

NO DISTRACTIONS . . . Studying under slightly less than perfect conditions in the new Library annex are Leslie Guske, Mathematics major from Yerington, Nevada, and Noori Kakerounian, a Biological Science major from Iran. This is one of the large new study areas that when furnished will provide an additional 1,130 reader stations. (Photo by Norum)

Another Building Accepted; College Continues To Grow

Library Annex Passes Final Will Triple Reader Capacity

Official college acceptance of the new \$1.2 million Dexter Memorial Library annex was consummated late Tuesday afternoon after a final inspection by State Division of Architects and college officials. The annex, containing 66,000 square feet of floor space, enlarges the present reader capacity of the library from 520 to 1,650.

Included in the new portion of the building are four new levels of stacks, which will more than double the present stack area.

The ground floor of the annex, containing 7,200 square feet of sales and office area, is the new location of the El Corral college bookstore. Part of the new stack area will be used for bookstore storage space.

"With a construction completion date set for mid October, the college hopes to accept the 15,635 square foot area of the new Science Wing," says Douglas Gerard, college building coordinator.

The wing at a cost of \$400,000, will house new atomic physics and solid state physics laboratories. A sub-critical reactor, under a grant of the National Science Foundation will also be installed in the building.

Engineering West Building, to be completed by the end of October, contains a floor area of 122,000 square feet—the size of more than 100 average homes. Although only scheduled for operation for Winter Quarter, moving into the \$3.25 million structure will begin as soon as it is officially accepted.

Homecoming Candidates Announced

Five fetching coeds were selected Wednesday night as finalists in this year's Homecoming Queen election.

The five were selected from among 31 girls in an interview session with the Homecoming Queen committee in the Staff Dining Hall. Their names will appear on a student body election ballot next Wednesday and Thursday, according to ASB President Vik Dolente.

This year's Homecoming queen candidates are: Pat Bright, a 19-year-old sophomore Social Science major from La Canada; Caroline Cooper, a 21-year-old Home Economics senior from Tempton; Maridel Kennedy, 19, a sophomore Home Economics major from Claremont; Pat Palmer, a 20-year-old Elementary Education sophomore from Santa Cruz; Sandy Wright, an 18-year-old Home Economics sophomore from Downey.

Members of the Homecoming Queen selection committee said they had a "tough time" selecting this year's finalists. One member said, "I think all 31 of the girls are queens."

The coed who is finally chosen by the student body to be Homecoming Queen will reign over the campus-wide Homecoming festival, Oct. 19 and 20. The other four girls will form her court of princesses.

No Vehicles Allowed On 'New' Campus

"No vehicles other than service or emergency vehicles shall be allowed inside the Outer Perimeter Road." This section of the Master Plan for the Physical Development of Cal Poly, as described by the college's consulting architects, Falk and Booth, marks the beginning of a new era at the college. The era of The Walking Campus.

During the August meeting of the State College Board of Trustees, the architects presented the long range building and construction plans for Cal Poly. This master plan for the college is designed with the assumption that by the mid-1970's there will be an annual enrollment of 12,000 students.

At the present rate of students to cars—a ratio of better than three registered cars to every five students—it is expected that there would be as high as 7,000 student automobiles on campus at one time if permitted.

Armed with these figures, the Master Plan calls for large parking lots to be designed and constructed adjacent to each campus entrance outside the perimeter roads.

With a total area of 59.4 acres allotted for these new parking facilities, most of the presently existing lot will be converted to eventual construction sites for some of the \$10-\$15 million worth of construction planned for the next five years.

Commenting on the new "Walking Campus" College Building Coordinator Douglas Gerard said, "With the permanent closure of several campus roads this Fall, the initial step is over. It will be awhile before more roads will eventually be landscaped and converted to pedestrian malls."

The election for "Ugly Man" will take place from Oct. 15 through Oct. 19. A donation of a penny will constitute a vote. Stuffing the ballot box is recommended. All proceeds will be used for the improvement of the Poly Grove area.

A perpetual trophy will be awarded to the organization sponsoring the winner and photographs of previous contestants are on display at the library.

The Ugly Man will appear on Friday night, Oct. 19 at the Homecoming bonfire and dance. He will ride on the APO float in the Homecoming Parade and at the football game. He will also accompany the Homecoming queen at various public appearances.

CALIFORNIA STATE POLYTECHNIC COLLEGE

Vol. XXV No. 3 SAN LUIS OBISPO, CALIFORNIA Friday, October 5, 1962

OFFICIAL MOROCCO TRAINING CENTER

Poly Chosen For Peace Corps

Sixty Trainees Set For Friday Arrival

Cal Poly has officially been selected as the Peace Corps training center for Morocco, it was announced last week by College officials. According to them, establishment of a Peace Corps training center here has been under extensive study for many months, but until final contracts were received late Wednesday morning they were reluctant to make any public statements on the program.

Several dozen memos, telephone calls and letters outlining and planning the program have been exchanged between Cal Poly and the Peace Corps and State Department officials in Washington, D.C. to complete these negotiations.

Starting next Friday, 60 special trainees will begin a rigorous 13-week training program on campus to prepare themselves for crop production, irrigation, surveying or English teaching positions in the tiny northwestern African country.

J. Corder Gibson, assistant dean of agriculture and director of the Peace Corps training program at Cal Poly, said that each trainee's progress and reactions to training will be continuously evaluated during the stay. Those who do not meet the exacting standards of the Corps will be weeded out, Gibson added.

Cal Poly and the University of California at Los Angeles will be the only two California schools preparing trainees for the Peace Corps this fall. It is estimated that more than 70 other colleges and universities across the nation will be engaged in the program at its peak.

San Jose State, San Francisco State and the University of California at Berkeley have already presented Peace Corps training programs.

Corps trainees, who are not regularly enrolled students in college, will take eight highly specialized and fast-moving courses during

their training. They will attend class 10 hours a day for six days a week.

The courses will include:

AREA STUDIES and an intensive look at the history, culture, geography and language of the people of Morocco.

AMERICAN STUDIES and a survey of the United States history and government with an intensive look at contemporary problems of the United States in World affairs.

"In this course, we're not going to tell the trainees what to say about America—we're just going to give them the facts," Gibson said. "The trainees will be free to tell the Moroccan what they want."

HEALTH AND MEDICAL TRAINING including the basics of first aid and personal hygiene. This course will also prepare the trainees for the mental problems they may have to face in Morocco.

PHYSICAL EDUCATION AND RECREATION giving the trainees more than an hour of strenuous daily exercise and instructions about Moroccan dances and sports.

FRENCH giving the trainees an opportunity to learn the country's official language. Trainees will receive more than 18 hours a week instruction in it. A large part of this course will be taught in the language laboratories of the San Luis Obispo City Schools.

INSTRUCTION IN COMMUNISM, covering its menaces and how to locate and recognize it and its forms.

PEACE CORPS ORIENTATION, giving the trainees a complete study of the history and working of the Peace Corps. This course will also give the students information about their Moroccan assignments.

TECHNICAL STUDIES teaching the trainees what they in turn teach the Moroccan people.

While they are being trained, the Corps neophytes will be housed in two downtown motels. They will commute to the college on bicycles and will eat in the Student Dining Hall.

Funds for the program were appropriated through the State Department and will be administered at the college by the Cal Poly Foundation.

The trainees will be at the college from Oct. 12, 1963 to Jan. 23, 1963 but will take a two-week "home leave" during Christmas vacation. After their studies, those who successfully complete the program—then officially called "Peace Corps Volunteers"—will spend a two week training period in Puerto Rico. They will then go abroad to Morocco—their home for the next 18 months—for final two weeks of training.

Nigerians Celebrate Independence; Plan Gala Celebration

Nigeria's first year of independence will be celebrated tonight when members of the Nigerian Students Association host a reception for school officials and the general student body.

Temporary College Union will be the site of the reception and dance with entertainment being held from 7-10.

Nigerian students will also discuss their country's first year of independence and their purpose in choosing Cal Poly. They will be available to answer questions concerning national dress, customs, schools, recreation and social activities.

All members of the student body and faculty are invited.

Publicity Workshop Open To Groups

A workshop has been opened on campus where organizations can have publicity, public relations and advertising materials produced.

The new facility is called the Student Publicity Workshop and is located in the rear of the present Associated Student Body Office and Post Office Building.

Robert Spink, graduate manager of the college, urges campus groups to become acquainted with and make use of the new facilities for great advantage. Plan to come in and be shown around the shop by the shop manager or Spink at your earliest convenience.

Mirror Trouble? You Have A Place

How did you look, sir, when you got up this morning? As you gazed upon your half-awake face, did it occur to you that you might possibly be the most ugly man on campus?

Alpha Phi Omega is hunting for you for the annual Ugly Man Contest held in conjunction with Homecoming. Each organization on campus is asked to enter a promising candidate. Applications for the non-beauty contest are available in Box 45 in the ASB Office, and there will be a meeting of these prospective candidates on Oct. 8 at 7:30 p.m. at Poly Grove.

The election for "Ugly Man" will take place from Oct. 15 through Oct. 19. A donation of a penny will constitute a vote. Stuffing the ballot box is recommended. All proceeds will be used for the improvement of the Poly Grove area.

A perpetual trophy will be awarded to the organization sponsoring the winner and photographs of previous contestants are on display at the library.

The Ugly Man will appear on Friday night, Oct. 19 at the Homecoming bonfire and dance. He will ride on the APO float in the Homecoming Parade and at the football game. He will also accompany the Homecoming queen at various public appearances.

NIGERIAN INDEPENDENCE . . . Celebrating their second year of independence is enough reason to hold a dance and the Nigerian students are doing just that in cooperation with the International Relations Club. Making final preparations for tonight's affair at the TCU Hall are, from the left: Chijioke N. Chineme, Charles N. Etuk, Bonifacio O. Okehi, Emmanuel N. Agwuna, and Onuma Baldy Okezie. Nigeria celebrated her Independence Oct. 1.

Sticks And Stones

Officials Oppose Name Change Proposal Of College Trustees

A proposal to change the name of the 18 California state colleges is being opposed by Cal Poly administrators.

The proposal, which was made by the State College Trustees Gifts and Public Affairs Committee last July, would make the names of the colleges identical except for their locations.

Cal Poly, for example, would be renamed, "California State College, San Luis Obispo."

The proposal is considered by some to be the first step in a plan to install identical curricula at all of the state colleges.

In other quarters, the proposed name change is considered to be the first step in giving the state college system university status. If the state college system were to be changed into a university, it would be called, "California State University." There would be no connection with the University of California, however.

The name change proposal is being studied by the state college chancellor's office.

Cal Poly officials are opposed to the change because it would take the word "polytechnic" out of the college's official title. A spokesman for the administration said this would cause the college to "lose its identity."

The spokesman, who preferred to remain anonymous, said Cal Poly considers itself to be more of a statewide service than the rest of the state colleges.

About 80 per cent of the students enrolled at Cal Poly come from outside the San Luis Obispo county area, the spokesman pointed out. He pointed out that other state colleges enroll mostly students from their own geographical areas.

If the proposed name change is to be interpreted as the first step in making all state colleges teach identical courses, it could mean the complete revampment—or the end—of Cal Poly's vocationally oriented curriculum.

In Cal Poly's case, however, the change could not come about easily. Specific provisions for the college's curriculum have been written into the California State Education Act.

Changing Cal Poly's name would require legislative action. The chancellor's office, however, has the power to change the names of many of the other state colleges.

Cal Poly officials also protest moves to change the names of the Kellogg and Voorhis campuses because they were secured largely through fund and lands donated by prominent families.

College officials do not know when the name change proposal will be acted upon by the chancellor's office.

Our Milk Is Tops! Wins Gold Medal

The campus creamery has won a Gold Medal Award for its milk entry at the Los Angeles County Fair.

Elmer D. McGlasson, Dairy Department instructor, announced this week that the milk, entered in competition with commercial producers from throughout the state, received a near perfect score of 94 out of a possible 97 at the annual judging.

The milk sample was judged on flavor and odor, bacteria, sediment, temperature and container and closure.

McGlasson pointed out that the award illustrates the quality of the approved manufacturing methods and procedures used by the student-employees, and the outstanding performance of new equipment located in the dairy manufacturing section of Cal Poly's new Food Processing Building.

The Cal Poly Gold Medal milk entry came from a mixed herd of cows owned by both the college foundation and individual students.

Funds for the program were appropriated through the State Department and will be administered at the college by the Cal Poly Foundation.

The trainees will be at the college from Oct. 12, 1963 to Jan. 23, 1963 but will take a two-week "home leave" during Christmas vacation. After their studies, those who successfully complete the program—then officially called "Peace Corps Volunteers"—will spend a two week training period in Puerto Rico. They will then go abroad to Morocco—their home for the next 18 months—for final two weeks of training.

ASB Office Has Reserved Seats to Fresno Game

Reserved seat tickets to the Cal Poly-Fresno State football game to be played in Fresno's Radcliffe Stadium on Saturday, Oct. 13, are on sale in the Associated Student Body office.

Robert L. Spink, graduate manager, said the reserved-seat tickets will sell for \$3 each and are available on a first-come-first-served basis.

Spink said Cal Poly students will have an organized rooting section at the night game. Cal Poly students with ASB cards will be admitted free of charge to the rooting section.

3,000 Take Sabin Sugar

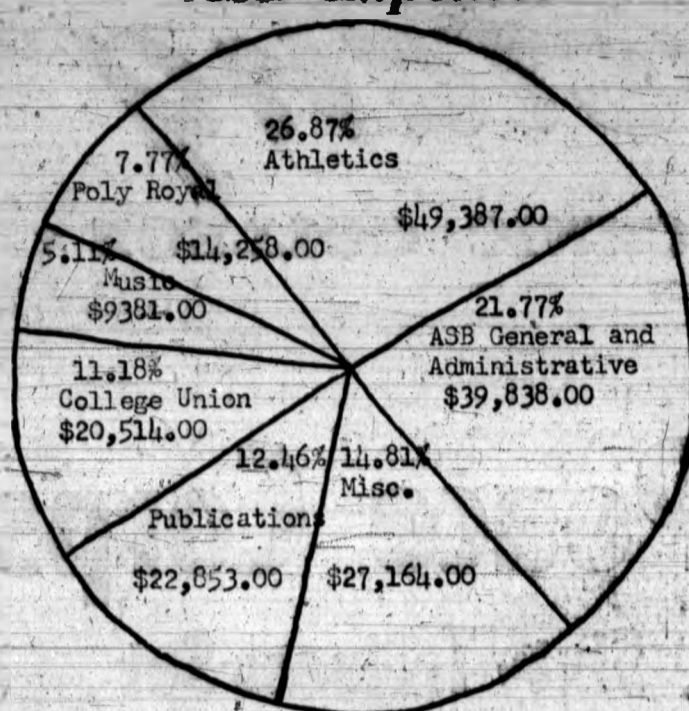

Approximately 3,000 of the students fighting crowds at enrollment received the Sabin type polio immunization. This program was conducted by the health center under the direction of Dr. Clifford L. Walker.

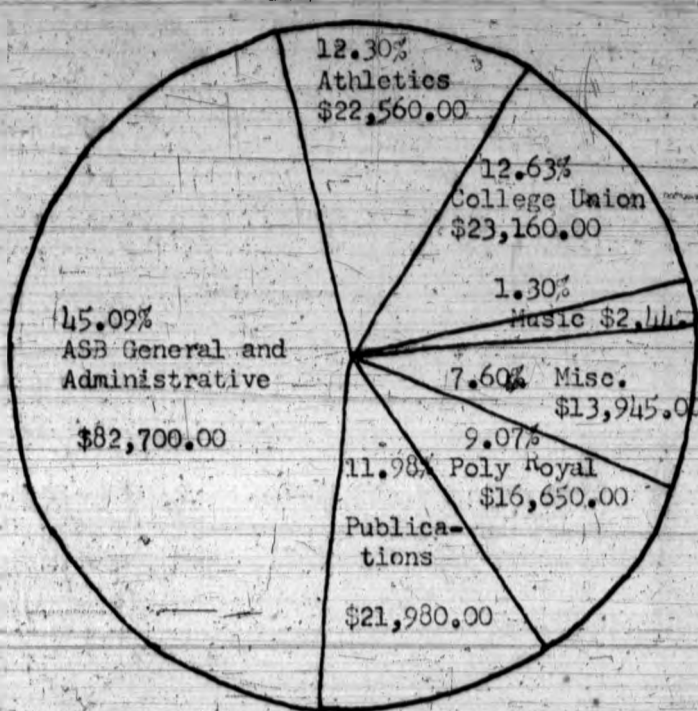

IT WON'T HURT . . . Bea Victor, Home Economics junior, as she receives her first flu shot from Jeanne Miller, registered nurse. In accordance with the present campaign, flu shots are being given to students free and to staff and faculty members for 50 cents a shot. Health center officials urge everyone to get their shots and avoid what could be a severe flu epidemic year.

NOTHING BUT REALITY . . . Finalists for the Homecoming Queen Election set for next week are: (l to r) Patricia Britz, Caroline Cooper, Patricia Palmer, Maridel Kennedy, and Sandy Wright. Polls will be open Wednesday and Thursday, and anyone with an A.S.B. card may vote.

ASB Expenses

ASB Income

LITTLE MAN ON CAMPUS

"QUIT WORRYIN' ABOUT WHAT KIND OF A COURSE IT IS! WITH A LINE THIS LONG IT MUST BE A 'SNAP'."

College-Age Adults Have Most 'Aches' Survey Shows

Completely exploding that rosy, nostalgic and time-honored myth that "college days are carefree days," a recent survey discloses that young adults of college age—19 through 24—suffer not only the most frequent headaches, but the most severe ones of any other comparable age group.

Even the harassed business man takes second place to students, with a total of 77 per cent suffering frequent headaches as against 80 per cent in the college group, according to a survey taken by a drug concern.

It is certainly no secret that the cost of education has zoomed, making the financing of a college career a serious problem. And many a young co-ed and college boy worries about being popular, gaining admittance to the "right" fraternity or sorority—in short making friends.

Final exams are equally guilty as headache initiators. Students burn the midnight oil cramming for tests, and work what might have been a simple headache into a four-star splitter because of anxiety and lack of sleep. Then, pyramid on top of all these, the big blockbuster headache—what does the future hold?

Hoover On TV; "To Tell Truth"

Ralph Hoover, horseback rider in the Animal Husbandry Department, will be a guest participant on CBS Television's "To Tell the Truth" program on October 8.

Hoover, who was in New York to record the program in CBS studios recently, has been a member of the Cal Poly faculty the past 14 years.

Oct. 12 Last Day for State Driver Training

The defensive driver training program will be offered for the last time this quarter on Friday, Oct. 12, from 3 to 6:30 p.m. Ag. Eng. 128.

The program is for students and staff members who drive and plan to drive state cars or trucks. The three and a half hour session will consist of a lecture and a drive with driving tests given arranged times to interested students. The test will be given by a certified driving instructor in the department.

Symphony Needs Participants

Students and staff are invited to participate in the cultural activities of the 1968-69 season of the San Luis Obispo County Symphony. If you play any instrument, plan to attend the rehearsals held on Tuesday evening at 7:30 in the San Luis Obispo Junior High School Hand Room.

This year's 5,705 enrollment far cry from the 18 students rolled at Cal Poly its first year.

ASB Budget Is \$183,395; Must Be Spent By You

By JIM McLAIN

You and nearly 6,000 other students will sponsor activities costing \$183,395 during the coming nine months. That figure is the total income and expense for the more than 60 Associated Student Body-sponsored activities and services provided for in this year's ASB budget.

The huge allocation was approved by the Student Affairs Council last Spring Quarter.

Deciding just how and why the money should be divided up and spent took the student Finance committee most of the last school year.

Last year's Finance committee, which was presided over by Tom Bragg, conducted hearings every Monday evening with groups that had requested the use of student body funds.

In deciding what to recommend to the Student Affairs Council, the committee wanted to know exactly how much money each group wanted, exactly how the money would be spent, and exactly how the proposed activities of each group that requested money would benefit the entire student body.

After cutting the requests of some groups, the committee was finally able to balance the income and expenses of the 1968-69 Associated Student Body budget at \$183,395, a figure that could be called comfortable.

A glance through this year's budget, which took 20 pages of double-spaced typing to record, reveals some interesting statistics. Athletics, for example, will cost the Associated Student Body some

\$49,387 this year. But they will bring in an income of only \$22,560.

The \$26,827 deficit is the cost of so-called "minor" sports which bring in no income. The "minor" sports include track, baseball, frosh football, tennis, swimming, gymnastics, golf, cross country and water polo. Both student and faculty members consider the minor sports essential to a well-rounded intercollegiate program.

Basketball and football are the only two sports that actually bring money into the Associated Student coffers.

But, although admissions are charged to basketball games, the sport is expected to show a \$8,560 deficit this season.

Football is expected to show slightly less than a \$1,000 profit this year.

Other statistics are equally as interesting as athletics.

The student body will spend \$22,853 on publications this year. But publishing newspapers and annuals will bring in only \$21,980.

The College Union program, which includes most dances, movies, social events and concerts to be offered this year, will cost \$20,514. It will bring in revenues totaling \$23,160. A long look at this year's budget tells a story of statistics like the above.

Building Coordinator

Douglas Gerard, college building coordinator, is responsible for the college's buildings from six to eight years prior to construction until one year after construction. They are then turned over to the Maintenance Department.

With General Montgomery

ROTC Gains New Chief; Has Diverse Background

A World War II staff member of General Montgomery in Europe is the new professor of Military Science and is in charge of the college's ROTC program. Lt. Col. William Boyce, a graduate of the University of Connecticut who did additional study at George Washington University, Wash. D.C., is replacing Lt. Col. A. F. Marcondia. Other new staff members include Sergeant Bernard Parker who replaces Sergeant Henry Bradley and Major George Davies. All three of the new staff members are from the first Cavalry Division in Korea.

Lt. Col. Boyce is a graduate of the Command and General Staff College at Fort Leavenworth, Kan., and has been on the Department of the Army General staff and has spent two years with the Joint Chiefs of Staff. His last assignment consisted of Deputy Battle Group Commander in Korea.

Maj. Davies is a graduate from

Biology Dept. Head Returns to Poly

Returning to Cal Poly after a year's leave of absence is Dr. Glenn A. Noble, head of the Biological Sciences Department.

Dr. Noble received a Fulbright Lectureship and taught Zoology at Taiwan University and parasitology at the medical college also in Taiwan (Formosa). He also carried on research with the university and the medical college.

Receiving his doctorate from Stanford in 1940, he came to Cal Poly in 1947, and has held the position of department head since his arrival. He has received grants from the California Department of Fish and Game in 1948; New York Zoological Society, 1952; National Institutes of Health, 1958-1960.

Dr. Noble is a member of American Society of Zoologists, American Society of Parasitologists, Society of Protozoologists, American Microscopical Society, Society for the Advancement of Research (Philippines), Western Society of Naturalists and Sigma Xi.

PLACEMENT OFFICE INTERVIEWS

Monday, Oct. 7
McCLELLAN Air Force Base, Sacramento Interview seniors in Aero, EE, EL, IE, ME, and Metallurgical Engineering for positions in support of manned aircraft missile systems, and communications systems.

Tuesday, Oct. 8
LOCKHEED-California Company, Burbank Interview seniors in Aero, Arch, EE, EL, Math, ME, and Physical Sciences for the Burbank facility for positions in spacecraft, advanced aircraft development, or ocean systems organizations. An Advanced Degree Work-Study Program is also offered.

Wednesday, Oct. 9
U. S. AIR FORCE Officers will be in the Snack Bar area of the Dining Hall to discuss the U. S. Air Force Officer training program.

Thursday, Oct. 10
MORRO UNION Elementary School Dist. Interviews for teaching candidates for elementary teaching positions.

Friday, Oct. 11
U. S. AIR FORCE Flight Test Center Interview seniors in Aero, EE, EL, Math, ME, and Physical Sciences.

Interested persons please sign up for appointments and obtain application blanks in the Placement Office, Adm. 208. Company brochures and literature are available and should be read prior to interviews, stated Gene Rittenhouse, placement officer.

MC CLELLAN AIR FORCE BASE AT SACRAMENTO, CALIFORNIA

Announces Campus Interviews for

Electrical, Electronic, Industrial Mechanical and Aeronautical Engineers and Metallurgist
(\$5,335 to \$6,345 Per Annum)

McClellan has a continuing requirement for a large number of Electrical, Electronic, Industrial, Mechanical and Aeronautical Engineers for the support of Manned Aircraft, Missile Systems and Communications Systems

Applications are being accepted from students who will receive their Bachelors or Masters Degrees by June, 1969

U.S. Civil Service Procedures Apply
U.S. Citizenship Required

A recruiting representative will be at the Campus for personal interviews on 8 October 1968

Consult your Placement Office for further details and to arrange for interview appointments

X-CHANGE

SAN FRANCISCO STATE COLLEGE—Students can pick up six units of extension credit by watching TV. And with this, televised education for college credit is under way in the Bay area. Economics 199, a study of economic policy, and an understanding of how the economic system functions, is offered to combat "economic illiteracy."

Golden Gater

SAN JOSE STATE COLLEGE—Bruce F. Allen, Assemblyman, 29th district, related in a letter to this paper that the state administration has put a freeze on vacant faculty positions.

"September registration at San Jose State College has resulted in the disclosure of a highly secret directive from the Brown administration requiring a freeze on a certain number of vacant faculty positions. This is the third year in a row that Brown has imposed this restriction on state college operations, in each case without publicity, and in such a furtive manner that administration officials refuse to talk about it and even deny its existence."

"At San Jose, students were turned away from required courses, which will result in an additional semester or even a year of college. Laboratory and room space was available, but no teacher because of the required freeze."

"Restrictions such as these, which prevent eager students from progressing with their technical education, are a restriction on the people of California, a prevention from achieving the highest potential."

Bruce F. Allen, Assemblyman, 29th District

FRESNO STATE COLLEGE—Enrollment at F.S.C. jumped 511 over the fall semester a year ago, to bring the total to 6,684. This increase is the biggest enrollment increase at F.S.C. since the late 1940's.

FRESNO STATE COLLEGE—"Diamond," the T-bone steak eating, dry martini drinking, snoring bulldog mascot of Fresno State was "borrowed" recently, but later returned by campus pranksters.

Collegian

STANISLAUS STATE COLLEGE—A turkey race is proposed to take place sometime in late November or early December. Entries of turkeys may be made by various colleges, local growers, organizations on campus, or by individuals. The poultry may be saddled, painted, or in any manner decorated to depict an individual concern.

Signal

'True Security' Subject Of Christian Talk

"Christian Science: The Revelation of True Security" will be the title of a lecture by Paul K. Wavro of Jacksonville, Fla. Sponsored by the campus Christian Science Organization, the free lecture will be held Monday, Oct. 8, at 7 p.m. in Science B-5.

Wavro is a member of the Board of Lectureship of the Mother Church, the First Church of Christ Scientist in Boston, Mass.

BIGGEST LOLLIPOP . . . Pretty Dolly, wife of senior Architectural Engineering major Robert Engman carries one of the many colorful "land buoys" that the Architectural Department has taken to the Monterey convention this week. (Photo by Norum)

Architecture Students Attend Confab

More than 50 Architectural Engineering students are attending the 17th Annual Convention of the California Council, American Institute of Architects which opened in Monterey yesterday.

Cal Poly contributions to the convention include several student projects and the planning of the professional program by George Haaslein, head of the Architectural Engineering Department.

Nearly two dozen colorful "land buoys" designed and constructed by architecture students to reflect Monterey's nautical atmosphere are sprinkled throughout the Monterey County Fairgrounds, site of the convention.

Auction Set For Oct. 22

Sixth annual Range Bull Auction, under the auspices of the Animal Husbandry Department, will be held in the livestock pavilion Oct. 22, at 11 a.m.

The 80 bulls, to pass under the auctioneer's gavel, include 60 Cal Poly test bulls and 20 consigned by the Tri-County Hereford Breeders Association. The bulls will be graded under the University of California's quality grading system Oct. 21 at 1:30 p.m.

The test bulls were consigned by 10 different breeders, six each, and were started on feeding trials Dec. 1, 1961. The bulls were held until Feb. 1, and then fed for maximum growth. They were fed in two separate lots, three bulls from each breeder in each lot. Full records have been kept and are available for buyers to study.

The bulls are strictly range conditioned and ready for heavy service on any range.

The test is completely supervised by the college, under the direction of Roy Harris, Animal Husbandry instructor. The test is used for student instruction and is of great value to the beef cattle industry, says Harris.

Official Explains Parking Lot Rates

Students ask why they have to pay the same rate for the use of the unimproved temporary parking lots as they do for the use of surfaced and lighted lots.

Don Nelson, college Business Manager, explains that statewide campus parking regulations do not provide for different rates because of location or desirability of parking lots. Although the college has requested that it be allowed to charge a varying rate dependent upon the desirability of the space, state officials insist the charge must be the same for all lots.

Temporary lots 0-9, 0-10, 0-13, have been put in by the college Maintenance Department using its own funds. This was done for the convenience of the students to allow them to park closer to the center of the campus and to provide additional spaces, added Nelson.

The state will not provide money to improve these lots because they are all sites for future buildings and will not be available much longer, said Nelson.

ROTC Wins Honors At Summer Camp, Has Top Marksman

Competing with 30 other ROTC programs, the 20 members of Cal Poly's senior class won the camp trophy at summer camp in Fort Lewis, Wash.

The trophy, presented annually to the college with the highest group average in the M-1 rifle marksmanship score, was accepted in the graduation parade by Cadet 1st Lt. Gordon Umenoto, a Math major from Honolulu. Umenoto had the high class score of 78, which was one of seven expert scores turned in by the seniors. The camp average was 56.8.

Winning the camp trophy placed Cal Poly in contention for the national "Warrior of the Pacific" trophy. The marksmanship competition included Stanford, the University of California and other ROTC programs in the Sixth Division area.

The Fort Lewis summer camp, which ran from June 23 to August 3, offered cadets training in rifle marksmanship on the transition range, physical fitness, first aid, map reading, and tactical problems.

Each cadet fired live rounds of .308-caliber, .300-caliber, rifle, grenade launcher, and machine gun ammunition. They also witnessed a four-hour display with the combined arms of artillery, armor, infantry, and air forces destroying an imaginary enemy with fire and smoke.

Biological Science graduate Charles L. Jankay received the commission of 2nd Lt. in the Quartermaster Corps at the close of the camp.

Among visiting dignitaries representing each of the colleges at the camp were college President Julian A. McPhee and Dean of Students Everett M. Chandler, who witnessed training in the bivouac area.

Students Win At LA Fair

Special awards for entries in the livestock division at the Los Angeles County Fair went to several Cal Poly students. The prize-winning animals were on exhibition during the 16-day run of the fair which closed last week.

Students and their champion livestock were: Sally Chapman, reserve champion wether or ewe lamb; Earl Cosma, champion hereford steer; Charles Watts, reserve champion hereford steer or halber; Dale Davenport, champion short-horn or other breed steer; Ernest Lucas, reserve champion barrow or gilt-swine; Dan Robbins, champion barrow or gilt-swine; Dan Robbins, champion barrow or gilt-swine; Dan Robbins, champion market swine; Larry Warren, reserve champion market swine; Dan Robbins, grand champion market swine.

The group was awarded first place for five animals (beef) entered from one college.

Rev. Pike Launches Three-Day Mission

Rt. Rev. James A. Pike, Episcopal Bishop of California and author of the article "The Right to be an Atheist," will launch a three-day mission at the First Presbyterian Church in San Luis Obispo.

Bishop Pike will speak at 8 p.m. Sunday, Monday and Tuesday evenings in the church at Morro and Marsh Sts.

Canterbury, Wesley and Westminster campus student groups will attend the three lectures. The mission has received the endorsement of the local ten-denomination Ministerial Association as well as the Episcopal and Presbyterian congregations.

The 44th annual convention of the statewide California Farm Bureau will be held in San Diego Nov. 11-15.

ERASE WITHOUT A TRACE ON EATON'S CORRASABLE BOND

Typing errors never show on Corrasable. The special surface of this paper makes it possible to erase without a trace—with just an ordinary pencil eraser. Results: clean-looking, perfectly typed papers. Next time you sit down at the keyboard, make no mistake—type on Corrasable!

Your choice of Corrasable in light, medium, heavy weights and Onion Skin. In handy 100-sheet packets and 500-sheet boxes. Only Eaton makes Corrasable.

Crops Class Is On Two Day Field Trip

Thirty-nine students enrolled in the seed production class are in San Joaquin Valley this week for a two-day field trip to study the various phases of seed production at seven commercial business operations.

According to Dr. Oscar E. Reece, crops instructor who will head the group, students will see seed harvesting, processing, packaging, and the marketing of field, vegetable and garden seeds and some flower seeds.

During the first day of the trip students will visit the Vernon Thomas ranch near Huron and the Arnold Thomas Seed Service located on the Raymond Thomas ranch near Five Points, where they will be guided through seed processing plants and regular seed experimental fields.

The group will journey to the Charles Messic Chemical Company near Five Points to learn about mixing insecticides and insecticide sales.

Tomorrow at Modesto, the students will tour the plant of Lawrence Robinson and Sons, who specialize in the vining-type of vegetable seeds.

At the Wain-Rohmert Company near Hollister, the field trip group will be taken through a four-story seed cleaning plant where vegetable seeds are processed and packaged.

The Ferry-Morse Production Seed Farm near San Juan Bautista will feature field operations and the harvesting of seeds to include beans and tomatoes.

Climaxing the trip will be a tour of the All-American Flower trials also at the Ferry-Morse farm.

Laker-Warrior Tickets On Sale At ASB Office

Tickets for the Oct. 11 Los Angeles Lakers-San Francisco Warriors basketball game are on sale now at the ASB Office. Student admission is \$1.50. General and reserved tickets are \$3 and \$4.

Other ticket outlets in San Luis Obispo are Wickenden's Menswear, The Village Squire, Welsh's City Pharmacy and Green Brother's Clothiers.

Tickets also can be purchased at Hall's Sporting Goods in Paso Robles, Crisanti Hardware in Atascadero, Grand Avenue Hardware in Arroyo Grande and Slinas Sporting Goods in Santa Maria.

Leaders Will Combat Apathy

Apathy and the wave of student disinterest on campus will be the topic of discussion at the Fall Leadership Conference to be held Oct. 26-27 at Camp Ocean Pines, Cambria.

The conference is being held for all interested students to help cope with growing problems of disinterest and to create enough enthusiasm to keep student activities going, says Dan Lawson, activities dean. Students active in campus organizations are especially urged to participate.

"Apathitis," a disease prevalent among college students and threatening a school-wide epidemic, has been selected as the theme of the conference.

Rev. Don Hartsock, Los Angeles minister who was a speaker at Religion in Life Week in 1960, will give the keynote address.

"How-to" sessions will explore the mechanics of student organizations and go into effective internal communication, effective publicity, and the reasons why groups fail.

Tickets are now on sale in the ASB office for \$2. Men's will be provided if the student has a meal ticket or will be priced at regular cafeteria rates.

Student Wives Club has donated \$50 for a "Campership" fund to pay the registration fees of those who can't afford it. These "Camperships" are being offered to leaders in student organizations and inquiries can be made in the ASB office.

State of Theater Is High Noon Subject

The state of the theater in New York and Europe is the topic of Tuesday, Oct. 9 Books At High Noon program in the Staff Dining Room.

The discussion will be conducted by English instructors Stanley Barr, who attended 20 plays in Europe during the past summer, and Robert Andreini, who "attended as many plays as I could afford" while on sabbatical leave at Columbia University.

Mustangs Host S. F. Valley State

NEW STARTER — Halfback Jim Ramos of San Luis Obispo will lead the Mustangs against San Fernando Valley State College Saturday night at 8:00 in Mustang Stadium. Ramos won a starting assignment for his play in the San Diego State game, as he scored one of the Mustang's two touchdowns.

Vaughn Hitchcock Makes Debut as Wrestling Coach

Communications Discussed

"What Did You Say?" an address on business communications, was presented to the Industrial Engineering Club last week by R.S. Stevens, director of sales for Advance Seminars, a Los Angeles business advisory firm. Stevens said that accurate communication is management's greatest problem. He used audience participation skits to prove his point.

Cross-Country Schedule

Oct. 6 — At Fresno State
Oct. 13 — Santa Barbara Open at (Santa Barbara)
Oct. 20 — Fresno State
Oct. 27 — Westmont College
Nov. 3 — San Francisco State
Nov. 10 — At UC Santa Barbara at (Santa Barbara)
Nov. 17 — California Collegiate Athletic Association Championships, Los Angeles
Nov. 24 — Regional NCAA College Division Championship, Fresno.

Poly Colts Host Fresno Frosh Today

The Cal Poly colt junior varsity football squad opens the 1962 season today at 2:30 p.m., playing host to the Fresno Frosh in Mustang Stadium.

The Colts have a new coach, Vic Buecola. The young mentor, a Cal Poly alumnus of 1956, is coaching his first game at his alma mater. The tentative starting lineup finds Jack Hoover at quarterback. The Colt forward wall will consist of Don Buttery at center; Brad Elliot at left guard; John Whipple, left tackle; and Lindsay Daniels, left end. On the right side, Ron Cecchini, tackle; Louis Gabriel, guard; and Gary Zinani at end. Hoover is joined in the backfield by John Davis, fullback; Dan Catehey, left half; and Gwinn Paige, right half.

In this his first season at the reins, Buecola has material to turn out a top team. The squad has good backfield speed as Davis runs the 100-yard dash in under 10 seconds, while starting right half Guinn Paige runs the century in 10 flat.

Injuries could hurt the squad today as six gridders will be kept out of action. Guards Bill Blount and Jim Beaumont won't see action. They will be joined on the sidelines by John Sarkisian, Louis Ortali, Mike Forster and Ray Malech.

This year Fresno has a tough line from tackle to tackle with their offense built around a good running attack. The Poly offense is basically balanced with equal emphasis placed on passing and running.

Last season's Colts finished the year with a 1-4 record as their lone victory came over the Fresno Frosh.

OPEN EVENINGS

Local Product Could Help Gridders Gore Matadors

When the Cal Poly Mustangs take the field against the Matadors of San Fernando Valley College 8:00 p.m. this Saturday night in Poly Stadium, the presence in the lineup of a hometown halfback just might be the spark needed for the "green machine" to roll home a winner. In last week's game against San Diego State little five foot-nine inch, 170 pound Jim Ramos gave a demonstration of fine running skill. He led the Mustangs on their 71 yard first period touchdown drive, capping it off with a seven yard touchdown jump. Ramos gained 47 yards in seven carries for a fine 6.7 average and gathered in one pass from quarterback Stan Reynolds for 29 yards.

Saturday night will be a night of firsts as the Mustangs of host the Matadors in a California Collegiate Athletic Association battle.

The Mustangs will be looking for their first CCAA victory of the season following last week's 35-14 loss to the San Diego State Aztecs, while the Matadors will be looking for their first CCAA victory in the SFVSC history since the college is only two years old and in its first year of CCAA competition.

Last season the two teams met in a non-conference game won by the Mustangs, 43-8.

The Matadors opened their season against UC, Riverside and won on the last play of the game, 7-6, but were defeated 11-7 in a real close contest last week by Claremont-Mudd. The Mustangs' first contest was a 35-0 crushing defeat at the hands of the San Diego Marines.

As of Monday morning, no injuries occurring from the San Diego State game had been reported to head Mustang Coach Sheldon Harden.

Several Mustangs were able to show their stuff last week against the Aztecs even though the scoreboard didn't show it.

Quarterback Stan Reynolds showed some good passing and running techniques as late in the fourth quarter when he couldn't find his receivers down field and looked to be in deep trouble, he skirted around several Aztecs and left end for 17 yards down to the nine yard line.

The outstanding linemen for the Mustangs had to be guard Fred Whittingham (6-3, 235) who recovered two fumbles, and ran a kickoff back for 24 yards, and made numerous tackles.

The Matadors are led by their

1961 "most valuable player," Bill Storm (195, 6-0) junior fullback. In his first game of the season he packed the ball 10 times for 76 yards including a 37-yard romp that set up the winning TD.

Head signal caller is Phil Romoli (180, 6-1). Romoli scored the winning touchdown after the gun had gone off to win the game for the Matadors against UC, Riverside. With the time already gone, center Joel Schaeffer kicked for the extra point and the victory.

Up front, the Matadors are led by end Kenny Olson (190, 5-10) who played fullback last season. Olson also plays in the defensive backfield and has snagged several opponents' passes.

CCAA ROUNDUP

With most of the experts having conceded Fresno State's strong Bulldogs their fifth straight California Collegiate Athletic Association championship, Saturday's league game between Long Beach State and San Diego State may decide the runner-up spot. Pre-season polls tabbed the 49ers of Long Beach and the Aztecs as the best bets to battle it out for the CCAA's number two position and that's just what these two clubs figure to do come Saturday night.

The Aztecs have recorded two straight triumphs over CCAA foes and will rule a slight favorite to gain the nod over Don Reed's 49ers. Following an opening game loss to Cal Poly (Pomona) 13-6, San Diego State has impressive wins over Los Angeles State and Cal Poly (SLO) respectively.

First Home State Game

Warriors, Lakers Set For Oct. 11 Cage Clash

A probable preview of this year's "World Series of Basketball" is in store for Cal Poly roundball fans on Oct. 11, when the fabulous Elgin Baylor and the Los Angeles Lakers meet the equally fantastic Wilt Chamberlain and the San Francisco Warriors here in the Men's Gymnasium. The Lakers and the Warriors are currently in the midst of an exhibition series in Hawaii and are in good shape for the opening of the 1962-63 National Basketball League season.

In Elgin Baylor and Wilt Chamberlain, cage fans have an opportunity to see two of the all time greats of the round-ball sport.

Each of the three years since he entered the league, Chamberlain has not only been its highest scorer, but also set many records. The most outstanding of these was set last year when the seven foot two inch star hit the buckets for a remarkable total of 100 points in one game. He had a seasonal average of 50.4 points per game.

As a balance against Chamberlain, the Lakers have a great one-two punch in Baylor and Jerry West. Both all-stars, Baylor scored 38.2 points per game while West hit the nets for a 30.8 average.

These three all-stars, in addition to the many other fine players on both of the teams, should provide cage fans with spectacular play that is the trademark of the NBA.

Tickets for the game are priced at \$4 for reserved, \$3 for general admission and \$1.50 for students. They may be purchased at the Associated Student Body Office or at several locations in downtown San Luis Obispo.

Times, Rules Set For PE Facilities

Regulations for use of the athletic facilities were posted this week, according to Dr. Robert Mott, head of the Physical Education Department.

All students may make use of the handball courts, athletic fields, and tennis courts at any time of the day when PE classes are not using the respective facilities. The gym will be open from 7-9 p.m. Monday through Friday. Equipment can be checked out from the locker room attendant weekdays from 8 a.m. to 6 p.m.

The swimming pool in Crandall Gym is open for the aquatic minded the following hours: 3-4 p.m. daily Monday through Friday; 7-9 p.m. Wednesday evening; and 2-4 p.m. Sunday afternoon.

Elgin Mustang WATER POLO SCHEDULE

Oct. 13	At Fresno State, 4 p.m.
Oct. 20	San Fernando Valley State, 3 p.m.
Oct. 26	El Camino Junior College, 8 p.m.
Oct. 26	At Long Beach State, 3 p.m.
Oct. 27	At University of Southern California, 10:30 a.m.
Nov. 7	Los Angeles State, 3 p.m.
Nov. 8	Fullerton Junior College, 8 p.m.
Nov. 10	San Francisco State, 8 p.m.
Nov. 16-17	At UC Santa Barbara, 3 p.m.
	California State College Championship, San Francisco.

SPACE, MISSILE & JET PROJECTS AT DOUGLAS

have created outstanding career opportunities for

SCIENTISTS and ENGINEERS

B.S. degrees or better

Assignments include the following areas:

Servo-Mechanisms—relating to all types of control problems

Electronic Systems—relating to all types of guidance, detection, control and communications

Propulsion—relating to fluid-mechanics, thermodynamics, dynamics, internal aerodynamics

Environmental—relating to air conditioning, pressurization and oxygen systems

Human Factors—analysis of environment affecting pilot and space crews, design of cockpit consoles, instrument panels and pilot equipment

Heat Transfer—relating to missile and space vehicle structures

Structures—relating to cyclic loads, temperature effects, and the investigation of new materials, methods, products, etc.

Aerodynamics—relating to wind tunnel, research, stability and control

Solid State Physics—relating to metal surfaces and fatigue

Space vehicle and weapon system studies—of all types, involving a vast range of scientific and engineering skills
