Shooting out from hundreds of feet of gaseous clouds, the Earth Resources Technology Satellite makes its way into space. The craft took off from Vandenberg AFB Wednesday morning.

## Resource scan goal of satellite

VANDENBERG AFB, CALIF. (UPI) —

An earth resources satellite, hailed as the prototype of the most useful spacecraft yet devised, was launched Wednesday to join a sister ship scanning every portion of the globe with cameras and sensors.

The 1,165 lb. LANDSAT 2, was lifted on a Delta rocket on schedule at 9:56 a.m. into a 970-mile high orbit to report on the world's environment and its resources.

A NASA spokesman said the launch "looked fine, just fine." The spokesman said preliminary calculations showed the satellite had a high point of 868 miles and a low point of 861 miles.

LANDSAT 2 took off over the South Pacific, crossed Antarctica and began a course over the Indian Ocean, Egypt, the Mediterranean, eastern Europe and the Arctic before swinging down again over the Pacific.

The NASA spokesman said separation from the second stage rocket went off on schedule approximately 55 minutes after launch and "all systems are operating normally."

NASA said LANDSAT 2 would have to make four sweeps around the globe before its exact path could be determined but early

indications were that it was in the planned orbit.

NASA Director James C. Fletcher said if he had to pick one space age development to save the world he would pick Earth Resources Technology Satellite (ERTS) and later satellites evolved from it in this decade.

Photography buffs of the Central Coast, both amateur and professional, will get a chance to learn new techniques and information about 35 mm photography in a free seminar on Friday and Saturday, Jan. 24 and 25, 8 a.m. to 5 p.m.

The seminar, which will be held in the Cal Poly Theatre, will feature Walter Huen and William Pierce as speakers.

Huen, manager of special sales and service for E. Leitz, Inc., has taught Leica photography and 35 mm techniques at the Leitz plant in Wetzlar, Germany. He also assisted working photographers at the Republican and Democratic Conventions, the Olympic Games, the Apollo launches, and the inauguration of former President Richard Nixon.

## Kennedy is optimistic

# Funds available?

by MARK LOOKER

Calling on a widespread cross section of the university to "make this campus the exception to Gov. Jerry Brown's initial decision that no new major construction be undertaken," President Robert E. Kennedy indicated Tuesday that there is still hope that needed funds can be obtained.

Kennedy addressed a special university convocation in the Cal Poly Theatre consisting of members of the President's council, Academic Senate, Staff Senate and Student Executive Committee, among others.

Kennedy's message was that Brown would listen to reasonable pleas for more money and that this campus, more than any of the other 19 campuses in the system, had good reason to ask for the money.

"Our work is cut out for us," said Kennedy. "We must get the Governor's ear and make that 'prudent and painstaking' case for the facilities we need."

The options facing the campus are many, pointed out Kennedy, and "I'm not certain how I'm going to get consensus on both the direction to go and strategy to use."

The university must decide on one approach to take when it goes before the Trustees Campus Planning, Building and Grounds committee meeting on Feb. 26, said Kennedy. It has three basic alternatives to choose from.

The alternatives are:

1. Hold enrollment to the current level of 13,800 annual average Full Time Equivalent (FTE) and attempt to obtain permission to continue to use Tenaya Hall for faculty offices until a minimum of two major new buildings are ready for occupancy: Life Sciences and the Faculty Office Building.

2. Hold enrollment at 13,000 FTE for three years, release Tenaya, and obtain 10 trailers for use until the two new facilities are ready for occupancy, and continuing growth at the planned rate after 1978-79.

3. By continuing to grow at the already established rate of 13,800 for 1975-76, with approximately 200-300 annual FTE increases until we reach 15,000 in 1979-80 and obtain a minimum of 20 trailers for faculty office spaces as of Fall, 1975.

The Life Sciences building, which is estimated at \$6,200,000, has the No. 1 priority on the trustees priority building list, said Kennedy.

"Gov. Brown's statement about not funding new capital outlay projects at the State University and Colleges was based on his belief that the campuses are not growing. The Governor left himself room for special circumstances," pointed out Kennedy, "and we are that special circumstance."

Kennedy expects many tough questions as the university defends its position before the Chancellor's staff, the Trustees Committee, the Dept. of Finance and perhaps the office of the Legislative Analyst.

"That's when I need to have the confidence that I am speaking for the majority of our constituent groups on campus," said Kennedy and that contacts made with these same individuals or agencies by others will be in support of the same basic goals."

Kennedy asked any group that had ideas on which alternative the university should choose to have the ideas into him by Feb. 1, the deadline for agenda items at the Feb. 26 Trustees meeting.

## The news at a glance

WASHINGTON (UPI) — Ignoring the threat of a presidential veto, Senate Democratic Leader Mike Mansfield and Sen. Lowell P. Weicker, R-Conn., announced Wednesday they will introduce legislation calling for mandatory gas rationing.

Weicker said he and Mansfield will file the bill today. It would order President Ford to implement a nationwide rationing program within 60 days.

At his news conference Wednesday, Ford emphatically rejected gas rationing as a solution to the energy shortage, saying he would veto any mandatory gas rationing bill.

"I feel we need mandatory gasoline rationing now, not stand-by authority," Weicker said in a statement.

LONDON, ONT. (UPI) — Police withdrew their offer Wednesday to meet a \$10,000 ransom demand and supply a

getaway car to a gunman holding four children hostage in a rural farmhouse near here.

An Ontario Provincial Police spokesman said the money and the car had been brought to the police command post near the farmhouse, but that they decided instead to wait out the gunman, who has been holding the four children, ranging in age from 4 to 13, since 3 p.m. Tuesday.

WASHINGTON (UPI) — Reform-minded Democrats Wednesday dumped a third powerful House committee chairman — Rep. Wright Patman of the Banking Committee — in a wave of sentiment against seniority.

The Democratic party caucus voted to elevate Rep. Henry Reuss of Wisconsin, fourth-ranking member on the Banking Committee last year, to the chairmanship. Patman, 81, of Texas, dean of the House with 44 years of service, held the chairmanship for 13 years.

## Seminar to focus on photos

Pierce is a free lance photographer who has been a contract photographer for Time magazine as well as contributing to Camera 35, Popular Photography and Thirty-five MM Photography. His former clients include the Smithsonian Institute and the Sesame Street television series.

This will be Huen's second appearance at Cal Poly following a similar seminar held here last year.

Helen Kelley, photojournalism instructor, stated that last year's be different in content in that amateur and professional photographers from around the Central Coast area.

"The response was so good, we asked him (Huen) to come back. We are trying to make this

seminar a permanent thing here a Cal Poly," said Kelley.

Kelley stated that each day will be different in content and that, "the discussion will be geared to anyone who understands or who cares about photography."

Huen and Pierce, who have recently started to collaborate on such seminars, will cover a wide range of subjects in 35 mm photography.

The first day will be spent with a presentation by Huen of the two types of cameras used by professional photographers which use the 35 mm format. The discussion will concentrate on the technical and operational differences of the two cameras.

Pierce will follow with a discussion on the application and use of the two cameras from the

viewpoint of a working photographer.

The second free seminar on Saturday will include a presentation by Huen on exposure methods and correct utilization of light meters for black-and-white and color film.

## Correction

Statement of earnings (W-2) will be out Monday Jan. 27 for all foundation employees. Mustang Daily Wednesday erroneously reported the statements were ready.

Pick up for student employes is in the Administration Building Rm. 106 for state payroll and in University Union Rm. 215 for foundation payroll employes, Monday.

# GSU defended as 'right to choose'

Editor:

Foolishness is easy to spot nowadays. Some people just do not realize that to oppose the Gay Student Union is to follow in the footsteps of Hitler, old Joe McCarthy and Carl McIntire.

Its case is hopeless. First, they oppose the capstone of modern thought, indeed the American dream by not allowing a man (or woman) to do just anything they want as long as they visibly don't harm anyone else.

Secondly, he faces public ridicule for his 19th-century mind and for his "archaic" notions such as absolute truth. Such ideas simply are no longer with us.

Let us examine the question with critical eyes and a compassionate heart. I believe any supporter of the GSU would feel as I do — resentful — at the notion that the homosexual is simply a sick person, a creature of environment or society.

Such treating of homosexuals

as college-age children is aggravating, especially when the proposed establishment of the GSU proves that they made a moral choice, and are old enough to be responsible for that choice.

Otherwise, we could not ask the Administration to change their position, "They being but creatures of their environment and not responsible for their unfortunate condition." If a man cannot choose, a man cannot change.

If there is a God (in the Judeo-Christian sense, as most relativistic ones, being impersonal and unconcerned don't really matter here), then he knows what is best for us in life, health, knowledge and in happiness; he has the power to punish us for our many imperfections and deliberate sins; and he just might be just enough to do it.

And if there is not God...well, that's actually a bigger if. At

least the fundamentalist has some appropriate objective evidence that we can either accept or deny Divine Revelation.

## Letters

We in the fishbowl called the "Natural" have no way to gain evidence to the contrary, for the supernatural is beyond our capability to measure, deduce or, with any honest scientific investigation, evaluate.

It is outside of our fishbowl, and beyond the confines of Matter, we cannot be sure of anything. We can only speculate, and even then we cannot discover on our own, who's on the other end of the line.

As Pascal once said, "Betting against the unknown is a losing bet."

Now, we don't live in a

theocracy and Christians should remember that their God, Jesus, didn't tell them to crush, kill, and destroy their enemies. "That's true", they might answer, "and being human, our indignation sometimes overcomes us. We have been less than kind; forgive us. So have you."

We: "Aren't you supposed to love your fellow man?"

They: "Yes. And doesn't love also include warning a friend who is about to fall off a cliff?"

We: "What?"

They: "If God be God, you are deliberately rebelling against him and are sliding deeper and deeper into eternal misery."

We: "Come off it brother! You don't expect me to buy that hell-fire trip. It went out with Holy Hubert!"

They: "Did it? What if God is...?"  
Craig Mills

# CEC director speaks today, raps tonight

The director of the City of Santa Barbara's Community Environmental Council, Paul Rells, will speak today during College Hour (11 a.m.) in Rm. E-77 of the Science Building.

Rells, an instructor at Santa Barbara City College, will talk about "Community Involvement in City Planning in Santa Barbara."

Tonight at 7 p.m. there will be a "rap session" in University Union Rm. 219, where Rells will be available for further discussion.

Admission is free and the public is invited to both events, which are sponsored by the Political Action Club here.

Rells is author of Urban Agriculture, a book scheduled for completion in April.

## It Sounds Incredible

**BUT EVELYN WOOD GRADUATES CAN READ**

**THE EXORCIST IN 58 MINUTES**

At That Speed, The 403 Pages Come Across With More Impact Than The Movie.

You can do it, too. So far over 650,000 other people have done it. People who have different jobs, different IQs, different interests, different situations have completed the course. Our graduates are people from all walks of life. These people have all taken a course developed by Evelyn Wood, a prominent educator. Practically all of them at least tripled their reading speed with equal or better comprehension. Most have increased it even more.

Think for a moment what that means. All of them—even the slowest—now read an average novel in less than two hours. They read an entire issue of Time or Newsweek in 30 minutes. They don't skip or skim. They read every word. They use no machines. Instead, they let the material they're reading determine how fast they read. And mark this well: they actually understand more, remember more, and enjoy more than when they read slowly. That's right! They understand more. They remember more. They enjoy more. You can do the same

thing—the place to learn more about it is at a free speed reading lesson.

This is the same course President Kennedy had his Joint Chiefs of Staff take. The staff of President Nixon completed this course in June 1970. The same one Senators and Congressmen have taken.

Come to a Mini-Lesson and find out. It is free to you and you will leave with a better understanding of why it works. One thing that might bother you about your reading speed is that someone might find out how slow it is. The instructors at the Evelyn Wood Reading Dynamics Free Speed Reading lesson will let you keep your secret. It's true we practice the first step to improved reading at a Mini-Lesson and we will increase your reading speed on the spot, but the results will remain your secret. Plan to attend a free Mini-Lesson and learn that it is possible to read 2-4 times faster, with comparable comprehension.

**SCHEDULE OF FREE MINI-LESSONS**

**You'll increase your reading speed**  
**50 to 100% on the spot!**  
**Thursday Only**  
**January 23**  
**4:00 p.m. & 8:00 p.m.**

**Sands Motel**

**EVELYN WOOD READING DYNAMICS**

## Center needs volunteers for activities

The United Church Care residents love to go on field trips and get out into the community, but lack of volunteers to supervise these field trips hinders them. Volunteers can help on field trips such as bowling, beach trips, tours of the Cal Poly campus and various places about town.

Active volunteers are needed to fill various positions at the United Church Care Center. Students are needed to help out in all areas ranging from basket weaving to mathematics. The grade levels range from pre-school up to junior high.

The physical therapy program is an important program at the center. In this program, the physically handicapped are able to have their own range movement under the supervision of a trained nurse.

Volunteers are also needed in the area of personal hygiene. The residents at the center need help in learning how to care for their hair, dress themselves, manicure their nails, and so forth.

At the center, social activities need creative volunteers who like to plan parties. Volunteers are needed for entertainment, ideas for decorations, and supervision.

To volunteer, stop by the Activities Planning Center in the University Union.

## Campus events

The International Students will meet today at 11 a.m. in Rm. 216 in the University Union. All foreign students are urged to attend.

Masa-gohan (rice) and taukemono (pickled salted cabbage) for dinner?

Those are only a part of the menu of Japanese cuisine for Tomo Dachi Kai's Winter Festival Dinner Jan. 25.

The Japanese students organization here is including skewered beef teriyaki, chicken teriyaki, aimon (beans), mandarin oranges, tea and senbei (rice crackers) in the meal.

The dinner will be held from 6:30 to 9:30 p.m. at the Veteran's Memorial Building in San Luis Obispo.

Tickets are \$3.75 for students and \$4.75 for the public and will be sold at the door.

The American Institute of Architecture and the California State University and Colleges' International Programs will sponsor a slide show and music presentation of "Sights and sounds of Italy" today at 11 a.m. in the Cal Poly Theatre.

The presentation was prepared by four architecture students who spent the 1973-1974 school year in Italy.

All students are invited to attend the presentation. Admission is free.

## Jobless aid hits record high in '75

(UPI) A record number of Americans are receiving unemployment benefits and orders of durable goods went into the steepest decline in 20 years, the government said Wednesday.

Large and small companies announced plant closings, and Treasury Secretary William Simon said a high inflation rate will continue for years.

The Commerce Department said orders for durable goods—

Thursday, January 23, 1975

Page 3

such items as steel, heavy machinery, automobiles and major appliances—declined 11.1 per cent in December to \$26.3 billion, \$4.78 billion less than in November.

It was the sharpest fall since November, 1954, the fifth biggest on record and the fifth consecutive month of decline.

The government's survey of durable goods orders is closely watched by industry because it is a strong indicator of future economic conditions. When orders drop, producers of raw materials and manufacturers of finished products cut back production.

# Your first job may be your last.

It has happened that way often in the past. Many of the college graduates who join us decide to build satisfying lifetime careers in our organization.

#### Why this decision?

- Perhaps because of the relative stability of Pratt & Whitney Aircraft over the years. This has resulted from a talent for providing continually more powerful engines for the majority of commercial aircraft operated by airlines of the free-world.
- Perhaps a significant factor has been the planned diversification into non-aircraft fields. For example, we have developed jet engines that now provide power for utilities, high-speed trains, marine vessels, chemical complexes and other applications.
- Perhaps the emphasis on new products with exceptional growth potential. Fuel cell powerplants that do not pollute the atmosphere and are far more efficient in producing energy from scarce fuel typify this aspect.
- Perhaps an important plus has been a competitive salary structure and increasingly more important assignments that lead to attractive futures in management.

- Perhaps most important, for many, has been the challenge of working at the frontiers of the art in virtually every technical and scientific field. Certainly, ability is tested to the utmost in improving powerplants that can lift their own weight plus additional thousands of pounds of plane, passengers and cargo. This ability is tested, too, in the development of new and better ways to utilize the world's energy resources.

We have attractive career opportunities for engineers, scientists and graduates in a variety of other specialties such as accounting and business administration. So see your College Placement Office for our descriptive brochure, requirements and interview dates. ## Top Division II team is no contest

Despite a hardly dazzling performance in their first season as an NCAA Division I team, the Mustang wrestlers showed they were still better than the best Division II team Tuesday night defeating Northern Iowa 23-11.

Northern Iowa, heir apparent to the Division II throne now that Poly has moved up, took it on the chin winning only two matches as the Mustangs rolled to their seventh season victory.

Mark DiGirolamo came back after a forfeit and loss in his last two matches to defeat Iowa's Dave Cunningham, 3-1. Don Lawson, a freshman replacing the injured Benje Williams, held Iowa's Bruce McClure to a 4-4 draw at 130.

The Mustangs lost their only two matches as Rick Torres and Ron McKinney were defeated, McKinney in a superior decision.

Roger Warner came through in his usual style defeating Iowa's Jim Blasingame, 6-3.

165 pounder Bruce Lynn won handily in a 10-0 decision. Cliff Hatch defeated Iowa's Dan

Keller at 167, 7-5. Cal Poly's tightest win came as Sythell Thompson took a 2-1 decision from Iowa's 177 pound Dick Erickson.

Iowa received its final two points as Mustang John Plant came up with a 1-1 draw against Cass Ingram at 190.

Gary Casey won his first heavyweight bout as he topped off Poly's 23 points with a 7-4 win.

Halfway through their road trip the Mustangs put their 7-6 record on the line last night against Drake University. The final road match will be at Nebraska-Omaha this afternoon.

## Gal netters host exhibition match

The women's tennis team will host a pre-season exhibition match against the University of California, Santa Barbara tomorrow. The match will begin at 3 p.m.

The Mustangs, coached by Sonja Murray, will have a fairly young starting team, consisting of one senior, two juniors, two sophomores and two freshmen.

In the singles matches, senior Ruth Gilstrap from Caruthers

# Pioneers invade Mustang corral in non-league game

The Mustangs are getting a breather of sorts this week.

Fresh from a last-second win over Cal State Bakersfield, to keep their CCAA championship hopes alive, the Mustangs draw a pair of non-league contests.

Tonight Cal State Hayward comes to town and they don't figure to be any pushover. It took

the Mustangs two overtimes to dispatch the Pioneers 71-69 in Hayward last month.

The Mustangs have one good thing going for them. They're undefeated here in San Luis Obispo. The 9-5 record overall has been considerably enhanced by the fact they're 6-0 at home.

Hayward hasn't been nearly as fortunate as they sport a mere three wins in 17 starts. In their first meeting with Poly, the Pioneers led by as much as nine points at one time.

The big man for Hayward is 6-8 postman Stan Cherry. Cherry is scoring at 17.7 clip and rebounding at a 11.7 pace. In last weekend's games against Sacramento State and Chico State, he bagged 23 and 22 points respectively.

Mustang Coach Ernie Wheeler said of the Pioneer star, "Stan Cherry is as good a player as we will face this season."

Wheeler also said, "If Hayward plays like it did the first time we'll have to be ready to play a tough basketball game."

Both tonight and Monday night's game against the University of San Diego will start at 8 p.m. Both games will be preceded by junior varsity contests. The Colts take on Ambassador College tonight and Cuesta Monday.

## Ruggers try to right ship after losses

The Long Beach Rugby Club will be here Saturday for a 1 p.m. match on the Cal Poly soccer field. Sunday the San Luis Obispo crew will travel to Santa Monica for a game with the Santa Monica Rugby Club.

The ruggers were beaten by both Kern County and Fresno in last week's games. Things aren't getting any easier.

Santa Monica is the defending league champion. They have a talented and experienced team.
