

CU Building To Pay One-Half Way

By MAUREEN LUND
A student body approved fee will provide less than 50 per cent of the total cost of the planned College Union Building and its operation, according to Douglas Gerard, college building co-ordinator.

The remainder of the 3.5 million cost for the building and all equipment will come from income-producing functions within the building.

Two years ago a change in the education code gave the student body the right to assess themselves a fee for the construction and operation of a college union.

By law, the building and operating fee is not to exceed \$20 per year.

According to sections 23804 and 23805 of the education code, to assess this fee the student body must approve three items as a single venture:

1. Approval of commitment of available non-state funds for not less than 10 per cent
2. Approval of total cost of the building and equipment.
3. Approval of assessment of building and operating fee.

The \$20 annual fee is set as a maximum. However, the actual fee will be reviewed yearly and adjusted to be just sufficient to keep the building operating.

Gerard points out that as the number of students increase, the fee may decrease. It is conceivable that in 15 or 20 years the College Union Building will be entirely self-sustaining.

The proposed fees for the 1966-1967 academic year would be as follows:

	Fall	Winter	Spring
Reg. Students:	\$4	\$5	\$5
Ltd. Students:	\$3	\$2.50	\$2.50

The Summer Quarter fee would be \$2 per session. The fee would not go into effect until completion of the building so students will not have to pay for something which is not yet available.

An early fee referendum goes along with the half-million dollars of non-state funds to stand as security for the loan.

The chancellor's office has not approved a fee in excess of \$12. The decision is based on the fact that several schools such as San Diego State and San Jose State have applied for federal funds. The chancellor has indicated that a higher fee will be permitted if financing is available through private capital.

Gerard said, "Cal Poly is capable of this endeavor by use of private capital due to a large accumulation of non-state funds from the college bookstore operations."

Federal funds would have more restrictions because public funds are being used. Also, there is a question of availability because

of the limit on these funds, Gerard said.

The Bookstore will be the major source of income contributing to the general operating fund from the income-producing functions within the building. The bookstore will be more centrally located in the new College Union.

The game area activities of bowling, billiards and table tennis will also provide a good portion of the income. These are tentatively planned to be the only activities in the game area requiring a charge.

Food services from vending machines and a snack bar will also add to the income.

Portions of the building can be leased to convenient services as a laundry or shoe shine shop by bid contract. The monies from these services will be put into the general fund for paying-off the loan and for operation of the College Union Building.

None of the revenue will be designated for specific expenditures.

All will be put into a general fund to draw on for all expenditures.

"The College Union Building is a sound business venture," emphasized Gerard. The costs will include repayment of the loan, setting aside of reserves for sound business operation and operating expenses which will include such items as salaries, custodial costs, utilities and insurance.

The projected financial report on College Union does not show an immediate reserve fund due to the tight financing of the first years of the building.

The money in reserve will be set aside for three purposes. One will be an operating reserve available in case of an unforeseen operating expense. Another purpose will be for depreciation costs for replacement of the equipment. A third reserve will be for the replacement of the College Union Building itself.

BLUE JACKET MOB . . . 1,300 Future Farmers of America flocked to campus last week for their 36th annual convention. Besides filling an Ag Shop canteen, the boys found time to elect officers and conduct parliamentary procedure and judging contests. The California Association of FFA has been meeting as Cal Poly for 81 years.

CALIFORNIA STATE POLYTECHNIC COLLEGE

VOL. XXVI, NO. 41 SAN LUIS OBISPO, CALIFORNIA TUESDAY, MAY 12, 1964

Seniors Plan Round Of Events To Prelude June Commencement

A pleasurable and memorable round of events has been compiled by the executive council of the Senior Class with activities commencing Sunday, June 7.

According to the council, tickets for the barbecue, breakfast and baccalaureate may be picked up at any time in the ASB office. Each senior is entitled to one free ticket upon presentation of his class card. Graduates may buy up to three extra breakfast tickets for parents and guests starting June 1. Extra tickets will cost \$1.25 each for the breakfast and \$1.50 for the barbecue.

The Senior Class barbecue will be at Routsahn Park in Lopez Canyon. The last day to get tickets is June 1.

PIT degrees will be received by industrious wives who have helped to "Put Hubby Through," Sunday, June 7 on the Library lawn. The wives are asked to report to the lobby of the library.

Baccalaureate services will be held in the Little Theater. There will be a procession and a recession for which the seniors will wear caps and gowns and ROTC

members will be in uniform. Baccalaureate will be at 2 p.m.

The class gift will be presented at 2:30 p.m. at the New Administration Building. The class gift will be the seal of the college which is the Great Seal of California with California State Polytechnic-San Luis Obispo around the perimeter.

The class tree will be planted in front of the Little Theater on Friday, June 12, following baccalaureate services.

The Gold Rush Room of the Madonna Inn will be the scene for the annual Senior Ball. Dinner will be served from 6 to 10 p.m. The Collegians will play from 9 to 1 p.m. Reservations may be made up to Monday, June 8.

Saturday morning, June 13, the seniors will attend the annual breakfast at 8 a.m. in the student dining room. A written program including a brief history of the Class of '64 will be given to all present. Activity awards will also be presented.

ROTC Commissioning will follow at 11 a.m. in the Choral Room of the Little Theater. Officer's tans will be worn.

At high noon on June 13, the

Seniors will gather inside Crandall Gym and the marching order will be as follows: M.A. Degree candidates, ROTC candidates, B.S. Degree candidates, B.E. Degree candidates, and Technical two-year candidates. Commencement will be at 1:30 p.m. in Mustang Stadium.

Spring graduating seniors participating in commencement exercises may pick up their caps and gowns from June 9th to June 12th in the basement of the cafeteria.

Summer, Fall, and Winter graduates pick up their caps and gowns on Saturday, June 13 from 8 to 12 noon.

Additional information may be obtained from the ASB office or from any of the following members of the Senior Class Executive Council: Cap Peake, president, 543-2100; Scott Adler, vice president, 543-9431; Sunny Franzen, secretary, 543-2869; Tom McManis, treasurer, 544-2195; Jim Quick, SAC representative, 543-9709; Ralph Kechn, publicity chairman, 543-8894; Bill Dunne, baccalaureate chairman, 543-5350; Don Oberman, breakfast chairman, 543-5350; Ron Brewer, senior ball chairman, 543-1266; Gay Jensen, barbecue chairman, 543-9768; or Mead Johnson, advisor, 543-2000, Ext. 482.

Foreign Students Study Livestock

Eleven foreign students, under the supervision of Roy Harris, Animal Husbandry instructor, are enrolled in an experimental agricultural instruction program, a 15-unit course.

The course deals with livestock care and improvement and related fields, geared to agricultural conditions in Africa.

With Harris, other Animal Husbandry instructors contribute to the program when their phases in the study are taken up.

Dr. Werner Duntz works with Harris teaching the 11 foreign exchange students from 9 a.m. until 5 p.m., Monday through Friday. The daily schedule goes as follows: from 9 to 11, lecture; 1 to 4, lab; and 4 to 5 a summary period of the day's lessons. On Mondays and Tuesdays they have feeds and nutrition; Wednesdays and Thursdays, livestock hygiene and sanitation; Fridays, physiology.

Before coming to Cal Poly the students completed approximately

three months of English instruction in Washington D.C. In addition to the instruction they received in Africa. They will attend summer school and in January, 1965 they will have completed their year instruction period.

Eight of the 11 students are from the Congo, two are from Nigeria and one is from Burundi. Their native language is French.

The students were sent to the United States on a trial scholarship basis. "If they progress too slowly they will return to Africa before their year has expired," said Harris.

The experimental program was set up through AID in Washington D.C. The 11 African students in this experimental program will be acting as veterinarians and agricultural advisors in Africa until their new government is capable of supplying the country with qualified employees in the fields of hygiene, sanitation, disease control, medicine and pathology.

Campus Aid Program Grows With 10 Diverse Majors

Sixty-nine students, representing 15 countries, are currently enrolled on this campus under the Agency of International Development (AID) program.

Since inception of contractual cooperator relationships with AID and its predecessor federal government agencies, and the Foreign Training Division, Foreign Agricultural Service, USDA, Cal Poly has provided practical technical education, study and opportunity for more than 1,000 individuals from all over the free world.

Individuals now engaged in positions of agricultural leadership in 50 countries received part of their educational experience here.

Approximately eight per cent of all visitors from abroad who have undertaken technical training studies in the United States under

AID program support in agriculture have received either a major portion or part of their training at Cal Poly.

For the first time, two students are now enrolled in the Mechanical Engineering Department and two students are presently under the ROTC program.

The remainder of students are enrolled as follows: Agriculture Business-15, Agricultural Engineering-14, Agricultural Education-1, Agricultural Journalism-1, Animal Husbandry-12, Crops-13, Electrical Engineering-2, Mechanical Agriculture-12, Poultry Industry-1, Soil Science-11.

The countries represented at Cal Poly under the AID program are: Ghana, Sudan, Jordan, Nigeria, Iraq, Togo, Vietnam, Morocco, Afghanistan, Cambodia, Kenya, Argentina, B.W.I., Korea and Turkey.

Garfield Arms, Off-Campus Housing, No Longer On Approved List

Garfield Arms, an off-campus men's living quarters that houses 114 students, is no longer an approved residence hall, college officials have announced.

The apartment-type dwelling, which opened last September as one of the few off-campus living quarters to be granted an "approved" housing status by the college, was notified it would no longer be on the "approved" list April 29.

According to Dean of Students Everett M. Chandler, the apartment house was taken off the residence hall list because a few male students had women in their apartments during Poly Royal weekend.

"Nothing really serious happened, and we have no beef with Garfield Arms," the dean of students declared.

He said, however, that rules for residence halls operating under campus "approved" housing policies forbid women in men's living quarters.

"And this was not the first time that this had happened at Garfield Arms," said Chandler. "This was what might be called 'the straw that broke the camel's back.'"

The apartment house, located at 738 Grand Ave., began the year as an "approved" off-campus residence hall at the request of Al Sohn, owner of the establishment.

But according to Chandler, re-

curing problems that came about after the opening of the Triangle coeducational apartments just across the street had forced college officials to notify Sohn that the "approved" status would be revoked at the end of this academic year.

During the Poly Royal weekend, a number of students had women in their apartments, according to college spokesmen. The students claim the girls were there merely for pinning on corsages, and consuming Cokes and popcorn.

The administration spokesmen, however, explained that no matter why the girls were there, the rules say they shouldn't have been.

Technically, Dean Chandler pointed out, each of the 30 or so students involved in recent "incidents" at the apartment house could be suspended from college.

Instead, the officials decided to remove the "approved" status from the apartment house.

Chandler said that the earlier decision to take away the "A" status at the end of this year had been agreed to by Sohn.

"We simply can't have some approved houses operating completely by the rules and some not," said Chandler.

Besides having women in their apartments, some students at Garfield Arms had alcoholic beverages

on the premises, the dean of students said. Alcoholic beverages are not allowed in "approved" college housing facilities.

"I'm worried Garfield Arms will get a bad name because of this, and I don't want it to," one student who lives at the apartment house told El Mustang last week.

"Sure when a person has a birthday, he probably winds up in the pool, but Garfield Arms isn't a Playboy Club, as it is often thought of," another student declared.

"A lot of guys moved to Garfield in an attempt to escape the clamor of campus dormitory life," the student continued.

The college has no major complaints against Garfield Arms, Chandler said emphatically.

He also noted, however, that students who live in campus dormitories have a higher grade point average generally than do students who live off campus.

"We maintain an above-average GPA generally and spend many a lonely, quiet hour without a sound," one Garfield Arms resident said. "On weekend nights, the only noise is usually an exchange (dance) with one of the girl's dorms."

Because "approved" housing must meet somewhat stringent requirements, most off-campus housing in San Luis Obispo does not bear the "Cal Poly seal of approval," college officials point out.

American Institute Of Architects Confers Fellowship On Hasslein

By EDNA TOGAWA
A man with a friendly smile and who is the head of the third largest architectural department in the United States has reason to be happy these days.

George Hasslein, head of the Architectural Engineering Department will receive the highest honor an architect can achieve on June 18. He will be honored along with about 15 others at the annual dinner of the American Institute

of Architects (AIA) at the Chase Park Plaza Hotel in St. Louis, Mo. during the institutes' 1964 convention.

The AIA will confer upon Hasslein the honor of Fellowship and membership in the College of Fellows in accordance with the action of the Jury of Fellows at its recent meeting for his contributions in the field of education. He will be honored with a medal and certificate.

The basis for this honor is advancement of the profession through achievement in design, service to the profession, public service, literature, education or science of construction. Besides achievement in one or more of these areas, nominees' professional work must be judged superior by the jury. The Jury of Fellows selects those who will be elevated to fellowship each year.

Hasslein was nominated for the Fellowship by his colleagues from the Santa Barbara chapter of the AIA of which he is a member.

The nominee has to submit a presentation of his architectural work—pictures of various buildings he has designed. He must be supported by his chapter and letters of endorsement written by different persons in the field of architecture are also required in order to be considered by the Jury of Fellows.

His contribution to education is based on a 15-year period during which a program in architectural education of recognized status has been developed out of a nonprofessional program of related architectural subjects. Also the establishment of an architectural school to serve the building industry and the environmental sciences.

Hasslein has created a high level of student and professional contact and interchange through work with the California conventions. He has contributed in the creation of a source of professional dedication to the profession of architecture.

Since the first graduating class in 1960, the ratio of architectural registrants has been increasing. Presently about one fourth of the 350 graduates are registered.

Senior Wins Grant For Graduate Study

Virginia Hill, a vivacious 21-year old senior in the Biological Science Department, has been awarded a National Science Foundation Grant to study at the Friday Harbor Laboratories of the University of Washington this summer.

Last summer Miss Hill, from Woodland, received a similar NSF Grant and studied at the University of the Pacific's Marine Station for Biological Research at Dillon Beach. While at the University of Washington this summer, she will do research and graduate studies in the Department of Zoology.

As secretary of the local Beta Beta Beta chapter, an affiliate of the national honorary biological society, she received praise for the presentation of her senior project at a recent western regional meeting of Beta Beta Beta.

Miss Hill has also been awarded a teaching assistantship for the academic year, 1964-65 at the University of Washington.

Tubs Race At Avila

Those seeking the thrills and spills of Indianapolis or the excitement of the Olympic Games should wrap up a sack lunch and hop in the old jalopy and head out to Avila Beach on Saturday, May 16.

When you arrive, you'll find that the usual procedures and equipment of such events have been altered slightly. Instead of the custom built roadsters with the Meyer-Drake engine, you'll find stock bathtubs in-laid with lead and a steep hill to supply the go power. The athletic events which follow will be held on a combination salt water and sand track field namely the beach. Those competing in the high jump will probably be soaring at heights from 4 to 5 feet.

The bathtub race will be held between 9 a.m. and 12 noon with track events immediately following. Approximately 250 Poly students will be participating in this annual event. Ted Cimral, said, "All Poly students and their guests are welcome to attend and join in with the fun."

Grads Visit School, Speak To Majors

The Printing Engineering and Management Department was host to six of its graduates recently during a workshop.

The six are working in the printing field and came to tell the student printers what to expect in the industry.

According to A.M. Fellows, Printing Department head, the men spoke on what graduates may expect from their employer, what the employer may expect from them and the employment opportunities for graduates.

Some of the people from the San Francisco area were Doug Parker, Jack Pierce, A. Gray and Bob Blouington.

Mat Pica Pi's 'Little Pica' Hopeful For \$1,000 Jump

The annual Calaveras County Frog Jumping Contest takes place on May 15-17 in Angels Camp. Cal Poly will be represented in the jump by Mat Pica Pi, Society of Printing Engineers.

"Little Pica," the club's entry, will be jockeyed by Gary Sharar, and will be jumping for the first prize of \$1,000, that is if the frog breaks the world record of 18 feet 10 inches, measured in three jumps.

This event commemorates the humorous story, "The Celebrated Jumping Frog of Calaveras County," written by Mark Twain. The contest usually draws between 30 to 40 thousand people.

The management of the frog jump welcomes all contestants and groups. This is an international event and frogs will be coming from Africa, Japan, and other distant places. The entry fee is only \$2 for each frog entered.

Taste Good, Specs?

Grades Affect Salaries, Speaker Tells Engineers

By JIM McLAIN

In at least one respect, now is the last time that there will be a tomorrow for today's college students.

That is the contention of George H. Heap, quality control manager for Martin Company's Vandenberg Air Force Base operations, who spoke to members of the Industrial Engineering Club last Thursday night.

Heap, who for the past 13 months has served as program manager for the company's "Zero Defects" program at Vandenberg, spoke to the group on "Zero Defects and You."

"The student who doesn't do his best in his studies is ensuring the biggest defect in his life," Heap told his audience. "You will never again have the opportunity to say, 'I can do that tomorrow.'"

In 1962 "Zero Defects," the Martin executive told the group, is a program established by the large missile building firm. The company which builds the Titan missile, initiated the program to strengthen its entire operations.

The program was aimed at both company personnel and suppliers in order to build missiles, "that we could count on firing perfectly every single time."

Bringing the concept home to his

student audience, Heap declared that students who graduate from college with low grade point averages will take two to three years to bring their salaries up to the beginning level of those who receive their degrees while maintaining high grades.

"Today we want to see your transcript; today, we want to see your grades . . . and low grades mean low salaries," said Heap.

According to the quality control manager, the reason his company is placing so much emphasis on grades is that, "We don't have time for books."

Heap demands that engineers who graduate with low grade point averages will constantly have to refer to reference books in order to solve assigned problems.

"In the field we need men who can solve problems quickly and correctly," said Heap.

Heap urged members of his audience to set up "zero defects" programs of their own by doing a careful evaluation of their study habits with an eye toward making more efficient use of their time.

"There is not a single person in this room who is working up to capabilities," Heap contended.

"The only reason for our Zero Defects program is that we have an many good habits in

our nation," the Martin executive declared.

He pointed out that a number of Martin employees who quit school part way through college are finding that they are being left behind in today's aerospace industry.

The company's "Zero Defects" program, which includes personnel from secretaries to missile engineers has already resulted in an overall 64 per cent improvement in Martin's operations, Heap said.

"We started the program not only because a mistake in the manufacture of one of our products hurts our own reputation, but because it also hurts the image of the United States," said Heap.

The program has been adapted by the department of defense and is rapidly becoming the trend in the aerospace industry, according to Heap.

Noting that there are still many people in the industry who do not subscribe to the theory that a perfect missile can be produced every time so long as specifications are strictly adhered to, Heap declared:

"There are many sleeping giants in our industry today, and it will not take much for you students to go right on by them."

During his presentation, Heap showed color movies of a number for the company's "Zero Defects" of Titan launchings.

'First Team Of College' To Honor Top Scholastic Students At Banquet

The "first team of the college," the Cal Poly Honor Society, will initiate new members at the annual banquet Tuesday, May 19 at 6 p.m. in the Staff Dining Room.

The students eligible for initiation are academically among the upper four to six per cent of the graduation class.

At the top of the list is Mrs. Audrey Norma Fink, Social Science senior from San Luis Obispo, with the highest grade point average at Cal Poly, of all the students in the Honor Society, with a 3.94. Mrs. Fink will preside as honorary vice-president of the society due to her scholastic achievements.

Those to be initiated: William E. Burkhardt, a sophomore majoring in Business, with a GPA of 3.74.

Charles W. Cruikshank, junior Animal Husbandry major, with a GPA of 3.62.

Lynn A. Johnson, junior Biological Science major from Yucca Valley, with a 3.62 GPA.

Michael Gordon Jones, junior Social Science major from San Luis Obispo, with a 3.75 GPA.

Janet Mary McNeely, Elementary Education major in her sophomore year from Ventura, with a 3.64 GPA.

Clinton A. Phalen, junior Mathematics major, with a 3.61 GPA.

Stanley A. Portugal, junior Agricultural Business Management major from Hanford, with a 3.63 GPA.

Marilyn Ruth Reid, senior Elementary Education major from San Luis Obispo, with a 3.78 GPA.

Michael Sherman, junior Biological Science major, with a 3.80 GPA.

Guest speaker for the Honor Society banquet will be Dr. Richard F. Logan, professor of Geography at the University of California at Los Angeles. Dr. Logan's topic will be "Man in the American Desert," a report on research in survival and will be given in the Little Theater at 8 p.m.

Presiding over the Honor Society is Dr. Edgar Ryer, Farm Management Department head and president of the Society.

Other officials include: Membership Chairman David Montgomery, a Biological Science instructor; Brenda Batati, Elementary Education student, vice-president; Dr. Allen D. Miller, Mathematics, secretary-treasurer; and Dr. Milo Whitton, advisor.

To be eligible for membership in the Honor Society, a student must have a cumulative grade point average of at least 3.5, and have less

than 30 units of work to complete before graduation.

Or, a cumulative GPA of 3.6 or above is needed with less than 70 units of work to complete. Transfer students must have completed not less than 45 units at Cal Poly with cumulative GPA of 3.5.

In addition to academic attainment, the following points are weighed: balance in course of study, general personality, moral character and potential leadership after graduation.

The procedure used to select members is with an IBM machine which selects academically qualified students. Also, staff members of honor societies within the major of the potential members contribute their opinions as to personality, character and potential leadership abilities of the student.

Members selected last Winter Quarter were Clayton C. Beagle, Biological Science; Edward W. Brashaw Jr., Ornamental Horticulture; James E. Dickens, Technical Arts; Leona Mae Dobell, Elementary Education; Audrey Norma Fink, Social Science; Robert M. Koffsky, Industrial Engineering; Donald Paul McGuire, Social Science; Dorothy K. Reif, Elementary Education, and James E. Thayer, Mechanical Engineering.

Hawaiian Singers Win Annual Spring Sing

Sounding as if they had been flown in from the Hawaiian Islands, especially for this performance, Hui O' Hawaii sang their way to a win at the fourth annual Spring Sing held Friday night. The group won both the men's division trophy and the Must Award Sweepstakes trophy.

The beautifully-melodious songs performed by the campus Hawaiian Club included "Pu Pu A'O Ewa" which, when translated into English, means "Pearly Shells" and "Pu Pu Hinu Hinu," which is a Hawaiian lullaby.

"I am surprised and happy and glad for the guys," said Jim Kahue, director of the group. Budda, as Kahue is better known as, said that all 26 men in the group are from the Islands.

Other winning groups included Santa Lucia and Muir Hall, who combined men and women's voices in a hilarious satire on television commercials. Their performance, titled "Hamateur Hour," enabled them to walk away with top honors in the production division.

Jesperon Hall, with a charming array of songs entitled "Alpine Lullaby," won the women's division. The "Four Hens Minus One" made up of three members of the Mechanical Engineering Society, conquered the specialty division trophy. Rally Club, as spirited as ever, won the mixed division trophy with their performance of "Two Tickets to the Window."

The winners were announced by Steve Scofield and Jana Mosger-Zoual presented the awards.

Results Of Election Announced Tonight

Results of all class elections will be announced at 9 o'clock tonight in El Corral Snack Bar.

John May, chairman of the Inter-Class Council Election Committee, said today that ballots will be counted at 5 p.m. and that the election results are subject to approval by the Student Affairs Council.

More than 15 candidates are named on the ballots for the three classes with several students currently campaigning for write-in offices.

Free Men, Sciences To Be Topic

Man's freedom in a scientific age will be the topic of discussion at the three-week series of lectures and panel discussions of the 22nd annual Institute on World Affairs at San Diego State College, August 10-28.

"Freedom, Hope and Dilemma" will be the subject of the discussion by more than 30 diplomats, scientists, military leaders and political authorities. These discussions are open to the public without charge and can be taken for graduate or undergraduate credit, according to the college's Public Relations Office.

Under the leadership of Minos D. Generales, professor of Political Science, now serving his 18th year as director, the Institute on World Affairs is for those who share a legitimate concern about the future of mankind.

Generales, commenting on this year's theme says, "Currently man's freedom faces new and crucial challenges. Although sciences free man from his dependency on his environment, it also locks him in a state of servitude to a set of formulae. Consequently, the dilemma of freedom in this age of science and automation poses this poignant question: Must man emancipate himself from one set of conditions only to be forced to conform to another?"

Members of the advisory board for the Institute on World Affairs represent institutions throughout the world including the Universities of Madrid, Stockholm, Vienna, Chicago, California and Notre Dame.

Full information about the Institute on World Affairs may be obtained by writing to the Institute on World Affairs, Political Science Department, San Diego State College, San Diego.

Concert Disk Sale Starts

Today recordings of the 22nd annual Home Concert will be on sale. Students desiring to purchase a record will have a choice of either the Specialty or Home Concert recording.

Consisting of music by the Men's Glee, Women's Glee, the combined glee, and Collegians, the Home Concert record features such numbers as "September Song" and "Landlord Phils The Flowering Bowl."

"The Green Leaves of Summer" by the Women's Glee and "Little Brown Jug" by the Collegians are just two of the many songs on the Specialty record. Other featured groups are the Men's Quartets, Women's Quartets, Majors and Minors, and Men's Glee. This album also features the "Cowboy Lullaby" which is sung by the Men's Glee Club albums at every Home Concert.

The price of the Home Concert record is \$4.15, and the Specialty record costs \$3.10. Either one may be purchased from any member of the Music Department or from the ASB office.

Made by the Century Record in Southern California, the records are 33 1/4 long play.

Hootenany Friday In Crandall Gym

A "Hootenany-Stamp" sponsored by the Freshman Class, will be held Friday at 8 p.m. in Crandall Gym.

Four folk singing groups, including two groups from Cal Poly, Pomona, are slated to perform. The Regents will provide music for the stamp which will follow the Hootenany.

According to Melanie Dietz, publicity chairman for the Freshman Class, admission will be 25 cents per person and \$1.25 per couple.

Numbers For Security

Student Assistants! Turn in your social security numbers to Adm. 108, or you will not receive your pay.

The payroll office will not issue checks to student assistants on payroll, who have not turned in their social security numbers, announces Doris Anderson, personnel clerk.

STUDENT PREPARATION

The basic purpose of Cal Poly is to prepare students to meet both present and future requirements of specific occupations in production, supervision, management, product design and development services and sales areas.

Campus Capers

BOOKS AT HIGH NOON

"The Deputy," by Rolf Hochhuth will be reviewed by Philip L. Garber, head of the English and Speech Department, today at Books at High Noon in the Staff Dining Hall.

Dr. Garber will review both the play and its New York production, which he attended last month. The review of the play in Life concluded: "This play will be less important in the history of drama than in the drama of history."

FOREIGN STUDENT BANQUET

A banquet honoring this year's graduating foreign students will be held Wednesday at 7:30 p.m. at the Madonna Inn.

Sponsored by the People-to-People Club on campus this will be the second annual dinner to honor these students.

More than 30 San Luis Obispo townspeople will be hosting the students.

Any students or faculty members planning to attend the affair may obtain tickets at the door.

INDEPENDENT COLLEGES

Although the oldest of the colleges, San Jose State College dates back a century, the California State College system under an independent Board of Trustees was created by the Donahoe Act of 1960. Formerly the colleges were under the jurisdiction of the State Board of Education.

OF NEW...

PRO TAN 3

SUNTAN LOTION

Tans faster than the Fastest!

Thousands of sun-loving Californians switched to new 3-sunscreen ingredient PRO TAN 3 last summer - did you? Be sure you take advantage of this special opportunity to prove to yourself that it is the most advanced suntan lotion available today. A half dollar refund on your first purchase! But hurry - this generous introductory offer is for a limited time only. (See coupon for full details)

ONLY Pro Tan 3 CAN GIVE YOU...

- the faster, deeper, richer tan of a 3-sunscreen ingredient lotion (others have just one!) - naturally tans last longer
- ingredients which actually inhibit freckling - retard aging of the skin
- exclusive "water bounce" - whether swimming, surfing or water skiing, PRO TAN 3 stays on

GUARANTEE: PRO TAN 3 is better in every way than any other suntan product you have ever used, or your full purchase price refunded by the manufacturer.

USE THIS COUPON

50¢

REFUND on 4 oz. plastic bottle.

25¢ REFUND on 2 oz. size.

Remove dotted square on back of PRO TAN 3 carton. Fill in name and address - attach this coupon - and mail to:

CHARLEY ROLLEY, Pro Tan 3
932 AMERICAN ST.
SAN CARLOS, CALIF.

Cash refunds by return mail. Limit of one to a person. Offer expires July 9, 1964 (postmark).

BETWEEN
OUTER SPACE

AND THE DEEP SEA

THERE'S A WIDE RANGE OF OPPORTUNITY
IN THE BELL TELEPHONE COMPANIES

To outer space and into the deep sea, we take the sum total of our scientific and managerial knowledge. A case in point is Teistar, which represents the first step toward a worldwide communications system. Another example, the new deep-sea amplifier that simultaneously transmits two-way messages. Both communications triumphs stem from Bell System planning, research and development.

Such trailblazing projects command the best of managerial and scientific talent. That's why you'll find, throughout the Bell System, men with college training as diverse as the responsibilities they shoulder. Their backgrounds run the gamut from liberal arts and business courses to science or specialized engineering majors.

Admittedly, the work is demanding. It requires that unusual caliber of man who finds a greater satisfaction in challenge than in ready solution... who is eager to see his education yield dividends... who wants an immediate opportunity for leadership.

Men with this kind of impatience will discover the stimulation, welcome and rewards they seek in the telephone business.

Petroelje Leads Trackmen To 8th In Fresno Relays

Mustang Lloyd Petroelje took the conference record, threw the home first place in the college discus 168-feet 10 1/2-inches, and discus at the Fresno relays Friday beat second place Hiywka from to help the Cal Poly team to an eighth place finish.

Petroelje, who last week broke watch for his first place showing.

Gary Walker, concentrating on the hurdles, twice ran to third places in the 120-yard high hurdles.

Running in the college division Friday night, Walker clipped the eighth hurdle to enable Chaidu of San Fernando and Miller of Idaho State to pull away. Walker's time was 14.6, while Chaidu's was 14.3.

Walker waited till Saturday to get his revenge. Entered in the open high hurdles he ran two 14.3 times and placed third in the event.

Curtis did not participate in the open 100 Saturday.

Cal Poly's mile relay team ran their fastest mile relay over (3:17.9), but still went unplaced as California State at Long Beach took home the trophy with a 3:11.3.

Jon Dana participated in the open division 440-yard high hurdles for the first time Saturday and took third in his division with a 54.1 time.

Ben Laville was unable to place in the javelin as the best thrower in the nation were entered. First place was over 260 feet.

The Mustangs did collect ten points in the college division to tie them with Pepperdine College for eighth place. Redlands took the college meet with 37 markers, followed by California State at Long Beach (33), and the host school, Fresno State, with 18.

In Saturday's open division, San Jose State won the team title. Stanford was second and Fresno State third.

UNC, which had won the Relays since 1946, was relegated to fourth place.

MUSTANG MUMBLINGS . . . Walker barely missed first place in both hurdle races. Head coach Walt Williamson said "He ran very well, another four inches and he would have had a watch." . . . New watches were given to each athlete who placed first . . . Petroelje went unplaced in the open division discus Saturday after he nailed down the college title Friday . . . Williamson held Curtis out of the open 100 yard dash, although the coach thought the runner could have placed second or third . . . Dallas Long, a 200 pound muscleman, tossed the shot-put 68-feet 7 1/2-inches to better his old world's record of 65-feet 11 1/2-inches . . . Santa Barbara placed eleventh in the college division with 4 points.

WHO HAS THE BALL . . . Fullback Dan Heibel takes the pigskin from quarterback Bill Ward during the Mustangs first scrimmage session of the 20-day spring practice. Coach Sheldon Hardon saw some bright spots during

the two-hour scrimmage but reports that the 10 days before the annual Spring Game May 23 will be hard spent. The squad currently has 63 members which is well in numbers above last seasons 45.

FOOTBALL

J.C. Transfers Bolster Mustang Interior Line

"Things are starting to smooth out," reports Mustang head coach Sheldon Hardon as his varsity squad starts its third week of practice.

The first scrimmage was held last Saturday, going for 2 1/2 hours, with things seeming to be going real well.

The team is scheduled to hold its second live play scrimmage next Saturday in preparation for the fourth annual alumni game, May 23 at 1:30 p.m. in Mustang Stadium.

Showing up well in the guard position, reports Coach Hardon, is 5-10, 228 pound Fred Strasburg from Antelope Valley College.

The top performer signaled out in the backfield by Hardon is 6-1, 200 pound Dick Doerr from Sacramento Junior College.

Also looking good are 6-3, 235-pound Dick Fenske from Harbor Junior College; Chuck Perden, 5-10, 220 pounds from Napa Junior College; Chuck Campbell, 6-2, 220 pounds from Orange Coast College; and, from Modesto Junior College, 6-3, 195-pound Doug Parks at the end position.

The "Green Machine" looks good on both offense and defense with two short weeks to go before the big game. It looks like the alumni will have its hands full this year, according to Hardon.

Rafferty To Address Teacher Workshop

The weeks of August 2 through 14 have been set for the 15th annual California Physical Education Workshop for Women in Secondary Schools.

Announcement of dates for the workshop, traditionally held here, came in a joint statement made recently by the State Department of Education, the California Association for Health, Physical Education, and Recreation, and the Physical Education Department, sponsors of the event.

Educational focus of the 1964 workshop will be the high school physical education curriculum as it is developed in relation to the physical, psychological, and emotional characteristics of students.

Discussion topics are expected to include the "new look" in competition for girls, the emerging fitness emphasis, the use of sound educational guidelines in curriculum planning the practicality of flexible scheduling, team teaching, the "unit" plan, and evaluation.

Dr. Marguerite Clifton, assistant professor of physical education at UC Los Angeles, will serve the workshop as resource leader and will work with additional panel members during the workshop.

About 300 women's physical education teachers from high schools throughout California are expected to take part in the conference,

which is traditionally held concurrently with the workshop in physical education and coaching for instructors in men's physical education, also held here.

A highlight of this summer's workshop will be a special joint session during the second week, at which Dr. Max Rafferty, California's superintendent of public instruction, will be the featured speaker.

Cowboys Second

Dave Freeman, Bob Shaw, C.W. Adams and Jim Warren each won their respective events in the Flagstaff, Arizona, National Intercollegiate Rodeo Association rodeo recently, but the Cal Poly team wound up second to University of Arizona at Tucson.

Freeman won the barrelback bronc riding with Lee Smith finishing third. Shaw bounced to first in saddle bronc, Adams to first in bullriding, and Warren to top in ribbon roping.

Eddie Newton, got fourth in filly roping and Warren second in one go-around of bulldogging. Newton placed third in another go-around.

University of Arizona at Tucson maintains top spot in the West Coast region, with Cal Poly holding onto second.

Mermen Place Sixth In State College Test

Mustang swimmers broke three school records last weekend while placing sixth in the California State College Championships held at Chico.

Ten of the state colleges participated. San Jose State came out on the top, with San Diego State trailing in second place and Los Angeles State third. Long Beach State was fourth, San Fernando Valley State fifth, Chico State seventh, Fresno State eighth, San Francisco State ninth and Sacramento State last.

Dick Marvel set a new school record in the 1650 yard freestyle qualifying in a time of 18:52.6. His teammate, Phil Heintz, tied the old school mark of 18:53 in the 100-yard butterfly set by Frank Brooks.

Dave Woolworth, Dave Waite, Jerald Shultz and Roger Mohlad teamed up to establish a new school time for the 100-yard freestyle relay at 3:28.2.

Pete Seaton took the only second place for the Mustangs in the 100-yard back stroke. Seaton and Fred Vogel took third and fourth, respectively, in the 200-yard back stroke.

The team of Seaton, Vogel, Heintz and Mohlad placed fourth

in the 400-yard medley relay, also a new school record. Their time was 3:54.2.

Marvel placed fifth and Roger Seaton sixth in the 500-yard freestyle.

Next year the state college championships will be held here March 9, 10, and 11, two months earlier than this year.

The Mustangs wrapped up their regular season last week slipping by San Fernando Valley State, 50 to 45.

Coach Dick Anderson said he was pleased with the team's performance in the championships. He mentioned that the team was only 2 1/2 points away from fifth.

Looking back over the season, Anderson had particular praise for Marvel and Seaton. Asked about the prospect for next season he said he expected most of the same men to be back but said he would lose several seniors.

The Mustangs will be without the services of two of their most experienced swimmers next year, Seaton and Vogel. They will also lose Jeff Cappel who turned out to be a late season surprise in his performance against San Fernando Valley State last week.

Horsehiders Win Three, Finish 2nd In League

"Everything is coming up roses," or better yet, "Everything is coming up base hits." This is what the varsity baseball team was singing on its way home from San Fernando Saturday night after sweeping a three-game series from the Matadors and tying down second place for the 1964 season.

The Mustangs not only won their last three games to tie down second place, but won themselves a berth in the National Collegiate Athletic Association tournament to be held in Long Beach.

Long Beach, the California Collegiate Athletic Association champion, will enter the university division playoff, and the runnerup Mustangs will enter the college division playoff.

The Mustangs banged out 36 hits during the series with Jim Ramos, hitting .207 for the year,

supplying eight of the series-winning drives.

In the first game, Steve Fox led the team to a 6-5 victory behind 18 hits supplied by the eager Mustangs.

The Green and Gold never failed to come up with needed hits as they rapped 12 safeties in the second game in support of hurler Terry Curl and Pete Cocconl. Curl in support of his own cause, homered in the second game with one man on.

With the first game of Saturday's double-header under their belts, the Mustangs made it three in a row as Tom Kempf pitched a 3-2 victory.

League-champion California State at Long Beach finished with a 11-4 record, with Poly in second place with a 9-6 record and Fresno State securing third place with a 5-7 league record.
