

Proposed CU Building Will Have Multi-Purposes

By EDNA TOGAWA

What are some of the features of the different areas designated for the proposed College Union Building?

An outdoor activity center will be located east of the auto shop and north of Palomar Residence Hall separate from the College Union. The skindivers' cave, boat house, bike, motorcycle and auto repair garages will be included within this area.

Four students living in Palomar will have charge of this work area. A concrete slab about the size of a football field will be available so that students may work on their

cars, cycles, boats and bikes. The area will be lighted so that they may work at night.

There will be seven auto repair garages and one garage for each of the others listed, said Dan Lawson, dean of activities.

Students will be able to check out equipment and tools from the garages. Overhead hoists for engines will also be featured in the garages.

The building games area will feature billiards, table tennis and a bowling alley.

The hobby craft area will provide facilities for such crafts as pottery, woodwork, graphic arts, metal working and lapidary. Students will be able to check out

CALIFORNIA STATE POLYTECHNIC COLLEGE San Luis Obispo Campus May 26 and 27, 1964 SPECIAL COLLEGE UNION BALLOT						
1. Use only (Pencil) provided.						
2. Fill in completely the space under either the yes or the no.						
3. To change a vote, erase the mark completely and remark your vote.						
4. Ballots otherwise marked will be void.						
Should a student body center (College Union) be constructed at California State Polytechnic College, San Luis Obispo Campus, under a financing arrangement whereby: (1) at least \$500,000.00 be raised from non-State funds shall be used for planning, financing, equipping, and construction cost, and the remainder of the construction cost, amounting to not more than \$2,000,000.00, shall be financed from revenue bonds issued, serviced and retired pursuant to the State College Revenue Bond Act of 1947, and (2) A building and operating fee, for financing, operating, equipping and constructing the Center may be established by the Board of Trustees of the California State Colleges, beginning with the 1966-67 academic year, in amounts not to exceed \$20.00 per student annually, to be required of all students attending the College?						
YES						
NO						
EXPLANATORY NOTES: (1) Estimated total cost of College Union - \$3,500,000.00						
(2) Anticipated annual fee schedule:

			F	W	S	Summer
Full-Time Student	\$0	\$0	\$9.00	\$9.00	\$9.00	\$2.00
Limited Student	\$0	\$0	\$3.00	\$2.50	\$2.50	—

equipment and buy the necessary materials in this area.

Skilled persons in the crafts may be hired to conduct classes in the different crafts.

The quiet-areas and multi-purpose room will feature various lounges.

Each of these lounges will have a conference room, projection room and a kitchen next to it.

The international lounge will have maps of the different parts of the world on display. Clocks with the different times of various countries will also be included in this lounge. The purpose of this is to

stimulate students into thinking internationally, said Lawson.

The art lounge will have cultural objects and the art works on exhibit. Reading materials will also be available.

The music lounge will have listening booths and records and a grand piano. Small concerts may be held in this lounge.

The social activity center features a sky room which is planned to have a dance floor, tables, dance band station and a soft drink bar. Music will be piped into the glass walled room.

The multi-purpose patio will include an eight chair barber shop and a clothing and repair service.

Salinger To Speak Here Tuesday; Press Association Sponsors Talk

Democratic senatorial candidate Pierre Salinger will speak to students, staff members and the public Tuesday at 3 p.m. at the steps in front of the Library.

Salinger, who is seeking the senate seat currently occupied by ailing senator Clair Engle, will be sponsored by the Cal Poly Student Press Association.

Cal Poly will be the former presidential press secretary's only stop in San Luis Obispo County before the June 2 primary election. After his talk he will be interviewed by Technical Journalism students and a number of professional newsmen at a combination press conference-reception in room 120-A of the Library.

If it rains, Salinger will speak in the Little Theater and the reception will be held in a nearby

conference room, according to a Press Association spokesman.

Salinger, press secretary to Presidents Kennedy and Johnson, began his career in 1942 as a copy-boy for the San Francisco Chronicle. Except for a three-year service stint during World War II, the senatorial aspirant stayed with the newspaper, as a reporter and night city editor, until 1955.

During the war, he was commanding officer of the submarine Chaser and was awarded the Navy and Marine Corps Medal for leading the rescue of 15 Navy personnel during the Okinawa typhoon of 1945.

In 1955, Salinger joined Collier's Magazine as West Coast editor. He was made a contributing editor in 1956 and was working on a series on James Hoffa, president of the

International Brotherhood of Teamsters, when he met Robert Kennedy, then counsel for the Senate Labor Rackets Committee.

Salinger joined the committee as an investigator in 1957, but was named press secretary for then-senator John F. Kennedy in 1959. He assumed the post of Presidential Press Secretary on Jan. 20, 1961, the day of Kennedy's inauguration.

Salinger's reporting work on the Chronicle won him the 1953 Edward V. McQuade Memorial Award for a series of articles on county jail conditions in California. To get the story, Salinger spent 15 days as a prisoner himself.

Salinger's reporting work on the day for the U.S. Senate on March 20. He is opposed in the race by State Controller Alan Cranston.

Governing Board Will Run College Union Building

If and when the College Union Building is constructed it will be run by a governing board, if a proposal written by College Building Coordinator Douglas Gerard is carried out.

The board, according to Gerard's proposal, will include both students and faculty:

—five students, one from each of the four instructional divisions and one appointed by the ASB president.

—four or five faculty members.

—the Dean of Activities, Dean of Students and a representative of the Cal Poly Foundation manager.

According to Gerard, the student voice will be a "major controlling factor" in the policies and programs of the board.

The governing board will set policies on building operation and control the building's budget.

The board will handle such matters as the buying of furniture,

what hours the building will be open to the public, and who will have priority on using the facilities of the building. It will recommend hiring of all personnel and handle payments on the loan which finances the building.

A building manager will be hired to head the whole building. He will manage the operational budget of the building—the money from the assessment and the income sources of the building.

A second budget by which the building will be run will be under the direction of Bob Spink, graduate manager. The Student Affairs Council (SAC) budget will cover such affairs as dances, receptions and teas. Spink will head the whole SAC aspect of the building.

The hobby craft area and the games area will have full time employees managing them, along with many student assistants. Four students will run the outdoor activity center—skindivers' cave, boat house, bike, motorcycle and auto repair garages.

Colorado's Aggies Give Assistantship To Poly AH Senior

Peter T. Fagerlin of Saugus, Animal Husbandry senior, has been awarded a graduate assistantship at Colorado State University in Fort Collins.

Under the assistantship, Fagerlin will conduct some of the research work under a \$6,500 grant to CSU. The grant was donated by the Thomas and Dorothy Leavay Foundation of Los Angeles to finance beef cattle breeding research.

Colorado State University has awarded Fagerlin a graduate fellowship of \$4,500, which is renewable for five years. While at the university he will work toward his doctorate in animal breeding.

Fagerlin was awarded the Wrasse Scholarship and the Sears and Robuck Scholarship while at Cal Poly. He was also a member of the Honor Society and was named outstanding senior in Animal Husbandry. He carries a cumulative grade point average of 3.8, the highest in his class.

Ag Speaker, Awards Highlight FM Meet

A steak dinner, an interesting and informative speaker, awards and scholarship presentations, and dancing were provided by the Farm Management Club for the 117 persons who attended the club's annual banquet held recently in Morro Bay.

Guest speaker Frank Bennett, deputy director of agriculture in California, predicted that problems are due to arise in agriculture before long, although insisting that there does not exist a "farm problem" as is so often quoted by politicians.

Bennett proposed that no one block obstructs the path of agriculture today.

No one problem takes precedence above all others and presents a stalemate to the industry.

A Blue Key nomination, an unexpected honor for its recipient, was presented by club President-elect Jack Mase to John Emery.

Following the speaker, Gus Beck Scholarships were presented to Bill Nelson and Bill Adams by Farm Management Department head Edgar A. Hyer. Fifty dollars was awarded to each student on the basis of need, departmental participation and scholarship.

Cal Poly Student Wins Regional AIAA Award

Richard A. N. Larson, Aeronautical Engineering senior, is the man of the week in his department by virtue of his triumph over stiff competition with his senior project presentation.

"The Direct Comparison of Nozzle Efficiency," was presented in the 14th Annual Western Region Student Conference of the American Institute of Aeronautics and Astronautics held last week in Los Angeles.

The announcement of Larson's win came from Cal Poly's AIAA advisor, Lester Gustafson. "We're all very proud of Rich Larson," Gustafson said, "his award shows everyone that Cal Poly's practical method of application in studies is top."

About 250 people attended the awards banquet and looked on as Larson was presented the \$150 special award for the best undergraduate technical presentation. All seven cash awards made at the conference were from the Minta Martin Aeronautical Student Foundation.

Dean of Engineering Harold P. Hayes said that Larson's win was an excellent indication of the way things are done at Cal Poly. He explained that the AIAA awards

prizes to graduates and undergraduates based on presentation and technical content.

Although it isn't the first time a Cal Poly student has placed in this competition, Larson's award is the first special award the Cal Poly has won for the best overall presentation technique by an undergraduate student.

Papers at the conference were also presented by students from Cal Poly Pomona, University of California at Los Angeles, University of California at Berkeley, and the University of Utah.

Although the AIAA presentation was Larson's, credit for the senior project is shared with Ray Schumway. Together they tested their theories on rocket nozzle efficiency at the Naval Ordnance Test Station, China Lake, California.

Under the name AMROC (short for amateur rocket) the students fired three solid propellant rocket motors furnished by the navy. Each firer had a specific purpose and utilized special exhaust nozzles designed by the students.

The entire project was photographed and filmed in color and showed in detail the work done and the techniques used. These films were Larson's prime tools in his award-winning presentation.

ASB Budget For 1964-65 Passes After Third Session — \$190,000

Student Affairs Council approved the 1964-65 Associated Student Body budget of slightly over \$190,000 Tuesday night.

This action ended the three week debate on relocating funds within the total budget for different budgeted groups on campus.

Finance Committee recommended that most budgets be cut to the deficit of this year's budget. This deficit is the result of over-estimation of projected income.

The 1964-65 budget is about

\$19,000 lower than this year's budget. Projected income at the beginning of this year's budget was \$200,450, but was cut last quarter by \$12,000 because of unrealized income.

In the Publications budget under El Mustang, salary fund for the business manager, circulation manager, advertising manager, and editor, was raised from \$55 in the proposed budget to \$115. Board of Publications chairman Darryl Skrabak said

that these funds for salaries were made possible by negotiating lower printing costs. Printing costs dropped from \$9,490 to \$8,884 for the coming year.

This year's budget for Publications salaries is about the same as the accepted new 1964-65 budget. The Finance Committee cut the salaries because they felt that students should not be paid for work that will benefit them when they graduate.

The El Rodeo budget under expenses was increased from \$3,760 to \$9,550, and projected income from \$9,760 to \$10,560. This action was to maintain a \$300 yearly salary for the editor, increase the allotment for supplies, and to place color in the yearbook which would have been black and white.

This increase in funds was granted to El Rodeo provided the staff find a way to sell 800 more 1963-64 yearbooks by the end of this year.

SAC voted to charge admission to the home wrestling matches, in place of charging a mandatory entry fee in order to participate in the intramural program. This \$450 was shifted from intramural income to wrestling income.

Intercampus SAC Meeting Starts Here Tonight

A joint Student Affairs Council meeting of this campus and the Pomona campus will be hosted here today and Saturday.

Steve Sanfilippo, Joint SAC Meeting chairman, said the main purposes of this meeting are to bring to the surface many of the problems that face both campuses and to bring us closer together.

Present at this meeting will be this year's SAC representatives and the incoming representatives for next year.

Probable items on the agenda will be: rose parade float, poly weekend, Inter Campus Council codes, Ag Business Operation Committee, CCAA entrance, and a discussion of employment guidelines.

On Friday there will be a buffet dinner from 7 to 8 p.m., then the first session will start at 8 p.m. in the A, B, and C sections of the snack bar.

On Saturday breakfast will be served in the snack bar at 7 a.m.; at 8 a.m. a committee meeting; at 9 a.m. the second session; at 11 a.m. the campus tour; and at 12:30 p.m., lunch in the cafeteria.

In Mustang Stadium the Spring football game will begin at 1:30 p.m. And the final Joint SAC meeting session will begin at 8:30. The banquet in the Staff Dining Hall will begin at 4 p.m. instead of 7 p.m. as originally scheduled.

President Julian A. McPhos will receive the first copy of the 1963-64 El Rodeo, the college yearbook.

The banquet, which is open to all students and their guests will start with a steak dinner and introduction of honored guests.

Tickets for the banquet, at \$2.50 apiece, are available at the ASB Office or from any member of Student Affairs Council or Awards Committee. Sales close May 29.

New ASB officers will take their oaths of office at the banquet.

Headlining the program will be a keynote speech by ASB President Roy Killgore along with the introduction of President-elect Malcolm Kemp.

Each year during the Spring Quarter the student and staff members who have given their time and service to the programs at Cal Poly are rewarded at the annual Awards Banquet.

According to Paula Connolly, this year's banquet chairman, the event will take place in the Staff Dining Hall May 31 at 5 p.m.

'Little Pica' Fizzles; Jumps 528 (Picas)

By JIM McEAIN

Dusk was falling throughout Northern California last Wednesday evening, and the hero of this story was doing what he does every evening about that time.

Croawwkg!

He was croaking.

He didn't know it then, but that was the beginning of his Big Adventure. It was also the first mistake he was going to make in a week that would see him make more mistakes than are usually made by 1,000 of his kind.

It was then that a hand reached out in the semi-darkness and took our shiny hero—a frog—from his water dwelling.

And then a nameless frog, a frog that looked and acted like any other frog of his age and geographical origin might look and act, was informally dubbed "Little Pica."

For the next few days he would

carry with him the pent-up hopes and aspirations of about 125 members of Mat Pica Pi, Society of Printing Engineers.

But, alas, "Little Pica's" destiny was set; he was to dash those hopes against the cold, hard ground at Angels Camp in Calaveras County.

For when the frog was caught that Wednesday night, Gary Sharar, a Printing Engineering and Management senior from Modesto, was ready to take him to the International Frog Jump Jubilee at Angels Camp.

And that was Gary's Big Mistake.

The International Frog Jump Jubilee is a part of Northern California tradition that became popular with Mark Twain's story, "The Celebrated Jumping Frog of Calaveras County."

This year it attracted more than 50,000 visitors and some 2,000 entries, some of them as far away as Japan, Nationalist China, the

Union of South Africa and India. And one of them was from as far away as Cal Poly.

But, as Max Shulman would say, we digress.

Sharar's job was to take "Little Pica" to the Jubilee and win the \$1,000 prize for Mat Pica Pi.

Unfortunately, "Little Pica" was not as limber as Sharar thought he would be.

In the contest, each frog was allowed to make three jumps. Judging would be based on the total distance covered by each entrant.

The sweepstakes prize was won by a toughneck named Rusty from the East Bay community of Lafayette.

He jumped 17 feet, one and one-half inches.

All the way to the fair, Sharar thought "Little Pica" could beat any entry.

He even jumped out of his

Styrofoam container and hopped all around the car on the way up. "Sharar said with a bewildered look on his face this week.

Sharar was bewildered because "Little Pica" petered out when it came to the acid test.

He jumped a measly three feet, eight inches.

"And that was a total of three jumps," Sharar complained.

Mat Pica Pi was almost as unhappy as Sharar about "Little Pica's" showing in the contest.

But Sharar feels saddest of all, because he was the "jockey" the man who was supposed to be "Little Pica's" coach.

Probably the happiest one in the whole affair was Little Pica. At the close of all the activity, he did just what comes naturally to members of his kind.

Croawwkg!

PARKING PROBLEM SOLVED
... This bicycle was discovered behind Palomar dormitory Wednesday morning hanging by a bicycle lock. High-rise may be a campus trend—last week one of the California Highway Patrol's plywood policemen appeared atop Tenaya Hall.

(Skrabak Photo)

SCULPTOR OF PRESIDENTS . . . Rahim Vessal, Crops Production Senior from Iran, puts the finishing touches on a bust of Lyndon Johnson. Rahim, who has also sculpted JFK and Jackie Kennedy, is

looking for a sponsoring group to send one of the works to Mrs. Kennedy. Magazine photographs, says the artist, are the only references he uses to create likenesses in three dimensions.

ROTC Secretary Receives Award

Mrs. Alison Tomlin, known on campus as Mrs. ROTC, was recently presented the Certificate of Meritorious Service during a cadet review held in her honor.

Mrs. Tomlin has held the position of secretary to the Professor of Military Science, since Sept. 22, 1952. She is also responsible for the cadet records of the Military Science Department.

The Department of the Army award, signed by Maj. Gen. A.R. Lohi, was presented by Col. William M. Boyce, head of the ROTC Department.

Senior Is Patenting Automatic Sprinkler

George Rauchwerger, an Electronics Engineering major, built a senior project that not only will help him graduate, it might make him some money in the future. He has a patent pending on a fully automatic sprinkler system.

The title of his project is a "Fully Automatic Transistorized Sprinkler Control System." It is not a timing system, George says, that turns the sprinklers on for fifteen or twenty minutes each day; but it measures the humidity

of the soil and will turn the sprinkler on when the humidity has dropped to a certain point.

A humidity sensor is put into the ground to measure the humidity loss in the soil, and is calibrated to turn the sprinkler on after the soil has lost a certain amount of moisture.

Rauchwerger says the system has been designed to turn the sprinklers on only at night when the weather is above freezing. It can turn on any number of sections. All a person needs is another humidity sensor inserted into the ground.

A person can have a humidity sensor in the front lawn, one in the back lawn that will turn on independently from the front, and one on each side that will turn the sprinklers on when the ground around the sensor needs watering.

The sprinkler system will be book size, Rauchwerger says it will be reasonably priced, although he can't quote any precise figures at this time. The unit can be used by schools, parks, golf courses and private homes, he says.

Rauchwerger had this idea for two years, and is now seeking a company to manufacture his invention. He says he knows of at least one company that might be interested in his invention.

New Research Devices Studied In IE Project

Senior projects come and senior projects go, but not all are fortunate enough to be able to research the potential uses of \$11,000 worth of intricate measuring devices such as the special dynamometer equipment purchased last summer by the Industrial Engineering Department.

Such was the fortune of IE majors Joe Morgan and Walt Lund as they set out to develop a basic foundation of dynamometry at Cal Poly which might serve as a springboard for future experimental research.

Morgan and Lund's senior project, Machine Tool Dynamometry and Metal Removal Phenomena, evaluated the influence of tool and cutting geometry by employing strain gauge transducers which measure multi-directional stresses. The transducers convert mechanical energy to electrical energy which in turn is recorded on strip charts for later study.

"Dynamometers are special apparatus for measuring forces or energy" Morgan said. "We have

special dynamometers for lathes, drills, and milling machines" he went on, "which can be set up and used to determine optimum tool life, tool speeds, and work forces on each unit."

After setting up the various pieces of their equipment, Morgan and Lund studied the varying aspects of metal removal from the information transmitted by their strain gauge dynamometers. This data led to the development of a student guide and suggested experiments that exemplified the uses and applications of the theory and equipment.

According to M.J. Fetter, IE Department head, the work initiated by Lund and Morgan is the forerunner of events to come in the department.

"It is the intent of the Industrial Engineering Department," Fetter said, "that the efforts of this project will be reflected in the eventual philosophy of developing the Manufacturing Processes Program along the lines of manufacturing research through the application of this newly acquired and still relatively uncommon research equipment."

Department Store Selling Studied

A senior project done on a "Comparison Study of Merchandising Programs" may help land a job for Lynda Krause, Home Economics major from Whittier.

Lynda's study had a twofold purpose: to gain insight on the job opportunities in the field of merchandising, and to gain a broader basic knowledge of the merchandising program.

The major part of her project was based on interviews and questionnaires given to six different chain department stores in Southern California. The six stores ranged in reputation from being the very cheapest to the most exclusive.

The Home Economics senior felt that although the majority of the stores featured centralized buying, the stores which did individual buying were suited to the needs of different clientele in various areas.

She explained that the training program usually lasts one year. During this time trainees attend several classes a week and gain experience by selling merchandise in many different departments of the store.

Election Roundups For Primaries Democrats Republicans

By MIKE GREGAN

President, Cal Poly Young Democrats

Although the party in power generally has it much easier in an election year than does the opposition, Democrats can look forward to no less of a row on which to rest this fall. In fact, the theme of interparty fighting is already apparent.

George Wallace, the racist Governor of Alabama who is trying to make bigotry respectable, has been collecting significant numbers of votes in Democratic primaries in some northern states, notably Wisconsin and Indiana.

He hopes to gather enough delegate votes so that at the convention in August he will have some weight to throw around.

But Gov. Wallace is obviously ignorant of what Harry Truman said when the Southern Democrats walked out of the 1948 Democratic Convention to form the "Dissemination Party." Asked what he thought about leaving the rebels, Truman said, "... to hell with the South." Then he went out and won the Presidential election without Dixie.

And Lyndon Johnson, with or without the South, will win the election this fall.

Here in California, the major Democratic contest is for the United States Senate seat left vacant by the illness of Clair Engle. It is extremely important that a Democrat win that seat, as the other of California's two senators is Republican Thomas Kuchel.

Alan Cranston, California state controller, and Pierre Salinger, former presidential press secretary, are the front running candidates for the senate seat. George McLain, better known as "Mr. Senior Citizen" for his lobby work for benefits for the elderly, is among the ten other Democrats vying for the nomination.

Cranston, who has served as controller since 1958, currently handles the largest state budget in the nation. He has the support of the 70,000 member California Democrat Council (CDC), as well as Gov. Brown and other state officers. Cranston has campaigned widely throughout California, visiting here during Poly Royal.

Salinger resigned as presidential press secretary in February and entered the senate race here at a comparatively late date. He has the tacit support of the California branch of the Kennedy family, Pat (Kennedy) Lawford, wife of actor Peter Lawford, being one of Salinger's campaign chairmen.

Assembly Speaker Jesse "Big Daddy" Unruh, such political foe of Cranston and the CDC, is hinted to be one of the key men behind Salinger. This has been denied by both Unruh and Salinger.

Keeping in mind that political predictions are seldom valid except as entertainment, we could at this point project to November and take a look at what the scene will be like.

Lyndon Johnson will be pulling dogs' ears on the White House lawn. Hubert Humphrey, senator from Minnesota, will be vice president. Democrats will maintain a slim majority in Congress.

California's new Senator will be Alan Cranston. Salinger will go back to work for the San Francisco Chronicle, where he was working when President Kennedy called on him to serve as press secretary.

Then, as after every bitterly contested election in history, the nation will pull together (or at least will narrow the gaps separating the national factions) behind the President. The same old pattern will be repeated. After a year of political rest, the mid-term elections of 1966 will set the emotional machinery of the campaigns into action again.

By LEW HOLZMAN

State Vice President (Central Region)
California College Republicans

With only two weeks left until the 1964 presidential primary in California, the big question is who will win the Republican delegation.

After his upset victory in Oregon last week Gov. Nelson Rockefeller's campaign has taken a completely new outlook. Only two months ago Sen. Barry Goldwater was far ahead with a victory within his hands; however, the Rockefeller camp has now taken a lead in Northern California and is anticipated to win in the South. Should this happen what effect will this have at the national convention in San Francisco this July?

While Goldwater and Rockefeller are really the only two candidates with any real support to speak of, Ambassador Henry Cabot Lodge should not be ruled out. One should remember that the first ballot at the convention will only have those delegates who are committed for and only for the first ballot. After this the field will be wide open.

The favorite sons will carry some weight and where their support will go after the first ballot is yet to be seen. Gov. William Scranton of Pennsylvania will go into the convention with his state's large vote along with Gov. George Romney of Michigan. It will be up to these delegates to pick the nominee.

While Lodge only has three committed state delegations on the first ballot, it is anticipated that if Rockefeller shows no additional votes after two ballots his delegates will go to Lodge, along with the delegations of Romney and Scranton. If this should happen the balloting will be one of the longest in the history of the Republican Party.

Lodge stands an excellent chance of receiving the nomination only if Sen. Goldwater and Gov. Rockefeller lose a substantial amount after the first ballot.

As to the weight of each man prior to the convention, Goldwater now has a substantial lead with over 400 votes. Should he win in California he would go into the convention with enough votes to swing the uncommitted delegations to his camp. Should this happen he would receive the nomination on the first or second ballot. However, should he lose in California, this would open the convention with a stalemate with neither candidate having enough votes for nomination.

Here is where the forces of Lodge will stampede the convention with the hope of having their candidate becoming the nominee. The forces of Rockefeller will in all probability switch to Lodge after they see their candidate will not receive enough votes. It is a toss-up on what is going to happen with the Goldwater forces. Most of them are committed to his camp only for the first ballot. Whether they stay with him after that is yet to be seen. If they should change the question is to whom their votes will go. It is very unlikely that they would go to Lodge because of the recent decision of the Lodge camp in California to support Rockefeller.

I have talked with delegates from both camps and it is interesting to note that both are confident of a victory in California. Regardless who wins the California primary the convention will prove to be one of the longest in history.

Another question is who will be the vice-presidential nominee. I feel that Gov. Mark Hatfield of Oregon will receive the honor. Scranton has stated that he wishes to remain in Pennsylvania and seek a second term as governor and the same holds for Romney.

How will the convention end? I anticipate that after a long and hard battle the ticket for the Republican Party will be Lodge for president with the running mate of Gov. Hatfield.

President, 1964-65

Inquiring Reporter Finds Students Like CU Idea

EDITOR'S NOTE: The reporter making these interviews attempted to get both pros and cons on the issue. However, he could only find persons who were for the construction of a College Union Building.

By CHUCK SMITH

Angelica Vigil, Poultry Industry

"A college growing at the speed of Cal Poly must have the extracurricular activities which are offered by colleges of its category. The College Union without a doubt would give more opportunities to the residents and foreign students."

Jeanne Ingebrigtson, Home Economics

"I definitely think we need a College Union Building. It made the school I went to in Oregon. We went in for coffee between classes; it was the center of activity; a study place; and was used more than any other building on campus."

Corn Sue Strauss, Bio Science

"I am all for the idea. The one at Michigan had a bowling alley and other recreational games. It is good for the students who can't get off campus."

Charlene Peak, Math

"I think it is a very good idea for the future and we need one now. At Cal we used the bowling alley and bookstore and it was a good place to go after dates. Also it was a good place to study during finals."

Gigi Garretson, Bio Science

"I think a College Union would be great because this college needs more recreation and activities. I think this would draw more students to Poly and keep the town happier."

Richard Brubham, Ornamental Horticulture

The College Union will be a tremendous addition to the Cal Poly campus. It will provide many useful services and almost unlimited recreational opportunities which are either scarce or otherwise lacking in San Luis Obispo. I hope every student will vote—this in itself is vital to the College Union success.

Nancy Kelly, Elementary Education

"A College Union Building would be an excellent addition to our school since it would include such a variety of facilities. I can't understand any students voting against it since everyone would benefit and no one would be paying the fee until after the building is constructed."

Mernice Magnuson, Ornamental Horticulture

"I feel that the College Union would be a fabulous asset to our college. It will draw our school closer in social activities and campus affairs. It is a step toward the future for Cal Poly."

Published twice weekly during the regular school year except holidays and exam periods by the Associated Students, California State Polytechnic College in San Luis Obispo, California. Printed by students majoring in Printing Engineering and Management. HOLDING THEIR HORNS... Spring Quarter Mustang Award winners pose with their trophies. Selected by the ASE Awards Committee for service in co-curricular activities, the winners are (l. to r.) Dave Hruska, chosen for his work in College Union Drama (Dave appears in Romanoff and Juliet at the Little Theater this weekend); Mac Dyer, who heads the College Union Building

Program Committee; Gary Sharar, printer and former production manager for El Mustang; John Depra, who works in Newman Club and the Amateur Radio Club; Alan Johnson, sparkling for the Poetry Club; Lyman Miller, not shown, received an award for work on the Music Department's Home Concert.

Bio Senior Tells Tale Of Snail, Starfish

"Tequila Funebris and Tegula Brunnea in the Presence of Plaster Ochraceus," commonly known as "The Behavior of the Brown and Black Turbine Snail in the Presence of the Common Starfish," is the subject of research by Biological Science major Virginia Sill in her senior project.

Miss Sill said that she conceived the idea for her senior project by reading about a general survey on animals showing escape responses in the presence of starfish and decided to confine her research to the turbine snail.

She pointed out that she performed two kinds of experiments. One was a diffusion experiment by which the snail could determine the presence of starfish without direct contact. It was found that the snail sensed the presence of the starfish and went up the sides of the tanks at a rapid rate and

did not stop until they were above the level of the water which contained the starfish.

The other experiment was a direct contact experiment in which the snail and the starfish were touched together. This was done to determine the different reactions where different parts were touched in order to see which part of the snail was most sensitive and to see what part of the starfish caused the responses.

Results of the direct contact experiment showed that the snails would twist their shells or throw them away from the point of contact. They also reacted by raising their shell up off their foot and releasing themselves so that they could fall or roll away from the starfish.

It was found that all parts of the snail are equally sensitive and all parts of the starfish cause the response. Miss Sill concluded that

the snail threw his shell away from the point of contact in order to break the grip of the starfish and that the releasing of the feet and falling was an escape mechanism used to enable them to escape rapidly.

She said the reason for the escape response is not known. Not all types of starfish eat these snails, and the snails do not react to those that don't eat them, while they react very vigorously to those that do eat them. The senior biologist stated that the snails were only a minute part of the diet of the starfish and that this raised the question of whether the starfish did not eat the snails because they did not like them or because they could not easily catch them.

She added that very little research has been done in this field and that there are many stimulating questions waiting to be answered.

Student Makes Plea For Lost Books

"Please return my books," urges Carlos Lavalle, a foreign student from Guatemala.

Lavalle continues his plea by stating that two library books, "Path of American Thought" by Arthur Schlesinger Jr. and "The Lincoln Company" by Lincoln, were taken from a classroom in the Engineering West Building last Friday morning. Lavalle says he would appreciate it if the persons having the books would please return them to the library.

Ruggles Will Appear On Television Show

Tom Ruggles, Agriculture Engineering freshman from Oxnard, will be a guest star on NBC's "Agriculture U.S.A." June 27.

The tape for the nationally broadcast TV program was cut Saturday, May 16, reports James Merson, Agriculture Engineering department head.

Ruggles competed in the agriculture program with two other students, one from Pierce College, and the other from Mt. San Antonio College. He won the contest.

Merson accompanied Ruggles to the contest and acted as umpire in the quiz.

Campus Capers

Clubs sponsoring events at guest speakers at a meeting or a special meeting and would like publicity are asked to leave information and details in QA 226. The material must be turned in before Friday noon if it is to appear in the Tuesday edition. Organizations may also call extension 521, El Mustang office.

ADVISOR REWARDED

Nelson L. Smith III, advisor of the Applied Arts Council and a member of the Technical Arts faculty, was presented a pen-trophy for the help he has given the council the past year and a half. The award was presented to him at the council's first annual picnic at Routhman County Park.

MATH CLUB BANQUET

Poly's Math Club will sponsor a chicken barbecue at Cuota Park from 1 to 6 p.m. May 31. Members interested in purchasing tickets may do so for 50 cents or \$1 for nonmembers from Joyce Russell, Math Department, or John Lee in 332 Tenaya Hall.

BOOKS AT NOON

Harold Hayes, dean of the Engineering Division, will review "The Green Felt Jungle" by Ed Reid and Ovid Demaris, Tuesday, June 2 in the Staff Dining Hall. The authors expose the ways in which some of the nation's top criminals, under the pretense of operating legitimate businesses, are actually pouring millions of tourist dollars into the coffers of the Mafia. On Tuesday, May 20,

Monterey Festival Lowers Admission

Special group rates for high school, college students and servicemen are available to the Monterey evening and Sunday afternoon concerts of the second annual Monterey Folk Festival, May 30 and 31.

If twenty five or more students or servicemen apply for tickets in a group, they may obtain a 20 per cent discount on the price of all tickets to these two concerts. Group checks or money orders must be mailed to Box 728, Monterey, by Tues. May 26.

Prices for the Monterey evening concert are \$5, \$4, \$3, and \$2. Prices for the Sunday afternoon concert with Mahalia Jackson, are \$4, \$3, \$2.

student Tom Gartland will review "Atheism in Our Time" by Egonne Lepp.

AIM HANQUET

Ag Business-Management Club holds its biggest event of the year tonight at the Golden Tee in Morro Bay at 6:30 p.m. When its fifth annual banquet begins.

L. N. Thompson, vice-president of Olson Brothers, Inc., will be guest speaker. He has chosen "Today's Route to Success" as his topic.

DAIRY CATTLE JUDGING

Cal Poly dairy judging teams

Poly Instructors Appear in SLO

Little Theater Play

"Nude With Violin," a play by Noel Coward, will be presented in the San Luis Obispo Little Theater at 8:30 p.m. May 22 and 23 and June 5 and 6.

Directed by English and Speech instructor Glen Smith, the cast includes Robert Andreini of the English Department and Wayne Hines, a student majoring in English.

The story revolves around the death in Paris of a world famous painter. His family comes to England to attend his funeral and finds that he has left no will. Instead, he has left a letter with his valet. To the family's dismay the letter reveals that he has never painted a picture in his life.

To keep the actual painters quiet and to maintain the name of the deceased fraudulent painter, the family undertakes many adventures. Their ventures make up a wonderfully funny plot for a farce comedy comparable to any on the market.

Admission price for the performance is \$1 for students and \$1.50 for the public.

composed of 10 students each have been notified that they placed second, third, seventh, and ninth in a nationwide contest sponsored by Hoards Dairyman magazine. Entries from the San Luis Obispo campus were among 150 college teams and 101,000 individuals who took part in the competition.

Individually Jim Eigerly, a sophomore Dairy Husbandry major was eighth; and Bernat Mar-sophomore Farm Management major was eighth; and Bernat Mar-quies, freshman Dairy Husbandry major was 10th.

MONTEREY HOOT AUDITIONS

Auditions for Lou Gottlieb's hootenanny at the Monterey Folk Festival on May 30 will be held tomorrow at the USO in Monterey at 8 p.m.

The USO is located at the corner of Webster and El Estero.

Cutting, Reining Elect New Officers

Kenneth Carroll, Physical Science instructor, and William Gifford, Animal Husbandry instructor, are the new co-advisors of Cutting and Reining Club. The club voted on the new advisors after Jim Flanagan, Animal Husbandry instructor and past advisor, submitted his resignation.

Officers for next year were elected at the meeting. They are President Jim Glines, Farm Management junior, vice-president, Tom Halsarini, Animal Husbandry freshman; secretary - treasurer, Mary Beaver, Home Economics sophomore; awards, Tom Fox, Farm Management sophomore; publicity, Molly Martin, Agriculture Journalism junior; and horse show chairman, Jim McCandlish, Animal Husbandry sophomore.

CBS Election Crew To Meet Tuesday

All students and staff working for CBS News on the primary election June 2 are being called together for a training meeting in Mel. E 27 at 7:30 p.m. on Tuesday, May 26.

County chiefs Mike Grogan and Pat Bromley have pointed out that everyone who plans to work for CBS must attend this meeting, or else send a representative.

All necessary materials will be distributed at the meeting, and each worker will receive explicit instructions as to his specific job.

CBS newscaster Walter Cronkite has emphasized the importance of San Luis Obispo County in the California vote. He points out that this county is the only one using voting machines that will close its polls at 7 p.m. For this reason, results from SLO will be the first in the state.

Poly ROTC Cadet Earns Appointment To USAF Academy

Terry W. Curl, 21-year-old Industrial Engineering junior from Downey, recently received a congressional alternate appointment to the United States Military Academy at West Point. Curl is on the Cal Poly baseball team.

Curl is alternate to an army lieutenant commissioned through Officer Candidate School. It is not yet definite whether the principal appointee will decide to attend or not; so, Curl may be notified at any time that he is eligible for immediate entrance to the academy. He has passed all the necessary physical and mental aptitude tests.

Top Dairy Cattle Aim For State Show

Five head of top Holsteins will go from Cal Poly to the State Black and White Show in Turlock, Friday May 22, as winners from the Southern California Show in Los Angeles, May 13, reports Harmon Toops, Dairy Department head.

The cattle won junior champion and reserve junior champion of the show; first senior calf; second fall calf; first, second, fifth and sixth senior yearlings, and first junior get of sire.

Nature Study Boasts New Science Text

"Natural History," a book written by Dr. Richard Pimentel, Biological Science instructor, has been successful in gaining nationwide circulation.

The book, published by the Reinhold Publishing Co., is being used as a college text in natural history, nature study, biology, and other related courses.

Dr. Pimentel said that it took him about three years to write the textbook and that he decided to write it because, "There wasn't a textbook for our nature study course."

OPTION... Starting quarterback Fred Richeau (with ball) debates whether to pitch back to trailing halfback Bruce McPherson in last week's scrimmage. Both will open against the alumni tomorrow afternoon in the traditional game.

Weight Aids Alumni In Tomorrow's Game

A tricky gap 11 defense and a cast of past greats of the gridiron will meet the Mustang varsity when they battle the alumni tomorrow.

The aging group of veterans, the largest in recent years, will be aiming for their third straight victory when they take the field in the afternoon contest.

The veterans will have the

natural weight advantage which comes from sitting on stools, while the varsity will have a big edge in fitness.

John Brennen, alumni interior lineman is "looking forward to doubling last year's score." (The 1963 game found the varsity on the tail end of a 27-0 count.) Brennen warned that the "alumni could only double the score if the pep talk at half time was liquid."

John Madden will once again handle the alumni team. Madden is the head football coach at Hancock J.C. and has handled the grade for the past few years.

Some of the potent ex-Mustangs on this years squad are all-conference players Jack Clark (full back), Ted Tollner (QB), Carl Bowser (FB), Bruce Butterfield (End or guard), Bud Chadwick (E), John Albee (G), and Fred Brown (E).

Besides these veterans, player-coach John Albee can call on the likes of Clark Tuthill, Bill Dauphin, Al Marbury, Bob Erbland, Bob Reathard, Paul Lewis, Dick McBride, John Ramsey, Jim Milligan, Rob Johnson, Roger Kelley, Dave Proctor, Jim Antoine, John Brenner, Jim Stireman, Gil Stork, Thad Murrin, Craig Brown, Carlos Gonzales and a host of others.

The grade will be going all-out to teach the "young'ns" a lesson so Mustang fans should be prepared for some rugged football come tomorrow.

Diamondmen Duel Hornets With Steve Fox On Hill

"The team spirit is very high and the boys are ready to go." These were the words of baseball coach Bill Hicks before the squad left yesterday evening enroute to Long Beach for the National Collegiate Athletic Association college division regional tournament.

The Mustangs were notified of their selection to play in the Pacific Coast tourney early Monday morning by the regional committee. They, along with Chapman, were chosen over Humboldt State and Montana University to fill the remaining two berths in the regional playoffs.

The Mustang horseholders will open the four-squad tourney against Sacramento State today at 2:30 p.m. with Steve Fox on the hill. The Hornets were champions of the Far Western Conference this year with a 29-9 record for the season. "We have never played them before so I can only judge them according to their record," said Hicks.

In preparation for the tourney, the Mustangs have concentrated mainly on their hitting.

The lineup for the weekend's activity is Ed Schum at first, Ernie Higham playing second, Jim Ramos in the shortstop position, Bobby Phillips at third, Al Montana in left field, Johnny Garcia in center, and Terry Ward in right. Wayne West will catch.

According to the 1964 CCAA baseball statistics, five ball players were named among the league leaders. In the batting department, Ramos hit .387, Higham .379, West

Harden—Gridders Ready To Oppose Alumni

Head football coach Sheldon Harden's team will take to the gridiron tomorrow afternoon at 1:30 in its final appearance of the spring season against the alumni.

Couch Harden has picked Fred Richeau to pilot the Green and Gold against the favored alumni. Harden described his team as having a lot more depth than last year.

"Our linemen are hitting harder also," Harden remarked.

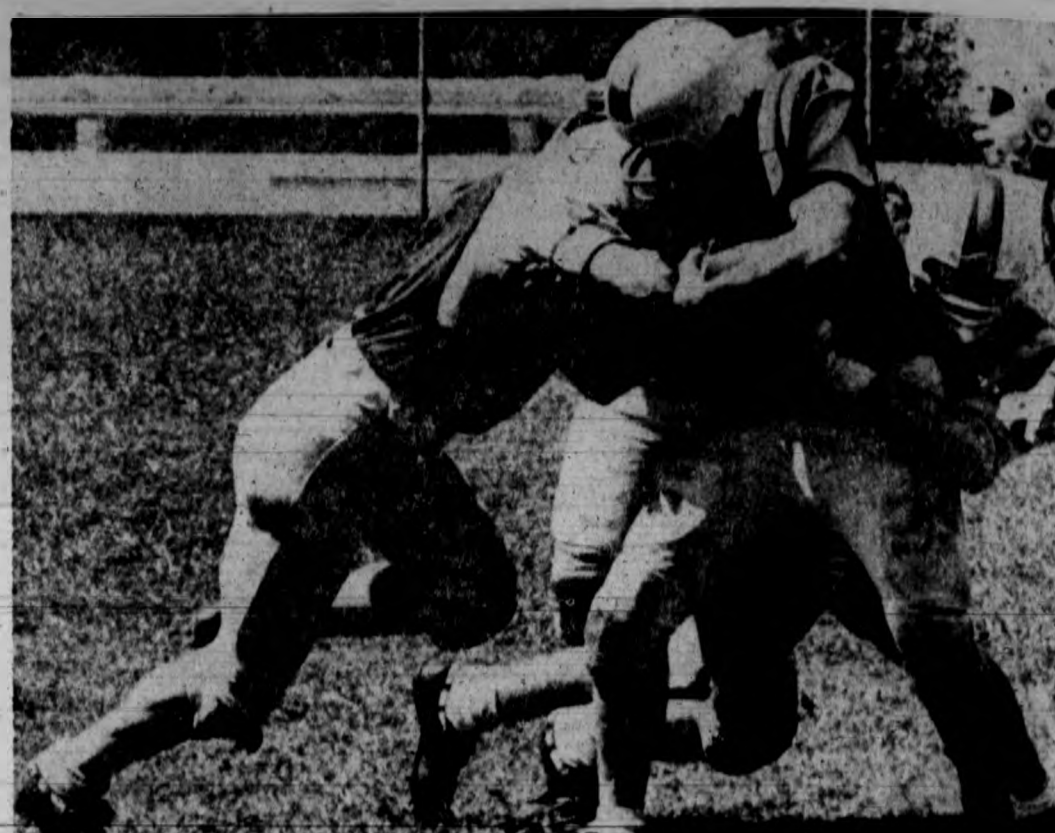

Expected to complete tomorrow's starting offense is Bill Brown (5'-10", 175) at left end. At right

end will be Lefty Ward (6'-2", 185).

At the tackle positions are Chuck Campbell, left tackle at 6'-2", 220 pounds, and Mike Forster (6'-0", 210) at right tackle. Fred Stinasburg (5'-10", 223) will fill the right guard position and 6'-2", 205-pound Lee Oxybeck will be at the left guard position.

In the center spot will be Bob Cardoza (6'-0", 215).

In the backfield, slated at right halfback is Bill Roberts and at left half, Bruce McPherson. Dan Heibel will be at the fullback slot.

KEEP CHURNING... Halfback Bob Finberg will take place tomorrow at 1:30 p.m. when the Mustangs take on the alumni in recent game-type scrimmage. Action like this of the team.

4 Alums Sign Pro Contracts

By JOHN BERILLA
Four Cal Poly graduates recently signed contracts with three different professional football teams for the 1964-65 gridiron season. The ex-Poly athletes were Jim Mulligan, Fred Whittingham, John Brennen and Jack Clark.

Pop Ivy, coach and general manager for the Houston Oilers, called Mulligan last September. He flew him back to Houston where he signed a \$9,000 contract as offensive or defensive tackle. Mulligan reports to the Oilers training camp at the University of Houston on the 16th of July.

"Competition will be tough but they have quite a few openings due to older fellows retiring. I think my chances will be pretty good," said Mulligan.

Last year Houston took third in the Eastern Conference American Football League while three years ago they won the championship. Fred Whittingham, former Poly football star, signed with the Los Angeles Rams a year ago but was unable to play the entire season due to a knee operation. He reports to the Rams' training camp at Chapman College on July 14 as a defensive end.

Whittingham played excellent ball last year and will compete against Lamar Lundy and Dave Jones, both veteran ball players with the Rams. "If I do as well as I did last year, I won't have any problems. I plan on playing pro ball as long as my legs hold out," said Whittingham.

The Rams season starts on the 14 of September against Pittsburgh.

John Brennen and Jack Clark have both signed with the Saskatchewan Rough Riders for an estimated \$9,000. Both boys report to the training camp in Regina on June 27. Brennen is hoping for an offensive or defensive center position while Clark will be used in the backfield.

Clark and Brennen will have to get used to some changes in Canadian ball. There are only three downs, no down field blocking and there are twelve men on a team. Concerning these changes, Brennen

said, "I suppose I'll have some trouble adjusting to these changes but that will come with practice."

Both men were uncertain as to their chances of making the squad but expressed enthusiasm and said they would just have to wait and find out how things go when they get there.

Ex-Pro Basketball Player Recalls Many Hardships

By HILL RICE

If you saw the movie "Go, Man, Go," you certainly know what Coach Tom Lee is talking about as you listen to him describe his professional basketball playing days of the 1930's and 1940's.

It was strictly play and travel, one hotel and one gymnasium after another as Lee and his teammates barnstormed across the United States in a style much less comfortable than the air conditioned buses and airplanes now used by teams such as the world-famous Harlem Globetrotters.

Lee recalled that a nine-passenger station wagon got awfully tiring and crowded night after night. But that's the way it was as he and the cage squad bounced from town to town, playing every night of the week.

Lee enjoyed this kind of life with the famous bearded House of David team and when asked if he had to grow a beard to play he quickly replied, "I can grow a beard in a week."

Lee also saw action with other

teams that came out of his stomping grounds, the Mid-West. And he began his pro career at an early age as the seasoned veterans of the pro circuit recruited his talents as soon as he graduated from high school in North Dakota.

One squad he played with, the Chicago "All-Nations" team, was billed as "The Tallest Team in the World."

The team featured Sky Seifert at 7-feet 3-inches and Norm Lapp at 6-feet 8-inches.

In also featured Bob Karnates, 6-feet 4-inches, who has the distinction of being the only white player to see action with the Globetrotters.

Players got a percentage of the gate, according to Lee, "but nothing like the high salaries paid to athletes nowadays. But it was sufficient enough for Lee, as he saw action for more than a decade."

The weary traveler finally stopped movin' on when he married and decided to continue his education. He enrolled at San Jose

State College, graduated in 1949, and went on to receive his Master's from Stanford University in 1951.

Cal Poly obtained his services and he has firmly planted his roots, being here now for 13 years and serving as a coach in football, boxing and just about every sport that Cal Poly has to offer.

Ovalmen To Face Finest At Modesto Trackfest

Modesto's world famous relays will be the scene of action for four Cal Poly trackmen Saturday.

The small squad will be headed by sprinter Gary Curtis in the 100- and 220-yard dashes. Curtis has run 9.5 in the 100 and has consistently been in the 21 second bracket in the 220.

Fieldmen Ben Laville and Lloyd Petroelje will also be on hand to battle the finest athletes in the country.

Laville, who last week tossed the spear 233-feet 3-inches, will be facing several 260-foot javelin throwers.

Petroelje, the conference record holder, will be competing against the likes of Al Oerter, Jay Silverster, and Rink Babka. Petroelje threw the discus 164-feet 11-inches in claiming the regional championship of the National

Collegiate Athletic Association (NCAA) last week.

Gary Walker rounds out the list of entrants for the Green and Gold. Walker is participating in the 120-yard high hurdles. Last week he took the NCAA regional championship in this event. Walker holds the school record of 14.2.

Head coach Walt Williamson will accompany the team to Modesto. When questioned about the reason for so few entries the coach replied, "The entry requirements were so high that only four boys could qualify. The whole meet is open and there is no division for college athletes."

Asked about the competition, the energetic coach said, "Just name the top track and field men in the country and you'll have an idea of the competition."
