Dome will house migrant workers

A geodesic dome, designed and built by the third year design class of the architecture department, will serve as an experimental housing unit for migrant workers this summer.

Sanford Hirsch, consultant architect for the State of California Office of Economic Opportunity, visited our campus this week to check on the construction of the housing unit and its applicability to farm labor use. At present, the migrant workers have very inadequate housing.

Low cost plastic housing units are now in production. Challenging present designs, architecture students, headed by Ben Shapiro, their instructor, who has had experience in this work, undertook the project of designing a superior, low cost housing unit made of steel. Hirsch offered criticisms and added a realistic atmosphere for the school design problem.

Class members designed different solutions to the problem. Ugo Flaco, Ralph Taylor, Jack Reinck, Ron Madsen, Henry Steel-smith, and Mort Awe came up with the winning design. Julio

Pernas and Al Dutcher are also working on the project this summer.

The dome is prefabricated in the shop and is easy to transport and erect. Shapiro estimated that it would take about 25 man hours to erect the structure. Each panel is pre-bent for strength, allowing the formation of a roof and walls without supporting structures.

The class is now completing the interior and substituting steel for the initial plywood-base ventilators.

One dome is capable of housing an average family of six to eight people. It has a floor area of 400 square feet and a loft area of 100 square feet. The dome consists of three bedrooms, a living room, a kitchen, and an up stairs loft for sleeping or storage. The kitchen and sanitation facilities are completely portable, becoming effective by simple plug-in.

Butler Manufacturing Co. of Kansas City, and Monsanto Co. of St. Louis helped sponsor the project. Each donated \$1,000 to help defray costs for materials, fabrication, and experimentation.

Migrant Worker Housing Constructed

Bennett Shapiro, design instructor, and Sanford Hirsch, consultant architect for the State of California Office of Economic Opportunity, inspect the geodesic dome, designed by architecture students as an experimental housing unit for migrant workers.

John Healey becomes Acting Department Head

John Healey, a member of the Technical Journalism Department since 1947, was recently appointed to the position of Acting Department Head.

The appointment, following the resignation of former department head Robert McKnight, was effective July 19, and will continue until a permanent department head is named.

learned that McKnight would be leaving.

"At this early date, I have not yet formulated any definite programs, but we will be trying to update the Technical Journalism Department as much as possible," Healey stated.

In his initial years at Poly, before a journalism department was established, Healey was headquartered in the basement of the old Administration Building, instructing classes and working as Athletic Publications Director. The Journalism Department was established in 1950, moving into the present-day facilities in 1960.

Healey has instructed classes in photography and news reporting and has actively participated in the campus publication, El Mustang. Through his efforts, the campus chapter of Sigma Delta Chi, a professional journalistic society, was chartered in 1965. Because of his invaluable assistance with the society, a John Healey Scholarship Award was established last year to be given to outstanding journalism students.

Receiving his Bachelor of Arts degree at San Jose State College in 1941, Healey then earned the

(Continued on page 8)

Advisory committee invites presidential nominations

Procedures to receive and process suggestions for candidates to fill the vacancy created by President Julian A. McPhee's retirement have now been completed by the campus Chancellor's Advisory Committee on the Selection of a President and nominations are being invited, according to George Hasslein, head of the Architecture and Architectural Engineering Department and chairman of the committee.

The various segments of the campus community, including faculty, administration, staff, students, alumni, and other interested persons have been invited to participate by using a data form to forward their nominations. Copies of the form may be obtained at any of the campus General Office locations or from any member of the committee, and candidates may be recommended either by themselves, by groups, or by individuals.

Hasslein said that all names submitted will be reviewed and that additional information may be requested. Candidates who, in the opinion of the committee display potential, will be interviewed. In the meantime, the Chancellor's Office will be submitting candidates considered suitable for the position to the campus committee. Names of candidates suggested by the Chancellor's Office will be reviewed and those which the committee feels suitable will be accorded the same treatment as candidates proposed by local sources.

By way of report, the committee chairman said that some 15 nominations had been received from the Chancellor's Office. One interview has already taken place and another is slated to take place shortly. He reported that one of the committee's primary interests in consideration of candidates is their appropriateness to Cal Poly-type programs and philosophy.

Assigned the responsibility of developing a list of five candi-

dates to be forwarded to Chancellor of the California State Colleges Glenn B. Dumke, the committee expects to continue its work during the summer months. Hasslein said it is evident the magnitude of its assignment dictates that the committee's work will not be completed until well into next academic year. Consideration of an acting president is not part of the committee's assignment.

Foreign students tour horse ranch

The summer program schedule for foreign students is offering a tour of Varian's Arabian Horse Ranch in Arroyo Grande and the Royal Oak's Dairy in Corbet Canyon this coming Saturday, July 23.

Included in Saturday's schedule will be a lunch stop at McCheaney Grove. The Cafeteria will provide box lunches honoring meal tickets or a lunch may be purchased for \$1.10. Lunch orders must be placed two days ahead and picked up by 8:30 a.m. on Saturday.

Since all of the tours will include lunch stops, it would be advisable to plan on purchasing a lunch or to bring one along.

The foreign student office will continue to offer a variety of trips throughout the summer. Among

the excursions planned will be tours of the Macy Ranch and Phelan Packing Co. & General Box Distributors, July 30; the Hellmann Grain Farm and Paccetti Winery, August 6; the Great Almond Ranch and Cal Al Processing Plant, August 13; the Koyama Farms, which will include a luncheon provided by Mr. Koyama, August 20.

A highlight of the program will be a tour of Hearst Castle on August 27. The admission charge will be \$2.00. This particular trip will leave San Luis at 9:00 a.m. and will include a lunch stop at San Simeon County Park.

Transportation for the summer tour program will be provided by volunteers from local clubs and organizations in the San Luis area.

John Healey

In appointing Healey to the position, Vice-President Dale W. Andrews wrote, "On the recommendation of Dr. Carl C. Cummins, dean of applied arts, I am appointing you to the position of Acting Head of the Journalism Department.

Your long experience as a member of the Technical Journalism Department and able assistance in helping with the many administrative duties of that department have qualified you to take over full responsibilities as Acting Department Head."

Healey served briefly as Acting Department Head prior to the appointment of McKnight in 1965, and unofficially assumed those duties this summer when it was

McPhee doing well

President Julian A. McPhee, who is reportedly "doing very well" in his recuperation from major abdominal surgery performed June 22 at Monte Vista Hospital, journeyed to San Francisco Saturday with members of the family.

Since leaving the hospital July 5, President McPhee has improved steadily. According to those in immediate contact with the retired president, he has been up and around, taken several outings with the family, and "looks much better."

Activities office suggests revisions of campus organization procedures

A two part study concerning both on and off-campus activities has been completed by the activities office.

Their findings and recommendations have been submitted to the Student Affairs Council.

The first objective of the study was to undertake a cross-sectional review of membership requirements with emphasis on the associate member in campus organizations.

The second objective was focused upon the need for a statement concerning participation in off-campus activities by recognized groups of the Associated Students Incorporated.

The study resulted in the following proposed amendment to Code 2a and will be processed by S.A.C. next Fall.

Membership
1. Active membership may include only registered students in-

cluding limited students, regular students, graduate students and the faculty advisor if the club so desires.

2. Only Active members may participate in meetings, be elected to office, vote, debate, or represent the organization.

3. Associate members may attend whatever activities the organization may designate, but they may not vote, debate, hold office, or represent the organization.

4. In all cases of interpreting membership sections of student organization by-laws, it shall be made paramount that student organizations are chartered by the college to enhance the educational objectives of the institution. Individuals and/or groups outside the college shall not be permitted access to influence student organizational affairs through any membership clause in the by-laws of a chartered student organization.

The student Activity Guide will also also be affected. Paragraph 3.9 will include the following in the 1966-67 edition.

Off-campus Activities

3.91 All Associated Students, Incorporated organizations shall, in their off-campus activities, refrain from action that might be considered unlawful, un-American or detrimental to the image of Cal Poly.

Business Department plans conferences

The California Field Ironworkers Apprenticeship Training Program will be held on campus Aug. 20-28. A craft union of the AFL-CIO, the California Field Ironworkers has a membership of approximately 10,000.

This program, an industrial relations institute, will present all the latest developments in the fields of concrete, reinforcement, rigging, and new building materials.

Attending the institute will be journeymen ironworkers who teach apprentices that are striving for journeymen status in the union.

This program will be hosted by the Business Administration Department, with members of the Society for the Advancement of Management (S.A.M.) monitoring during registration and doing general host and hostess work during the three-day institute.

Owen L. Servatius, head of the Business Administration Department,

will lecture on human relations. Top men from various fields of industry will also address the group on innovations in ironwork.

An invitation has been extended to all interested students who would like to attend the lectures during the workshop. According to Servatius, this conference has significance for majors in Architecture, Welding and Metallurgy, and Business Administration.

This workshop concerned with industrial relations, is one of five areas of concentration—management, marketing, accounting, finance and property management, and industrial relations.

Representing the field of accounting will be a conference for the Society of California Accountants slated for Aug. 29-31. John Trammell, an instructor in Economics, will act as co-ordinator for this conference which will also be hosted by the Business Administration Department.

Hemophiliac needs blood

Willard L. Muples, Jr. a student at Cal Poly is the victim of hemophilia, an incurable blood disease. The only treatment is repeated transfusions of anti-hemophilic plasma. The average hemophiliac uses a minimum of 50 units of plasma per year. This plasma is obtained through the Tri-Counties Blood Bank which allows a unit of plasma for each pint of blood donated. At the present time Willard is indebted to the Blood Bank for 131 units of plasma.

Willard is a chemistry major and will graduate in December at the close of the Fall Quarter. Because of his affliction he misses classes quite often. Although a hemophiliac must be careful of cuts, scratches, etc., most of his trouble is hemorrhaging into the joints which is very painful as well as crippling. It can lead to permanent crippling. A hemophiliac is also plagued with internal bleeding from time to time.

The Tri-Counties Blood Bank Mobile Unit will be in San Luis Obispo Wednesday July 27 at the Monday Club on Monterey St. from 7 to 8 P.M. Anyone wishing to help this young man may do so by donating a pint of blood in his behalf.

Willard is the son of LCDR and Mrs. Willard L. Muples, Sr. of 1449 Roselle Dr. Santa Maria, Calif.

Healey . . .

Master of Science Degree at the University of California at Los Angeles in 1964.

Prior to the Cal Poly Journalism Department, Healey worked as a reporter for the San Jose News and the Sacramento Union; did public relations work at McClellan Field, Sacramento; and was Valley Editor for the Modesto Rev.

Chartered clubs increase numbers

As of July 1, 1966, there were 129 chartered organizations on campus. The status of the organizations are as follows: chartered-121; conditional- seven; inactive-one; probationary- none.

The conditional clubs are as follows: residence halls, El Dorado, Palomar, Shasta, Sjerra; Jeep Club; Dietetics; Class of 1968; and Cultural Society of India.

The American Society of Tool and Manufacturing Engineers is inactive this year but plans to be active in 1966-67.

New clubs receiving charters include: American Chemical Society, American Society of Agricultural Engineers, Cal Poly Drill Team Club, Electronics Engineering Club, Jesperson Residence Hall, Pakistan Students Association, PALS (affiliate Association of Childhood Education International), People To People Club, Phi Upsilon Omicron, Society for Advancement of Management.

The following clubs have been dropped: International Relations Club, Business Club (Replaced by the Society for Advancement of Management), Hawson House Club, Judges House Club, Mustang Flying Association, Home Economics Honor Society (Replaced by Phi Upsilon Omicron), Bowling Club, Green and Gold Club, Humanist Club.

Workshops slated for visiting groups

A busy schedule of conferences, short courses, and workshops for off-campus groups is being planned for the remainder of July and for August.

Under the direction of George Beattie, co-ordinator of special will host visiting groups. The schedule for the remainder of the Summer Quarter is as follows:

- July 24-July 27 Farm Brokers Short Course
- July 31-August 18 Los Angeles Herald Examiner Journalism Workshop
- August 7-August 20 Women's Physical Education Workshop
- August 14-August 26 Soil Conservation Service Short Course
- August 28-August 31 California Society of Accountants Workshop

Children's books exhibited at library

The 15th Annual Books on Exhibit are on display in the Curriculum Library.

This book exhibit is a display of children's books published throughout the year. It is made available to everyone, but it is especially helpful to visiting teachers, here for the summer, taking refresher courses. It is hoped that these teachers will find it helpful in ordering books for their libraries.

"This is a good selection of children's books published throughout the year," stated Glenn Whaley, reference librarian in the Curriculum Library. He also stated, "Cal Poly has had this exhibit many times in the past."

The divisions of books on display represent two major age groups, which include the elementary grades, ranging from kindergarten through sixth grade, and the junior high, ranging from seventh to ninth grade.

The exhibit will be on display until August 12.

The National Book Exhibiting Service makes these outstanding new library books of the year available to schools systems. The top 50-65 juvenile and trade publishers submit these books for

the exhibit. The collection is both representative and complete.

Books on Exhibit is sponsored by Books on Exhibit Incorporated of New York. They operate under the state and county education departments, or libraries. This service is available in all 50 states.

July activities set

The scheduled activities for the week of July 25-29 are slated as the weekly Dutch Luncheon, Wednesday at noon, and a movie on Friday evening.

Monday is the beginning of the second session. Wednesday at the Dutch Luncheon James Webster will speak on "What's News in Surveying?" The luncheon will be held in the Snack Bar.

Friday, the second movie of the summer will be shown in the Little Theater. It is a Polish film entitled "Eve Wants to Sleep." It will begin at 8 P.M.

The New York Post commented in a critique, "In Eve Wants to Sleep, the Polish Film reaches its most surprising development. . . This is a satire, laughing boldly at officialdom, particularly the police, and having almost as much fun at the expense of their opposite numbers, the criminals."

Tour encounters Yellowstone bears

Inquiry '66 correspondent, Judy Pigg, recently lost her reporting job and most of her 70 day United States tour in exchange for a new last name.

Miss Pigg was unexpectedly intercepted at Grand Teton National Park in Coler Bay, Wyo. by Henry (Hank) Behrendt, architectural engineering major. Behrendt, 22, "popped the question" and the couple left immediately for Las Vegas, Nev.

While El Mustang may have lost a reporter, Miss Pigg, now Mrs. Behrendt, has gained a husband. And a story for future grandchildren; How Grandpa Hooked Me After I Traveled 3,845 miles.

The new reporter for Inquiry '66, Dave Bush, reported the progress of the trip Friday, July 15. The touring group was situated in Junction, Utah, about 50 miles from Bryce.

Bush reported that they were one day ahead of schedule—no messages—everyone well. They were planning to stay in Boyce that evening.

Bush explained they had a small run-in with the Yellowstone bears. The group lost some utensils—plastic bowls being the

favorite item of the bears. However, better the bowls than us, he said.

The high point of the Yellowstone tour was a visit with Drs. Noble and Thurmond at the University of Wyoming Research Station. The students were entertained with a description of the research being carried out by the two Cal Poly faculty members.

Then the group went on to Butte and Big Hole Battlefield National Monument in southwestern Montana. They enjoyed the craters of Moon National Monument in central Idaho. Bush commented that the group enjoyed the trip along "Grand Canyon" of the Yellowstone, searching for wildlife and birdlife along the river.

At the Tetons the group stayed over for one day. Six of us went on a 14-mile hike into the hills, while another group went boating on Jenny Lake. They went swimming in lieu of taking showers.

In Jackson we took a ski-ride to Snow Mountain, which overlooks the Teton Range and Jackson Hole. "The group really enjoyed the ride," stated Bush.

When we arrived in Salt Lake City there was a tour of Temple

Square. Bush remarked that the resident Mormons volunteered to be guides on this tour. The travelers stayed, enjoyed a Chinese dinner, and listened to the Tabernacle Choir rehearsal. It was as exciting as a real performance.

The group traveled about 250 miles on Friday, July 15. Bush stated, "We hope to use the extra day on the Eastern Seaboard."

Mexican sounds under the stars

Want some excitement in your life? Need something to do this Saturday evening? What? You say you don't have too much money! Did you know there is a Concert Under the Stars tomorrow evening in the Ag-Eng patio?

That's right, tomorrow evening the Concert Under the Stars can be seen. The Mariachi Tropical Band will be playing from 8 until 10 p.m. The admission is free and the public is invited.

A mariachi band specializes in loud brassy sounds from south of the border. The Mariachi Tropical is from Oxnard.

The band consists of a mighty six members, and including three guitars, one trumpet, one clarinet and one violin. The leader is Jesus Rangel.

There will be no chairs, so bring your blankets! Mike Sullivan, summer program committee chairman stated, "They play real hot, wild music, and it's good." He urges everyone to attend.

Males and females reside compatibly

Twenty-one girls are presently living with 130 males on campus. Actually, things aren't so risque as they seem, because the girls are quite separated from the men. The first floor of Muir Hall houses both men and women summer students. The women occupy the north wing, and the men, the south wing. Male students also live on the second and third floors of the brick dorm.

One-woman track team aims towards Olympics

Chris Iverson, a 22-year old, 5 ft. 7 in. physical education graduate from Salinas, is known as Cal Poly's one-woman track team. She graduated from Poly in 1965 and has spent the past year as a graduate student working for her credential as an assistant physical education instructor.

On June 30, July 1-2, Miss Iverson competed in the National AAUW Championships at Frederick, Maryland. She ran in the 440, capturing third place with a time of 55.7, her best mark. Through efforts of people in the area and radio station KVEC, \$338 was raised to send her to the Maryland championships.

Miss Iverson has been running for three years, last year placing sixth in the 100 and fourth in the

200 yard dashes at the Women's National AAUW Championships at Columbus, Ohio. She was California Relays champion in the 100 yard dash. This year she finished runner-up in the state AAUW Championships for Women in the 220 and 440 yard dashes. Her time for the 220 was 24.1, fourth fastest in the United States; 10.8 in the 100; and 56.2 for the 440, third fastest in the United States and fifth fastest in the world.

According to track coach Walt Williamson, the level of women's track in our country, and internationally, has improved fantastically in the last four or five years.

Miss Iverson plans to compete on the U.S.A. track team in Jamaica during the August meet, to continue running, and aim for the Olympic Games to be held in Mexico in 1968. She expressed thanks to the people of Cal Poly and especially to her coach Walt Williamson, without whose help she couldn't have succeeded.

Volleyball tournament scheduled next week

Chairman of the summer intramural program, Dick Fenske, announced that a three-man volleyball tournament will be held next Tuesday at 8 p.m.

Sign-ups for the tournament will be held just prior to the beginning of the tournament. Depending on the number of entries the tournament could be either single or double elimination.

Tentatively being planned for the future also are a badminton and handball tournaments. The badminton tournament is scheduled for late August due to the fact that the gym will be occupied during the first two weeks by an athletic workshop for all graduate physical education instructors and their families.

Students live it up in staff dining hall

About 150 Poly students are enjoying a change from the mass feeding operation of the cafeteria by eating in the staff dining room.

This is the first summer that the cafeteria has remained open. Manager Jack Bertram decided that it would be more convenient to use the staff room.
