SAN LUIS OBISPO, CALIFORNIA

FRIDAY, JULY 15, 1966

Carl R. Nelson

## Nelson chosen outstanding teacher by American Dairy Science Assoc.

Carl R. Nelson, a veteran member of the faculty, received the American Dairy Science Association Teaching Award for Dairy Production during a banquet held in conjunction with the 61st annual meeting of ADSA, in Eugene, Ore., June 28.

Nelson, 57, received the \$1,000 check and plaque which symbolize the coveted honor, for having demonstrated outstanding ability as an undergraduate teacher of dairy science.

The award is the highest honor for teaching excellence given by the 3,300-member Dairy Science Association.

Selection for the award is made every other year by the National Dairy Products Corporation and is made and given by a committee of ASDA members. To be eligible for the honor an individual must be an active member of the association at the time of his nomination and must have completed 10 years in that capacity.

Nelson joined the Dairy Department in 1949 after having been an instructor at Kansas State University and a county extension agent in Kansas for three years.

Since joining the Cal Poly faculty, Nelson has taught courses in both husbandry and production.

Nelson has written several outlines, record books, and other articles and developed a number of filmstrips, models, and other visual aids.

Most significant of these visual aids have been picture-groups of cattle he uses in teaching both dairy cattle judging and classification. He also uses preserved models of animal digestive systems with which he illustrates his various feeding and nutrition courses.

He has also made many drawings and illustrations, which have been published and are being used as training aids in teaching dairy cattle judges throughout the Western United States.

Nelson received his B.S. degree from Kansas State University in 1941, and his M.S. from University of Missouri in 1958. He belongs to both ADHA and the California Agriculture Teachers Association.

He was president of CATC's Region-at-Large during 1964-65

and, during 1963-64, was secretary-treasurer of the same group. He also was a member of ADHA's Student Affiliate Committee, during 1964-65.

Nelson's principle nominator for the national teaching award, Dr. Richard H. Johnson, an alumnus of the Dairy Department, calls his nomination of the Cal Poly dairy instructor "one of the most enjoyable and satisfying things I've ever done."

Dr. Johnson, a former student of Nelson said perhaps the most important reason for making the nomination doesn't touch directly on his teaching ability.

But a good teacher, in my book, must be first of all a humanitarian, and Mr. Nelson certainly typifies the best in humanity and humanitarianism to me," Dr. Johnson concluded.

## Three students chosen to win Wrasse Scholarships

Announcement of award of \$500 Leopold K. Wrasse Scholarships to three additional young men earlier this week brought the number of such awards to students planning to enroll for study at California State Polytechnic College's campus, here, this fall to 80.

One of the three, Stephen De Brum of Hanford, will be a continuing student, while the other two, Donald Silveel of Petaluma and Dan Wiens of Madera, will be starting their studies at Cal Poly with the Fall quarter.

The scholarships, primarily provided for students of Cal Poly's Agriculture Division, come from income of a trust fund established in the will of the late Caruthers-area farmer, Leopold K. Wrasse.

Those selected to receive the awards must have qualified on the basis of character, need for financial assistance, interest in the major field of agricultural study, and active participation in community and school life.

Each recipient must have also earned a sum equal to half of the amount of the scholarship during the year immediately prior to its receipt and students who attended Caruthers Union High School, Fresno County Schools, Cal Poly, and other California schools, receive priority in that order.

Coupled with the \$38,500 in Wrasse Scholarships announced by the college earlier this month, the new awards bring the total value of scholarships awarded to students for use at Cal Poly next year to nearly \$45,000.

Additional scholarships expected to be announced within the next few days, should bring the final total to nearly \$60,000.

Two of those named in this week's release from the college are officers of the California Association of Future Farmers of America.

Silveel, who graduated from Petaluma High School earlier this month, was elected vice president of the FFA association during its annual conference, which took place on the Cal Poly campus, here, last month. He plans to major in dairy husbandry while enrolled at the college.

DeBrum, elected sentinel of the state association of FFA during the conference last month, completed his freshman year as a dairy manufacturing husbandry major at Cal Poly earlier this month and is expected to begin his sophomore year in September. He graduated from Hanford Union High School in June, 1965.

Wiens, who graduated from Madera Union High School earlier this month, has indicated he will major in animal-husbandry in his studies at the college.

## Lindberg, Eley win scholarships

Two students have received \$100 scholarships from the American Welding Society's Santa Clara Chapter.

Stephen R. Eley, son of Mr. and Mrs. Robert A. Eley, San Gabriel, a sophomore metallurgical engineering major received one scholarship. Charles F. Lindberg, son of Mr. and Mrs. O.F. Lindberg, Lindsay, a sophomore air conditioning and refrigeration engineering major received the other.

To be eligible for the scholarship, Eley and Lindberg have completed at least one year in their majors, with a concentration in welding courses, and have shown exceptional interest and aptitude in their fields.

Announcement of their awards brings the amount of scholarships granted at Cal Poly to nearly \$40,000.

## Newsman to assist graduate manager

Wayne Shaw

Appointment of Wayne F. Shaw of Brookings, S.D., as assistant graduate manager for the Associated Students, Inc., at Cal Poly, was announced by the college Wednesday, July 6.

Shaw, 30, has been director of sports information at South Dakota State University in Brookings for the past three years. Before that he worked for 12 years in various editorial capacities for daily newspapers in both Iowa and Idaho.

According to the announcement, Shaw will assist ANI Graduate Manager Robert Spink with the management of the Cal Poly student body's business affairs. His specific responsibility will be the promotion of income producing activities and events and operation of the sports information program.

He replaces Douglas A. Gibson, a former Wyoming newsman, who resigned from the position April 1 to enter the armed forces.

Shaw, a native of Audubon, N.J., attended Parsons (Iowa) College and University of Iowa, where he received his B.S. degree in Journalism.

(Continued on page 4)

## Library open later by student request

The reserve room of the library will be open an additional hour Monday through Thursday nights.

According to Harry Strauss, college librarian, remaining open until 10 p.m. rather than closing at 9 p.m. is the result of a number of student requests.

The rest of the library will be closed at the regular time. Students using the reserve room may enter the library from the old wing.

## Activities for July include luncheon, dance and concert

The activity schedule for the month of July offers a variety of events for summer students.

The associated students through the Summer Program Committee will continue to bring planned activities through the duration of the summer quarter. The schedule for this month is as follows:

- Fri 15 Stamp'n Dance 9 p.m.-midnight Snack Bar
- Wed 20 Dutch Luncheon Noon Snack Bar
- Sat 23 Concert Under The Stars 8 p.m. Ag-Engl Patio
- Sat 23 1st Summer session ends
- Mon 25 2nd Summer session begins
- Wed 27 Dutch Luncheon Noon Snack Bar
- Fri 29 Movie 8 p.m. Little Theatre

## Correspondent visits Crater Lake area

(Editor's note: Judy Pigg is El Mustang's correspondent on the inquiry "66" tour of the United States. Today, Judy reports to us from the Crater Lake area.)

We got showers at last after six days! This was one of the activities anticipated most by the inquiry '66 participants.

We first encountered bad weather in the Rain Forest but rain here only increased the forest's beauty. Mt. Rainier was completely invisible, because of rain and low clouds. Now for a run

down on our week's activities:

**SUNDAY, JUNE 25**—We drove around the rim of Crater Lake stopping occasionally for a different view. Crater Lake was upper part of Mt. Mazama, the 12,000 foot volcano that formed the surrounding area. The lake itself is only 6,000 ft. high and presumably Mt. Mazama fell into its own crater leaving the lake.

We took a hike down to the lake of pure blue and found the water temperature not as cold as expected. Geologists attribute

the lake's pure color to its depth and temperature. The depth is 1,332 ft. and the average temperature is 40 degrees.

**MONDAY, JUNE 27**—Our first stop today was in Eugene at the University of Oregon. It is a large school with old and new brick buildings. Some of the buildings were covered with ivy and greenery adding a touch of tradition and atmosphere to the school.

The day's agenda also included a tour through the Weyerhaeuser Lumber Co. in Springfield, an adjoining city to Eugene. We went through a saw mill, paper mill, and plywood mill. We camped near MacKenzie Bridge heading for Mt. Hood.

**TUESDAY, JUNE 28**—In the Mt. Hood area we miles and miles of lumber destruction. It was very depressing to see such beautiful trees cut down. We drove along the Columbia River stopping at

# Overseas program shares knowledge, students, faculty

"The exchange of ideas, technical knowledge, and students and faculty through a systematic program may be the answer to a world living in fear and hoping for peace." Overseas Program Director Ivo Vanoncini, thus expressed the importance of international education and began to explain Cal Poly's role in that field.

Our Cal Poly is one of 50 colleges and universities helping the

emerging, newly independent countries of Africa with technical assistance and education programs. American colleges are evaluated and then asked to participate in this education project by the U.S. government through the Agency of International Development (AID).

Vanoncini further explained, "At the Dar es Salaam Institute in Tanzania our program is to develop engineering technicians.

These students, upon graduation, will be employed as supervisors and advisors to the trades of the country. Those showing advanced ability will continue their academic learning at higher institutions. The training at this institute provides an academic background as well as job orientation. Training technicians is more important than the training of engineers in most underdeveloped countries at this time.

"The feeling of the Cal Poly staff members towards this program is that it is exciting, rewarding, and at times frustrating. There is a great deal to do in preparing these students for the part they must play in the development of their country."

Ray Allen, refrigeration consultant to the team at Dar es Salaam, may run into difficulties not usually encountered by educators. During a coming 60-day stay in Tanzania he is to prepare and select equipment for a technical high school in Zanzibar.

The hitch is this: although Zanzibar, an island 40 miles from Tanzania, is officially part of Tanzania, it is under Communist control from the U.S.S.R., Red China, and East Germany. No visitors are allowed. Allen is scheduled to go there for two days.

## Five horticulture awards assist returning students

Nine hundred dollars in scholarship funds have been awarded to five students of Cal Poly's Ornamental Horticulture Department for use during the 1966-67 academic year.

Largest of the awards were two \$200 Wellington Davey Scholarships won by James B. Carstens of Mt. Vernon, Wash., and Anne M. Voorhies of Sacramento.

One hundred dollar awards were given by the Central Chapter of the California Association

of Nurserymen which went to Albert J. Hertelero of Oakland; the Santa Barbara County Horticulture Society Scholarship, won by Steven J. Galliano of Ventura; and the Harry E. Rosedale Memorial Award won by Garth E. Veerkamp of Placerville.

Miss Voorhies, begins her third year of study at Cal Poly in the fall. She graduated from C. K. McClatchy High School in 1964.

## Artist displays Batik style

Linnasa Deyo, the young Santa Barbara artist, was featured speaker at the Dutch Luncheon Wednesday. She demonstrated the dye and wax technique popularly called "Batik."

These Batik hangings are works of the traditional Javan vat dye method. Her designs can be used for everything from wall hangings to custom fashions.

Mrs. Deyo's hangings are winks of nature that have been captured and pressed upon cloth. Some of the brilliant colors include pinks, oranges, blues and greens.

She received her A.B. from the University of Puget Sound. Mrs. Deyo has also been a children's librarian and a television story teller.

Her works are now on display in the library. Some of her more famous hangings on exhibit are "Green Boy" and "Flower in a World."

Mrs. Wright, reference librarian, stated, "These are unusual, original Batik hangings which are of great value." She went on to say that, "The library is taking

special care of them."

Mrs. Deyo has had her works exhibited in Washington, New York and Santa Barbara galleries. The "L.A. Times Home Magazine" has published her works both in '64 and '65. "Everlasting Tree" and "Fresh and Ready Picked" also have been published in the "Craftsman of the Southwest."

## Lack of interest

### sinks intramurals

Due to the lack of interest on the part of the students attending the summer quarter, the scheduled intramural program has been cancelled. In its place will be an informal and open volleyball game on Tuesday and Thursday afternoons.

## Inquiry . . .

# As I See It

traction here was the Fish ladder. This was constructed to aid the salmon in going up stream from the ocean to spawn. We camped parallel to the Columbia River at Eagle Creek campground.

**WEDNESDAY, JUNE 29**—We drove along the Columbia on our way to Portland today. We stopped at Multnomah Falls, the second highest falls in the United States — 626 ft. high. In Portland we spent several hours at the Oregon Museum of Science and Industry. We also spent a short time at Lloyd's Center, the largest shopping center in the world. We camped at Saddle Mountain State Park.

**THURSDAY, JUNE 30**—Fort Clatsop was our first stop this morning. It was the winter fort of the famous Lewis & Clark expedition in 1805-1806 as they ended their exploration journey into the West. A replica of the original fort was built in 1955. The fort was small but very interesting. The rooms were furnished just as if they had been left that way.

Today we visited Astoria which included a trip through the Bumble Bee cannery, a climb to the top of Astoria Column and a ferry ride across the Columbia into Washington.

Astoria Column was built in 1925 as a memorial to the Lewis and Clark Expedition. It overlooks the mouth of the Columbia. We camped at Lake Quinalt on the edge of Olympic National Park in the Rain Forest and encountered rain here for the first time.

**FRIDAY JULY 1**—Because of the rain the urge to move on

### El Rodeo Revival Needed

There are many traditions on campus, good ones and bad ones. Unfortunately, the college publication El Rodeo falls into the category of a bad tradition.

By bad, I don't mean to say that we should not have a pictorial record of the year's events, but I feel that we need a dynamic change over the ordinary, traditional, and patented type of El Rodeo.

Over 7000 students attended Cal Poly during the 1965-66 academic year. A grand total of 1500 yearbooks were ordered to supply these students and, even more disappointing, only some 1200 El Rodeo's have been purchased. To me, this is a clear-cut indication of dissatisfaction, or disinterest, or both.

Working with a budget of \$10,580, 1965-66 El Rodeo editor Cliff Gillette put out a yearbook that I feel is undoubtedly the best one that has been published at Cal Poly. Though a definite improvement over the past El Rodeo's, it is still the same, stereotype yearbook that does not draw the attention of the student, the main

struck again. We made a short stop at the Pioneer Visitors Museum in Olympic National Park affording us our only view of the area. We camped at Sequim. Ahead of our schedule.

**SATURDAY, JULY 2**—Today we drove in and around the Tacoma and Seattle area spending some time at Seattle Center, the site of the 1962 World's Fair. From the top of the Space Needle a rather dismal view of the city could be seen through the rain. Mt. Rainier National Park was our stop for the night.

**SUNDAY JULY 3**—This morning we drove as close as we could to Mt. Rainier and were very disappointed when we could not even see it! It was raining again and the low clouds prevented the view of the mountain. So onward we went to Grand Coulee Dam. After dinner we viewed the dam at nightfall through an array of colored lights. It was truly a beautiful site to see the majestic power of the tumbling water accented with different color combinations.

Because of our altered schedule it is difficult to give a day by day run down of what is to come. But our route will take us into Montana and Idaho ending up somewhere near Yellowstone.

target of yearbook sales.

It seems as though some administrators are somewhat apprehensive about giving the El Rodeo a face-lifting. There are basically two steps that can be taken. We can be satisfied that only one-fourth of the student body is interested in the yearbook; or, seemingly an unthinkable step, we can change the yearbook into an appealing publication that the students will really look forward to owning.

Throughout last year the Publications Policy and Procedures Committee discussed campus publications, searching for better and more appealing methods of production. Though the majority of the discussion was centered on El Mustang, one dynamic statement from the committee stated . . . if the sales of El Rodeo continue to fall off, the production of a campus magazine should be considered.

If they consider that the sales of El Rodeo have been around the 1200 mark for the last three years, then I don't suppose the Committee sees this as falling off of sales, as miserable as the sales have been.

I am entirely in favor of coming out with a magazine instead of the standard El Rodeo yearbook. Most of the college magazines I have seen are more appealing, interesting and more acceptable to the students.

But more important, I am in favor of doing away with club pictures in El Rodeo, unless they are totally revamped into interesting and active pictures, not the standard group shots found in the majority of the yearbooks. And, the only way to present clubs in an appealing way is to charge a fee and to employ a professional photographer to take the pictures.

Many persons on this campus were opposed to the charging of clubs for the 1965-66 El Rodeo, feeling that all clubs should be represented. Dr. Dan Lawson, Associate Dean of Activities, presented one of the strongest oppositions to this decision. In my opinion, the run-of-the-mill group shots found in El Rodeo are the most distracting part of the yearbook. It is fact that over half the colleges in the country charge clubs, but so long as there are those who are satisfied with rubber-stamp reproductions of El Rodeo, we can never attain student acceptance or student pride in our yearbook.

Instead of continuing with a tradition of unacceptable El Rodeo's, why not try to establish a tradition of excitement and interest in this campus publication?

Monty Odett  
Editor-in-chief

## Girls! girls! attend stomp

Stomp tonight from 9 to 12 to the sounds of the Thundermugs at the Snack Bar. Admittance is free with the presentation of an A.S.I. card.

"All girls are eagerly encouraged to attend," stated Summer Program Committee Chairman Mike Sullivan. One guest will be admitted with each A.S.I. card

Sullivan commented, "The last dance was quite a success. Everyone seemed to be stomping energetically to the Thundermugs and fully enjoying themselves."

He went on to say, "The low ceiling and compactness of the building gives the feeling of a larger crowd."

## Remer nominated for "athlete of the year"

Mike Remer, NCAA national college division 115-pound wrestling champion has been nominated for consideration as the California Collegiate Athletic Association's "athlete of the year" for 1965-66.

Remer's nomination was announced by Richard Anderson, athletic coordinator for the college, battled back to overcome a knee injury which threatened to end his career early last winter.

He won his weight class title during the NCAA's National College Division Championship Meet, held at Mankato (Minn.) State College early in March, and some two weeks later captured fourth place in his weight class at the NCAA's University Division meet, held at the University of Iowa.

Remer's performances throughout the 1965-66 wrestling season enabled Cal Poly's grapplers to roll up an impressive record topped only by his individual national championship in the College

Division meet and the Mustangs 1966 national College Division team championship, first in the college's history.

In addition, Remer's six points were the first ever recorded in the University Division meet by Cal Poly and his placing in that meet qualified him for inclusion on the 1966 NCAA University Division all-American team, also a first in Cal Poly athletic history.

Cal Poly wrestling coach Vaughan Hitchcock, who has led his grapplers to four consecutive CCAA championships and a 32-1 dual match record in four seasons, praised Remer's accomplishment during 1965-66 as a real triumph of determination.

The 21-year-old senior from Castro Valley suffered what doctors termed a "severe" knee injury in the first minute of his first match of the season, last November. After being refused an additional year of eligibility by the CCAA's governing board, he returned to action knowing that each move on the mat could be his last as a collegian.

## Home economics head retires after 30 years

Final examinations and other end-of-the-year activities earlier this June brought to a close the career of Mrs. Marjory E. Martinson, who retired after more than 30 years as a home economics educator.

Mrs. Martinson asked a year ago to be relieved of her duties as head of the Home Economics Department to devote her full time to teaching. She has been a member of the college faculty since 1936, when she became head of the department.

Her first responsibility was the development of a curriculum and the organization of the department, which accepted its first students in September 1936.

Since then, she has seen it grow from an enrollment of 30 students and faculty of 2 to the point that it now has more than 100 students, registered and a faculty of ten.

Mrs. Martinson is credited with primary guidance of the develop-

## Study haven opens

Looking for a quiet place to study?

Then the place for you is the Cal Poly library. Due to the limited number of students attending Cal Poly during the summer, the library is a cool, quiet and quiet place to study.

During the summer all normal services will be offered including photocopying.

The following library schedule will be in effect: Monday-Thursday 7:45 a.m.-10 p.m.; Friday 7:45 a.m.-5:00 p.m.; Saturday 8:00 a.m.-12:00 p.m.; and Sunday closed.

## Newsman...

Prior to moving to South Dakota, he was reporter for the Sioux City (Iowa) Journal for three years and, before that, was sports editor of the Boone (Iowa) Daily News Republican for six years. His earlier experience as an editor and reporter were for the Twin Falls (Ida.) News-Times; the Ottumwa (Iowa) Daily Courier, and the Sibley (Iowa) Gazette-Tribune.

Since 1960 the new assistant graduate manager has won a number of awards and citations from national organizations and publications, including the Football Writers Association of America (FWAA), the College Sports Information Directors of America (COSIDA), Amateur Wrestling News Magazine, and the American Association of College Baseball Coaches.

Shaw was a past-president of the Iowa Daily Press Sports Writers Association and has been a member of Iowa's All-State Football Committee for six years. He also is a member of both FWAA and COSIDA.
