SAN LUIS OBISPO, CALIFORNIA

FRIDAY, JULY 1, 1966

Andrews, Kramer named to head Poly campuses

Vice President Dale W. Andrews and Robert C. Kramer of Cal Poly's San Luis Obispo and Kellogg Campuses, respectively, have been asked by Chancellor Glenn S. Dumke to be in charge of operations at their campuses because of McPhee's retirement June 30.

DALE W. ANDREWS

In a statement released to the college this week, Dr. Dumke announced his request that Drs. Andrews and Kramer "be in charge of their respective campuses."

The chancellor's statement indicated that their appointments would continue until a new president is selected for the campus.

Chancellor Dumke, in deciding not to name acting presidents, pointed out the necessity for naming permanent leaders for each campus at an early date and added that this is an interim arrangement, pending such permanent appointments.

"If there should be delay in naming a president for either campus, consideration will be given to the naming of an acting president," the chancellor concluded.

In his letter to Dr. Andrews, Chancellor Dumke stated, "I am confident that you will provide effective interim leadership for the campus. Since each campus will be functioning under a vice president you are authorized to achieve maximum utilization of the available manpower on the San Luis Obispo Campus to assist you in your administration."

President McPhee, who on Feb. 7 reached 70, the mandatory age for retirement from presidency in the state college system, became head of Cal Poly in 1933. Since then he has seen the college grow from a faculty of 25 and student body of 125 to the point that some 1,700 persons are members of its faculty and staff and its students over 12,000.

In addition to the Kellogg Campus, which is located near Pomona, and the San Luis Obispo Campus, the college also operates an Educational Center for business and industry at its Voorhis Campus, which is near San Dimas.

Legislation authorizing division of Cal Poly's San Luis Obispo and Kellogg-Voorhis Campuses into two separate colleges was passed by the California Legislature last month and has been (continued on page 3 column 1)

INSTRUCTIONAL TELEVISION

James Habb, instructor in the Printing Engineering Department, demonstrates closed-circuit television that he plans to incorporate into the instruction of his printing classes. Using the new method, Habb hopes to instruct a large group of students on the various intricacies of press work.

Instructor uses T.V. as visual teaching aid

Closed circuit television is both revolutionizing and aiding teaching. Due to the post-war baby-boom, college enrollment in the past five years has nearly doubled, making it imperative that time-saving devices be employed to eliminate the tedious and basically repetitive aspects of student instruction.

After careful consideration of the problems involved, a program of experimentation has begun in the printing department, geared to the practical application of closed circuit television in daily instruction.

This program is under the auspices of James H. Habb, the exponent of its use on campus. Habb intends to integrate into his normal curriculum this advanced teaching technique, in the hope of providing his students with a more thorough knowledge of the technical aspects of the printing press and other machines.

Habb received his basic instruction in the use of closed circuit TV and the necessary equipment from the audio-visual department. During the experiment, room 304 of the Graphic Arts building will be used to house the monitor.

The class will receive instruction transmitted by Habb and his senior-assistants from the printing department. In this way the time previously used to instruct many small groups in the use of the press will be halved by eliminating unnecessary repetition, leaving more time for student use of the machines.

Summer school program held for visiting children

A chuckwagon dinner and a community sing around a campfire await 61 children from Fellows, California, tonight when they journey to Routzan Park. This will be the last excursion of many taken while visiting San Luis Obispo.

Cooperation on this summer program between the Midway School District and Cal Poly has resulted in an enriching experience for children ages ten through thirteen and practical application for education majors.

Alice Roberts, Education department instructor, has coordinated the program planned by 21 Cal Poly teachers and 12 Fellows teachers. Mrs. Roberts gives credit for initiation of the project to Midway School Superintendent F. Edward McPherson and the Midway School Board.

The Tonaya "penthouse" shelters the 61 boys and girls, 12 teachers, and four parents, while the college snack bar feeds them

banquet style. Passers-by may have noticed a walled-off room with 10 storybook figures surrounding tables in the snack bar.

Their daily schedule has consisted of classes in the mornings, study trips in the afternoon, recreation before dinner, and special entertainment after dinner.

The children were broken into four groups for their morning classes and received instruction in science, music, art, logic, social science, and home economics.

Study trips through the week have included a historical tour through San Luis Obispo, inspection of the college farms, a trip to the beach, and a visit to Morro Bay.

Summer government formed, begins work

By Cliff Gillette

The Summer Interim Committee met for the first time last Thursday in the activities office to discuss the business to be conducted by the committee this summer.

The president-elect, Mike Elliott, was the temporary chairman, but will yield his position to Jim Sefton for the summer.

The other members of the S.I.C. are: Tom Jones, Applied Science Council Representative; Pete Goodman, Applied Arts Council Representative; Robert Spink, Graduate Manager; Roy Gurskey, Agriculture Council Representative; Woody Underhill, Inter-Class Council Representative; Cliff Gillette, Board of Publications Representative; Dick Fenske, Board of Athletic Control Representative; Mike Sullivan, College Union Board Representative; Sam Taylor, Music Board of Control Representative and Jan Bonan, Recorder.

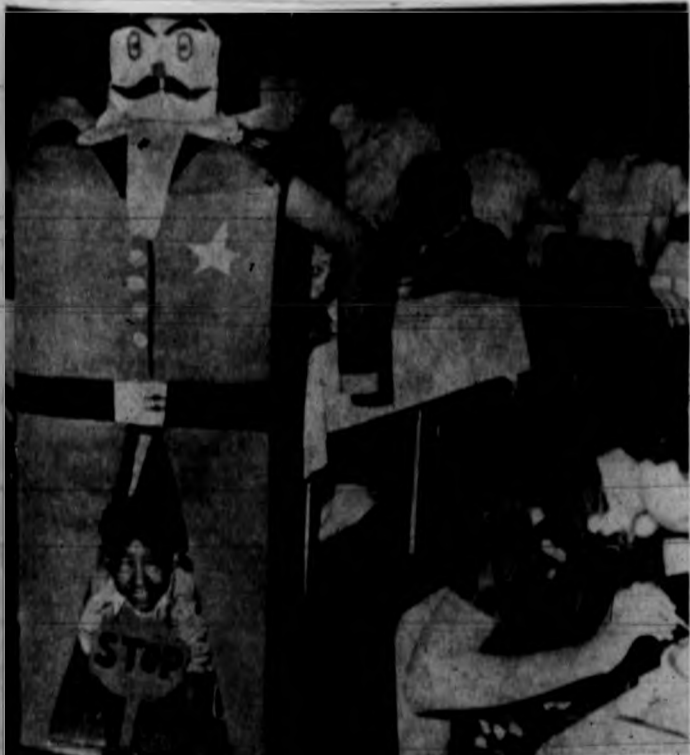

S.I.C. was created as part of the Student Government Reorganization passed in the spring

quarter by the student body. The purpose of the committee is to carry on with regular SAC business through the summer, having all of the powers and duties of the regular SAC.

On the agenda for the Thursday meeting were two letters, one from the Olympic Games Organization and one from the Korean Fund Organization. Both letters asked for contributions from the student body treasury.

The Olympic Fund letter was referred to Block "D" service organization for consideration and the Korean Fund Organization letter was directed to the Inter-Dorm Council.

Also discussed was the proposal to accept and sign the contract which would set-up an Employee's Retirement Program for the members of the foundation.

SPECIAL EDUCATION PROGRAM

Children from the Midway School District take time out from a busy week of activities to enjoy a hamburger luncheon in the college snack bar.

McPhee's condition 'satisfactory' following major abdominal surgery

President Julian A. McPhee was reported to be in "satisfactory condition" Tuesday following major abdominal surgery Wednesday, June 22, at Sierra Vista Hospital. The operation was reported to be centered in the lower intestinal region.

According to Howard West, assistant to the President, "The surgery was performed to correct an intestinal disorder. It is my

understanding that the operation was involved and extensive, but beyond that I do not have any additional information available." Because of the impending operation, it was suddenly announced that the President would not be able to preside over baccalaureate and commencement exercises, two events which would probably have been his last major appearances before the student body.

From his hospital room, President Julian McPhee talked to members of the California Agricultural Teachers' Association (CATA) by direct telephone in the college cafeteria Wednesday evening. His brief talk spurred great enthusiasm among members of the group who had been disappointed when it was announced earlier that the president would not be with them this week.

Johnson, Cruikshanks Mach earn 'outstanding teacher' recognition

by Shirli Lawrence
Richard Johnson of the Animal Husbandry Department, Norman Cruikshanks of the Social Sciences Department, and George Mach of the Mathematics Department were honored as Cal Poly's "outstanding teachers" of 1965-66 at the June meeting of the Faculty-Staff Council held in the Mr Conditioning and Refrigeration Auditorium.

Each will receive an award of \$500, made possible through the Distinguished Teaching Awards program established this year by the California State Colleges.

On the committee selecting these three "outstanding teachers" were Jerald Holly, Registrar; Dr. Carl Cummings, Dean of the Applied Arts Division; Charles Elston of the Mathematics Department; Lester Gustafson of the Aeronau-

tical Engineering Department; John Merriam of the Agricultural Engineering Department; Dr. Arthur Butzbach of the Education Department; and Dr. Milo Whitson, head of the Mathematics Department.

The committee's selections were based on the following criteria: (1) Depth and breadth of competency, (2) High personal standards of professional integrity, (3) High degree of personal interaction between students and teacher, (4) Impact of own knowledge and experience in teaching (5) Teaching procedures contributing to student enthusiasm and high performance level, (6) Student ability to apply learning to future problems, (7) High student gain in critical analytical ability, (8) High student gain in background, and (9) Consistency in presenting subject matter accurately and understandably.

Richard Johnson, one of the "outstanding teachers" was graduated from Iowa State College and the State College of Washington. He served in the United States Army as a member of the faculty and animal husbandman at the State College of Washington's Experiment Station. Since 1960 he has been a member of Cal Poly's Animal Husbandry Department faculty.

Dr. Cruikshanks, who was graduated from the University of California and received his EdD at Stanford University, taught in high schools at both Sacramento and Fort Bragg. Dr. Cruikshanks came to Cal Poly in 1947 and served as head of the Social Sciences Department from 1951 to 1963.

Dr. Mach, who was graduated from Iowa State Teachers College, received his PhD from Purdue University in 1963. Before coming to Cal Poly in 1964, Dr. Mach served as a teaching assistant at Purdue and as an officer in the United States Navy.

John L. Merriam of the Agricultural Engineering Department, one of the first to receive the "outstanding teacher" award after it was established in 1963, was chairman of the committee, which made the selections. Others who have received the honor include Robert E. Holmquist, who was honored with Merriam for 1963-64, and Jay O. Richardson along with Milo Whitson for 1964-65.

As I See It

Glad to see that you are reading the first issue of El Mustang for the summer quarter... keep up the good work.

By now, you have noted the striking contrast on campus between the summer environment and the regular school year. For the car driver it is the abundance of parking spaces... it is almost frightening. For the instructors, it will be the lack of staff dining facilities and the prospect of lunching with the students, perhaps equally frightening for some. And for everyone, an unusually peaceful and quiet campus.

Another striking change with which I hope you will become aware, and with interest, is that of El Mustang this quarter. This summer will be sort of a testing ground, an opportunity to try different styles and various forms of news content and make-up in an effort to find the type of college paper that YOU enjoy.

One of the primary reasons I wanted to become editor of the summer paper was to incorporate some new ideas into the paper to provide, what I feel, will be a more interesting and appealing El Mustang. I am sure you too, have some ideas of your own, therefore, I urge you to give your suggestions, criticism, and desires. The student response we receive this summer will aid next quarter's editor and staff in providing a better El Mustang.

We hope to provide a student opinion section of the paper.

giving the students a chance to express their thoughts, to ask questions concerning El Mustang, the college administration, or any other facet of Cal Poly.

And for those who would like to actively become a part of the El Mustang staff, we urge you to join in and help produce a better paper. This is YOUR newspaper... don't just sit back and criticize, participate!

Monty Odetts
Editor

El Mustang to appear weekly

El Mustang, the college newspaper will be published every Friday throughout the summer quarter.

The paper will be a four page tabloid, written by the summer El Mustang staff and printed in the Printing Engineering Department.

There will be nine consecutive issues appearing on the stands on the following dates:

Friday, July 1	4 pages
Friday, July 8	4 pages
Friday, July 15	4 pages
Friday, July 22	4 pages
Friday, July 29	4 pages
Friday, August 5	4 pages
Friday, August 12	4 pages
Friday, August 19	4 pages
Friday, August 26	4 pages

Program committee slates summer events

A number of exciting events have been planned for the summer quarter by the Temporary College Union. The summer Program Committee has made an effort to bring entertainment to the campus that will be enjoyed by the summer students and their families.

There will be a series of Dutch Luncheons which will feature campus and community members who will discuss various topics of general interest. To kick off the program will be Mr. Dan Stubbs of the Math Department speaking on "Is the Faculty Ever Wrong?"

The first luncheon was held in the snack bar during the noon hour on Wednesday, June 29. A highlight of the July 13 luncheon will be a Batik Show featuring demonstrations of this dye and wax technique. "A Summer in Tahiti", will be the topic of a presentation by Dean Chandler. He will relate his experiences and

impressions of his summer trip.

A concert under the stars has also been planned. It will be held on Saturday, July 23 in the Ag-Engl patio. There will also be stomps, dances, and movies of a fine arts nature. Some of the movies that have been ordered are; July 8, Rashomon; July 29, Eva Wants to Sleep; August 12, Finche; August 19, The Member of the Wedding.

A Faculty Art Show has been suggested but as yet there have been no replies. Faculty members interested in supporting the Art Show can do so by contacting Miss Cleo Bauer, the Summer Program advisor.

Andrews appointed

signed into law by Governor Edmund G. Brown. Final action by the Trustees on the separation is expected in the next few weeks.

Dr. Andrews, 46, a native of Southern California, has been a member of the Cal Poly faculty and administration staff since 1960. He became vice president of the campus here in February of this year after having been dean of the college since 1961.

Prior to that time, the San Luis Obispo Campus chief executive was a member of the faculty and served as both instructional materials coordinator and coordinator of special educational programs for the college.

A graduate of University of California at Davis, he earned his MA degree at Cal Poly and his PhD at University of Minnesota.

Vice President Andrews, always active in agricultural education, is a member of the California Agriculture Teachers Association, Alpha Zeta, Phi Delta

Kappa, and Gamma Sigma Delta, the national honor society of agriculture.

Dr. Kramer became vice president of the Kellogg and Voorhis Campuses last November after being a member of the faculty and an administrator at Michigan State University.

Intramurals lack student enthusiasm

The Cal Poly Physical Education Department is attempting to begin an intramural program for the summer. They have only one slight problem? They don't seem to be able to find any students that are interested. The first meeting which took place last Thursday turned out but a handful of students.

Dick Fenske, chairman of the program, has asked all interested students to attend the final organization meeting next Tuesday at 3:30 in Room 218 of the Men's Gym.

Only softball and volleyball are being offered, with tentative dates of Monday and Wednesday afternoons for softball, and Tuesday and Thursday for volleyball.

In order to keep the girls active, the P.E. department is attempting to have one of the volleyball leagues co-ed. The normal team will have three boys and three girls.

As Dr. Mott, head of the department, stated, "At present, we haven't enough students for one softball game, let alone a league."

SKI
In any given skiing holiday of two-week duration, ten percent of the skiing group will report an injury.

Soares makes year-end report; salary increase recommended

In his final official act as ASI president, George Soares will present his year-end president's report to Dr. Lawson next week.

The president's year-end report is a list of recommendations made by the outgoing president to be used as a guide for the president-elect.

One of many proposals made by Soares was a salary increase for the Graduate Manager, Robert Spink. The raise would increase Spink's salary bracket from that of a junior instructor in the fifth class, to that of a fourth class intermediate instructor. In commenting on this proposal, Soares said, "The subject of a raise for the graduate manager has been of concern to SAC for the past few years. Because of the growing responsibilities that we (SAC) have included in this position, I believe it is necessary to raise the salary to a more appropriate level."

Another recommendation that Soares proposed concerned the assistant graduate manager. The job has been on a one year basis, and the recommendation is that it be extended to a full time job. Soares stated, "The 1964-65 SAC established the assistant graduate manager's position on a one year basis. In reviewing this, the 1965-66 SAC again felt it advisable to resume this position on a one year basis. I believe the time has come to add security to this position by placing it on a permanent basis."

In discussing the possibility of having student advisors and assistants to the ASI president, Soares commented, "The job of student body president has become so demanding that it is nearly impossible for one person to handle its many duties. I believe it would be of great aid to the president if he would select a staff of assistants and advisors to work with him in attempting to solve the various matters before the student body."

Other recommendations to be operation between Student As presented call for increased co-

operation between the administration; a carry through of the proposals made to improve the standing of the El Rodeo, the college yearbook; the establish-

ment of an overall student body award; and the holding of monthly news conferences between the student body government and El Mustang.

Summer registration looked upon as hectic, hopeless and frustrating

by Carolyn Wojcik

A total of 1542 students registered last Monday for the first Summer Quarter and again the men outnumbered the women by about three to one. The official breakdown was 1185 men to 357 women.

Seniors led the student body with a total of 452 registered. Next were the juniors with 307, sophomores with 221, freshmen with 192 and graduate students with 32.

But how did registration go? To some (those who had a last

name at the top of the alphabet) it went smoothly. However, for the remaining, classes were closing fast.

Registration was very bleak," according to Milton Mulligan, graduate student in Agriculture Science. "I think it would have been better if they had held back a certain number of cards for those who registered at the later times.

According to Marilyn Ward, Sophomore Journalism major, it was a helpless feeling to walk out of registration with so few units. She said, "I would have felt better if I could have pulled cards even if I didn't need them, but there was nothing left to pull at 11:30 when I registered."

"My jobs were messed up, but I got the lectures I wanted because I registered fairly early," said Tim Leonard, Agriculture Business major. "In my department a lot of classes were offered around 10 or 11:00 so we had to take classes we really didn't want."

Tim Benjamin, Printing Major, said, "For me everything went great, but for others, they didn't have a chance after 10:30. Since so few sections were offered, it wasn't fair to about half of those who registered. Also, the schedule for registration should have been programmed as a regular quarter and not simply alphabetically."

Modoc II defeated in volleyball games

The 1968 Intramural volleyball championship was captured by Modoc I recently. Modoc II played a rough game, but were finally defeated after two sets of three games.

Modoc I, down one game before the championship, won the first set which kept them in the running. The winning of the first and third game during the second set earned them the volleyball victory.
