

Information systems VP appointed

Dr. Arthur S. Gloster II, director of the Computing Services Center at Detroit's Wayne State University, will become vice president of information systems at Cal Poly on Dec. 1.

Appointment of Gloster to lead Cal Poly's computer operations was announced by President Baker.

Gloster was selected for the position following a nationwide search involving more than 200 applicants. He will succeed Dr. David Walch, who will return to his administrative duties for the library and audiovisual services.

The 47-year-old academic administrator earned an undergraduate degree in industrial engineering from the University of Tennessee at Chattanooga, and a master's degree in the same subject at the University of Tennessee at Knoxville.

In addition, he earned an advanced degree in educational administration from the University of Tennessee at Knoxville, and a doctorate from Virginia Polytechnic Institute and State University.

Since 1982 Gloster has directed a large multi-computer facility at Wayne State University. He previously directed computer operations at the University of Oregon, Appalachian State (N.C.) University, and Oak Ridge Associated Universities in Tennessee.

He has also held faculty appointments at the University of North Carolina at Greensboro, the University of Tennessee at Knoxville, Appalachian State University, and the University of Oregon.

While at Appalachian State he served as president of the Southeastern Appalachia Regional Hospital Data Center, a cooperative venture with six area hospitals to develop and operate data process-

ing service organizations.

Gloster's expertise has been called upon by a number of corporations for assistance in planning and installing major computer operations. He has been a consultant for the U.S. Air Force, Sperry Univac, and a number of hospitals, municipalities, colleges, and universities. The IBM Corporation uses him as an instructor and consultant in the Customer Executive Program supporting the public sector.

The holder of a commercial pilot's license, Gloster has been active in civic affairs. He was a charter member of a Kiwanis Club in North Carolina, and chairman of the Airport Commission.

New work order system activated

Plant Operations recently activated a computerized Maintenance Management System (MMS) to provide more efficient and timely response to maintenance requests and an effective tracking system for work order progress. Effective Nov. 3, maintenance work orders directed to the Carpenter Shop were issued using the new work order system. Although the format of the work order is different, the information it contains is the same as the previous system. As with the previous work order system, the work order number is critical when requesting information about a service request.

Please note that only maintenance work orders directed to the Carpenter Shop will fall under the MMS initially. In the next few
