FRIDAY, APRIL 2, 1965

\$7,044 post now official

Work is now underway to implement the March 18 decision of the Student Affairs Council to create the \$7,044 post of assistant graduate manager.

According to Robert Spink, graduate manager, information sheet on the position and the school have been sent to trade publications in the personnel guidance and graphic arts fields of work. He further noted that as things now stand, the person filling the new post will start work Aug. 15.

The March SAC meeting was the third time the council had considered the matter of creating the new post. This latest consideration was brought about by a motion of George Soares to reconsider the previous SAC action which established the assistant graduate manager position. Soares, and apparently several other members of the council, felt that the general student body was not well informed on the matter at hand. One of the members favoring reconsideration noted that at the time the proposal was first brought before the council much student interest was diverted by the Social Science-English Departments enrollment quota controversy.

There was a week interval between the Soares' motion and the actual vote. This was because of a procedural point and also to allow further time for student body leaders to appear before

the various division councils and organizations.

The vote on reconsideration of the entire matter was 8-15-1 against. The three Agriculture Council representatives voted no, this time with the backing of their council. On an earlier vote, the agriculture representatives voted in favor of creating the new post, disregarding the di-

rections which their council had given them to vote against the post. However, after receiving a fuller explanation of the proposal the council reversed its position and gave its blessing to the assistant graduate manager idea.

A check with Spink indicated that there have been several preliminary inquiries about the new position.

FREE PUBLICITY...Bumper stickers such as these displayed by Miss Cal Poly, Diane Oberholser, were observed throughout the state last week when students went home over quarter break. Hopefully, the publicity will stir more statewide interest.

4-H students visit

Tomorrow Cal Poly will host the annual Tri-Counties skills day. Sponsoring the event will be the 4-H clubs from San Luis Obispo, Monterey and Santa Barbara Counties.

Livestock judging and showing will be the main goal of the days activities, according to Stan Hears, 4-H member. Judging of cattle, swine, and sheep will also be included.

Grades out Monday

Winter Quarter grades will be available Monday and Tuesday, April 5-6, announces Jerald Holley, college registrar.

Students can pick up grade slips between the hours of 8 a.m. and 5 p.m. either day at the ticket windows of the Men's Gym.

SAC sets election rules

Setting guidelines for campaigning during the coming ANI election was the main order of business at Tuesday's short Student Affairs Council meeting.

Bob Mattes, chairman of the election committee, requested an extension of the campaigning period to four weeks. Previously, it has been two weeks. He pointed out that the extension would allow candidates more time to appear before campus groups for the purpose of campaigning.

Dr. Dan Lawson, dean of student activities, stated that the four week period might interfere with the candidate's academic standing. But another member felt that the campaigning would begin slowly and would reach a climax as elections neared, rather than a full four weeks of intensive campaigning.

Mattes also proposed that an \$95 maximum be placed on campaigning expenses for each candidate. However, this figure would not be rigid and could be changed by an agreement of the all candidates.

Both of these resolutions presented by Mattes were approved unanimously by SAC.

Students interested in running for a student body position, or their campaign managers, can get the necessary nomination papers from ASI Vice President Robert Mattes, Dr. Lawson, or from the personnel in the ASI office.

Two other brief items of business were also acted upon by the council. First was the appointment of Mike Elliott as the chairman of the Student Judiciary Committee and second was the approval of the by-laws for Monterey Residence Hall.

CSC summer flight material available to students, faculty

Material, describing overseas charter flights scheduled in connection with the California State Colleges' International Programs is available in the Public Relations Office, Adm. 214.

The flights are scheduled to transport CSC students who have been or will be participating in study abroad programs to and from their campuses in Europe. Seats not taken up by students will be made available to members of the faculty, staff, and student body of the state colleges.

Included in the announcement are two charter flights—the first from Paris to San Francisco, Aug. 3 and 4, 1965, and the second from San Francisco to Paris, Sept. 2 and 6, 1965. The fare, one-way, is \$225 and half that price for children under 12 years.

Avant garde play slated for Saturday presentation

Waiting for Godot, a two-act tragicomedy by Samuel Beckett, will be presented in the Little Theater at 8:30 on April 3 and 10.

The play is sponsored by the C.U. Drama Committee and is directed by Richard Denner, an English major. Tickets are 75 cents for ASI card holders and \$1.50 for the general public.

According to the New York Post, Waiting for Godot is, "...one of the most fascinating plays of the postwar theater...grotesquely beautiful and utterly absorbing."

The play, by the Irish playwright Beckett, is the archetype of the "Theatre of the Absurd" drama. It does not tell a story, it explores a static situation.

"Nothing happens, nobody comes, nobody goes..." A feeling of uncertainty is produced. This and the ebb and flow of this un-

certainty—from the hope of discovering the identity of Godot to its repeated disappointment—are the essence of the play.

Waiting for Godot is considered by its actors an "avant garde" production.

Kern County offers summer camp jobs

Interested in summer employment working with youth? Spend a summer of significance working with youth at Kern County "Y" Camp. This idea opens the 40th season of camping for the YMCA of Kern County, and applications are now being taken among college students for counseling jobs.

Operating the most comprehensive away from home program of any agency in Kern County (public or private) the Kern County YMCA enjoys three separate facilities. Most resident camping is carried on at Poso Heights which has 22 acres of rolling ranch land at 5,000 feet.

Twenty seven buildings, including a new dining hall with fireplace and modern restroom facilities are complemented by the two and one-half acre man made lake for swimming, boating, and fishing. A herd of cattle with the YM brand graze the pasture and the meadow abounds with deer.

Farther up the mountain at 7,000 feet the YMCA maintains Portuguese Meadow facility for primitive camping in Sequoia National Forest.

Pack trips originate out of the base camp maintained at 10,000 feet above the Mammoth Lakes in the High Sierra.

Counselors are needed to work with the hundreds of boys and girls that use these facilities and programs. College students are usually the best qualified, combining enthusiasm with responsibility.

Students 19 years old and older with program skills in craft, swimming, campfire programs, chapel programs, riflery, archery, cook-outs, horseback riding, story telling, and games are preferred. Some students of exceptional capability will be considered even if they are not yet 19.

Spring enrollment has broken with historic trends. For the first time in recent years the Spring enrollment has not dropped significantly from the Winter enrollment. According to Jerald Holley, registrar, the latest enrollment figure for this quarter is 6,521. This is considerably above the projected Spring enrollment of 6,400. The Engineering division has 2,807 students; Applied Arts, 1,904; Agriculture, 1,456; and the Applied Sciences, 1,040. (Photo by Halstead.)

EDITORIAL PAGE

As each quarter dawns, a new editorial staff takes the helm of *El Mustang* and normally new policies are applied. But the policies this quarter are not new; they are the policies of good journalism which have always guided *El Mustang*.

Our number-one concern is to be fair and just in reporting the news of every phase of the campus community. For example, we do not favor the Agriculture Division over the Engineering Division, nor will we intentionally give the Social Science Department more coverage than the Home Economics Department, nor favor any segment of the community.

Due to the large number of campus club and organizations, we have been forced to reorganize our system of reporters' "beats." Our small staff can only hope to have consistent direct contact with the major segments of the campus. Thus, for the most part we will cover the division councils and boards.

We are not saying that other news will not be covered, but we do say that *El Mustang* can be fully effective and efficient newspaper only with the cooperation of students and student groups. Most organizations have a publicity chairman or committee. For those that do, we urge that they utilize these people to insure coverage of their organizations.

One instance where the right of suppression will be reserved is in the area of letters to the editor. *El Mustang* welcomes all student opinions but it will not be used as an instrument for a personal vendetta. All letters must be in good taste and nonlibelous.

El Mustang can serve the campus only when everyone cooperated to achieve a common end: newspaper that is news.

Mailbag

Contributions to "Mailbag" should not exceed 200 words. Editors reserve the right to edit and/or condense all letters received and to decline publishing letters that are, in the opinion of the editor, in poor taste or libelous. All communications must be signed by the writer. If a nom de plume is desired as a signature, it is permissible but the editor must know the true name of the author.

Why restrict?

Editor:

"In human societies there is no reason whatever why the specialist should not retain the capacity to function as a generalist... Education can lay a broad and firm base for a lifetime of learning and growth. The individual who begins with such a broad base will always have some capacity to function as a generalist, no matter how deeply he chooses to specialize..."

"One of the clearest dangers in modern society is that men and women will lose the experience of participating in meaningful decisions concerning their own life and work, that they will become cogs in the machine because they FEEL LIKE cogs in the machine. All too often today they are inert components of the group, not participating in any significant way but simply being carried along like grains of sand in a bucket."

This quotation, taken from an article entitled *Self Renewal: The Individual and the Innovative Society*, by John Gardner, expresses a principal reason for stimulating liberal arts studies. As another writer puts it,

"Specialized or technical training prepares an individual for his first job but not for the decisions he must make as a free man or for the changes in careers that will come during his lifetime. Liberal education, because it is education for versatility, is the best preparation for those who live in a changing world." (From an editorial by Paul Woodring,

Education Editor, *Saturday Review*, April 18, 1964.)

What are we at Cal Poly doing to meet the needs not only for social scientists, but for engineers, ranchers, architects with a generalized background in economics, history, English, political science, sociology?

We are restricting these areas!

IS EUROPE?

College life is such a busy one, what with learning the Maxims, attending public executions, and walking our cheetahs, that perforce we find ourselves sometimes neglecting our studies. Therefore this column, normally a vehicle for innocent tomfoolery, will occasionally forego levity to offer a quick survey course in one of the learned disciplines. Today, for an opener, we will discuss Modern European History.

Strictly defined, Modern European History covers the history of Europe from January 1, 1964, to the present. However, in order to provide employment for more teachers, the course has been moved back to the Age of Pericles, or the Renaissance, as it is better known as.

The single most important fact to remember about Modern European History is the emergence of Prussia. As we all know, Prussia was originally called Russia. The "P" was purchased from Persia in 1874 for \$24 and Manhattan Island. This later became known as Guy Fawkes Day.

Persia without a "P" was of course called Ersia. This so embarrassed the natives that they changed the name of the country to Iran. This led to a rash of name changing. Mesopotamia became Iraq, Schleswig-Holstein became Saxe-Coburg, Bosnia-Herzegovina became Cleveland. There was even talk about changing the name of stable old England, but it was forgotten when the little princes escaped from the Tower and invented James Watt. This later became known as the Missouri Compromise.

Only last week he invented the German short-haired pointer.

Meanwhile Johann Gutenberg was quietly inventing the printing press, for which we may all be grateful, believe you me. Why grateful? I'll tell you why: Because without Gutenberg's invention you would not have this newspaper to read and you might never learn that Personna Stainless Steel Razor Blades are now available in two varieties—the regular double-edge blade we have all come to know and love, and the new Personna Injector Blade. Users of injector razors have grown morose in recent years, even sullen, and who can blame them? How would you feel if you were denied the speed and comfort and durability and truth and beauty of Personna Stainless Steel shaving? Not very jolly, I'll wager! But injector shavers may now rejoice—indeed all shavers may—for whether you remove your whiskers regularly or injectorly, there is a Personna blade for you—a Personna Stainless Steel Blade which will give you more luxury shaves than Beep-Beep or any other brand you might name. If by chance you don't agree, the makers of Personna will gladly buy you a pack of any brand you think is better.

Yes, friends, we may all be grateful to Johann Gutenberg for inventing the means to spread this great news about Personna. The next time you're in Frankfurt-am-Main, why don't you drop in and say thanks to Mr. Gutenberg? He is elderly—408 years last birthday—but still quite active in his laboratory. Only last week he invented the German short-haired pointer.

But I digress. Returning to Modern European History, let us now examine that ever-popular favorite, France.

France, as we all know, is divided into several Departments. There is the Police Department, the Fire Department, the Gas and Water Department, and the Bureau of Weights and Measures. There is also Madame Pompadour, but that is a dirty story and is taught only to graduate students.

Finally we take up Italy—the newest European nation. Italy did not become a unified state until 1848 when Garibaldi, Cavour, and Victor Emmanuel threw three coins in the Trevi Fountain. This lovely gesture so enchanted all of Europe that Metternich traded Parma to Talleyrand for Mad Ludwig of Bavaria. Then everybody waltzed till dawn and then, tired but happy, they started the Thirty Years War. This later became known as Pitt the Younger.

Space does not permit me to tell you any more about Modern European History. Aren't you glad?

© 1965, Max Shulman

And aren't you glad you tried Personna® Blades? You'll be even gladder when you try the perfect companion to Personna: new Burma Shave®. It soaks rings around any other lather!

Win a Honda just for being born

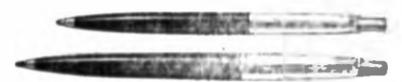

Your own birth date may have already won you a Honda in Parker Pen's Birthday Sweepstakes!

For example, if your birth date is December 1st, 1942, your entry is 12-1-42. Just fill in the coupon below—take it to your Parker Dealer for his signature—and then send it to us. And you might as well know this: you winners have your choice of Hondas . . . the powerful C-110, or the deluxe CA-102. Congratulations!

Maker of the world's most wanted pens

New Compact Jotter. First girl-size ball pen made for girl-size hands. Uses the big 80,000-word Jotter refill. \$1.98.

T-Ball Jotter. The world's first ball pen with stainless steel—writes a clean, clear line up to 80,000 words. \$1.98.

Parker 48 Convertible. The pen that fills two ways—with handy reserve ink cartridges, or from an ink bottle. Standard model—\$5.00.

Mental health careers program set for June

A 10-week summer work-study program designed to interest college students in mental health careers will begin in June.

Participating are 10 California state hospitals, University of the Pacific, Stockton and San Diego State College.

Besides the hospitals and the colleges, the program is sponsored by the Western Mental Health Training and Research Project of the Western Interstate Commission for Higher Education. April 10 is the deadline for applications, which should be made to either UOP at Stockton or San Diego State College, depending on which a student wants to attend.

Any student with a good scholarship record in a western college or university who would like to explore career possibilities in mental health, or gain a better understanding of efforts in mental health fields is eligible. Students must have completed at least their sophomore year by the time the program starts.

The opening and closing weeks

will be spent in regular academic summer sessions at the colleges.

The eight intervening weeks will be spent on job assignments in hospital wards, occupational therapy and recreation programs, and in social service, psychology and special school programs, all under staff supervision. Academic work will continue with reading assignments, conferences, seminars, and study projects. Efforts will be made to give students varied experiences and insights. College credit will be given.

Students will receive a salary of about \$560 for the eight weeks. Costs to them will include tuition, room and board, and transportation.

Some scholarship assistance may be available from Mental Health Associations in the region or from other foundations and agencies.

Information on such aid or loan, and requests for applications, should be made to the sociology department of the college a student wants to attend.

Secret detective 'gathers' the facts with the braceros

VENTURA—(AP)—A Ventura County supervisor has been masquerading as a farm laborer to see what goes on in the lemon orchards since domestic workers have taken over from the Department of Labor.

After three days of picking lemons and wearing old clothes, Supervisor Robinson says he feels there's a real farm labor crisis in Ventura county. His comments include this description of conditions:

"There were two drunks on the truck who couldn't go to work, and two more took bottles into the grove. There was drinking during the night. Some of the men didn't smell to good."

As to his over-all reaction to the situation, the County Supervisor said: "The farmer is getting a rooking as far as getting the job done."

The 43-year-old Robinson is an insurance executive as well as a county supervisor. When he put on old clothes he said he was hired for a farm job on his first visit to the State Employment Office. He gave his right name but not his occupation or address. After three days in the orchards, he said he found the food excellent and the barracks conditions not too different from those he had in the service in war-time. As to the men working in the groves, he said: "You have people who are interested in putting in eight hours rather than working eight hours. They recognize that if they just kind of loaf along they can get a day's pay, and that's all they are interested in."

Poetry competition open to all students

All college students are invited by the National Poetry Press to submit verse to be considered for publication in the Annual Anthology of College Poetry.

The student's name, home address and college must be typed or printed on each entry submitted. Failure to follow these rules will disqualify the entrant. More consideration will be given to shorter poems.

Manuscripts may be submitted to the National Poetry Press, 3210 Selby Ave., Los Angeles.

All manuscripts must be submitted by April 19.

Office work in Europe is interesting

SUMMER JOBS IN EUROPE

Grand Duchy of Luxembourg —You can earn \$300 a month working in Europe next summer. The American Student Information Service is also giving travel grants of \$390 to the first 5000 applicants. Paying jobs in Europe include office work, resort, sales, farm, factory, child care and shipboard work just to mention a few. Job and travel grant applications and complete details are available in a 36-page illustrated booklet which students may obtain by sending \$2 (for the booklet and airmail postage) to Dept. J, ASIS, 22 Ave. de la Liberte, Luxembourg City, Grand Duchy of Luxembourg. Interested students should write immediately.

Equipment requests due

Audio-visual equipment and materials may be recalled from quarter loan locations and redistributed during Poly Royal, according to A-V coordinator Marcus Gold.

If a departmental club or organization plans to use ma-

terials or equipment during Poly Royal, staff members are asked to schedule equipment usage with the A-V Department now by sending or taking a requisition to Room 9 in the Business Administration Building.

Graduating engineers & scientists: Join IBM's new computer systems science training program

Become a problem-solver and advisor to users of IBM computer systems in areas such as:

- real-time control of industrial processes
- communications-based information systems
- time-shared computer systems
- graphic data processing
- computer-controlled manufacturing systems
- management operating systems
- engineering design automation

All engineering and scientific disciplines are needed. IBM will give you comprehensive training, both in the classroom and on the job. Openings are available in all principal cities of the U.S.

For more information see your placement director, or call the nearest IBM branch office. If you prefer, write to G. M. Wood, IBM Corporation, 3424 Wilshire Boulevard, Los Angeles, California 90005.

SPORTS

Horsehidiers carry hot bats despite average season

Coach William Hick's varsity horsehidiers may only be playing mediocre .500 ball, but statistically they look like potential league champs.

At this early stage in the 1965 campaign, they are just on the bright side of a 7-6 season record, but the team is hitting a robust .303, a mark more becoming of a diamond powerhouse.

The mound staff, headed by Steve Fox, has also been more effective than the won-lost columns show. With 40 innings of duty behind him, Fox has tossed 4 complete games in compiling a 5-1 mark and a 3.87 ERA. The real stingy man of the staff, however, has been Terry Curl, who has allowed only three earned runs in 23 innings in posting a microscopic 1.35 ERA.

Last home track meet tomorrow

Tomorrow Coach Walt Williamson's thinclads face Cal Poly at Pomona and the University of Redlands in their last home meet of the season.

The Mustangs will be without the services of sprinter Gary Curtis. Curtis ran the 100 yard dash in 9.5 seconds last year.

According to Williamson, "We should beat Pomona, but Redlands has more depth than we do, and without Curtis our overall team performance could be hurt by as much as 15 points."

Gary Walker, all-around track man for the Mustangs who was injured earlier in the season, is in top condition and will be running in his last home meet for the Mustangs. He stands a chance to break the all-time point total record for Cal Poly which is currently held by airplane crash victim, Vic Hall.

Distance man Roland Lint, also injured earlier in the season, will be ready for action. Lint has broken the school record for the mile and is expected to repeat his performance.

Time for the triangular meet will be 1:30 p.m.

THE SAFE WAY to stay alert without harmful stimulants

NoDoz™ keeps you mentally alert with the same safe re-fresher found in coffee. Yet NoDoz is faster, handier, more reliable. Absolutely not habit-forming. Next time monotony

makes you feel drowsy while studying, working or driving, do as millions do . . . perk up with safe, effective NoDoz Keep Alert Tablets.

A message of importance to sophomore men

If you've got what it takes to be an Army Officer, you may qualify for this new on-campus training program

A new Army ROTC program starts this coming Summer for sophomore men who apply prior to May 1—only 3,000 applicants to be accepted

If you're a sophomore now attending one of the 247 colleges and universities that offer Army Officer training—or you plan to transfer to one of these schools next Fall—you may qualify for the new two-year Army ROTC program.

This new program—designed especially for college men who have not taken Army ROTC during their first two years—will commence with six weeks of field training this coming Summer, beginning June 14. Then you'll have on-campus training during your junior year . . . six additional weeks at camp during the following Summer . . . and more on-campus training during your senior year. Even flight training is offered at some schools.

ROTC training is really a process of learning to organize and direct others—to be a leader. Consider how important this ability can be to you throughout life; yet, to acquire it you will spend relatively little time in the ROTC classroom. You'll obtain valuable junior management experience . . . a fuller and richer campus life . . . extra spending money (\$40 per month during your junior and senior school years, and even more during Summer training) . . . and, when you graduate, an Army Officer's commission as Second Lieutenant. Then you'll normally spend two interesting years on active duty, often abroad with opportunities for travel.

Talk to the Professor of Military Science on your campus about this opportunity. Ask him to describe this new short program in detail.

Or send in the coupon below for complete information. There's no obligation involved, and you'll not be subjected to any "hard sell" recruiting effort. The kind of men the Army wants can decide for themselves if this new opportunity is right for them.

If you're good enough to be an Army Officer, don't settle for less. Sign up now for Army ROTC.

Send in this coupon for more information on this new two-year on-campus Army Officer training program.

U.S. Army ROTC, Post Office Box 1040, Westbury, New York 11591

Please send me complete information on the new two-year Army ROTC program. I understand there is no obligation involved.
