CALIFORNIA STATE POLYTECHNIC COLLEGE

Volume XXXIII No. 53

San Luis Obispo, California

Monday, January 4, 1971

Is this hassle familiar? About 11,770 students are expected to go through these same registration lines today, according to Jerald Holley, director of admissions. Three hundred of these students will be new to the college this quarter. Photo from Mustang Daily Archives.

Year-round plan eyed

by Keith Wills

With classes getting harder and harder to get at registration and with the waiting lists for admission into the state college system getting longer and longer, a big question in the minds of students and faculty today is how can more students be handled more efficiently under the small budget allotted under current state leadership.

The Academic Senate, under William Alexander, chairman, is currently considering the pros and cons of full utilization of Summer Quarter—sometimes referred to as Year-Round-Operation.

The principal decision makers in the state are all anxious to make it possible for a larger number of students to receive a good education in the State Colleges while holding the construction and materials costs to a minimum. This can be accomplished through full utilization of all four quarters a year.

The State Colleges are beginning to have to deny admission to qualified applicants as the colleges do not have the facilities to provide the high quality education the applicant desires. Yet during the summer when all the faculty is on a three month vacation, the campus sits practically unused. Where else in the working world will you find an industry that shuts down for three months?

Given these facts the full utilization plan becomes simple to state:

The College would select certain majors and announce that admissions would be

available only on the basis of three quarters in each academic year. The three quarters available to the student would be determined by the college and the faculty. The majors selected for this procedure would be those with qualified applicants far enough in excess of the admission quotas to justify an added quarter.

To illustrate the application of the full utilization, consider a major with an enrollment capacity of 200 students such as the Graphic Communications Department. This department, like all the others on campus, has an enrollment quota that it cannot surpass in accepting qualified new students. They, like most other departments, must turn away applicants even though the facilities are capable of handling more students, given better financing and a larger faculty.

Under the full utilization plan, the students would be organized into four groups of 65, depending on the quarter in which they were initially admitted.

Group one would be admitted in June and would attend in Summer, Fall and Winter Quarters.

Group two would be admitted in September and would be permitted to attend in Fall, Winter and Spring quarters.

Group three would be admitted in January and would be permitted to attend in Winter, Spring, and Summer Quarters.

Group four would be admitted in March and would be permitted

(Continued on page 2)

Geodesic dome daddy will speak Thursday

R. Buckminster Fuller, internationally known as the "mastermind of the geodesic dome, will speak on the campus this Thursday. The appearance is set in the Men's Gymnasium at 8:30 p.m.

Fuller is internationally acclaimed as an architect, scientist, author, philosopher, engineer and mathematician. In recent years he has become known for his outspoken opinions concerning environmental problems.

Born in Milton, Mass., in 1895, and educated at Harvard University and the U.S. Military Academy, he is one of the most honored individuals the world has known in recent years.

Besides being honored by

societies and governments in nations throughout the world. Fuller has addressed some 45 international or national professional groups in recent years and has spoken at nearly 250 different colleges, universities and schools around the world.

Pictures on page 3

Presently a member of the Southern Illinois University faculty, he has also received 13 awards of merit from the American Institute of Architects, the U.S. Marine Corps, the Triennale de Milan in Italy, and the Society of Mexican Architects, and more than 20 honorary degrees from colleges and universities.

Pakistani drive nets \$3,212

The Pakistani Student Association has sent \$3,212.33 to the Pakistan President's East Pakistan Relief Fund as a result of a special fund drive which began Nov. 16 and ended Dec. 4.

The funds were donated by students of this college and residents of San Luis Obispo County.

The last-minute contribution \$51.50 collected by employees of the state Division of Highways in San Luis Obispo.

Masroor Batta and Ashgar K. Malik, both of Karachi, Pakistan, leaders of the fund drive, expressed their appreciation for "the generosity of the students and residents."

The funds are destined to aid the victims of the cyclone and tidal wave which struck the delta area of the Ganges River on Nov. 12.

KENNEDY INTERVIEW

President cites personnel moves

On Sept. 16, 1969, Pres. Robert E. Kennedy gave an address to the faculty and staff of this school in which he said: "Cal Poly was founded in 1901 on the theory that it would be individual and different from most schools. Through all the years of ups and downs and changes in administration, Poly has always maintained that thread of independence. . . Poly has never cared much for being lumped into a package with some of the state colleges, where a tradition is something that happened last week. California State Polytechnic College has a maturity that is not too concerned about squabbling with the state education hierarchy."

He went on to say, "It was never an easy road, never a simple following of a path cut by others. It is always hard to take 'independent' action—whether you are an individual or an institution trying to maintain individuality. It was different to achieve a reputation as a college that had the guts to be different when different in the eyes of many academicians could mean only 'second rate.' Being different now—in this age—means 'first rate.' Those institutions which have been hung up for years on the need to conform to whatever the so-called leaders were doing find they do not have the dynamic energy to blaze their own trail; to follow the mean-

derings of some of their former models through the Groves of Academe only adds to their confusion."

..This was Cal Poly in 1969, what is Cal Poly in 1970 and 71? How has it changed and is it still trying to be "first rate" as Kennedy stated in 1969?

..The following interview between Mustang Daily Editor Ian McCabe and Kennedy took place on Dec. 2. It transpired to clarify many rumors and misunderstandings about the college's standards, procedures and current actions on reappointment and tenure decisions and other personnel related issues.

..Because of the crucial nature of the questions, the president's

responses are printed in full. A second portion of the interview will appear in a succeeding issue of Mustang Daily.

MD: With the recent rumors of many teachers being refused reemployment, is the direction of the school and what it is requiring from its faculty changing?

Kennedy: At the beginning of the Fall Quarter we had 716 faculty members on this campus, some who have been teaching here successfully for as long as 35 years and some who had just been appointed. On Dec. 1, in accordance with state college regulations, letters were sent by me to all non-tenured regular, full-time faculty members,

now in their second, third or fourth year of probationary service, notifying each of them as to the final decision on reappointment for 1971-72. (Teachers in their first probationary year are notified on March 1.) It was not necessary to send notification to 324 faculty members who already had tenure, which is a status to which a State College faculty member can be appointed after he has been appointed for the fifth year. State regulations require a State College president to either award a tenure appointment to a full-time, regular faculty member who has completed his four-year probationary period or notify him that his

(Continued on page 7)

Aging censor depllores sex in British screen

LONDON (UPI)—The man who decrees what British moviegoers can see-and what they can't-said today he's quitting, offended at too much sex on the screen.

"That's not the only reason, of course," said John Trevelyan, head of the British Board of Film Censors. "I've been in the job 12 years, and at 67 I'm past retirement age, anyway."

"I am also quite sick and tired of the stuff we get now, more and more. I've just had enough."

"I think people in many parts of the world have just gone sex-mad," he said. "Almost anything goes. Perhaps it's because they've been deprived of it for so many years."

"Mind you, I've nothing against sex, it's a marvelous human activity. But merely to watch it, watch others doing it, is not my idea of entertainment," Trevelyan said.

Surrounded by models of the geodesic domes he has made internationally famous is R. Buckminster Fuller. The architect-philosopher will speak on the campus Thursday at 8:30 p.m. in the Men's Gym. (See story on Page 1.)

Classifieds grow with Mustang

"Classified Advertising began last spring with just a few ads, and already it has grown to be a real help to the students," says Jonnie Fuentes, classified advertising manager of Mustang Daily.

"At the present time," Miss Fuentes continued, "we are running between 25 and 30 classified ads every day." She added the people who read the classifieds are primarily students, and said the student market is the best possible for many items. "For instance, if you have a surfboard for sale, you would probably have more luck trying to sell it on campus than to the general public," she said.

Most ads in the past have been under "Automotive" and "Housing," but there are seven other classifications available, according to Miss Fuentes. They are "Announcements," "For Sale," "Help Wanted," "Lost and Found," "Personals," "Services," and "Transportation."

She suggested students use the classified section to sell items they can no longer use, to let people know they are interested in typing senior projects, and possibly to arrange car pools from outlying areas such as Arroyo Grande and Morro Bay. The column also has been used by people wanting to wish their friends a happy birthday.

Rates for classified advertising will remain the same as in the past. A three-line ad, run for three days costs \$1.50.

Due to budgetary cutbacks, the classified advertising office in Graphic Arts 228 will not be open full time this quarter, but Miss Fuentes has set up special hours when she can be contacted about classified advertising. She plans

to be in the office between 10 a.m. and 11 a.m. on Mondays, Wednesdays, and Fridays, and from 9 a.m. to 12 noon on Tuesdays and Thursdays.

In addition, people wishing further information about classified advertising can call 545-2164, or stop by the office and leave a number for Miss Fuentes to call.

Ski Club: a view from the top

The first home movies of pioneer Poly Skiers shows them hiking the faces of white slopes, usually without the aid of chair lifts, T-bars or trams.

Since that time things have changed. The ski club has grown to nearly 30 times its original size and mechanical miracles make skiing much more appealing. The club is a veteran of several decades and its 400 members include students, faculty and college employees.

The club is open to students, skiers, non-skiers and faculty. The membership dues are \$3 a year for new members and \$2

a year for returning members. This membership entitles the skier to movies, ski swaps, ski trips with discounts, a spring outing (water ski trip), organized ski races, ice skating and tobogganing parties on trips and free ski lessons (dry land and snow).

The club has scheduled a total of six ski trips for the quarters to come. Trips to China Peak are slated for Jan. 9-10 and Feb. 27-28, both of which should greet skiers with plenty of snow and good skiing. China has two chairlifts, a T-bar, and tow ropes, which provide good skiing for the expert and beginner. Lift tickets are only \$5.50 and lodging is \$4 a night. Lessons and rentals are available. China is located only three and one half hours from San Luis Obispo.

Jan. 30-31 will be the Ski Club's only trip to Dodge Ridge. Rates are somewhat higher than China, but there are six double chairlifts and six tow ropes. Lift tickets are \$7 on weekends. Rentals and lessons are obtainable. Dodge provides some tough runs and lies four and one half hours outside of SLO.

Scheduled for Feb. 13-14 is a trip to Bear Valley. With a vertical drop of over 2,300 feet and a good network of chairs, skiers stay on the slopes and out of waiting lines. Food and lodging are reasonable. Cross-country trips are highlights for avid skiers. Lift tickets are \$7 traveling time from Poly amounts to about five hours.

Quarter break, March 20-24, should prove to be one of the club's better trips with a choice of skiing Sugar Bowl or Heavenly Valley. Sugar Bowl, one of the major ski slopes in the area, has five double chairlifts that service

some of the best skiing terrain. Lodging, food and lifts will be on a club discount and will be announced at a later date. In expensive rentals and lessons are also available.

Heavenly Valley is probably the best skiing the club will encounter. Heavenly offers skiing in both California and Nevada and cross-country day trips are slated. It is equipped with one cable car and 11 single chairs which service nine beginner, 10 intermediate, and eight advanced ski trails.

Trip sign-ups start two weeks before the trip, and a deposit on the reservation is required. The sign-ups then close the Tuesday before the trip. Transportation is provided by the students themselves, although members without rides can usually find transportation with the aid of the club officers. Insurance forms are filed on all drivers.

This year's ski club advisor is Dr. Max Riedlberger, a history professor here for the past two years. One could say he is more than suited for the job. He skied during graduate school in Michigan, in Austria in 1962, in Colorado while obtaining a Ph.D. at the University of Colorado in 1968-69, again in Austria while writing his dissertation, and at various resorts in California.

His advice to all skiers is "to get plenty of exercise and stay in good condition."

Barry Crandell, Ski Club President, lives in San Luis Obispo and had skied for the past six years. This is Barry's first year as president and third year as a club member. He has skied mainly in California and Utah

and names Mammoth as his favorite spot. Fischer skies are his recommendation for the experienced skier and for the beginner his advice is to "ski as much as possible until you are confident on skis and then ski some more."

Vice-President John Turner, a math major, has asked for five years and names San Luis Obispo as his home town. He is a third year member of the club and finds the friendships made in the club often outweigh the skiing aspect. Sugar Bowl is his favorite slope and Head are his favorite skies, although he acknowledges the up and coming fiberglass skies.

Architecture takes up alot of time, but Treasurer Russ Gilman always finds time to ski. A senior and four year club member, Russ has skied for four years and makes his home in San Diego. Colorado and California are Russ's skiing territory with Colorado taking the honors in his book. He feels that skiing with a club has many benefits such as reduced rates on lodging and lifts, free instruction, and the aesthetic value of being with a group of friends that have something in common.

Running the Publicity Department is Roxanne Beeth, a child Development major with two years skiing experience. She is a senior from Burbank and has been a ski club member for two years. Head 360's are her favorite skies and she enjoys the uncrowded slopes of China Peak. Mentioning her experiences with the club, she said: "I had only skied one time and got a lot of help when I joined. It's really a good thing for beginners, you meet a lot of friendly, helpful people."

Roxanne's assistant is Rand Self of Northridge, California. He is a senior and a third year member of the club. His ski tip is: "If you get a chance to teach

Schuss: meet Tuesday

The ski club will hold its first meeting of the quarter at 7:30 p.m. Tuesday, Jan. 5, in the Engineering Auditorium. This will be the only night to sign-up for the China Peak trip on Jan. 8-10. Everyone planning to go on this trip must be at this meeting,

according to Rand Self, publicity co-chairman.

The club is expecting to have between 150-300 members go on this first trip. Rides must also be arranged at this meeting. The price has not been set, but it will be between \$5-10 for food and lodging.

THE WIG IS UP

Hidden hair a no-no?

SALEM, Ore. (UPI)—A long-haired National Guardsman who wears a wig to give himself a "straight" appearance while on duty has the backing of Gov. Tom McCall in his fight with guard authorities. McCall asked military author-

ities Tuesday to reconsider regulations preventing guardsmen who are not bald from wearing wigs.

McCall became interested in the controversy when he heard about the problems of Portland Guardsman Neal Berlin, 21.

For almost a year Berlin had concealed his long hair under a wig—until a recent inspection.

Now he is threatened with dismissal from the Guard and a call to active duty for violating the new regulation.

"I must confess a certain bewilderment as to the rationale behind the regulation," McCall wrote Brig. Gen. Staryl C. Austin, Oregon Air National Guard adjutant.

The governor said he could see no reason "why the wearing of a wig should be the exclusive prerogative of men who are naturally bald."

McCall asked Austin to convey his feelings to the military authorities responsible for the regulation.

Teacher decline reflected here

There is a possibility, according to Richard V. Jones, director of student teaching, that students are responding to the present over supply of teachers in California by choosing an alternate profession.

Enrollment in the elementary and secondary student teaching programs in the Education Department for Winter Quarter of 1971 is considerably less than estimated, Jones said. Projected enrollment figures are based on an expected annual growth of from five to 10 per cent. The actual number of student teachers signed up for Winter Quarter of 1971 is below that of last year, the director stated.

Jones added that the apparent decrease in the number of students interested in entering student teaching during the Winter Quarter may simply be a result of students putting off fulfilling this requirement until Spring Quarter for one reason or another. It may also be that students are "screening themselves out", he added.

No significant program changes have been instigated by the Education Department, Jones explained, as a result of the present flux of teachers.

The student teaching program requires the education major to instruct in a full time capacity in an assigned school for a complete quarter. Fifteen units of academic credit are customarily awarded for completion of the requirement. Several prerequisite courses, including advanced composition and methods, must be completed before applying for student teaching. It is not necessary for a student to have a bachelor of arts degree, however, before entering the program.

"Student teaching," Jones explained, "is part of professional preparation which requires a year of study beyond

the B.A. but there is no definite concern with order."

The estimated enrollment in student teaching for Spring Quarter of 1971 is 60 in elementary and 85 in secondary making a total of 145. Comparative estimated and actual figures for Winter Quarter of 1971 are: estimated 110 and actual enrollment 85. This shows an actual decrease from last year's total of 95.

The boundaries of the school districts served by student teachers from this college include Salinas to the north and Lompoc to the south.

Several of the main districts in the program are Paso Robles Unified, Santa Maria Unified, San Luis Obispo Coastal Unified, Cambria Unified, Cayucos Unified and Orcutt Unified.

For some, student teaching completes credential requirements. When asked if student teachers are often hired by the school district they have served, Jones said that this situation does occur fairly often. He added that of course job placement is directly related to the degree of teacher turnover in the district. Many of the rural, outlying areas have a fairly high rate of turn over and student teachers to schools in these areas are often later hired by the district.

KENNEDY INTERVIEW

(Continued from page 1)

services will no longer be needed. The president can, at his discretion, grant a faculty member not recommended for tenure a "fifth notice year" appointment which constitutes an extra year of employment at the end of which the individual is automatically separated without further evaluation or action by the institution. Since tenure and reappointment notification is required to be sent on Dec. 1 to individuals not being retained, such individuals actually have six months advance notice, and will receive nine more monthly salary checks.

Notification of tenure appointments were sent Dec. 1 to 44 faculty members; notification of reappointment for 1971-72 were sent to 121 faculty members. Only four nontenure notifications were sent, and only five non-reappointments for 1971-72 were sent. These percentages of nontenure and non-reappointment decisions were not out of line with previous experience. Furthermore, every faculty member was evaluated by the tenured members of his own departmental faculty, his department head, the dean of his school. In every case where there was any difference of opinion among these three levels of evaluation, the case went before the Academic Senate's Personnel Review Committee. Every faculty member who was being considered for reappointment or tenure, whatever the status of his evaluation, was invited by the Academic Senate Personnel Review Committee, which consists of elected represen-

tatives of each of the seven schools, one representative from the Academic Administrative staff, and a student representative to appear before that group. I review all of the evaluation input from all sources, including the recommendations of the Academic Senate Personnel Review Committee before making a final decision.

In response to the inference that "standards" are changing for faculty retention, I must respond "yes". Cal Poly is striving to become the "best polytechnic college" in the nation—and we will achieve that status only on the basis of the excellence of our faculty. But the standard of "excellence" for various disciplines within our nearly 60 departments varies with the differences of those disciplines. The academic and experience background deemed essential for a faculty member who teaches architecture is not the same as that for a faculty member who teaches history. There are great and real differences between the academic and experience backgrounds required even within various departments within the School of Engineering and Technology. If it is assumed that only individuals with a Ph.D. will receive tenure, I must correct that misimpression. Some individuals who were granted tenure in the Dec. 1 notifications did not have a Ph.D. because it was not deemed essential in the discipline area in which they were teaching. In fact, faculty members who teach certain types of courses within a field in which the Ph.D. is normally common were granted

tenure this year—despite the fact that they did not have the terminal degree—primarily on the basis that they were outstanding teachers and were keeping their courses relevant to modern needs. In other instances, faculty members with the Ph.D. were not granted tenure or were not granted reappointment for 1971-72—because factors other than their original academic preparation were not, in the opinion of the tenured members of their department, at the level of accomplishment expected.

MD: Is an advanced degree being placed ahead of teaching ability? Kennedy: I believe that I have answered that in my comments to the last question. But to repeat, for emphasis, I must say that having an advanced degree does not guarantee an individual being good teacher. On the other hand, having a Ph.D. does not signify certain competence in the subject-matter field and does not, in itself, "spoil" the individual as a teacher. On our faculty we have the Ph.D. We are seeking and will appoint faculty members who have the highest level of competence in their subject-matter field. If they are good teachers, we will retain them. If they are not good teachers, we will not retain them. In the process, we may make mistakes. Evaluation is very subjective. Some faculty members who are very popular with their students will be retained and some may not be retained. There are many factors which must be considered, but I assure you that "good teaching" will continue to be the primary criterion at Cal Poly—not success in research, in

Monday, January 4, 1971, Mustang Daily

Page 7

writing publications, or serving on committees. MD: What do you propose to do about the morale of the faculty on this campus which is said to have reached its lowest ebb in many years?

Kennedy: I do not doubt that faculty morale on the Cal Poly campus is at a low point, but I do not believe that local conditions, those over which I have control, are the fundamental bases for whatever degree of faculty dissatisfaction exists here today. The best answer to this question could be obtained from Dr. William M. Alexander, chairman

of the Academic Senate. In the December issue of Cal Poly Today, a publication sent periodically to Cal Poly alumni, Dr. Alexander, a faculty member here for 12 years and now head of the Social Sciences Department, presents in writing his analysis of the problem. It might be well if Mustang Daily readers had the benefit of his entire statement. One short quotation from it pinpoints one major factor on the morale question: "Although these disorders did not touch Cal Poly, they did have serious consequences for the faculty

KENNEDY INTERVIEW

(Continued from page 7)

because we are, of course, part of the larger system of higher education in California. The most blatant of these consequences was the denial of the five per cent raise to the faculty of the state system at the same time a five per cent pay raise was granted to all other state employees. This action is understood to be a direct political consequence of public dissatisfaction with campus disorders in the larger educational system. It is not believed that this punishment was directed at the faculty of Cal Poly. The Cal Poly faculty member receives fewer dollars and pays his rising costs of living

with a kind of stoicism mixed with a pinch of bitterness."

I propose to continue to fight for Cal Poly faculty and students at every level of state government with the hope that attempts to solve problems at other campuses by systemwide rules, regulations, and punitive actions will not adversely affect the welfare of this college community nor the operation of this institution. We have been more successful on this point than many people realize. Ask your student body president, Paul Banks, about our success at preserving maximum local autonomy—even while the system is considering rules and regulations to regulate other

student bodies. Banks has done an outstanding job in helping present to Trustees and legislators the need for Cal Poly to retain the local autonomy on matters that would adversely affect our operations and our programs if we were forced into a systemwide mold.

MD: Are we going to require that all of the new faculty that we hire in the future have doctoral degrees?

Kennedy: No. That has not been the policy in the past and it is not the policy now. It is true that in many disciplines today there are more candidates applying for positions on our faculty who already have the doctorate than ever before in the history of this institution. This is attributable to many factors, not the least is the growing international reputation of Cal Poly as a college whose graduates are successful in the many enterprises and activities into which they go after leaving this campus. Many highly qualified and excellent teachers are applying for positions at Cal

Poly because they do not like the atmosphere of unrest and even violence found today on many other campuses. There are more Ph.D. holders today who are seeking teaching positions at colleges than ever before in the history of this nation. As I said before, we are looking for good teachers, highly qualified in their respective disciplines. If they have the doctorate and are good teachers, they may have an "edge" over someone who does not have that level of academic experience. I hasten to add, however, that this college prefers that even the Ph.D. holder have had considerable experience in industry or other nonacademic fields wherever we can find that combination. Perhaps some current statistics would help your records understand the current mix of faculty in terms of degrees: As of the Fall quarter, 1970, our regular full-time faculty are distributed as follows: Bachelor's degree only, 89; master's degree, 348; doctorate, 348; no degree, 7. Among the seven schools the distribution of

faculty with the doctorate varies from four in Architecture to 88 in Science and Mathematics. This upholds the concept that we seek men who are qualified in their field, and the appropriateness of the advanced degree depends upon the discipline.

MD: In the figures you gave to a previous question about "nonreappointment" of faculty members did you include those people who resigned in order to forestall receipt of a nonreappointment notice? Would you also comment on the cases of the two biological science faculty members and two economics faculty members about whom students have been expressing concern and have initiated petitions? Could you also specify in which schools the nonreappointment and nontenure cases were located?

Kennedy: I'll answer in reverse order. Of the seven schools, five of them had no cases in which eligible faculty were denied tenure or reappointment. In the School of Communicative Arts and Humanities three were notified of nonreappointment and four were notified of nontenure. In the School of Business and Social Sciences two were notified of nonreappointment. Three faculty members in the School of Science and Mathematics submitted resignations after learning that tenured members of their respective departments were not recommending them for reappointment. One member of the School of Business and Social Sciences submitted a resignation for the same reason.

The two faculty members in economics were reappointed for next year (1971-72).

The two faculty members in biological sciences were individually interviewed by me with all facets of both cases discussed in depth. In neither case did the faculty member request that his resignation be set aside; therefore, no action by the president was in order, except to investigate specific recommendations made in the interviews about operations within the department.

Once again, in a 1970 U.S. Army survey, milk heads up the list of the GI's 10 most wanted foods.

Unrest and violence in 1970

by Keith Wills

Like most people this time of the year, I took a few minutes out to think about what the year 1970 was and what I hoped to see in 1971.

With my stomach still filled with good food from the festivities of the holiday and sitting in front of a fire in the fireplace, I thought of some of the things that happened in education across the nation this year.

It's hard to think of 1970 without recognizing some of the terrible violence and its effect on good education this past year.

1970 started off rather quietly with few real problems. The first real incident occurred at Santa Barbara in March. A group of students rallying against unfair practices of landlords in Isla Vista turned into a riotous crowd, striking out at everything from Vietnam, pollution and faculty disputes to the establishment. Taking the Bank of America as a symbol for the country and its capitalism, students burned the bank to the ground.

Things again returned to the

normal turmoil of the campus. There were still demonstrations and disturbances, even a few arrests, but no violence until the warmer months.

May was perhaps the worst month of all both here and across the nation. While we were deeply involved in what could have been the first crisis on campus over charges made against a group of Iranian students during Poly Royal, a riot on a far away campus in Ohio turned four days of unrest into a disaster that left four dead and nine wounded.

On May 6 Governor Ronald Reagan closed all the campuses in California. For the first time in the seven years I've been here, that I could not go onto campus. Big trucks and security guards blocked all the entrances. In a panic measure by the governor this campus was forced to shut its doors and stop the educational process.

Just one week later violence struck again in the form of the shooting of two black students at

Jackson State College in Mississippi. Student protests began all across the nation as easy grades were given to many protesters on other campuses but our own. Students and faculty began to strike over the violence both here and in Indo China.

The summer came just in time to ease the pressure. Things have quieted down now in spite of the still uncertain direction of the war in Vietnam and the problems of pollution and the draft. The new school year brought a few terrorist bombings and a continued fight against ROTC, but fortunately little violence.

Now that the election is over the governor has decided to attack the budget again. Acting a little bit like Sir Lancelot he is out to destroy the money spending institutions. By cutting the finances for the colleges to a minimum and by eliminating all out of state travel and capital expenditures for the schools, Reagan hopes to fight inflation and save the state. Unfortunately

his mighty sword has cut off the head of the educational system and severely injured it! So far nobody in the college system has chosen to fight back and nobody has gotten injured in more violence.

Turning my thoughts to what I hoped to see in this my new year I find my self wishing for less violence and a little more intelligent discussing—communicating with a give and take approach—not just demands but requests and a few submissions. I hope to see a little less fighting over money and a lot more realization that education is here to stay and that it needs

money to continue.

The irony of the whole mess is that all the violence of 1970 is part of what has turned the taxpayer off toward the campuses. We are going to need a 1971 that has a little more good publicity for the students and a little less fire on the campuses; if we are going to reverse the anti-education trend and return to the anything for advancement of mankind trend of the 60's. Good education is what we are all here for—if we want to destroy things why not join the Army and get paid for it.

College campuses are for learning not for killing; let's hope that 1971 will be a year of peace.

Report reveals media timid of Agnew

NEW YORK (UPI)—Broadcast journalism was at its best last year in reporting environmental, consumer and space efforts, but reacted timidly to criticisms such as those made by Vice President Spiro T. Agnew, according to a private study.

Agnew's criticism Nov. 13, 1969 in Des Moines, Iowa of network "instant analysis" and concentration of power in a few executives "placed in the hands of broadcasting cynics and cowards a formidable excuse for not covering the crises that most thinking Americans acknowledged the country faced," the report, released Tuesday, said.

The Alfred I. DuPont-Columbia University Survey of Broadcast Journalism, "Year of Challenge, Year of Crisis," said, "With one clever thrust the vice president had shifted the credibility gap, the blame of the previous and now the current administration, from the White House to the Manhattan offices of the television networks" in the year's "most significant event for broadcast journalism."

The report, covering a period from July 1, 1969 to June 30, 1970, said although Agnew "recognized America as it had never been before to the enormous importance of electronic news, this awareness was linked in too many minds to a denial of the industry's most impressive accomplishment, the awakening of Americans to the social and political issues of the day."

The study, result of a year's research into news and public affairs broadcasting, was conducted by 60 correspondents throughout the nation under the supervision of the Columbia University Journalism School and a six-man panel headed by Dean Ellis Abel.

FAVORED TO HOLD TITLE

Wrestlers show power early

Coach Vaughn Hitchcock's Mustang wrestling team established itself early in the season as the one of the powers in the nation, and a heavy favorite to repeat as NCAA college division champion.

Four Mustangs swept individual championship and four

others nailed second in the season-opening University of Arizona tournament last month. The team then went on a barnstorming tour of Maryland, New York and Massachusetts, with meets against Navy, Army, Springfield College and Maritime.

Next action for the Mustangs will be against the University of Oklahoma Jan. 13 and Oklahoma State University Jan. 15. Both meets should test the strength of Hitchcock's team.

Leading the squad against the Oklahoma foes will be Gary McBride, 118, Glenn Anderson,

126, Steve Gardner, 142, and John Finch, 158, who each won first at the Arizona tournament.

Also figuring heavily will be Larry Morgan, 134, Frank Oakes, 167, Pat Farner, 177, and Gary Maiorfi, 190. Each of the four placed second in Arizona, where the Mustangs piled up 104 points

to outdistance nearest competitor Oregon State by 46 points.

At the same time the school's second team, handled by assistant coach Dick Heaton, won five individual titles and the team championship at the annual San Jose State meet.

Mike Wassom, 134, Lee Torres, 158, Russ Day, 167, Denny Johnson, 177, and Ron Lucas, 190, each nailed championships and will provide strong challenges to the front line wrestlers on the team.

Other wrestlers counted upon this season are Allyn Cooke, 180, who took third in Arizona, Ron Shearer, 142, who won the consolation title at San Jose and heavyweight Pat Kopitar.

Picture of a man about to make a mistake

He's shopping around for a diamond "bargain," but shopping for "price" alone isn't the wise way to find one. It takes a skilled professional and scientific instruments to judge the more important price determining factors—Cutting, Color and Clarity. As an AGS jeweler, you can rely on our gemological training and ethics to properly advise you on your next important diamond purchase. Stop in soon and see our fine selection of gems she will be proud to wear.

Players sought for power team

Serve. Bump. Set up. Spike.

If you know what these words mean and you can successfully apply them to a volleyball game, then the 1971 Power Volleyball Team needs you.

Under the direction of Coach Jamie Townsend this school will field a volleyball team eligible for intercollegiate competition. The first team meeting is scheduled for Jan. 7 during College Hour at the Men's Gymnasium Room 118.

"This meeting should be of interest to all Cal Poly students who would like to compete in intercollegiate volleyball," said Townsend. "Class credit can be given also if students interested in playing sign up for P.E. 161 (competitive volleyball)," he added.

Some top Southern California teams have already been scheduled, and other teams will be added to the schedule later.

Mustangs start right, capture Aggie Tourney

When you start out to do something, do it right from the start.

Seemingly employing that strategy, the Mustang basketball team opened the 1970-71 season by nabbing the title of their Aggie Invitational Tournament, narrowly nipping St. Mary's 77-73 in a thrilling championship game.

The Mustangs won their first game 99-73 over Cal State Hayward behind Billy Jackson's 27 points, but had trouble against the Gaels, who had been favored to win the tournament. Lew Jackson, the tourney's Most Valuable Player, hit key baskets and two free throws in the final eight seconds as the Mustangs barely pulled it out.

Named to the all-tourney team were Jackson, Bob Jennings, Dennis d'Autremont, Phil Hubbard of the Pioneers and Herman Brown of the Gaels. The Mustangs received title to the first annual Ed Jorgenson perpetual trophy, named in honor of the former Mustang coach.

All basketball photos by Paul Simon

Stealing the ball from a lax St. Mary's guard, senior Lew Jackson drives in for a layup.

Rick "Stick" Stickelmaier takes an 15-foot jump shot in the game against St. Mary's Gaels. The junior college transfer has moved well into Neale Stoner's style of play.

The leaping, rebounding ability of center Bob Jennings (54) makes him a valuable addition to the 1970-71 Mustang cage team. He pulled down 18 rebounds in the two games of the tournament and also tallied 34 points.

Hopeful Mustangs open CCAA hoop campaign

by Paul Simon
Sports Editor

They'll be playing for high stakes starting this weekend.

Neal Stoner's Mustang cagers meet the University of California at Riverside Highlanders Friday night in the start of what could be a very profitable California Collegiate Athletic Association campaign.

The Highlanders, CCAA champions last year who claimed third place in the NCAA college division playoffs, are again favored to cop the title. Coach Freddie Goss lost only one player to graduation, and has made several key additions to the squad.

Stoner's Mustangs can alter the picture with an upset over Riverside—and they have the potential to do it. Led by veterans Dennis d'Autremont at forward

and Lew Jackson at guard, the team has been bolstered by transfers and players from last year's frosh squad.

Bob Jennings, 6-6 center, and 6-6 swingman Billy Jackson add rebounding and scoring punch that the team lacked last year. With 6-6 Rick Stickelmaier and 6-3 Lennie Lowndes also up front, the Mustangs present a formidable lineup.

Depth is also a strength of

Stoner's crew. Guards Chris Blake, Floyd Qurtman and Randy Genung and forwards Mike Jackson and Brad Richardson supply a strong relief corps.

After opening the season by nabbing the title of their Aggie Invitational, the Mustangs played U.C. Santa Barbara, then made a three game swing to Oklahoma and Louisiana. The team competed in the Irvine Tournament a week ago.
