact the AIA office for information.

State College Trustees expect to name a new Chancellor within 60 days.

Tri Beta Confed Region Scoop

Outings and seminars will be featured at the annual Tri Beta Regional Conference to be held at Redwood Glen camp in the Santa Cruz Mountains, March 21-April 1.

Cal Poly's chapter will be one of many to be hosted by the Epsilon Delta chapter from San Jose State.

Purpose of the conference is to meet with other Tri Beta chapters from California to exchange ideas on scientific projects and encourage exchanges of ideas on the undergraduate level.

ENGINEERING SENIORS!

Your future is unlimited in LOS ANGELES

The City of Future

CIVIL ELECTRICAL

SANTALUCIA

ENGINEERS are needed for the challenging work of planning, designing, building and operating one of the largest electric and water systems in the world.

Arrange with the Placement Office to talk with our engineering representatives.

TUESDAY, MARCH 13, 1962

CITY OF LOS ANGELES

Department of Water and Power

RESIDENTS of the City of Los Angeles are invited to attend the "TALK-A-ThON," a fund raising program for the "Aloha Hawaii" Polynesian Show, on Tuesday night, March 13, at 7:45 p.m. in the auditorium at La Sierra College.

Sign-ups will be taken from 7-7:45 p.m., and the registration line will be open throughout the evening.

There are ten religious organizations now participating in the Jean-Faith Council on campus.

Learning never stops for engineers at Western Electric

There’s no place at Western Electric for engineers who feel that college diplomas signify the end of their education. However, if a man can meet our quality standards and feels that he is really just beginning to learn... and if he is ready to launch his career where learning is an important part of the job and where graduate-level training on and off the job is encouraged... we want and need him.

At Western Electric, in addition to the normal learning-while-doing, engineers are encouraged to move ahead in their field by several types of educational programs. Western Electric maintains its own full-time graduate engineering program, several fellowship and management courses, and a tuition refund plan for out-of-hours college study.

Towards this atmosphere is just one reason why a career at Western Electric is so stimulating and so rewarding. However, in the nature of the work we do. Our engineers are involved in projects that implement the whole art of modern telephony, from high-speed transmission and information to electronic telephonic and computer-controlled production techniques.

Should you join us now, you will be joining to Western Electric at one of the best times in the company’s history. In the management area alone, several thousand supervisory jobs are expected to open up to W.E. people within the next 10 years. And our work of building communications equipment and systems becomes increasingly challenging and important as the communications needs of our nation and the world continue to increase.

Challenging opportunities now available at Western Electric are for electrical, mechanical, industrial, and chemical engineers in the central, field and business areas. All qualified applicants will receive consideration, irrespective of race, color, or national origin. For more information about Western Electric and its engineering opportunities, contact: Western Electric Company, Room 8012, 250 Madison Avenue, New York 17, N.Y. — or contact your Western Electric representative to arrange for a Western Electric interview when our college representatives visit your campus.
