## Student Successes

### Soil Science Student Takes First In International Contest

Senior environmental soil science student Patrick Michelsen won first place in the Oral Undergraduate Research Symposium Contest at the 2014 International Annual Meetings of the American Society of Agronomy, Crop Science Society of America, and Soil Science Society of America in Long Beach, Calif. The paper, titled "Environmental Ramifications of a 120-

year-old Railroad Bridge Painted in Lead Paint," focused on the influence of wind and water flow in the distribution of lead, a known human toxin, in the

soils, plants and sediments of Stenner Creek around Cal Poly's Trestle Bridge, constructed circa 1894. The study demonstrated the importance of wind in transporting lead to the soils directly under and downwind from the bridge. The paper was coauthored by Craig Stubler (B.S., Soil Science, 1996) and instructor Chip Appel (B.S., Biochemistry, 1995; M.S. Agriculture, 1999).
