Controversial Christ film to be shown Oct. 10

The movie "Parable" comes directly from the New York World's Fair to the Cal Poly campus. At 7 p.m. Sunday, October 10, the controversial film will make its debut on campus in the Poly Little Theatre.

Sponsored by the Lutheran student group, Gamma Delta, the showing and discussion will be open to the public at no charge.

The 22 minute, color film has been cheered and jeered by more people, and has been responsible for more concerned discussion than perhaps any other Christian movie ever made, according to the Campus Chaplains Council.

Newsweek magazine said of the film, "It is very probably the best film at the Fair." Time called it "eloquent." Others thought of it as "senseless" or "ridiculous."

Parable opens by showing a circus coming into town. Your

County forbidden to forbid topless

(Los Angeles)—A preliminary injunction forbidding Los Angeles County to enforce an ordinance against topless costumes for entertainers was issued last week in Los Angeles. H. Nutter ruled that the field for regulating such activity has been pre-empted by the state.

The injunction was issued in connection with a suit brought by eight bar-restaurants in widely separated parts of the county. County officials had threatened to deny or revoke entertainment licenses if topless entertainment wasn't stopped.

town, mine, anybody's town. After the colorful parade there comes, riding along on a donkey, a lowly clown, all in white. This clown involves himself so much in the life of that circus that he is either pursued or followed by its operators and patrons. Who is the clown—Christ, or a "fool for Christ"?

J. Paul Davidson of the International Journal of Religious Education wrote the following in his review of the film: "It is often necessary to 'strip down' the complex garments of 'churchianity' so that we may see the kernel of truth itself. . . . We see Christianity as a ritual for Sunday mornings and a set of good works, neither of which is the result of the gospel, but rather a comfortable substitute for it."

Peace corps tests scheduled locally

Are you interested in joining the Peace Corps? A testing schedule has been set up for those interested.

You need only be a U.S. citizen over 18 years of age; either single or married without other dependents. If you are married, however, both husband and wife must apply.

Peace Corps placement tests are scheduled to be given at the San Luis Obispo Placement Office Oct. 9 and Nov. 13 at 9 a.m. and Dec. 6 at 3 p.m.

A test will also be given on the Cal Poly campus on Nov. 10. This is only a placement test. You don't pass or fail it and this does not obligate you to join the Corps. The test is only to determine how you could best help the people of developing countries in the event you do apply for service in the Corps.

If you are interested in taking this test you must pick up a Peace Corps Volunteer Questionnaire at the Placement Office, fill it out and either submit it to the

'Workshop' granted to AC student

One of the phases of President Lyndon Johnson's "War on Poverty" program uses the same principle that private industry has been using on the Cal Poly campus for four years—namely, work ships.

Under the terms of a typical "workshop," a company would grant a campus department a certain sum of money to be designated as wages for a particular student. As the student works for his department a given number of hours, he is paid a monthly salary until the grant is exhausted.

The main purpose of a "workshop" are to give a student actual training in his field, aid the departmental instructors, and help the student finance his college education.

Cal Poly has been the home of seven such "workshop" grant recipients during the past four years. The most recent workshop was granted to Jim Kehl, senior Air Conditioning and Refrigeration major from Cupertino. Kehl is to work in his department during the next nine months for a total workshop of \$900. This workshop is under the sponsorship of the Dura-Vent Corporation of Redwood City.

Wilson appointed for new state post

Dr. Max Rafferty, Superintendent of Public Instruction, has approved the appointment of Donald E. Wilson as Chief, Bureau of Agricultural Education for California.

Wilson, Bureau of Agriculture Education regional supervisor for the south coast region since 1959 at Cal Poly starts his new position immediately.

The new post consists of supervising the seven regional supervisors; and to promote, improve and extend agricultural education in public secondary schools in California. He will also serve as the state advisor for the Future Farmers of America.

Bio. Dept. to host speaker

Dr. Jerrold Meinwald, the regional Sigma Xi lecturer, will be on the Cal Poly campus Oct. 7 to speak on "Defense Secretions and Pheromones."

Pheromones, according to Dr. Stansfield of the Biological Sciences Department are the chemical communications of insects.

Dr. Meinwald will speak at 8 p.m. in Sci E-27 and is being co-sponsored by Sigma Xi, a faculty group interested in the furthering of scientific research, and Beta Beta Beta, the student biological sciences club.

Any interested persons are cordially invited to attend.

Big plans for band set for future

Cal Poly's marching band consists of 68 members and ten letter girls. Majorette positions need to be filled.

Of the musicians, 53 are males and 15 females, excluding the letter girls. Students wanting to audition for majorette positions may see J. M. Baum, band director, in his office Mondays through Thursdays at 11 a.m.

Plans for the season are to design new uniforms for next autumn and increase the number of musicians to 80 by this time next year.

Glenda McMurray, drum major, will direct and lead the band on to the field at each of the four remaining home football games and at the University of Santa Clara on November 13. Band Night, scheduled for half-time of the Long Beach State game,

will include seven to ten bands.

Practice hours are Monday evening 7-9 p.m. in the music department, room 216. The football field will serve as a practice area for the half-time shows, with practice held on Wednesday and Friday afternoons.

Other activities this quarter include a Christmas concert and performance during College Hour. During the break between winter and spring quarters the band will take a five-day tour in the San Francisco area.

They also plan the annual concert during Poly Royal and the spring concert.

"Flute, oboe and French horn players are desperately needed for concert band, beginning next quarter. Interested students may contact me and arrange for try-outs," comments Baum.

McNamara picks units

by the Associated Press
Secretary of Defense Robert McNamara has designated 982 units—chiefly in the Army national guard—for a 145,000-man select force to be brought to the "highest state of combat readiness." At the same time, he has ordered that 750 Army Reserve units totaling some 55,000 men be disbanded as unneeded to carry out contingency war plans. The 55,000 will be given an opportunity to shift to high priority units to help fill out the ranks of those units.

Men who choose otherwise may go into a manpower pool. Men in the pool are Reserves unassigned to units. The plan follows the lines of key features in a controversial proposal to merge the Army Reserve into the Army National Guard. That merger was banned by Congress, but McNamara said the streamlining announced today is possible under existing law.

Music Tryouts

Music will be ringing in Cal Poly's music department soon after last week's tryouts for the Collegians, the collegiate quartet and the Majors and Minors.

Four men have been added to the 15-piece Collegians dance band. They are Bill Hansen on the trumpet; Lee Thurston, tenor saxophone; Gary Faurot, alto saxophone; and Mike Barnett, guitar.

Majors and Minors, a group of men who don barber shop attire, includes six new fellows. They are Gary Wilshire, first tenor; Ron Redmond, second tenor; Ernie Smith and Scott Strachan, basses; and Sam Taylor and Larry Weigel, baritone.

Woody Barley leads the 12-man group, which sings for various audiences county-wide as well as for campus organizations.

The quartet includes: Tim Leathers, second tenor and Men's Glee president; Ken Alcum, leader; Dennis Morten, Music Board on Campus representative; and Eric Pool, bass.

During President Julian McPhee's convocation the men's quartet will make its first public appearance.

Little Theater gives Phoenix

Final presentation of "A Phoenix Too Frequent," directed by Robert Andreini of Poly's English and Speech department can be seen this Friday and Saturday at 8:30 p.m. in Little Theatre Playhouse, Monterey Street.

The satirical verse play by Christopher Fry concerns a young widow, Dynamene, who is mourning the death of her husband. Dynamene anticipates committing suicide, but a soldier, Tegus, persuades her to the contrary.

Playing the leading role of Dynamene is Mrs. Barbara Ratcliffe, wife of Mr. Ronald Ratcliffe of the Music department. Mrs. Ratcliffe won last year's Little Theatre "Oscar" for best actress for her lead in "Kind Sir."

Daryl Kruse will be Tegus, while Jessie Ray, well known Little Theatre actress and winner of two "Oscars," will play the part of Dynamene's maid.

The play was first presented last Friday and Saturday for the first time.

Graduates to speak

James R. Kennelly, sales representative for American Standard Corp., (industrial blowers) and Arnold B. Kubitski, sales engineer with Texaco will speak on "Career Opportunities in Industrial Sales" from noon to 1 p.m., Oct. 6 in the Air Conditioning Auditorium. All Cal Poly students are invited to attend.

The representatives' presentations, followed by a question-answer period, should be of special interest to students in TA, IE, ME and BA considering job opportunities in the rapidly expanding field of industrial sales.

Both speakers are graduates of Cal Poly with a Technical Arts degree. Kubitski graduated in 1960 and Kennelly in 1964.

Kubitski will also be interviewing in the Placement Office Wed., Oct. 6 from 8-11 a.m. and 1:30-4:30 p.m. for positions with Texaco in sales, resale and consumer sales.

Parks anywhere

A Honda is a slim 24" at the widest point. This

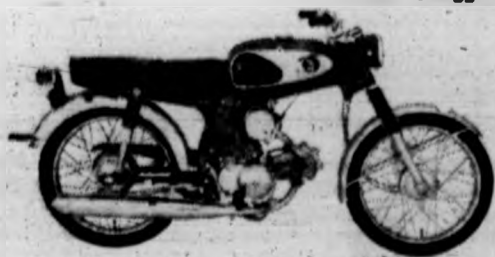

narrows down the hunt for a parking space considerably. slide into almost any shady spot.

Like just outside of English Lit. Hondas fit into slim budgets too. Prices start about \$215*. Gas goes farther, up to 200 mpg on some models. And cutting your wheels in half does just about the same thing for insurance costs. Or more.

This is the sporty Super 90 with its distinguished T-bone frame. Tops 60 mph. Just one of the 15 Honda models that make other campus transportation strictly for the birds.

See the Honda representative on your campus or write: American Honda Motor Co., Inc., Department C1, 100 West Alondra Boulevard, Gardena, California 90247.

Driver training scheduled; required for state car drivers

Defensive driver training is set for Thursday and Friday, Oct. 7 and 8 from 3 to 6 p.m. in AG 123. Students who drive state vehicles for a departmental or campus job are required to take such a course. This is the only time that the course will be offered this quarter.

Contact Don Nelson, college business manager, for further information.

CONSERVATIVELY speaking

by Bob Koczor

If a job paid \$1 per week at first but doubled each week thereafter, that job would pay a weekly salary of one million dollar within 5 months!

One needn't be a math-major to figure this simple multiplication: doubling the pay weekly increases it to \$8 at four weeks duration, \$32 at six weeks, and so on, until after 21 weeks the weekly pay is over \$1,000,000!

Demographers illustrate that this statistical phenomenon parallels our earth's population explosion. From the time of Christ it took 16 centuries for man to double the population. But only 200 years were needed for another doubling in population, and still another 100 years to double that figure.

Now, with the advent of scientific and medical discoveries which reduce or eliminate famine, pestilence, and disease, the population of the world will double itself within the next 35 years.

Our present population increase of about 180,000 per day (45 million per year) means that the population of Gary, Indiana, or Spokane, Washington is added to the earth EACH DAY! On a larger scale, this means an equivalent gain every 6 months of a nation the size of Poland or Spain.

One doesn't have to be looking for trouble to realize that the world's population explosion is more than a crisis. Aldous Huxley considered this problem so threatening to individual freedom that he devoted the first chapter of his "Brave New World Revisited" to overpopulation.

Not only have demographers and the intelligentsia broadcast the problem. In his UN talk on June 25, President Johnson went on record in behalf of a population control on an international basis. He said "America should act on the fact that less than \$5 invested in population control is worth \$100 invested in economic growth."

Having by-passed the political taboos associated with birth-control, our Congress has finally begun to seriously consider legislation whereby birth control information be disseminated to countries upon request.

This legislation also provides for the supplying of contraceptives to those countries which will distribute them to its population on a voluntary basis.

Most opposition to such legislation is found among the Roman Catholic hierarchy. This has been the primary factor for the refusal of most politicians to consider birth-control until very recently.

As for the Catholic laity, a recent Gallup Poll showed that 70% of American Roman Catholics believed birth-control information and devices should be made available to all.

Their position was that while Catholics were still bound by their church's moral ban on contraceptives, non-Catholics should not be forced by law to adopt the same prohibition.

In the future, as voters, we will have the responsibility to favor or oppose birth-control legislation not only on an international scope, but also within the countries and districts where we reside.

It would deem our generation and our children's generation most profitable if, at this time, we study the problem that cannot be solved by increasing the death rate, but contraceptively speaking, by decreasing the birth rates.

DON'T

fight it.

Christopher to speak on election issues

George Christopher, former Mayor of San Francisco and possible candidate for next year's gubernatorial race, will speak at Cal Poly Thursday evening, Oct. 7.

The Cal Poly College Republicans have scheduled Christopher

to appear at a news conference at Cal Poly at 5:30 that evening. He will speak to an expected capacity audience in the Little Theatre at 7:30. A reception will be held in the Staff Dining Hall at 9 p.m.

Christopher will speak with prominent Republicans about his possible candidacy while he is in San Luis Obispo. The issues of the 1966 gubernatorial campaign will be the focus of his speech.

SAT test deadlines set for Oct. 6

The deadline for new fall students to obtain registration forms to take the Scholastic Aptitude Test (SAT) is Oct. 6. Forms can be obtained in the Counseling Center, room 211 in Administration building. First time freshmen and undergraduate transfers who have submitted SAT results need not be concerned.

The SAT will be given on Nov. 6, and are required for enrollment reporting purposes.

Over 900 authors vie for 1966 nobel prize

Authors from Europe, Russia, Latin America and Japan are being mentioned as top contenders for this year's Nobel Literature Prize. The prize will be awarded Oct. 15, by the Royal Swedish Academy of Letters, in Stockholm.

More than 90 candidates are competing for the prize. Lists of candidates have never exceeded 80 in previous years.

The Russian Konstantine Paustovsky and the Guatemalan novelist Miguel Angel Asturias seem to be likely candidates this year. Paustovsky is one of the leading Russian novelists among the post-Stalin generation.

One of the publishing houses in Stockholm counts on Asturias, as no Latin American author has been awarded the prize since the late Poetess Gabriela Mistral of Chile won it in 1945. She was the last woman to receive the prize.

Fear of Mustaches?

A public opinion survey in the Philippines showed 85 per cent of those polled expressing distrust of policeman who wear long hair and mustaches. The survey has created a policy problem for the Civil Service Commissioner in Manila.

Winning photos' display set

Close to 100 of the top photographs taken by the county's newspaper and magazine photographers will be shown in the Graphic Arts Building during newspaper week, Oct. 11-16.

The display will be part of the Journalism Department's activities in honor of the week.

The photographs were entries in the National Press Photographers Association's 21st annual contest.

Bud Ross, president of the campus journalism society, Sigma Delta Chi, said the display is being sponsored by the Sigma Delta Chi chapter, the Press Association and the Technical Journalism Department.

No "me-tooism"

Dear Editor:

The article, "Conservatively Speaking," which appeared in your Sept. 28 edition accuses the Cal Poly College Republicans of lack of political discrimination in policy and lack of principle in representing the GOP on this campus.

The record must be set straight. The Cal Poly College Republicans does not endorse any candidate for any office, including Representative Lindsay. The fund for Lindsay was not a club function but taken up by individual members who desired to seek contributions in his support. We gave the Lindsay people the same publicity as we would give for any Republican candidate. In the coming gubernatorial race, individual members will be encouraged to support the candidate of their choice. After the Republican candidate has been elected in June, CCR and its members will support and work for his election in November.

Mr. Koezor should brush up on his practical politics before spewing illusory solutions to political problems into public view. CCR has not deviated from the basic conservative principles of the GOP, as accused, but is rather assisting the party in trying to create a better image of the Republican party in the mind of the voter.

A political party which remains exclusive and invites members to leave its ranks because of philosophical disagreement can not long survive. The party needs healthy debate to give its leaders the consensus of opinion needed to fulfill its number one purpose—to win elections. You serve no political use—as a party or a candidate—liberal or conser-

vative—if you cannot win elections.

Many Republicans disagree on the issues, and yet in Congress even the most liberal and most conservative Republicans vote with the party at least 55% of the time. In an election for state or national executive office, you are not only voting for one candidate and his views, you are voting an entire party into office. A Republican winner will bring a Republican administration. Hence, the need for party unity.

This is not a form of "me-tooism." Republicans agree on more basic policies than do the Democrats. For example, some Democrats believe in the "pork-barrel" approach to administration of public policy—others believe in an honest and objective administration of programs. Republicans unanimously agree on responsible fiscal spending, keeping politics out of the administration of public programs, supporting legislation for a real purpose and not a political one.

Republicans believe that because of these and other policies, they are better suited to administer the government and promote the legislation of the United States, both nationally and locally, than the Democrats.

John G. Tennyson, President
Cal Poly College Republicans

El Rodeo advertising

Dear Editor:

Due to insufficient funds, last year's El Rodeo had to be reduced in size. This shortened many parts of the book and eliminated others. It was on this basis that a proposal was introduced to the Board of Publications and SAC to increase the income, and expenditures of this year's El Rodeo. This proposal has al-

ready passed these governing bodies.

In brief, the plan includes selling to all clubs, organizations and on campus living groups the space allotted to them in the year book. These groups will be able to purchase half-page spreads for \$15, full-page spreads for \$30 and a full double page spread for \$60.

Contracts are being sent to the parties involved.

If this plan is successful, the 1986 El Rodeo will be lengthened, have more coverage of student activities and will include every facet of college life here at Cal Poly. Although this plan is in effect now, it can only be a success if there is student support, not only through this plan, but through the sales of the El Rodeo.

A yearbook is something which every student should have. It parallels every important activity at Cal Poly and is something which only adds pleasure to college life at the time, but is invaluable in future years.

A yearbook is as good as the students make it, and only the students can make a good yearbook, no one else.

Cliff Gillette, Editor
1986 El Rodeo

Foreign students: annual picnic Sat.

An International picnic will be put on by the Cal Poly Women's Club Saturday at Poly Grove. The picnic, which is an annual event, will begin at 12:30 p.m. All Cal Poly foreign students, Cal Poly Women's Club members, spouses and guests are invited to attend the event.

The purpose of the picnic is to welcome new students and returning students, from foreign nations, according to Mr. H. H. Hurlingham, international students chairman for the club.

A potluck lunch is to be served at the picnic. Music from native lands of the students attending will be on the program.

Finance committee needs assistance

Charles Dudley, Finance Committee chairman, urges students interested in serving on this committee to attend an interview on Oct. 11 at 7 p.m. in 11b 216.

Application forms are available in the ASI office and should be turned in to that office before the interview.

Students in any class level or department with a 2.0 G.P.A. are eligible. Students who are officers of a ASI fund budget group are ineligible.

Trailblazer!

UCB chancellor

An article in "The Daily Californian," student newspaper of the University of California-Berkeley, notes that the campus chancellor, Robert Heyns, held his first "student office hour" on the semester last Thursday.

Heyns is reported to have said that he hopes to meet with students frequently, both individually and in groups. He will schedule office hours through the semester.

Freshman officers installed

Recently elected freshman class officers will go before SAC tonight to receive final approval according to John Macy, election committee chairman.

Installed during last Thursday's Inter-Class Council meeting were President-elect John Wootan, a Business Administration major from Glendale; Vice-President-elect Larry Armstrong, a Physical Education major from Redwood City; Secretary-elect Kim Walker, a Social Science major from Van Nuys; Treasurer-elect Linda Madsen, a Home Economics major from Fillmore and Wayne Parks, new Student Affairs Council Representative, an Agricultural Engineering major from Tomales.

John Wootan

Platform of the candidates stressed stronger unity and greater spirit in future freshman class affairs.

Alleged violations of election rules involving, among other candidates, a few of the winners, were heard before the Inter-Class Council.

The Council's decision cleared all but one of the candidates who, incidentally, was not one of the successful candidates.

Love That Weather!

When former major league outfielder Wally Post was playing for Birdie Tebbetts at Cincinnati, the manager told the players that he was tired of them grumbling about the weather. Tebbetts warned them that the next player who complained about the weather would be fined \$25. That day, Post came in from the outfield and said: "Boy, it's hot." Then he remembered Tebbetts' warning and added quickly: "But I love it."

More Teachers

California school districts will have 9,500 more teachers on the payroll this fall than they did last year.

May be such thing as earthquake weather after all

By Associated Press

A world-famed expert on earthquakes, Dr. Charles Richter of Cal Tech, says there may be such a thing as "earthquake weather" after all.

Dr. Richter said in Pasadena today that three earthquakes felt over much of Southern California last weekend may have been triggered by a change in weather conditions.

The seismologist said, "There often is a temporary increase in the number of earthquakes in

Southern California at this time of the year." Dr. Richter went on to say, "Usually there is a general change in weather conditions during this season. Thus some shift in atmospheric pressure may be responsible for these 'quakes'."

Dr. Richter devised the system of measuring earthquake magnitude which bears his name. The seismologist conceded he is contradicting current scientific opinion that there is no relation between earthquakes and the weather.

GIRL: HAVE YOU WRITTEN A LETTER HOME RESEMBLING THIS ONE?

Dear Mother,

School is great, but I have a big problem and I don't know what to do about it.

It seems that every time a college event comes up, I just don't have anything appropriate to wear. I went to hear Louis Armstrong last Wed. and found that there was nothing in my closet that fit the occasion. I don't know any of the stores in town or which ones would have the type of clothing that I need. What am I going to do?

STOP WHERE YOU ARE! and complete your letter like this...

P. S. I just got a tip from an upper classman and went to Leonore Smith—a great specialty shop. She has something to fit every occasion.

From now on, I'll know that I can feel perfectly dressed when I shop at LEONORE SMITH'S.

SIR ARTHUR CONAN DOYLE

CREATOR OF SHERLOCK HOMES

Frosh beats UCSB, 19-14

by Dave Taxis

Obviously overconfident from their pre-game billing, the UCSB freshmen Gauchos fell before a hard-nosed and determined Cal Poly Colt team Friday, 19-14, in Mustang Stadium. It was the initial game for each squad.

Deceptive ball-handling by quarterback Ed Roseborough kept the Gaucho defense in knots throughout the game as ball carriers Marv Paolini (45 yards in 16 carries) and Jim Bird (73

yards in 9 carries) burst through big holes made by the aggressive line. The defensive unit of the Colts, led by Brian Moriarty, jarred the pigskin loose from the Santa Barbara backs eight times, recovering it three times.

The Colts first score came on a sustained drive, capped by a ten yard TD burst through tackle by the churning Paolini. The PAT was short and the Colts took a six point lead into the second quarter.

UCSB caught fire to sneak in a score before the half and led 7-6 as the teams came on the gridiron for the final 30 minutes of football.

A recovered fumble in the end zone and a 16-yard dash to pay dirt by Bird gave the Colts a commanding 19-7 advantage with nine minutes left in the fourth period.

The Gauchos put one score on the board before the gun sounded and the Colts had their first victory in the books for the 1965 season.

The Colts next contest will be Friday, Oct. 8 against the Fresno State College Bullpups at Ratcliffe Stadium in Fresno.

THE LARGEST ALL-NORTHERN CALIFORNIA GROCERY CHAIN

This is one of Arrow's 449 different button-down sport shirts. Be choosy.

Of course, you might very well want this one. An Arrow Cum Laude American-made madras of 100% cotton. (Colors bleed after first washing.) Has a full button-down collar and a back collar button. Shoulder to waist taper and neat box pleat. Handy hanger loop, too. "Sanforized", of course. \$5.95. Plenty more where this came from. Plenty.

SPORTS

Sports shorts

Cleveland's fast-balling left-hander Sam McDowell, was striking out batters at a faster rate than Sandy Koufax, although the Los Angeles Dodgers ace had about 56 more strikeouts than the Indian pitcher. McDowell, the American League's strikeout leader with 324, has pitched 270 innings for a rate of one and two-tenths strikeouts per inning. Koufax, with a major league strikeout record of 382, has worked nearly 336 innings for an average of one and one-tenth strikeouts per inning.

In addition to Koufax and McDowell, only three pitchers in Major League history have struck out 300 or more batters in one season. They are Bob Feller, Walter Johnson, and Rube Waddell.

Another sports short is that

Minnesota manager Sam Mele claimed it didn't matter to him whether his Twins faced the Dodgers or the Giants in the World Series. But he would've preferred to face the Giants. In an apparent reference to the Dodger staff headed by Sandy Koufax and Don Drysdale, Mele said:

"I hear one team has a pretty good pitching staff."

Under My Sombrero

by George Ramos

Welcome to my little corner of the sports page. I profess to be no Prescott Sullivan or Melvin Durslag, but I'll try my best to keep you informed on CCAA news or other bits of sports news. The World Series starts tomorrow and the Dodgers and Twins are out to win the Series by hook or crook.

Dodgers were one of the weird yet, wondrous stories of the 1965 baseball season. Faced by Sandy Koufax and Don Drysdale, the Dodgers took the pennant from the Giants last week after almost being knocked out of the race. They were 4½ games off the pace, when they staged their fantastic comeback bid for the crown. Mr. Koufax, not only won his last ten decisions in the final drive, but set a major league strikeout record for a single season with 382 whiffs.

The Giants, on the other side, seemed to roll over and play dead. They folded when they could've run away with the race. Their pitching deserted them and that's where the Dodger staff consistently won the 1-0, 2-1, or the like close games.

The Twins have power plus. Harmon Killebrew, Tony Oliva, Jimmy Hall, Earl Battey, Bob Allison, and Don Mincher were swatting shots out of Crackerbox, U.S.A. . . . Metropolitan Stadium.

The Twins defied the experts by running away with the American League crown. The biggest surprise was 20 game winner Jim "Mudcat" Grant. Camilo Pascual was sidelined with injuries and Jim Kaat proved to be some help in the Twin's fantastic success.

Strangely enough, can you imagine that this team was once the old Washington franchise, which consistently came in last place?

Risking my daily ration of chili sauce, look for the Dodgers to win the classic in six games.

Mustangs mauled, 41-0

The powerful San Diego State Aztecs, rated No. 1 in UPI small college football polls and No. 4 in AP's polls, romped to an easy 41-0 victory over a "jittery" Cal Poly grid squad last Saturday night in the border city before 12,371 partisan fans.

Rated an easy 45 point favorites, the Aztecs simply "out-everythinged" the Mustangs as they put the game away in the first six minutes of play, scoring twenty points.

Varsity mentor Sheldon Harden commented that, "The boys didn't settle down until there were 20 points on the scoreboard."

To elaborate, the Aztecs were consistently getting good field positions by containing the Mustang offense in their own territory almost the entire game.

The Aztecs took the opening kickoff and in four plays traveled 65 yards with All-American candidate Nate Johns climaxing the drive with a yard plunge for the score. The PAT failed.

Three minutes later, San Diego recovered a Mustang fumble on the Cal Poly 22. Again in the four plays, Aztec quarterback Don Horn hit Craig Scroffins with a six yard pass for the touchdown with 10:28 left in the first period. Randy Simpson kicked the PAT and made the score 18-0.

After Cal Poly regained possession after the kickoff, Ken Madison intercepted a Walt Raymond pass and returned it 20 yards for the score. Simpson again kicked the PAT and put the Aztecs to a commanding 20-0 lead.

The Aztecs closed out the scoring that period when Don Shy broke through right guard and rambled 12 yards for the score. Simpson kicked his third PAT and the highly-regarded Aztecs were turning it into a rout by leading, 27-0.

As Harden had stated previously, it wasn't until this stage of the game when the defensive unit, head up by Fred Strasburg, held the Aztec offense in check.

The Aztecs also proved they could run as well as pass. Halfback Don Shy rambled 48 yards for the touchdown with 10:40 left in the second stanza. Randy Simpson kicked his fourth extra points after touchdown to give San Diego State a halftime lead of 34-0.

Steve Taylor closed the scoring for the night as he went in on a 7 yard quarterback sneak for the score. With the PAT kicked by Simpson, the game ended with the final score being 41-0.

The Aztecs also stymied the

Mustangs defensively as they became a permanent fixture in the Cal Poly backfield, chasing three Cal Poly signal callers all over the field.

Nate Johns was the running star along with Don Shy, for the Aztecs. Johns gained 121 in 12 carries with Shy piling up 186 in 19 carries.

Aztec quarterback Don Horn had an average night, completing only 10 of 24 passes for 122 yards.

Overall, Cal Poly was held to a minus three yards for the entire game with Ron Hasson gaining 17 yards in 5 carries.

Oops! Harriers didn't run

Due to a scheduling mix up, Cal Poly's cross country team failed to run at Fresno last Saturday.

The Mustangs, pitted against Fresno State and the University of the Pacific, planned to run at 1:00 p.m., but the other teams ran at 11:00 a.m.

"Because we missed running this week, we might be in trouble next Saturday. Several of the boys had just come off the injured list, and they were ready to run. Also, we have lost our number two man, Jeff James. We hope to have him back next week, but right now, we're not sure," Purcell explained.

Next week the harriers will split up with the freshmen running at Hancock Junior College in Santa Maria, and the remainder of the team going to Santa Barbara.

Running at Hancock will be junior colleges, and frosh teams from all over California.

Nine teams entered the Santa Barbara event last year, including the Los Angeles Track Club, and the Los Angeles Striders. Long Beach State, last year's winners, will be back to defend their title.

Sports Laugh

Lindsay Nelson, who broadcasts New York Met games, recently handled a contest from the roof of the domed stadium in Houston. He had to use a walkie-talkie to keep in radio contact with his regular booth. Nelson said it worked out all right, except for one thing - he was working on the same wave length as a taxi company, and he kept getting commands to pick up fares at various addresses in Houston.

EDUCATION SPENDING

California ranks fifth among the 50 states in the amount of money spent annually on the education of each pupil.

The Industrial Engineering

Club at Cal Poly formed their club nine years ago to bring together students with similar interests.

Contract let for huge plane

By Associated Press

The Defense Department has awarded a multi-billion dollar contract to the Lockheed Aircraft Corporation to develop the nation's biggest transport plane—the C-5-A.

The General Electric Company will develop and produce the four fan-jet engines for the aircraft, each capable of delivering 40,000 pounds of thrust.

The Defense Department said the cost of development and initial production of 58 planes including engines, will be about two billion dollars.

The new plane will weigh almost 350 tons, twice as much as the C-141, now the nation's largest military transport plane.

It will be able to carry loads of 250,000 pounds for 3,200 miles and loads of 100,000 pounds non-stop across the Pacific Ocean.

The plane will carry up to 300 persons. It will be more than 230 feet long, 63 feet high at the tail, and will have a 220 foot wing span.

Student impressions of Japan program

Former El Mustang editor-in-chief Toni St. Onge is one of seven Cal Poly (SLO) students attending Waseda University in Tokyo, Japan, under the international studies program of the State College system.

Miss St. Onge gives her impressions of Japan and the program in general in a letter dated Sept. 20.

"We've had only two weeks of classes, but already a routine is being established. There are the usual outside reading assignments, term papers, and quizzes. We are following the American educational system rather than that of Japanese universities where no homework is assigned and students are not required to attend lectures.

"We are also following the qu-

arter system, which is a boon to the Calif. kids, especially since we are allowed only 11 units per quarter.

"My classes are Historical Roots of Modern Japan, Religion of the Far East, Japanese language, and seminar. The last is 2 units and everyone is required to take it, since it is a weekly lecture by a leading politician, educator, businessman, etc., of the day.

"To our surprise, we found that every Japanese student has studied English for at least 5 years. But the schools teach only reading and writing - no conversation. It is very difficult to find someone who will actually carry on a conversation. And, of course, the people are very shy. Consequently, we have to make the first overture of friendliness usually and then they blossom with goodwill.

"I think all of us have lost our way in the vast train stations at least once, and we've found it not uncommon for a Japanese to take our arm and kindly guide us to the exact spot to wait for the train, if indeed he does not go part way with us to our destination. It is rare in Tokyo to be able to directly reach your destination by way of one train, bus, or trolley. Indeed, almost all of us must take at least two trains or one train and a subway to school each way."

According to a release from the State College Systems chancellor's office, the program is unique in that students study and live under the same conditions as the foreign students

Toni St. Onge

with the same instructors and courses at host universities.

The students are enrolled simultaneously at a State College and a foreign university, and courses taken abroad are incorporated into their regular State College program.

Students are generally housed in dormitories with the foreign students to avoid grouping into strictly "American colonies", and to encourage exposure to the cultural life of the host country.

Attending Waseda with Miss St. Onge from Poly are: Carl Corlett, Carolyn Escobar, Alvin Goldberg, Kathryn Keebaugh, Roger Scott, and Trudi Zeiss. Other Poly students are studying in Uppsala and Stockholm, Sweden, and Aix, France.

Boots 'n Spurs Initiate frosh

A Boots 'n Spurs barbecue serving hamburgers and corn-on-the-cob, included games and initiation ceremonies for all freshmen students last Sunday.

Freshmen went as guests of the other members but were not treated quite royally as they went through initiation procedures. The barbecue held at the Agriculture picnic grounds, lasted from 1 p.m. to 5 p.m.

Pollution control sent to President

by the Associated Press
Congress has sent to President Johnson legislation requiring autos and diesel trucks to be manufactured in the future so as to cut down air pollution. The Senate completed Congressional action on the measure today.

The Secretary of Health, Education and Welfare would have power to prescribe regulations providing for control of air pollution from motor vehicles. Sponsors of the measure say this could be done by installation of devices on exhausts or by changes in engine design. The Health and Welfare Agency plans to put the regulations into effect for 1968 models.

LEAVE IT TO MADISON AVE.

Plans are being made on Madison Avenue to market a new product called "Art, the Dog Food Dogs Ask for by Name."
