PAY INCREASES

Faculty and staff payroll checks for July 1979 were computed based on 1978/79 rates before increases which have now been approved both for the October 1978 through June 1979 period and for the 1979/80 fiscal year. Because of delays in enactment of the state budget, and the subsequent veto override by the senate and assembly of the pay rate increase reductions by the governor, as well as action required by the Trustees of The California State University and Colleges to establish specific rate increases for each job classification ; it was not possible for the state controller to include the salary increases within the time available.

It is anticipated that separate salary increase checks for July will be received during August, and that payroll checks for August will be based on the correct 1979/80 rates. Because of the complex administrative problems associated with paying the increase for October 1978 through June 1979, the university has been advised that those payroll checks will not be received on campus before mid-September. All checks, when received, will be distributed using standard procedures for regular payroll checks (i.e., checks will be forwarded directly to the bank, distributed through the department, or personally picked up in the Administration building, depending on the manner in which payroll checks are normally delivered.
