## From Trough To Trashcan: Poly's Teenage Wasteland

Story On Page 4

# The Union And SAC

Operating with the command and authority of a two-year-old who has to be led around by the hand, the Student Affairs Council gets with it only when the grown-ups get annoyed and threaten it with a spanking.

Earlier this quarter SAC toyed with resolutions on rent control and a ceiling on enrollment for weeks. This didn't make much difference to anyone since there was no specific action required.

However, this was not the case with the obvious need for a graduated increase in the University Union fees. The University Union Board of Governors (UUBG) has already made it clear the Union would incur a large deficit without the raise and would thus eventually have to close.

This was not good enough for SAC. It endorsed raising the fees to \$25 for the 1975-76 academic year but omitted an endorsement of raising the fees to \$35 by the 1978 school year.

Several SAC members argued there was not enough student "input" into the decision to raise the fees. However, 10 of the 15 voting members of the UUBG are students. The chairman, Doug Jorgensen, is a student.

The reason there are so many students on the UUBG and other decision making boards is to give them a voice in university affairs.

SAC has delusions of grandeur if it's presumptuous enough to think it can be of much use in helping the UUBG make its decisions. It can't even make decisions on issues which come within its own jurisdiction.

If SAC wanted its say on raising the fees it should have gone to UUBG meetings, instead of asking the UUBG to come to it.

Now SAC wants the UUBG to re-examine the graduated increase plan, incorporating more student influence. However, we believe the UUBG, with its 10 voting student members, has made a responsible decision and should stick by its plan. The only thing SAC can contribute is to drag out the whole affair.

The only reason SAC took any action was because it was pushed into it by ASI director of business affairs Roy Gersten. He pointed out something had to be done so the chancellor of the State University and Colleges, Glen Dumke, could consider the fee increase at the last meeting of the year of the system's Board of Trustees.

If every student group on campus had to go running to SAC before it made an important decision the university would be in a state of paralysis. If SAC found itself in the path of a 70-foot tidal wave it would drown before it could decide how to get out of the way.

## The Dorms

Editor:

Recently I was informed of the situation confronting dorm residents at Cal Poly.

My daughter is one of those residents.

She has paid for the usage of the dormitory and its facilities. As a taxpayer, I have also contributed.

The acceptance of fees, by the school's administration, for dormitory use, denotes a contract. The intent of such a contract, though not specifically written, never implied limited usage.

Now my daughter, and other dormitory residents of Cal Poly, are being threatened with deprivation of lounge and kitchen

facilities — an integral part of life on campus, as invitingly advertised by school pamphlets prior to registration.

It is now proposed, by school officialdom, that these areas will become meeting places for special interest groups — groups comprised of people who are not students, and who have not paid fees for the use of these areas!

Not only is it purported that these areas will be denied the students — who have paid for them — but brick walls are to be erected, during Christmas holidays, to ensure it!

Perhaps dormitories should take on such names

as "East Berlin." (The title "West," bringing to mind a more democratic atmosphere, doesn't seem appropriate.)

I sincerely hope students will take a positive stand against this proposed in-

fringement. Not with violence; nor aimless demonstrations of anger and frustration; but with a firm democratic approach.

By pooling funds, those involved could retain a lawyer and invoke an injunction against any violation of their contractual rights.

Students, by the thousands, could register to vote; petition for a special election; then vote into law city ordinances to protect what they have paid for.

In the future city officials would have to campaign

deplorable decisions that kow-tow to minority groups, to realize the responsibility of their position, and the services that they are paid to render by the taxes of the majority.

A Parent  
Hayward,  
California

The lament of local pharmacists that prescriptions for students should be directed to the private sector was not supported by a survey taken almost 20 years ago when we found that of each ten prescriptions written by physicians only three were taken "down-town" to be filled; this was the impetus to develop our own pharmacy.

This has developed into a functional program licensed by the State Board and under the direction of a licensed pharmacist who is making a valuable contribution to our total Student Health Program.

Thanks!  
Billy Mounts, M.D.  
Director of Health Services

## Pharmacy

Editor:

The fine article re Health Center Pharmacy is in need of a factual update: The Health Center expansion was constructed not from "tax payers finances" but from Student Facility Fees.

# The Blackout: Wind Too Much For Power Poles

by FRED VULIN  
Daily Co-Editor

A power outage Sunday night curtailed electrical power to the campus for 46 minutes, a university official announced Monday.

According to Dr. James Landreth, Business Affairs Director of the university, the campus was completely blacked out at 8:20 p.m. Sunday.

Landreth said three power lines (with a total output of 12,000 volts) were forced together by the strong Sunday winds.

A spokesman for Pacific Gas and Electric said the three poles near the poultry unit caused the burn-out of a large sub-station transformer near Hwy. 1.

Called Gold Tree, the transformer is responsible for power transmission to the university, the north side of San Luis Obispo and the beach communities near Los Osos.

Some areas on campus, notably the dairy unit and the university main water pump, were not receiving electrical power until as late as 3:30 a.m. Monday.

Most people in the city, said the PG & E spokesman, had their power restored by 1 a.m.

He added 3,600 customers, at various times, were not receiving power in the cities of San Luis Obispo, Los Osos, Morro Bay and Baywood Park.

He said an energy transformer was being rushed in from Fresno and was due to be operating by 5 p.m. Monday. The PG & E spokesman also said power outages in Nipomo and Santa Maria were also reported.

According to Dr. Billy Moxmitt, director of the Health Center, there were no accidents on campus as a result of the blackout.

# Where Were You When the Lights Went Out?

With all due respects to Doris Day and Rock Hudson, who starred in the movie by the same name, where were you when the lights went out?

"Me and some of my friends were in the middle of a seance," said Gary Hunt. "But we just lit some candles and went right on. It really made a nice atmosphere."

"Listening to Jessie Colin Young and talking about what would happen if the lights went out," offered Jenny Ford and Terri Garrett. "Then we went down to the hall lobby and played the piano in the dark. It was great."

Over in Sequoia Hall, Ed Sautler, Barbara Driscoll, Chris Krvin and Doug Dohyne were trying to study, but quit in favor of a pinchle game under the beams of flashlights in the main lobby. "Up on the fourth floor in the stacks at the library," moaned one soul as he picked his way home along unlit campus streets. "It was like being blind. I was going to crawl down on my hands and knees, but a guy with a flashlight came up and got me out."

At Fremont Hall, Greg Handova was losing 21-11 in a ping-pong match with Bob Coffey and Lloyd Hasley. All three found that

holding a paddle and a flashlight at the same time was "interesting."

"I was listening to Tower of Power," said Mike Even. "I've got a really cheap stereo, so I thought at first that it had broken or something."

"On the phone, yelling at a girlfriend if she knew what was going on," said Judy Wheeler.

"In the shower," giggled Laurie Margulies as she sped past while giving Judy a piggy-back ride.

"I'm not telling," whispered Ken Shook.

"I was trying to work on a quilt," said Jeanne

Fredrick. "When I began to stab myself with the needle, I figured it was time to stop."

"Inside Cork and Bottle buying some soft drinks," said Cathy Acton. "Really. Then I went back to the dorm and listened to people scream."

"We were firing on people with a Water-Wienie," chorled Cindy Smith. "We went down to the UU study room, got a few people on bicycles, then took advantage of the darkness to get away."

"Watching the Six Million Dollar Man," said Krista Markowski. "I didn't get to see the end of the

program. I'm ticked."

"We were watching the telephone lines near 101 arc," explained Jeff Bague. "We all started yelling out the window, and then went around singing the Johnny Carson theme song."

Cutting a forlorn, dejected scene on the patio at Sierra Madre, Paul Willis explained that he was waiting for his roommate to come back, because he had locked his keys in his room when he went out to see what was going on.

"I was looking out the window because Charlie was throwing rocks at it," said Susie Gausewitz.

# Warning Given To Women About Dorm Harrassment

by ELLENA-MARIE KOSTOR  
Daily Staff Writer

Students in the Residence Halls will be receiving warnings from the housing office next week concerning the problem of men in the women's shower rooms and bathrooms.

"A problem has occurred on more than one occasion this Fall Quarter with which we need your assistance and to be sure that you have knowledge about it," the memo says.

The problem is actually two-fold.

"Often on weekends guys are over visiting the girls in our hall," La Anita Henry, head resident of Trinity Hall; the only female dorm on campus says. "To save themselves a walk downstairs they use the women's restroom. The girls even encourage it."

The other part of the problem involves men coming on campus and into the dorms for the purpose of harrassing women.

"The problem is one of a man going into a woman's shower room, standing outside the shower curtain, watching the woman student taking a shower.

Needless to say, this is exceedingly traumatic and terrifying for the women students," the memo says.

That situation has happened about five times.

The housing office suggests in the memo women students use the shower room in pairs, because the intruder is less likely to bother two women students than one he can find alone.

"If I could put a solution in two words it would be 'Be aware', all of us," says Beulah Prior, head resident of Yosemite, who has had to deal with the problem. "Especially of strange men who are cruising the halls aimlessly."

Prior says two of the best security systems in the dorms are the hours students keep and coed living. "When some students come in late and others are up studying or down at the vending machines, there is always someone there who can help."

"Coed living is one of the best ways to protect the residents because the guys feel very protective of the girls in every tower," she says.

# Vandalism Hits Poly Canyon

by BETSIE LOVELAND  
Daily Staff Writer

Crime is on the uprise everywhere. It even finds its way into the isolated expanse of Poly Canyon.

Design Village, an experimental construction site located in Poly Canyon, has been the victim of the modern day culprit—vandalism.

The vandalism ranges from petty thefts to senseless destruction of projects which require time, effort and care.

A wire was purposely loosened on an experimental structure upheld by tension, causing the entire structure to topple to the ground.

The damage will require over 100 man-hours to repair, according to Nelson

Greene, who teaches a course on the completion of the Shell House in Poly Canyon.

The Shell House has had its share of problems with vandals also, according to Greene.

An exposed water main for the Shell House was shattered by a thrown rock.

This pipe provided the only source of water for Design Village. Until the pipe can be repaired, the village will be without water.

Repairing the pipe will require many hours of hard work which will set back the completion date of the Shell House from December to next March, said Greene.

Light switches which had been installed in the

house were carefully removed by vandals.

"Meaningless destruction is sad," said Greene, and it's even more heart-breaking to those who have devoted their time to projects in Poly Canyon.

"We're making a plea to common sense to stop this vandalism," Greene said.

"The canyon is a laboratory, the only one of its kind in the nation," added Greene. "Each house here is unique in the world."

"Vandalism hurts us, but the whole school loses," said John Chasak, a student enrolled in the Shell House Completion Course.

"The canyon is not just for arches. It belongs to everyone."

# A Trashy Tale: Cafeteria-goers Holler 'Right On!' To Leftovers

Ray Cunningham is a student supervisor with 18 months experience in Cal Poly dishrooms. In that time, he admits, he's seen a lot of garbage.

"It's really depressing," Cunningham said, "all the food that gets thrown away."

"We have at least three trashcans filled with every three-hour shift. That's only the stuff that doesn't go down the garbage disposal."

How much food gets thrown away daily in the cafeteria is unknown.

"We don't keep any stats on it," Everett Dorrrough, Food Services director said. He said one of the garbage disposals makes it harder to compute the amount.

One estimate on the amount of wasted food came from Betty Jensen, the dishroom supervisor. She said there are "about 75 pounds of garbage" that can't go down the disposal.

"Lunch would run about the same amount, dinner would have at least twice as much. There are a lot more people then," Jensen said.

Waiting at the end of conveyor belt that carries trays into the dishroom, a person can tell what is being served in the dining hall without reading the menu.

Trays laden with rice, corn, salad, milk, Coke, funny looking pieces of meat and everything else served in the cafeteria slide into the dishroom.

"A lot of edible food gets thrown away, especially things like butter and sugar," Cunningham said. "People sent back desserts the most through. They take a piece of cake and then decide they don't like it or that they're full."

"Milk is another thing they throw away a lot. They'll send through a tray with five glasses on it that aren't even touched," he said. "Students' eyes are bigger than their stomachs. That's what happens with the milk. Once they've sat down they don't want to hassle with the milk lines so they get five glasses and end up drinking two."

Jensen agrees with him. "The students are lazy, that's why they take so many glasses and end up not drinking them."

"One thing that surprises me," she said, "is that we throw away a lot of potato chips, the ones that come in the little packages."

"The other day at lunch, in the first 20 minutes, I must have thrown away 30 bags. And those bags are something you'd think the students would take with them. I don't know...." she said.

"This waste isn't a campus wide phenomenon," Dorrrough said. "It only happens where the students have unlimited food, like the cafeteria, that we have the waste."

"We want the students to eat all they want, but to eat all they take," he said.

Dorrrough said periodic checks are made of the dishrooms to determine what is being thrown away. He said menu changes have been made in the past because of these spot checks. But he said the waste problem on campus has been growing and plans are being made for a stop the waste campaign.

"We'll probably have the same kind of campaign we had a few years ago. We'll put signs up in the dining halls asking them not to be wasteful...that kind of propaganda program," he said.

The dishwashers also get upset over the wasted food, and what diners do to the leftover food.

"I've seen whole trays of food come in here with nothing eaten. It really makes me mad," one dishwasher said. "And then there's the gross stuff they do to food."

"They pile all the leftovers on one tray and mash it together. Or they'll bury their silverware under a mound of mashed potatoes or rice. Or they'll skewer their baked potatoes on a knife, the turkeys do it all the time."

"You know," Cunningham said philosophically, "I remember how when I was a kid I was told to eat everything on my plate because of the starving people in the world. And then I think of all the food we throw away here, and I think about all the other campuses that throw away a lot of food. It's really bad," he said sadly.

## Untouched Food Is A Dishwasher's Delight...

**'They start out with salad, then have  
some meat and end with dessert'**

"Sure, I eat garbage," Joe said, "but it still tastes like cafeteria food."

"I don't see anything wrong with eating it. It's all good food, there's nothing wrong with it. I don't eat stuff with toothmarks or anything like that, just food that hasn't been touched. Or played with."

"It's not like I eat my dinner there. All I do is take some munchies, like cookies or cake. I really like their chocolate cake," Joe said with a smile.

Joe isn't the real name of this cafeteria dishwasher but his dining habits are real.

The number of people who, like Joe, are eating out of the dishrooms is a mystery. The official word is there are a few cases. However one dishwasher said that out of her shift of eight people "three or four eat food off the trays."

She said most of the food being eaten are "things like cookies, fruit, a piece of cake, sometimes meat. Most of the stuff they eat hasn't been touched, although not always."

The people weren't eating dinner, she said, but were eating for "munchies."

One of her co-workers said that wasn't always the case. "I've seen people who have to be eating dinner there. They start out with a bowl of salad then they have some meat and end up with dessert."

The official position of eating the leftover food is "it's a no-no," said Everett Dorrrough, director of Food Services. "That's against all the rules. It's against county health rules too," he said.

Dorrrough played down the number of people eating leftovers. "There's a few who do it, but not many. I've seen kids collect apples and oranges and wash them off, that's not bad. But eating off the trays, that's a no-no," he said.

Dishroom supervisor Betty Jensen also thinks there are only a few workers eating off the trays.

"Oh sure there are always a few who do but it's things like potato chips. Packaged stuff," she said. "It's unhealthy to eat off of the trays, you never know what the students might have put in the food, what they've done to it. Or they might have been sick and then the dishwasher might catch it."

Joe was the only worker questioned who admitted eating leftover food but "it happens a lot more than anybody wants to admit. Especially the bosses, it looks bad for them," Joe said.

**...And A  
Note Can Be  
Nice, Too**

Cafeteria goers have a lot to say to the dishwashers. Notes are sent back to the dishrooms on a variety of topics but most of them are about food.

"We get some notes through here," Betty Jensen, the dishroom supervisor said. "Some of them are complimentary, some of them aren't. Some are downright vulgar. Most of them are about the food but I don't think the cooks would want to read them."

"We sometimes get notes sent to us," Ray Cunningham the weekend student supervisor said. They are usually defaming our ancestry or else they are assorted little comments on the food.

"They'll ask for instance, where did we get the food, or when did we get the food. Or what is it."

One night-crew worker agreed that most notes are about the food.

"Most of them say things like 'this food is fucked', although," she said with a chuckle, "we did get a love note awhile ago."

"The guy wrote 'I've been watching you for days now and I'm madly in love with you. I'll write you later.' We thought it was great and put it on the wall. We haven't heard from the guy since."

A common subject is the garbage disposal. People say that all the food that gets ground up goes into a pipe and into the kitchen. Then it comes back as soup or pizza crust, something like that. It makes you wonder...." she said, her voice dropping off into silence.

# Dean Changes Gears And Joins In Bike Ride

by LEA BROOKS  
Daily Staff Writer  
"There were 4,000 of us, stretching out for 20 miles on the old country roads. Most of the towns we stayed overnight in had populations less than 2,000. You should have seen the lines to the campground restrooms!"

The memories Carroll McKibben has of the Great Bicycle Ride across Iowa sends his bearded face into a wide grin. McKibben, dean of the school of business and social science, participated in the ride this summer.

The 450-mile Great Bicycle Ride lasted seven days. The route, which changes every year, wound its way through the small towns between the Missouri and Mississippi Rivers.

"The ride caught my imagination," explains McKibben, "because the route went through my home town in Iowa."

McKibben, a native Iowan, moved to California during the summer of 1974 when he received his appointment at Cal Poly. He only went on the ride for two days that year because of the moving arrangements.

This year, McKibben planned his vacation

The dean on his machine (Daily photo by Ellen Banner)

around the Great Bicycle Ride. He took his bicycle on Amtrak and traveled to Hawarden, Iowa, the starting point of the riding.

He caught the train back to San Luis Obispo after reaching the end of the ride at Fort Madison. "Iowa has rolling hills,"

said McKibben. "They are gentle hills in a car but on a bike, they're mountains! The weather was very hot and humid and there was a

15-mile per hour headwind for six of the seven days.

McKibben explained he isn't a bike nut. "I'm a nut period," he said. "My motto is nonsense makes sense!"

A columnist for the Des Moines Register began the Great Bicycle Ride three years ago. Donald Kaul, a bike nut according to McKibben, wrote in his column that he and a friend were going to bicycle across Iowa.

People wrote in to the newspaper asking if they could go along and by the time Kaul and his friend got started, the ride was 1,000 bicyclists strong! The event went so well that there were 2,000 people last year and 4,000 this year.

"The Great Bicycle Ride is a really big thing in Iowa," said McKibben. "It's a very heavy agricultural state and there is not much traffic going through the little towns."

There was free food and drinks along the whole way, he explained. Churches and clubs organized dinners every night and during the day, there was lemonade, ice tea and watermelon stands along the road.

"Most of the time, people would not accept money for the food. It was such a big

thing for them," he said. "We'd ride into a town, and there would be banners welcoming us and bands playing. It was a great experience!"

McKibben rode with a friend's 16-year-old son from Texas. He said it was nice having a traveling companion and boasted

## Achoo! Self-Help Cold Clinic Is Nothing To Sneeze About

by DOMI TOMATE  
Daily Staff Writer  
Uncontrollable sniffles, coughs and wheezes are signs of an acute virus disease of the upper respiratory tract marked by inflammation of the mucous membranes, which, according to 10 out of 10 doctors, there is no known medical cure for—that is, except for a person's own body resistance.

The common cold. It's a seasonal pain in everyone's life, but the Health Center, with its Self-Help Cold Clinic will try to make existence easier for the disease-prone students this winter.

The Clinic works this way:

Unlike the usual process a student goes through when he uses the Center's services, the student ambles his way straight to the four booth stations, located about opposite the receptionist desk.

In the first booth, sign-in slips are provided for students to fill out as they read the symptoms of a cold.

Proceeding to booth No. 2, thermometers are situated so that a student can take his own temperature. On the poster board, directions explain if the recorded temperature is

under 100 degrees, then the student can move to the next booth. But if the temperature is over 100 degrees, then the student has passed the secondary germ infection of the common cold and should immediately report to the receptionist with the finding.

Booth No. 3 has a portable mirror with pictures of throats infected with

three common diseases posted on the board: tonsillitis, uvula, and yeast infection. The student then conducts a self analysis of his throat. If there seems to be no indication of infection, then he proceeds to the final booth. However, if the student finds that his throat is infected, then the report must be made to the receptionist.

The fourth booth is divided into two parts. The first part advises recommendations on how a student can build his resistance to overcome the illness. This includes, resting adequately, drinking ample amounts of fluids, gargling slowly with a hot water solution, and, taking one aspirin every four hours along with the free prescription under the direction of the clinic.

The second part reminds that a registered nurse and a doctor is available if any of these symptoms persists: high fever, headache, neck pains, sore throat, chest pain, and, cough productive with colored mucus.

Afterwards, the student goes to the receptionist and presents the sign-in slip at which time the nurse releases a slip to present to the pharmacist who then issues out Sudafed, a long acting nasal decongestant, and Afrin, a nasal spray.

## BA&E Pre-Scheduling

Pre-scheduling for Winter Quarter, 1976 for all majors in the School of Business and Social Sciences has started in Room 120 of the BA&E building.

This includes all Social Science, Political Science, Business Administration and Economics Majors and is mandatory for the Winter Quarter.

All pre-scheduling must be completed before the start of finals on December 10, 1975.

## Tower Of Power Returns

The rhythm and blues of 'Tower of Power' will return to Cal Poly in a 7 p.m. concert Dec. 7 in Chumash Auditorium.

Tickets will cost students \$3.50 in advance and \$4 at the door. All others will be \$4.50 in advance and \$5 at the door. The concert will be sponsored by the ASI concert committee.

## Open House Planned

"An Old Fashioned Christmas" will be the theme of the Ornamental Horticulture students' sixth annual open house Dec. 5.

The open house is a project of a special problems class supervised by Robert Gordon and Mrs. Cheri Burns.

Designed to promote the O. H. facility, the open house will be free to the public from 7 to 10 p.m. Last year 900 attended.

Student final floral designs, Ag. enterprise project sales, and ideas for Christmas decorations will be displayed.

Displays from the student chapter of the American Institute of Floral Designers (AIFD) will be in the the Beel Pavilion, south of the O. H. unit. Student designers will be Jean Gates, Susan Magrino and Steve Hiebert. Jennie Lee Irey, a member of the AIFD from El Cajon, will be commentator.

## Flu Vaccine Available

COLUMBIA, Dr. Albert Sabin said Monday there can be an inexpensive, effective vaccine against influenza ready for mass use against an anticipated epidemic in 1976 but only if Congress approves needed research funds.

"Our funding of this research is a nightmare," said Sabin who developed the oral polio vaccine. "Congress thinks heart disease and cancer are the only important diseases affecting people's lives."

Speaking to the Governor's Health Forum, Sabin said every 10 years since 1940 a new influenza virus has come out of Asia and, within each decade, that virus has undergone continuous change.

"This new vaccine has a new twist," he said. "A master strain of influenza virus has been developed which will allow a matchup with the new strain enabling scientists to develop a vaccine to meet the new characteristics."

## SLA Trial Delayed

LOS ANGELES - The attempted murder trial of two Symbionese Liberation Army "soldiers" was recessed Monday when two jurors failed to come to the courthouse.

Superior Court Judge M. Ross Bigelow said one juror called in sick and the other telephoned to say she did not want to leave her home because of a brush fire burning out of control north of the city.

Bigelow said he would wait at least another day before excusing the two and replacing them with alternates.

Joseph Remiro and Russell Little are the defendants accused of attempted murder and assault with a deadly weapon against a police officer in a shootout at Concord, Calif. Jan. 10, 1974.

## Kissinger Warns USSR

DETROIT UPI - Secretary of State Henry A. Kissinger Monday night warned the Soviet Union and Cuba against continued intervention in the civil war in Portugal's former African colony of Angola.

"We cannot ignore the substantial Soviet build-up of weapons in Angola which has introduced great power rivalry into Africa for the first time in 15 years," Kissinger said in remarks prepared for an Economic Club of Detroit Dinner.

"This Soviet involvement is resented by Africans most of all, but the United States cannot be indifferent while an outside power embarks upon an interventionist policy, continuation of which must inevitably threaten our relationship," he said.

"Nor can we," he continued, "ignore the thousands of Cubans sent into the African conflict."

## L.A. Brush Fire

GLENDALE, Calif. UPI - A wind-whipped brush fire raged along an 11-mile stretch of tinder dry foothills north of Los Angeles Monday, burning about a dozen homes in Glendale and in nearby La Crescenta.

More than 3,000 persons fled their homes during the night and families huddled in hastily set up evacuation centers in schools waiting to hear if their homes were still standing.

When the immediate danger was past they returned to their homes late Monday morning and started to clean up the damage.

About 10 homes in the \$35,000 to \$60,000 price range burned in northern Glendale when the flames rushed down from the foothills to the north. Some homes, perhaps a dozen more, were believed heavily damaged in the La Crescenta area to the east.

## Unconcert Generates Own Electricity

Despite an unexpected power failure, Mark Nafatalin still managed to provide unconcert-goers with an evening of hot, jazzy blues Sunday night.

Nafatalin gave eager listeners their money's worth by boogying on a concert-grand piano for over an hour without stage lights or a public address system, when a wind storm left Chumash Auditorium without power.

Nafatalin, the original keyboard player for the Paul Butterfield Blues Band, performed some original compositions along with his own renditions of popular hits to an enthusiastic crowd in hall-

filled Chumash Auditorium.

Long jamming instrumentals as well as soft vocals revealed Nafatalin's talent on the keyboard during his solo performance.

The lack of a p.a. system drew the attentive audience close to the stage which gave the concert a close, living-room atmosphere.

The appreciative crowd responded warmly to Nafatalin's fine music and persistence over electrical difficulties with a standing ovation.

Sunday's concert, the first unconcert of the season, was opened by the Geeks, a local band.

## T-Shirt Exhibition

The fine arts committee is sponsoring the great T-shirt exhibition starting November 24 through December 5.

The committee has been accepting and promoting t-shirts for the last three weeks. The qualifications for entrance in the T-shirt exhibition is that the shirt be customized; whether it be silk screened, embroidered, or batiked, it must be an original.

The fine arts committee have accumulated 15 shirts, a ways off from their goal of 30 shirts to open the exhibition. If all the shirts are not submitted then a mini-exhibition will be held, if more than thirty a maxi or larger exhibition will be held.

Shirts are a work of art and with batiking, embroidery, and silk screening the shirts of the seventies will be well remembered. Entered in the contest include shirts designed by the volleyball team, a shirt designed for children's apparel, and a 1917 track shirt. A 1917 track shirt was entered by a Cal Poly track star alumni. Although tattered, it is still ornamented with many medals from the track games.

Art is fun, but art on shirts is outstanding. For more information on the exhibition call Randy Donat in activities planning center at 546-2476.

## Bike: Good Vibes

(continued from page 5)

they only walked up two hills.

"You meet so many people," said McKibben. "When 4,000 people have a common identity, it brings out the best in them. Everyone was cheerful and helpful," he added.

"There were people from every state," continued McKibben. "Some families had carts behind their bikes for babies. Some took the ride very seriously," he said. "The bicycle clubs with their expensive equipment rode for time. They started out very early in the morning and covered the day's miles in a few hours. I guess they sat around and compared notes for the rest of the day," he said.

"I went on the ride just to see if I could make it and to have a good time. I didn't care about the speed," he said while munching on a snack of yogurt and granola.

McKibben described his bike as a \$90 Sears Roebuck special. "It weighs a ton," he said, "but I didn't have any breakdowns. The chain fell off twice, though."

McKibben's main problem on the ride was his sore rear end. Near the end of the week, bicyclers were sitting on sponges and sheepskins to ease the pain.

His hands also got tired and sun caused cracked lips and sunburn.

Participants of the Great Bicycle Ride had the choice of staying in private homes along the way or camping. Although most of the bicyclers camped, McKibben and his companion went the other route.

The towns opened their swimming pools to the bicyclers. McKibben explained, "When you ride a hill, you perspire and it dries when you coast down the hill. Pretty soon you have these layers of goo and when you jump into a pool, it feels so good!"

There were signs in front of houses along the road saying "bathroom, shower or free food," said McKibben. "People wanted to know where we were from. When I said San Luis Obispo, California they were so impressed."

There are some  
exceptional people  
who know  
how things work  
as well as why.

Ampex needs  
exceptional people.

On-Campus Interviews  
With Our Technical Staff  
November 25

A great many of the Ampex success stories have been built on a solid understanding of scientific theory. But a great many more are the result of a practical understanding as well. Right now we have unique openings for exceptional people. Specifically, people with a keen understanding of engineering theory combined with an aptitude for creating tangible results.

If you have, or are about to receive, a B.S. or M.S. in Electrical Engineering, Physics, Computer Science, Chemical Engineering, or Mechanical Engineering, and know the difference between a capstan and a soldering iron, we'd like to talk to you.

Depending on your degree, product-line interest, and even your avocational interest, you could be assigned initially to any of the following Ampex divisions: Data Products; Advanced Technology; Audio-Video; Magnetic Tape; Memory Products.

If you're one of the people we're looking for, see us on campus.

# Mustangs Romp, 'Greatest Team' Places Second

by JON HASTINGS  
Daily Sports Editor  
What is the funniest thing that can happen in football?

It has to be when a 6-3 football coach says, "We could have been 10-0 with a few more breaks."

Poly coach Joe Harper

## Season Opens This Weekend For Cagers

While most people will be getting fat on turkey, the Cal Poly basketball team will try and get fat in the win column.

Ernie Wheeler's bunch will open up their season this Saturday night against San Francisco State. The following Monday the Mustangs will play host to UC Davis. Davis went to the division II playoffs last year and Wheeler is expecting a tough game from them.

Last Saturday the Mustangs played Santa Clara even in a scrimmage up north. Wheeler was pleased with the team's performance and in particular the defensive play.

said it last Saturday night after his Mustangs thrashed Pomona, 44-6, in Mustang Stadium, but nobody was laughing.

The usual answer to a statement like that is, "Sure, and I'm the King of England." In Harper's case, however, you can't help but agree with him.

The Mustangs finished the year at 6-4 and lost the four games by a total of 18 points. They won all five of their home games en route to scoring 170 points to the opponents 50. They played one of the toughest schedules a Cal Poly team has ever been faced with. And they had more than their share of injuries.

"This was a great group of people, as well as football players," said Harper. "In many ways it was the best football team I have ever coached."

One of those people was Gary Davis who last Saturday scored three touchdowns in a game for the fourth time this year. Davis became the all time leading ground gainer in Cal Poly history. He closed out his career in style as he picked up 146 yards on 20 carries, including a 55-yard touchdown scamper.

Record-breaker Gary Davis (Daily photo by Wayne Thallander)

Davis wasn't the only player to go out on a big note. Seniors Cliff Johnson and Walter Mead combined on an 85-yard pass play to break a Poly record for the longest pass play from scrimmage.

Starting quarterback, Rich Robbins, gained 99 yards on the ground and completed three of five passes. John Henson gain-

ed 72 yards on 13 carries.

Once again, the offensive line was opening up holes all night. Kent Leland, Gordon Shaw, Kevin Kennedy, Glenn Hoving, Bob Ranger and Paul Freeberg drew nothing but praise from the opposing coaches.

The defense which gave up an average of 10 points a game at home, was as tough as ever against Pomona.

Led by the hard-hitting of Mike Jaeger and Mike Raymo, the defense shutout the Broncos for three and half quarters.

Mark Futak, a 225-pound defensive end, brought the house down in the fourth quarter when he intercepted a screen pass and took it 33 yards for a touchdown. Linebacker Dan Stansbury set up another score when he pick-

ed off a Pomona pass on the Broncos 29.

Poly finished the conference season with a record of 3-1 which was good enough for sole possession of second place. The sad part about that is the Mustangs weren't a second place team. At least not in the CCAA conference.

But there is always next year and that is what makes sports so interesting.
