Summer  
Edition

CALIFORNIA STATE POLYTECHNIC COLLEGE

VOL. XXV, No. 47

SAN LUIS OBISPO, CALIFORNIA

FRIDAY, JULY 12, 1963

**SUMMER CLASS**—Dr. Edgar Hyer and his farm management crew quickly get to the grass roots of things by making soil tests and checking pastures at a local ranch. Dr. Hyer says, "A good farm manager must recognize soil and its capabilities in order to determine which crops will grow best on it."

## English Major Reactivated

An English major geared for teachers will be reactivated this fall. It was announced this week by Dr. Carl Cummins, dean of the Applied Arts Division.

Dr. Philip Gerber, head of the English Department, says that the new program cannot appear in the college catalog until the Fall of 1964. However, President Julian A. McPhee has obtained permission from the State College Trustees to reinstitute the major this fall.

The English major was withdrawn from the college curriculum three years ago.

Dr. Gerber explains the adoption of a new English major was

hastened by the state legislature's ruling to eliminate the education major as a means to ob-

tain certification for teaching in California.

The new law requires teacher prospects to have at least a major or minor in an academic subject. Both the major and minor must be subjects normally taught in public schools. This eliminates the "education major" as a means to a credential.

Explaining further, Dr. Gerber said that according to the new law students reaching a certain point in their course of study will be allowed to continue and obtain teaching credentials. Those not to this point will have to transfer to an academic major.

It will be necessary for persons who have not completed two years of college work (90 quarter units)

and have not also been formally admitted to a teacher education program on or before Jan. 1, 1964, to choose a subject matter degree major and a teaching minor. (Acceptance into a college with freshman or sophomore status does not constitute "formal" acceptance into a teacher education program.)

"We expect a certain number to transfer to the English major and the department will be enlarged, but not more than normal growth," Dr. Gerber believes.

Dr. Gerber concluded, "Some courses will be enlarged while others modified to fit the planned sequence we have set up for the new major. The department is actually reorganizing rather than making any radical additions."

## Hensel Heads Social Science

Dale Andrews, dean of the college, today announced Dr. Donald W. Hensel as acting head of the Social Science Department. He succeeds Dr. Norman Cruickshanks.

Hensel acquired his BS Degree in history and political science from the University of North Dakota in 1949, his MA at the University of Colorado in 1953, and his doctorate in 1957.

His past working experience includes an instructor at public schools in Colorado, New Mexico and Arizona; graduate assistant at the University of Colorado, instructor in history and coordinator of arts and sciences instruction at the University of Colorado. He joined the Cal Poly staff in 1960.

## McPhee Plans Visit To Africa Project

Cal Poly President Julian A. McPhee is planning a trip to Africa in about two weeks.

Although his itinerary is not complete, McPhee will stop at Lusaka, the capital of Northern Rhodesia.

Lusaka is the location of the College of Further Education where Dr. Robert Mott, J. Philip Bromley and George Furimsky, Cal Poly staff members, are presently located.

Dr. Mott is vice-principal of the college and instructor in Physical Education. Bromley is instructing in Business Education and Furimsky is an instructor in pre-engineering.

McPhee will be making an official visit to the Cal Poly project in Rhodesia.

## 3 Poly Staffers Receive CATA Service Awards

Three members of the Cal Poly staff received outstanding service awards from the California Agricultural Teachers Association here during the organization's annual conference.

Assistant Dean of Agricultural J. Cordner Gibson was presented a 25-year key while department heads, Dr. Edgar Hyer, Farm Management, and Dr. Howard C. Brown, Ornamental Horticulture, received framed certificates for 15-year service.

Byron J. McMahon, chief of the Bureau of Agricultural Education, made the presentations at the last session of the CATA conference.

Dean Gibson began his vocational agricultural teaching career in 1938 at Downey High School. Two years later he moved to Whittier High School and remained there until 1943. After a three year break in the armed services, Gibson took a position as the regional supervisor in Los Angeles for the Bureau of Agricultural Education. In 1949, he joined the Cal Poly staff at the Kellogg-Voorhis campus in Agricultural Education, and later became the assistant dean of agriculture here in 1961.

Dr. Hyer served as assistant agricultural economics professor from 1948 to 1951 at Oregon State University, after graduating from Utah State University and earning his doctorate from Cornell University. Four years after joining the Cal Poly staff, Dr. Hyer became the first Farm Management Department head and has held that position ever since.

Ornamental Horticulture Department Head, Howard C. Brown, obtained a 15-year certificate by teaching at Ohio State University, where he gained his MS degree, and at Cal Poly.

## Action Expected July 16 On Proposed Housing

The San Luis Obispo City Planning Commission is scheduled to take action July 16 on the controversial 6 million dollar Dollie Adams development that will, if accepted by the commission, house approximately 2,000 Cal Poly students.

Nearly 200 residents in the Fredericks Streets area, the proposed site of the 1,000 unit development, attended the last planning commission meeting to voice their complaints about the student off-campus residence — complaints ranging from decreased property values, congested traffic movement, threat to children's safety, to so called "spot zoning."

President of the college, Julian A. McPhee, revealed to the "Telegraph-Tribune" that, "There is no question that, if there are no additional off-campus housing facilities developed, our enrollment will not continue to grow."

McPhee also mentioned, "It should be obvious to all concerned that the college cannot become involved in favoring or not favoring any one specific off-campus housing proposal. This would be a display of favoritism which would not be appropriate."

In answer to a group of citizens who proposed privately financed student housing facilities on campus, McPhee remarked that contrary to some reports, there are no housing developments located on any of the California state college campuses which have been financed by private or nonprofit corporations. McPhee expressed concern when he read that college officials were quoted regarding the possibility of the privately financed housing and that the college was favorably disposed to such a development.

Dean of Students Everett Chandler said, when asked about the ing, "We are grateful to all off-

college's stand on off-campus housing facilities, but we cannot be in the position to encourage or discourage any particular builder."

## July 4 Fireworks—Fizzle—FLOP!

Tramping to the South end of the baseball field were approximately 20, laughing, joking July 4 celebrants who mentally "licked their chops" in anticipation of popping some firecrackers and lighting up the landscape with various devices.

Arriving at the scene approximately around 9 p.m. the group wasted little time in setting up the "whistlers," "whomers" and sparklers.

A housewife from Verville raced to the group in hope of recovering some lost childhood experience.

There was only one hitch in the plans. The fireworks were defective.

There were a few sparks a whistle or two, burned fingers, but no real bangs. Matches were discarded and lighters frantically brought into play. To no avail. Try as they may it was clearly a July 4 flop.

People began to troop back to discarded studies. The housewife returned with nothing more than a half burned sparkler for all her troubles.

Finally a small group stood dejectedly in the clinging fog. In the center stood a young man with a piece of paper in his hand. A bill for \$4.11 worth of fireworks marked "paid in full."

## 16th Annual PE Workshop Scheduled Here Aug. 5-16

The 16th annual California workshop for Physical Education and Athletic Coaching will be held here from Aug. 5 through Aug. 16. The workshop is sponsored by the California Association for Health, Physical Education and Recreation, California State Department of Education and Cal Poly.

The 14th annual California Physical Education Workshop for Women in Secondary Schools will be held concurrently with the men's workshop. Dr. Pamela L. Strathairn of Stanford University will be resource leader.

Erle Johnson, program specialists in charge of physical education, Sacramento City Unified School District, will be the instructor in administration and supervision for the workshop.

With the line-up of instructors that is scheduled to be present, this years workshop should be one of the best.

Bob Lemon, who was a 20-game winner seven times in his major league baseball career, will assist Joe Gordon, the batting coach of the Los Angeles Angels, with the baseball clinic.

Bill Sharman who was a star with the Boston Celtics for 10 years and was seven times all-pro, will be present to conduct the basketball clinic.

Cecil Coleman, head football coach at Fresno State, will head football discussions at the workshop.

Vern Wolfe, who coached such stars as Dallas Long and Jim Brewer and who is now head track coach at USC, will head up the track and field department.

Charles Coker, public relations director of Lindberg Nutrition Service, and coach of the Southern California Striders track and field team, will be the instructor in weight training.

Other instructors in the Men's program will include: physical education, Dr. Fred Kasch, San Diego State, and Gordon Gray, College of San Mateo; tennis, Perry T. Jones of the Youth Tennis Foundation of Southern California; golf, Bob Mastin, Santa Rosa Junior College; gymnastics, Ara Hairabedian, Fresno State College; wrestling, Dr. Warren Boring, Long Beach State College, bowling, Lou Bellissimo, University of Oregon.

## Production, Health Are Related: Annis

By SUSAN KNEPPER

"A harmonious relationship prevails between the farmer and the physician, for a good producing nation, is a healthy nation," said Dr. Edward R. Annis, president of the American Medical Association, during the opening session of the 1963 Western Regional Farm Bureau Conference Wednesday evening in the Little Theater.

Dr. Annis of Miami, Fla. said "the basic fundamental of good health and a minimum of disease is good producing farms. In the world a large percentage of the ill people and the undernourished live in the low farm-producing countries."

Dr. Annis, who was graduated from the University of Detroit and received his MD degree from Marquette University, will be installed as president of the

World Medical Association in October of this year.

"The backbone of America is rural people who think for themselves. Some government agencies are spending money hand over fist attempting to propagandize people through mislabeling of proposed bills in the legislature such as the Medicare program. Medicare is a good program, but has been mislabeled by politicians," said Dr. Annis.

Dr. Annis left the Farm Bureau members with a question. "Do we run the government or does it run us? If we give some politicians any opportunity in Washington, they will run us. Why won't the politicians be truthful with the people?"

## PRO AND CON

### Residents Comment On Coed Living

by Leroy Ward

For the second summer Cal Poly is the scene of a coed living program in Trinity Hall.

Costs of keeping the dorms open has been cut appreciably by housing students under one roof.

The twenty-eight women and resident manager Barbara Smith live on the first floor, and the 96 men live on the second and third floors with their respective resident managers, Paul Bewley and Ken Krun.

When a few were asked for their opinions of coed living as it exists in Trinity Hall they replied:

LYNN BOMBERGER, Animal Husbandry major from Modesto, replied that she didn't find it any different than any other dorm, mainly because she spent the majority of her time in her room studying.

CAROL ROTOLLO, Elementary Education major from Los Angeles, stated that she didn't like the idea of being kept out of the lounge. She also mentioned that the communication system as far as telephone calls and visitors were concerned left much to be desired.

PRISCILLA LANG, Physical Education major and SIBARON CODY Elementary Education major, both from Tuft, stated that it would be nice if the restrictions for the graduate students were not as stringent as those for the undergraduates. However, that would not be fair, as long as both grads and undergrads were housed under one roof, they said.

MRS. JUANITA ABAJIAN, Elementary Administrator from King City, replied "I think it's great." She liked the freedom of being able to study at all hours. She also pointed out the fact that nightly lockup procedure was a good protective measure.

Most of the women interviewed felt that it was unfair for the men to have complete run of the lounge area. They suggested that they at least be allowed some sort of lounge or television room where they could relax.

Speaking of men, some had their own opinions about coed life.

ED CRAIG, Ag-Business Management major from Washington, liked the freedom that he and the other men have. He has especially enjoyed the birthday and beach parties and hastily added the fact that another beach party has been scheduled for next Saturday.

BOB McMAHON, Industrial Engineering Department major, said that he noticed that the conduct and manners of the men seemed to be a little more polished in the presence of the women. He also brought to light the fact that the men were required to wear shirts and shoes in the lounge.

LEWIS TABER, Air Conditioning major from the Panama Canal Zone, said not only was the communication system weak, but also the vending machines were constantly fouling "up."

When confronted with the opinions of the students, Mrs. Ruth Pabols, head resident, filling in for Mrs. JoAnn Clark, said that as far as she knew there were no complaints and everyone was happy.

According to Housing Supervisor, Robert M. Bostrom, the dorms are not set up to house both sexes at one time. Because of this, someone must forfeit the privileges of using the lounge area. With almost four times as many men as women, the decision as to who was to forego the privilege was not a hard one to make.

AGRICULTURAL STRUCTURES . . . Cal Poly agricultural engineering students extend a helping hand to the Crops Department by building farm structures at the new crops field house. Pictured above is a lath house, constructed to maintain transplanted plants.

### Structures Near Completion

Five new structures, started by students in the Spring quarter Farm Structures classes, are nearing completion at the Crops Unit—displaying an example of Cal Poly's "learn-by-doing" philosophy.

Included in the project are a glass house, lath house, dehydrator building, sulphur house and a machine shop storage building.

According to crops instructor, William Troutner, "The sulphur house and dehydrator buildings were designed by the Crops Department. We made them versatile in nature, so that they can be used for many crops, which ordinarily is not the case."

The sulphur house is used for sulfurizing cut peaches and apricots, a process through which the fruit's tissue is broken down to promote easy release of moisture and to prevent rotting. Acting as a preservative, sulphur also

gives fruit good color. After the fruit is taken out of the sulphur house, it is usually sun-dried. But in areas where the humidity is high, the fruit is put into a dehydration building to accelerate drying. This building is also used to dry walnuts and prunes, Troutner added.

The glass house is used for growing field crop seedlings, such as apples, and for growing transplants such as tomatoes and celery.

The lath house is used primarily to begin plants for demonstration purposes and other special uses.

Small materials will be stored in the machine storage building.

All the buildings, except the glass and lath houses, are constructed from concrete blocks. The lath and glass houses are the largest of the group, each 10 feet by 25 feet.

### Volleyball Tourney Headed By 'Friends'

Trinity Hall's intramural volleyball program swings into its third week of action next Tuesday when the Friends of the Library try to maintain their unbeaten record against the Rumeos.

The second game will find the Spikers trying to upset the Hustlers.

In the hot and hectic action last Tuesday the Friends of the Library remained unbeaten with victories over the Hustlers and the Spikers. The "Friends" are captained by Joanne Dawson and Vickie Dalton.

The Hustlers rebounded from their defeat at the hands of the "Friends" and sent the Rumeos down to their third straight defeat. The Hustlers are captained by Gaby McKannay and Mernice Magnuson, while the Rumeos are led by Barbara Smith and Sheila Griffith.

The Spikers threw a real scare into the "Friends" team, before falling in the final game 14-5. The Spikers are captained by Bob White.

Current standings in the volleyball league find the Friends of the Library in first place, the Hustlers in second and the Spikers and Rumeos tied for third.

## X-CHANGE

**AMERICAN RIVER JUNIOR COLLEGE, SACRAMENTO**—The undisputed sweetheart of the freshman class is Mrs. Fannie Black, 62 years young. She is majoring in English and minoring in music. Mrs. Black, a widow for two years, is attending college because it is something she's "always wanted to do."

**SAN DIEGO STATE COLLEGE**—"I got my father and friends smoking for me," said a SDS nonsmoker who won a new car in a tobacco company contest. The sophomore accounting major sent in 32 entries, each requiring five cigarette wrappers.

**UNIVERSITY OF MIAMI**—Protesting racial discrimination, the college president and the board of publications passed a resolution which forbids all University publications to "... carry advertisements from enterprises which would deny to some students services which they offer, by their advertising ... to all university students."

**SACRAMENTO STATE COLLEGE**—In an effort to limit high school students in their use of the library, college officials now require student identification of anyone entering the library. High school students must have a letter of intent signed by their instructor and school librarian. College students need only present their ASB cards.

**WASHINGTON STATE UNIVERSITY**—The student book store is replacing its free telephone with a pay phone. The book store manager explained that he received a bill for three long distance calls to Salt Lake City and two to Boston. It seems that the telephone was not on the campus exchange and with direct dialing in effect, all one had to do was to know the proper procedure to dial anywhere in the U. S. The culprits were found, he added, and sheepishly paid their bills.

**LONG BEACH STATE COLLEGE**—The English language is pretty tricky, especially to foreign students. Imagine the waitress's response when Leonel Campos, a graduate psychology student and native of Mexico, pleasantly ordered, "A cup of coffee and three of your crummy donuts."

**CAL POLY, POMONA**—The Kellogg campus is planning on submitting an inventory of college facilities to the Peace Corps in a bid for a Peace Corps training program here. The Language Arts Department is compiling the inventory.

Forty-Niner

## Real Estate Teachers Meet Here July 22-26

The third annual Real Estate Teaching Workshop is to be on campus July 22-26.

Dr. William Vrooman is coordinator of the annual event and he will help host the 30 participants who are slated to attend.

Real Estate teachers from as far north as Humboldt County and as far south as San Diego will attend the conference.

The workshop began in 1961 when it was held at the Kellogg campus of Cal Poly and this year it returns to the San Luis Obispo campus.

Scheduled to speak in this year's event is Fran McCreery, supervisor of education for the Pasadena School system, who will act as moderator. He will be supported by speakers Jasper Sanatsky, professor at Humboldt State College; Prof. Leonard P. Vidger from San Francisco State College; Ray Dabler, chief deputy of the Division of Real Estate Examiners and Wes Feimlee, a special service instructor from the San Luis Obispo School system.

The theme of this year's workshop is, "Course, Class and Communication."

## Hobby Garage Open Now For Students

The Hobby Garage is located near the north mountain dorms and is sponsored by the student body for students use. The garage is equipped with wrenches and other tools, two engine-hoists, a welder and a battery charger.

The garage hours for the summer are Monday, Wednesday, Friday 9:30 a.m. to noon and Tuesday and Thursday 2-5 p.m.

Work may be done anytime of the day or night. Anyone wishing to use the garage should check a key out for one of the garages and the tools he needs. He will be responsible for what he checks out. There will be a 25 cent per hour charge for the garage and tools or \$1 per day for storage with a \$1 minimum.

For special arrangements contact the manager, Ed Sutton at Cal Poly, Box 2657.

### 6,800 PROJECTS

Last year 6,800 research projects in 133 Veterans Administration hospitals, five regional offices and three outpatient clinics engaged the services of 5,000 professional investigators assisted by 2,000 technical and administrative assistants.

## Elementary Principals Discuss Communications

Fifteen elementary school principals and superintendents are on campus this week and next to take part in the third annual Workshop in Communications for Elementary School Administrators.

Co-sponsored by the college and the Central Coast Section of the California Elementary School Administrators Association, sessions for the two-week-long conclave are being held under the direction of Dr. Walter Schroeder, head of the college's Education Department.

According to Dr. Schroeder, the workshop, which began Monday (July 8), will continue through

July 19 and will feature workshops, speakers, and panel discussions on varied aspects of communication.

JAMES RAMOS

## No. 24 Brings Speed To 'Green Machine'

A speedy running back wearing number 24 is Cal Poly's Jim Ramos, a junior Physical Education major from San Luis Obispo. Ramos did his high school playing for the Mission High Indians in San Luis Obispo and was a four year letterman. After high school, Jim chose Cal Poly because it offered a good curriculum in the Physical Education field and it was close to home.

Ramos holds down the left half position on offense and wing back

on defense. He prefers offense to defense only because he likes to find the holes and help move the ball. He is gifted by a frame that is 6 feet, 9 inches tall, and weighs 175 pounds. At the age of 21, Jim will be playing his last season for the Green Machine next year.

But football is not the only standout for Jim. He participates on the varsity baseball team as a shortstop. He was a letterman on the squad in 1963, which made him a double letter winner, as he lettered in football in 1962.

During the summer months he remains in shape by practicing in the carpenter's field, working for his father.

After he receives his degree from Poly, Jim would like to try the pro-ranks in either baseball or football if the chance presents itself. He is now studying to become a coach and teach in the Physical Education Department of some high school. After spending some years in a high school, he would like to move up to the college ranks.

## Gridder Leaves Sunday For Ram Training Camp

Leaving July 14 for Chapman College, the training camp for the Los Angeles Rams, will be former Mustang gridder Fred Whittingham.

At 6 feet, 2 inches and weighing 245 pounds, Whittingham has been signed for defensive end duties for the California professional football team.

Fred is now in the process of getting into shape, for when he hits the Rams camp, he will be asked to knock heads with guys that may come close to doubling his size.

He was born in Pennsylvania and attended Rhode Island High School, where he played fullback. During his high school playing days, he became all-state at the backfield position. When he graduated from Rhode Island, he came to Cal Poly to major in Physical Education.

Coach Roy Hughes changed Fred from fullback to guard and end on both offense and defense. This seemed to be the position for which he was best suited as he was named to the Little All-American team in his junior year.

Besides playing football, Fred was active in the intramural program. He was a member of the second place team in the doubles of the handball tournament. During basketball season, he played for the team that dumped the CVI Nads, the eventual winners of the playoffs. He was the catcher who caught Don Adams for CAPHER when they took the softball league. He also participated in the volleyball tournament held during the Winter Quarter.

## Coaches Predict Probable Lineup

With the Varsity-Alumni football game of last spring in the record books as a win for the power-packed Alumni group, the work of the varsity coaches and players is certainly cut-out for them.

The squad hopes to add several junior college transfers to the team when practices starts for all on Sept. 3.

Equipment issue, physical examinations and pictures will be the order of the day on Sept. 3, and full-scale practice will begin on Sept. 4.

If a team had to be selected now, not waiting for the junior college transfers, this is how the coaches feel it would shape up: RE, Bill Brown; LE, Gary Chilcott; LT, Joe Faria; RT, Bob Matten; LG, Ron Oxley; RG, Roy Scialabba; C, Gil Stork; QB, Open with Bill Ward having the inside track; LH, Jim Ramos; RH, Paul Lewis, and F, Jack Clark.

In the line John Rogue, Martin Baccaglio, LeRoy Ward would be pushing for a first string berth.

In the backfield Gary Walker, Fred Richlieu and Stan Reynolds would be real contenders.

## Class Combines Golf, Tennis, Volleyball

The two Physical Education classes offered this quarter are an interesting combination of volleyball, tennis and golf.

Instructor Coach Tom Lee says that the classes are quite popular with foreign students.

The combination of the three intramural sports offers many foreign students skills they would not ordinarily come in contact with in their native countries.

Classes are unique in that although they are listed under two registration numbers, 141 and 241, all participants share the same

physical education time and are much the same as one class. There are approximately 30 students participating.
