and the [Central Coast](#)

Approval of Proposition 55 Will Now Bring \$35 Million, Including New Architecture and Construction Management Building, to Cal Poly

Proposition 55, the statewide school bond on the March 2 ballot approved by voters, will bring more than \$35 million to Cal Poly to replace aging buildings, classrooms, equipment, and pay for architectural design work.

Cal Poly's share of Proposition 55 money includes :

- \$28.5 million in construction money for a new building to house the University's architecture and construction management programs, part of Cal Poly's nationally-recognized College of Architecture and Environmental Design;
- \$5.3 million to pay for new high-tech equipment for the Engineering IV Building now under construction;
- and \$1.2 million for initial design and drawings for a new Center for Science and Mathematics to replace the 50-year-old math and science complex.

The \$35 million is part of \$71 million in direct dollars for construction, remodeling, equipment and building design headed to the Central Coast. The UC Santa Barbara Economic Forecast Project has estimated that funding should generate a boost of up to \$213 million for the local economy in terms of jobs for local contractors, designers and laborers and equipment and supplies purchasing.
