CALIFORNIA STATE POLYTECHNIC COLLEGE ★

VOL. XXVIII, NO. 50

SAN LUIS OBISPO, CALIFORNIA

FRIDAY, JULY 29, 1966

## Hartman named outstanding senior with 3.71 GPA

Margaret J. Hartman, China Lake, has been named the outstanding graduating senior in the Applied Sciences Division.

The honor places Miss Hartman, who received her degree last month at the top of the nearly 1,200 students enrolled in the division.

A Biological Sciences major, Miss Hartman compiled a 3.71 grade point average. She is the daughter of Mr. and Mrs. Herbert J. Hartman of China Lake.

Selection for the honor by Dean of Applied Sciences Clyde P. Fisher and the heads of the five departments which make up the division is based on grades achieved during a minimum of 50 quarter hours of course work in applied sciences courses.

Runners-up for the honor were Carol E. Plopper of Burbank and David C. Huffman of Baywood Park.

Miss Plopper, also a Biological Sciences major, earned a 3.66 grade average. She is the daughter of Mr. and Mrs. Carl E. Plopper of Burbank.

A mathematics major, Huffman had a 3.65 average. He is the son of Mr. and Mrs. W. C. Huffman of Baywood Park.

## New infirmary physician hired

"The finest thing that has happened to us," exclaimed Dr. Billy Mounts, Head of the Health Center, "He was speaking about Dr. Lloyd A. Hall's appointment to staff physician at Cal Poly. He described Dr. Hall as a hard worker, an intellect, and one who loves medicine and working with young adults."

Dr. Hall attended Stanford and majored in psychology in pre-medicine. He received his A.B. degree in 1947 and his M.D. in 1952 from the Stanford School of Medicine.

Dr. Hall had his residency training at Monterey County Hospital in Salinas. He then became a general practitioner at Fort Bragg for seven years, and worked at the Fresno State College Student Health Center from 1960 until now.

Dr. Hall is a member of Phi Beta Kappa, Alpha Omega Alpha, American Academy of General Practitioners, and the American Association for the Advancement of Science.

## Flower facilities to be transplanted

Plans are now in progress to move the Ornamental Horticulture Department facilities from their present site to above the beef unit.

Scheduled tentatively for next summer, the move is necessitated by the construction of the new residence halls. Expansion of the greenhouse facilities to about twice their present size is also under consideration.

During the recent California Agriculture Teachers Association meetings, the Ornamental Horticulture department offered three areas of instruction: beginning horticulture, advanced horticulture and floral designs.

## Librarian Dorothy Wright retires following twenty years of service

Mrs. Dorothy S. Wright, head of reference services leaves the college Sept. 1 after 20 years to become librarian of Cuesta College in San Luis Obispo.

Mrs. Wright joined the faculty in the fall of 1946, when the library occupied a half-dozen classrooms on the second floor of the old Administration building. Its collection totaled 9,413 volumes.

When the Spanish-style Walter F. Dexter Memorial Library was completed in 1949, she planned the move of more than 17,000 books and tons of magazines in such minute detail it was accomplished with a speed and low cost somewhat of a record in library circles. The library was able to open its doors on Sept. 12, 1949 in time to accommodate "the greatest enrolment in Cal Poly history: 2,836."

The Telegram-Tribune reported on that day:

"Mrs. Dorothy Wright, assistant-librarian, already has added color to the attractive foyer of the library with a display of scores of new books in a large, built-in display case."

Mrs. Wright's ability to focus attention on books, to open intellectual doors, to bring books and people together, has always been one of her special skills. Her high standards and selectivity contributed to the quality of the book collection, now close to 170,000 volumes, and to the 1600 periodical titles.

A background in liberal arts, with a degree in philosophy and English from Occidental College, preceded her training in librarianship at the University of California at Berkeley.

Her interests are as wide as the world of books with which she has been encompassed, ranging from community affairs to world affairs, from poverty to politics;

## Nine scholarships given to engineering students

Nine young men who expect to study engineering this fall, have been named to receive scholarships.

They are Jerry W. Tucker, West Covina; Cameron D. Gorton, Oakland; Wade A. Horwood, El Cajon; Russell H. Jones, San Francisco; Kenneth E. Nuss, San Luis Obispo, a native of Fresno; David L. Schaar, Belmont; Ray A. Andrews, Santa Ynez; Ronnie W. Fiedler, Shell Beach; and Jack Waite, Pleasant Hill.

Cal Poly's Scholarship Committee selects the recipients on the basis of outstanding academic achievement, good citizenship, and demonstrated financial need.

This group of awards brings the total scholarship aids to nearly \$60,000. Additional scholarships, yet to be announced, will push the final total for grants from the college to over \$65,000.

Andrews will receive the \$100 Solar Company Junior Scholarship Award. A graduate of Santa Ynez Union High School, he will begin his third year as a mechanical engineer major in September.

Fiedler won the \$500 Solar Company Senior Scholarship Award. A 1963 graduate of Arroyo Grande Union High School, he will begin his final year of study for degrees in both industrial engineering and mathematics in September.

Gorton will receive one of the two \$150 Sutherland Hutton Metallurgy Scholarships, made possible by the Golden Gate Chapter of the American Society for Metals. A 1962 graduate of Oakland High School, he will be a junior when he returns to his studies in September for a degree in metallurgical engineering.

Horwood won the second \$150 Sutherland Hutton Metallurgy Scholarship. A 1966 graduate of El Cajon High School, he will begin studies for a degree in metallurgical engineering in the fall.

Jones will receive the \$250 American Welding Society Scholarship, made possible by the society's San Diego Section. A 1962 graduate of Lincoln High School, San Francisco, he will be a senior majoring in metallurgical engineering when he resumes his studies in September.

Nuss won the \$450 Gordon G. Dunn Scholarship. A 1969 graduate of Roosevelt High School, Fresno, he will be a senior when

(Continued on page 3)

## Evaluation office changes location

Students now looking for the evaluations office will have to go around the corner from the records office. Evaluation has moved into Adm. 217 just up the hall from the placement office.

The reasons for the move according to Donald Coats, admissions officer are the new requirements of selective service, the new GI Bill and an increased load in the records office.

Transfer students can find out which courses they have taken will count for credit at Cal Poly by visiting the evaluations office. There a student may find out if he has met all the requirements for graduation.

## Leach to participate in World's Congress

Richard I. Leach, poultry department head, is one of 24 poultry scientists from throughout the United States who have been

Leach will present the paper during the 13th World Poultry Congress, scheduled for August 15-21.

His paper will be presented before a session of the economics and marketing section of the international gathering, planned for the morning of August 17. Titled "College Poultry Education - A Different and Proven Approach," it is some 3,000 words long and is also scheduled for publication in the official proceedings of the congress.

Leach is expected to describe in some detail the structure of his department's curriculum, one of the few in the United States that leads to a college degree in poultry husbandry or related fields.

Also scheduled for discussion in the Cal Poly educator's remarks before the WPC are uses of the "upside down" curriculum, the senior "thesis," and the "learn by doing" project system.

(Continued on page 4)

Richard I. Leach

asked to present papers before a world-wide gathering being planned for Kiev, Russia, next month.

## Journalism Department produces new pamphlet

A multi-color, eight page pamphlet is now available on the curriculum of the Journalism Department, according to Vincent Gates, Journalism Instructor.

The pamphlet, produced jointly by Gates and Bob Reynolds, is the first in six years and the second produced by the Journalism Department.

The purpose of the pamphlet is for distribution to high school and junior college students interested in pursuing journalism in college. John Healey, acting department head is in charge of the distribution of the pamphlets.

Gates, spearhead of the operation, said that the pamphlet was, "Overdue as a recruiting device to interest students in Cal Poly's Journalism Department." The reason for the long delay in the production of the pamphlet was

expressed as a, "Lack of continuity of leadership on the department head level to get the program off the ground."

Six years ago, the name of the department was changed from Agriculture Journalism to Technical Journalism and four curriculum concentrations were developed. Today, the Journalism department offers Business Industrial Journalism, Community Journalism, Home Economics Journalism and Agriculture Journalism.

Gates hopes the pamphlet will encourage interested students to look into the journalism program offered at Cal Poly.

Gates stated, "The classes in the Journalism Department are open to the whole student body, not just students enrolled in the department."

## Old paintings exhibited

Students are invited to attend an unusual exhibit, "150 Years of American Paintings" July 30-Aug. 9 at the Monday Club on Monterey Street in San Luis Obispo. Exhibit hours will be 10 a.m. to 8 p.m. daily.

Sponsored by the California Arts Commission, this traveling exhibit was arranged by the local Civic and Fine Arts Association. It is being shown in only 12 California cities.

A few of the great American artists are: Gilbert Stuart, most famous for his portraits of Geo-

orge Washington; George Innes, great landscape painter; Winslow Homer, beloved for his seascapes; Ralph Blakelock, painter of Indian scenes; Childe Hassam, and Edward Hopper.

Museums loaning the paintings are: University of Southern California, Elizabeth H. Fisher Collection; Oakland Art Museum; Fine Arts Gallery of San Diego; Santa Barbara Museum of Art; California Palace of the Legion of Honor, San Francisco; Los Angeles County Museum of Art; E.B. Crocker Art Gallery, Sacramento; San Francisco Museum of Art; Pasadena Art Museum.

## MEET THE RUSSELLS

The opening of the Rio Malo Saddlery in the College Square Shopping Center last February, marked the beginning of the first business venture for Pat and Mary Russell, both former Cal Poly students. The new western store met with immediate success, and work is currently underway to enlarge the women's department at the store. Mary, the former Mary Keil, graduated from Cal Poly in 1964 majoring in Agriculture Journalism. Pat attended Poly majoring in Animal Husbandry.

## Inquiry '66 explores Grand Canyon

Well, we've survived 32 days of this trip, and everyone is still very enthusiastic. We store up most of our energy on the long bus rides during the day. Everyone sleeps a great deal, so that when we pull into our campgrounds in the evenings we're ready for hiking before the sun goes down. We're enjoying the country very much, and are looking forward to getting back East. Now here are our most recent happenings.

Our first view of Grand Canyon was rather disappointing, since there were many huge rain clouds overhead. We saw that a rainstorm was inevitable. We set up camp on the very edge of the North Rim and drove to Cape Royal, another point along the northern edge which afforded a better view of the canyon. The rain clouds gave the beautiful

formations of the canyon a mystical appearance. Many of us regretted the lack of sun, but the clouds were beautiful, especially when the rain started coming down in certain parts of the canyon. A ranger gave a talk explaining the geological background of the area.

The next morning we started east into Navajo and Hopi Indian country. It was very hot and desolate country, but there were pretty vermilion colored cliffs visible all along the road. Soon we saw rain clouds along the horizon and before we knew it, we were again in a heavy rainstorm.

We stopped in Flagstaff, and from there went east on 86, and turned north towards Canyon de Chelly National Monument, our destination for the night. We saw a gorgeous desert sunset enroute.

Our next day began with a trip to the Visitor's Center at Canyon de Chelly where we learned about the fascinating development of the Pueblo culture, as well as the more recent cultures of the Navajo and Hopi tribes. Then we drove to a point from which we could hike down to the White House, ruin of a Pueblo cliff dwelling. The ruins were remarkably well preserved with many of the walls still standing. It was a long, hot hike down to them and back, but we thought it was worth it. A modern day Navajo had his hogan down in the canyon near the ruins and we soon learned that we weren't to take pictures of him or his house.

From Canyon de Chelly, through northern Arizona, our trip was hot and dry and we were finally relieved by another thundershow.

er in southern Colorado. We entered Mesa Verde National Park early in the evening, and some of us went to the campfire program to hear a ranger speak on the Indians and their culture. We learned that traditions are carried on by the Navajo tribe today just as they were hundreds of years ago. The ranger gave us more of a human interest side to their story. He was in sympathy with the Indians, and told of the hardships they suffered at the hands of the white man. Then some of the local Navajos demonstrated three of their tribal dances.

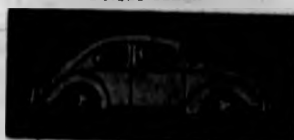

Early the next day, we were off to see the museum and some more cliff dwellings. This museum told us the tale of the cliff dwellers in more detail than did the one at Canyon de Chelly, and showed us quite a few artifacts that had been found denoting the Basketmaker period, as well as the more advanced Pueblo period. There were skulls that had been dug up, and the mummy of a Basketmaker girl, named "Esther", as well as much jewelry. From the museum we walked to the Spruce Tree House, a short distance away. Then we drove to the Cliff Palace Trail, and many hiked down to the largest and most well preserved of the cliff dwellings, the Cliff Palace. All of these cliff dwelling ruins were discovered in the later part of the 19th century, and were freely available to any person who wanted to excavate for artifacts. As a result, much of what was left was further damaged. In 1907, some steps were finally taken to preserve the area, and by now some areas have been rebuilt.

Great Sand Dunes National Monument was our stop for that night. We saw the sand dunes from quite a distance and were amazed at their location. These are the highest inland sand dunes in the United States, and are at the foot of the Rocky Mountains. They cover an area of 50 square miles, and at one point are 700 feet high. They are at an elevation of 8100 feet above sea level. The sand was deposited by large rivers long ago, and the winds have piled the sands at the foot of the mountains. The next morning, just about everybody in our group hiked up the dunes, but only two made it to the top.

Our destination was Manitou Springs, Colorado, but we ended up at a Pike National Forest campground, quite a few miles north of our planned destination, due to crowded conditions. It was pouring rain again, and the thunder was very loud and continuous. We're heading for the Rocky Mountain National Park for tonight, July 22nd.

## Editorial

## As I See It

The word is "Fraternity" - - - but Shh, don't say it too loud. In this modern, up-to-date day and age, one should not openly acknowledge that such a word exists - - - it may be catching.

An open discussion of fraternities by our college administrators with student representatives is seemingly considered an act of conspiracy, a stab in the back to our well-established no-fraternity tradition that has taken root on campus and spread throughout the various departmental levels, like crabgrass through a lawn.

The word "Fraternity" is shunned, swept under the rug, and forgotten. It is never permitted to be mentioned aloud. Like a social disease, it is spoken of in low whispers, behind closed doors. It is truly amazing that one little word could strike such an awesome fear in the minds of so many college personnel.

During a recent meeting of the S.I.C. (Student Interim Committee) a discussion of the Cal Poly "P" was brought before the board, stating that the "P" would have to be maintained during the summer months. One of the members present mentioned that a fraternity had volunteered to perform the cleaning operation, but at this, Dr. Dan Lawson, Associate Dean of Activities, vehemently refused to accept even the mention of a fraternity helping out in the cleaning of the Poly "P".

Really, Dr. Lawson, if members of the student body offer to

assist in the beautification of our campus, they should be applauded, not condemned. Is the administration so afraid that the members of the fraternity will show the student body that they are willing and able to perform service work for the college and the community?

In my opinion, the refusal of the administration to openly discuss the possibilities of on-campus fraternities is unfair and childish, closely reminding me of our high school ruling against walking on the lawns. Isn't it about time we faced this issue like adults, and not scared children. Instead of trying to avoid the issue of campus fraternities, why not bring the whole thing out in the open, hearing all sides of the issue, both good and bad? After all, this is a college, not a high school, supposedly for the benefit of the students.

I feel that, after hearing all the arguments involved, that the proposition of on-campus fraternities should be put to a vote of the student body. If it does not pass, fine. The students will have shown that they do not want to have fraternities.

But, it is up to student consideration. They deserve to have a say. Instead of condemning fraternities, before they start, let's approach this issue with an open mind. Even administrators can be wrong - - - past experience has proven this to be true.

Monty Odett  
Editor-in-Chief

## \$5,500 in awards given new students

Award of scholarship grants totaling some \$5,500 to 16 young people who plan to study at Cal Poly during the 1968-69 academic year, was announced by the college today.

Among those named in today's announcement were Ronald R. Wade, David H. Rylasadam, and Karilyn L. Hill, all of San Luis Obispo; Mark A. Homer, El Cajon; Rex J. Whelanand, Orcutt; Dennis Lee Baker, Fullerton; Kenneth C. Africa, Venice; Robert J. Spiller, Northridge; Billy A. Bettschart, Manteca; Timothy LaSalle and Gerald L. DeRuiter, both of Hanford; Jimmy C. Griffin, Gilroy;

Jack E. Schuyler, Santa Maria; Felton W. Richardson, Fillmore; Walter R. Stornetta, Point Arena; and Edward C. McLaughlin, Durham.

Selection for the scholarships is by the college's Scholarship committee and is based on a combination of outstanding academic achievement, good citizenship, and demonstrated financial need.

Announcement of the latest group of scholarship awards brings to nearly \$55,500 the amount of scholarship aid granted to students. Additional scholarships, will push the final total for such grants from the college to over \$65,000.

## Scholarships . . .

he resumes his studies for the Bachelor of Architecture Degree in September.

Schaar will receive a \$500 Minnesota Mining and Manufacturing Company Scholarship. A 1968 graduate of West Covena High School, he will begin his final year of study of architectural engineering in September.

Waite will receive a \$100 Solar Company Scholarship Award. A graduate of Pleasant Hill High School, he will be a junior majoring in industrial engineering when he returns to classes for the Fall Quarter.

## Three-day confab on farm, land sales

Two hundred and fifty farm brokers and real estate personnel from throughout California attended and educational conference on farm and land sales here recently.

Topics covered during the three-day gathering included developments in farm land sales, legislation, exchanging, taxation, and finances; trends in agriculture; agricultural estate planning; and agricultural management services.

Co-sponsors of the educational conference were the college's Agricultural Business Management Department and the California Chapter of the National Institute of Farm and Land Brokers.

## College catalogues and fall schedules are available soon

Do you have a college catalogue? If not, you may pick one up in the Admissions office.

Since there is little change from year to year, students are urged not to obtain a new copy every year.

Fall class schedules are expected to go on sale Aug. 15, in the bookstore.

Students not planning to be here at the time may have the schedules mailed to them. The bookstore performs this service at no extra charge; the only charge is the price of the schedule plus postage.

The college catalogues are printed each year, free of charge, by the state printing office. If the books were sold at cost each copy would sell for approximately \$.80.

## Leach . . .

all educational techniques pioneered at Cal Poly.

Participation in the World's Poultry Congress is but one of a number of activities planned by Leach during a six-month-long sabbatical leave from his duties at the college.

Between June 20, when he began the leave, and January 1, when it is scheduled to terminate, Leach plans to take a study tour of poultry industry operations on the East Coast of the United States, take part in the conference in Russia, and attend meetings of several other societies of professional agriculturalists, including a world-wide congress of food technologists in Warsaw, Poland.

While in Europe, Leach and his wife Jennebell, who is accompanying him during his leave, will also visit 13 different nations. En route to Russia they will stop over in Iceland, Scotland, England, Switzerland, Norway, Sweden, Finland, and Denmark.

The Kiev meeting is being sponsored by the World's Poultry Science Association, whose members represent some 75 nations. Richard C. Blake of Australia, president of WPSA, is expected to preside over the congress.

## Top sports educators teach methods of play

More than 250 high school, college, and university physical education instructors from throughout the state are expected to participate in the 19th annual California Workshop for Physical Education and Athletic Coaching, scheduled to begin Monday on campus.

The workshop is being sponsored jointly by Cal Poly, the California Association for Health, Physical Education, and Recreation, and the State Department of Education.

Featuring many of the nation's top authorities in the field of physical education, the staff of directors includes such names as Pete Peletta, head basketball coach of last year's nationally ranked San Francisco Dons, and Homer Beatty, whose California State at Los Angeles Diablos have won three consecutive CCAA football championships.

Sports activity courses being offered include badminton, baseball, basketball, bowling, football, gymnastics, water polo and swim-

ming, tennis, track and field, volleyball, weight training, and wrestling.

Other instructors on the staff include Cal Boyes, Dick Francis, Lou Bellissimo, Jack Rose, Paul Xanthos, and Chuck Coker who coaches the Southern California Striders track and field team.

Beside the sports activities being planned general courses in administration and supervision of physical education and methods of physical education are being offered.

In conjunction with the men's workshop will be the 17th annual California Physical Education Workshop for Women in Secondary Schools. The women's workshop will begin on August 7 and conclude on August 19.

Sports activities for the women, under the direction of Miss Doris White of the University of California, includes tumbling, swimming stroke and analysis, creative adaptation of games, field hockey, body mechanics, rhythmic gymnastics, and folk dance.

## Mariachi band cheered; other activities planned

The first star popped out about 8:45 and the moon was glowing brightly throughout the performance of the Mariachi Tropical. Everyone was huddled up in their blankets sitting on the lawn between the Ag-Eng. building.

There were some 300 people attending the Concert Under the Stars last Saturday evening. Many of those present were of Spanish descent shouting their requests to the band in Spanish.

The band consisted of one violin, two trumpets, and three guitars. They played and sang all Spanish songs. All of the band members except for the trumpet players sang at sometime during the program.

The Mariachi band was dressed in brown caballero suits, bright red ties and wide white sombreros. The player of the tiny guitar danced as the crowd cheered and shouted Ole!

During their break Mike Sullivan, chairman of the Summer Program Committee, asked how much the crowd liked the band. A great big cheer came booming from the audience!

Tonight there will be a different type of entertainment on campus. The Polish film, "Eve Wants to Sleep," will be showing at the Little Theater at 8.

The film is a satire particularly poking fun at the police yet having as much fun laughing at their opposite numbers, the criminals.

The Dutch Luncheons which were scheduled for the next two weeks have been cancelled due to a convention which is to be held at Cal Poly.

## Implement dealers aid top scholars

Students working in the field of agricultural engineering have received scholarships made possible by organization of tractor and implement dealers in the state.

They are Burl W. Holbrook of Los Osos, a native of Seaman, Ohio; Stanley K. Hirahara of Madera; and William L. Dennison of San Luis Obispo, a native of San

Bernadino.

The scholarships, valued at \$500 each, were awarded to Holbrook, Denison, and Hirahara by the college's Scholarship Committee on behalf of the sponsoring groups. Selection for such awards is based on the individual students' academic record, citizenship, and financial need.
