"Weird" Al Yankovic returned to the site Tuesday where he recorded *My Bologna*, a take-off of the hit song, *My Sharona*.

Student's song tops the charts

BY CATHY SPEARNAK

Daily Editorial Assistant

Al Yankovic has a way with "b-o-l-o-g-n-a."

My Bologna, a comedy song by the Cal Poly student, is currently the most requested song on one syndicated radio show and that's no baloney.

Yankovic, a 19-year-old architecture major, said he wrote the take-off on *My Sharona*—the No. 1 hit by the Knack—"just for fun." After recording the tune to his own back-up on the accordion, Yankovic sent it to Dr. Demento, a nationally syndicated disc jockey renowned for his crazy antics on the air.

Dr. Demento played the song on KMET, his Los Angeles-based station. It was an immediate hit.

"It has made a big hit with my audience, to put it mildly," said Demento in a letter to Yankovic.

Yankovic said he was shocked by the song's success.

"I didn't even know if he'd played it or not and then I got the letter. After that I went around smiling for three days," said Yankovic, who is known to many as disc jockey "Weird Al" on the campus radio station KCPR.

The Lynwood native is not new to the song writing business. With his trusty accordion by his side, Yankovic has been writing novelty songs and take-offs on top hits since high school. He sent one of his first songs, "Belvedere Cruising," to Dr. Demento in 1976, and the tune made Demento's top 50 list that year.

After the airing of *Belvedere Cruising*, Yankovic and Demento became friends. Yankovic answered phones for Demento's show on KMET and occasionally dropped in to play his accordion live on the show.

"You could say Dr. Demento has always been my 'dementor,'" he said.

Other tunes by the ingenious student include:

—*Crampton Comes Alive*.

—*Mr. Frump in the Iron Lung*.

—*You Don't Take Your Showers Anymore*, a take-off on the Streisand and Diamond hit of last winter, *You Don't Bring Me Flowers Anymore*.

But the successes of his earlier days pale in comparison to "My Bologna."

The song, which rapidly became

the most requested song on the Demento Show in Los Angeles and San Francisco, is now a top hit across the country. Oddly enough, although the song is number one, it is not currently available to the public.

For the song to be released as a single, it must first be cleared with The Knack, which "shouldn't be too hard," said Yankovic, since a producer from Capital Records has already given The Knack a copy of "My Bologna."

Last week Yankovic received a call from a spokesman at Rhino Records, a label that puts out novelty singles and albums. The company heard the song and is negotiating with Yankovic to put together an album of his comedy songs.

Yankovic was amazed when he received the call from the record company.

"This week is like the peak of my life—I couldn't be much happier," he said.

The 4th-year Cal Poly student spent the weekend in the studios of KCPR putting together a demonstration tape for Rhino Records.

If the deal goes through and he cuts an album with Rhino, Yankovic said he already has an idea for the cover.

"I might call it 'Yankovic Comes Alive' and have a picture of a hand coming out of a grave, or something like that," he said with a laugh.

But how does he come up with the zany renditions of top songs?

"I just sit around with some friends and tear the songs apart," he said.

With "My Bologna," Yankovic said he heard The Knack's hit so many times he decided he could do something more with it.

"I thought 'this song is getting big and everyone's getting tired of it—there must be something that can be done with it.'"

Has all the excitement over his song made him think about giving up the life of a student and going into "show biz"?

"You can't believe how tempting it is—but I don't think so," said Yankovic who plans to continue his studies in architecture and graduate at the end of the summer.

Yankovic said he has no long-term plans for his recent success, and when everything is over, "I'll go home, take a shower and watch TV."

CSUC budget formulas

Administrators want changes

BY GREG CORNING

Daily Editorial Assistant

The current financial crunch among state institutions—brought on by tax reductions and an inflation rate over ten percent is not being escaped by any of the 19 campuses of the California State University and Colleges.

Budget problems are multiplied for Cal Poly, some administrators say, because of a long-standing circumstance—the high cost of operating a polytechnic university is not recognized by the Chancellor's office. For years Cal Poly, with its expensive technical, agricultural and engineering programs has been budgeted on the same basis as other campuses with more lecture-oriented programs, say administrators.

"There is no question that the programs we offer here are more expensive on the average than those on other campuses," said Douglas Gerard, dean of facilities planning. "Sixteen percent of our classes here are hands-on labs, compared to an average for the CSUC system of four percent."

At the center of the budget allocation issue are formulas used by the Chancellor's staff to determine how much of the total budget goes to each campus. All the formulas used to distribute CSUC funds are to some extent related to the number of students enrolled at each campus. At Cal Poly the number of students is limited to the present level so funds to the campus cannot increase substantially.

"There are standards or models used in providing faculty, staff and equipment to each campus," said Business Affairs Director James Landreth. "There would actually have to be a system change in order for there to be an increase in dollars to Cal Poly."

Two areas of the budget—faculty allocations and equipment funds are especially short because of the emphasis on lab-oriented, "hands-on;" methods of teaching at Cal Poly. Laboratory courses usually require a high teacher-student ratio, and they create a heavy need for equipment.

"The equipment budget has never been adequate," said Dr. Hazel Jones, vice president for academic affairs. "We're trying to keep the curriculum up-to-date with out-dated equipment."

Money for equipment comes from the state in two portions, said Jones. One part is for the purchase of up-to-date machinery and laboratory and computer equipment. The second part is a replacement budget for worn-out or out-dated equipment.

"The replacement-of-equipment budget is \$275,000 for a need of \$1.5 million," Jones said. "That's ridiculous."

What happens after being under-budgeted for equipment over a period of several years is accumulation of needed items, said Jones. The amount given to replace equipment becomes insignificant in the face of backlogged requests.

If equipment funds are inadequate, faculty allocations are

not much better, some administrators indicate.

Teaching positions are allocated mainly on the basis of units taken at each campus the previous year.

In talks with Cal Poly administrators, two problems with this system were detailed. One is that programs in which many labs are involved tend to have a high teacher-to-student ratio compared to lecture-oriented programs, so a relatively large number of positions are required per student. Secondly, labs usually are not worth as many units as are lectures, so students in a lab-oriented program do not produce very many units of credit, which has an impact when units are totaled up to determine faculty allotments for the next year.

Police arrest man on threat charges

A man suspected of making over 100 threatening phone calls to the San Luis Obispo Police Department early Monday morning was arrested after a team of armed policemen surrounded his home near Tropicana Village.

John Robinson Young, 28, of San Luis Obispo was booked on charges of violating parole and making threatening phone calls, police Watch Commander Bob Downey reported. He said it is suspected that Young is mentally disturbed.

a high-powered rifle and threatened to "kill cops—to kill the first officer that came near his house."

The suspect then began calling other law enforcement agencies in the area.

Downey said once Young revealed his name and location, a probation officer from the Mental Health Department was called. The officer told the police the suspect's threats should be taken seriously.

"For the safety of the community, they (the police) decided he should be taken into custody," Downey said in a phone conversation Monday afternoon.

The San Luis Obispo Special Weapons and Tactics team set up outside Young's residence at 82 Palomar Ave. They arrested him at

7 a.m. Monday.

In a press release, police said they got the first of over 100 phone calls shortly after midnight. Downey said the caller said he had

Downey said Young was "completely cooperative" and was arrested without incident. The suspect is being held in the San Luis Obispo County Jail. A hold was placed on him by the Mental Health Department. Downey said there is no apparent motive.

"He's nuts—he does this periodically. He just goes bananas," the watch commander said.

Opinion

Financial dilemma

Dividing up the money is a job that, in any government system, usually generates some disagreement. The same goes for the California State University and Colleges. Representatives from every campus and from the office of the Chancellor are meeting in committee to analyze the formulas currently used to determine who gets what. There is at least agreement, said Cal Poly Business Affairs Director James Landreth, that some changes need to be made.

That may be the good news, depending on which way changes go. For years administrators at Cal Poly have attempted to obtain recognition from the Chancellor in the formulas used to disburse CSUC funds. But, up to now, much of the dividing of funds primarily remained on the basis of how many students are at a campus and how many units those students took.

We agree with Cal Poly administrators including Landreth, Academic Vice President Hazel Jones and Executive Dean Douglas Gerard that it is time some compensation be made for the special financial needs of Cal Poly.

Special recognition in the budget should be given to Cal Poly for several reasons. One is that the philosophy of education at Cal Poly involves lab instruction. This type of education is inherently expensive. There is a much higher cost per student for such programs because of required supplies, equipment, facilities and faculty positions. By comparison, lecture-oriented programs of study are much less costly per student.

Of course, it could be argued costs should be cut by changing the mode of education at Cal Poly to a more lecture-based curriculum. But that would ignore the vote by many businesses and industries, which by their seeking of Cal Poly graduates have indicated their approval of "hands-on" education.

Another factor meriting consideration in funding the university is while almost every other CSUC campus is losing enrollment (at best they are holding steady) Cal Poly is turning applicants away. As long as the disbursement of funds is on the basis of units taken at each campus, Cal Poly will be more or less stuck at the present level of funding. Not only is expansion impossible at the current funding level, it is evident Cal Poly's technical, engineering and agricultural programs—as examples—cannot continue the current standards of excellence without a greater share of CSUC funds. These and other Cal Poly programs are not staying up to date with the changes in their fields because funding is insufficient for them to do so.

We encourage and support President Warren Baker and other administrators in their efforts to obtain better formulas for funding. This is important for the continuation of education at Cal Poly at the present high levels of quality. We—and thousands of applicants to Cal Poly—support the practical approach to education. It is hoped that Chancellor Glenn Dumke will begin to feel the same way.

Letters

Alcohol opinion

Editor:

Your editorial (Oct. 3) supporting the sale of alcohol on campus argues that the administration should not attempt to protect students from the "outside world." Since liquor is just off campus, your argument runs, why not bring it on campus?

Your view, however, completely ignores the fact that the university is not just another community. It's obviously a special, highly artificial world created by society to educate its (largely) young. So far as possible, outside influences of all kinds which might detract from this purpose have been consciously excluded or controlled. Those students, for example, who live on campus (mostly under 21) find themselves, strangely enough, in segregated dorms, most unlike the living conditions in the community at large. They spend most of their day in the highly artificial world of classrooms and labs and much of their evening studying. They eat, oddly, in a common mess. Commercial enterprises of all kinds are strictly controlled.

If the university were just another community, of course beer would be in order. So would other kinds of booze, as well as discotheques, I suppose, and maybe a massage parlor or two—competition, after all, holds prices down. To keep us from feeling that we might even yet be missing out on something that other communities have, perhaps we could establish a small industry somewhere on the edge of the campus—non-polluting, of course. And to complete the picture, every community has its skid row. Wouldn't it be quaint (and so much like the "outside world") to have our own special little slum, where student-winners, those who couldn't hold their liquor, could end up.

Isaac Walker
Associate Professor
English Department

Krans actions clarified

Editor:

In regard to your article of October 4, 1979, dealing with certain "questionable" appointments by ASI President Rose Kranz, I would like to offer some points of clarification. First, the President has no obligation to consult with the Student Senate regarding the tenure of appointment. The only requirement is that the Senate approve the appointees by a two-thirds majority vote (ASI Bylaws V.B.1d.). In regard to Internal and External Affairs assistants, the President shall make these appointments "in consultation with PEC (President's Executive Cabinet) and approved by 1/2 vote of Student Senate" (ASI Bylaws V.E.1a. and 2a.).

Other aspects of the article also require clarification. For example, the statement "Kranz also appointed her boyfriend, Phil Dunn, to the Academic Senate," is made completely out of context. For those who may not be aware, Phil Dunn was last year's ASI Vice-President and Chair of the Student Senate. I believe that these qualifications alone dismiss the implication of skulduggery in his appointment. Also, the allegations of impropriety in the selection of a number of other assistants are not based on the ability of these persons to perform their jobs, but on the fact that they are personal

associates of Rose Kranz.

As a third-year Student Senator, I have had the opportunity to work with any ASI officers and executive assistants. This year, for the first time, I have seen the Senate open the year really prepared to deal with the many issues it will be facing. One of the reasons for this is the hard work that Rose Kranz and her executive assistants put in prior to the start of school this fall. Personally, I feel that many of these accusations against Rose Kranz are the result of carried-over animosity on the part of certain senators over the results of last spring's dramatically close and highly emotional presidential election. I would hope that these few of my colleagues would be professional enough not to tear down the ASI internally by playing petty politics games. I would also hope that the student body would look at the issue more rationally than some of their elected representatives are, for contrary to some allegations the ASI government this year is a dramatically more "open administration" than has been seen in years past.

Brian D. Jarvis
Student Senator, School of
Human Development and Education

New Student Record refunds

Editor:

There are a number of new students at Cal Poly who ordered a New Student Record but have not received their copy yet. The following steps are suggested to help them get their book or to get their money back.

1) Check with your mailing address for last summer—that is where the book was specified to be mailed.

2) If you did not get your book, call Institutional Services collect person-to-person for Bob Snodgrass and tell him the details. The number that you should call is (415) 364-8865.

3) If you are unsatisfied with the book or the deliver, I.S.I. will give you a refund. You must sign up in U.U. 217A with the officers' secretary and provide your name, an address that the check should be mailed to, and the copy of the book which you are unsatisfied with.

4) If you would like a partial refund due to late delivery or would like to write to the company about the New Student Record, you should address your letter as follows:

I.S.I.
2625 Broadway
Redwood City, CA 94061

5) Remember, you may not get the correct information on campus or you may not get assistance unless you contact the ASI officers' secretary in U.U. 217A. She or another member of that office staff are the only persons who can help you and be of service.

I would like to express my regret that the books were shipped so late by the publishing company. It is my hope that the above information will help those students who have encountered a problem with getting their book.

Five jump from 'Golden Gate

SAN FRANCISCO (AP)—Four Englishmen and a woman who call themselves the "Bungee Jumpers" jumped off the Golden Gate Bridge Monday morning, their leaps broken by thick rubber bands that stopped them short of the water and bounced them back toward the bridge.

The men, one of whom suffered a bloodied right hand, wore formal morning suits, complete with topers. The woman wore a sleek jump suit. They were

arrested by the California Highway Patrol and charged with trespassing on bridge cables, as was a man who got tangled in his own lines and didn't jump.

When the jumpers quit bouncing at the end of their elastic or bungee cords, they let themselves down on ropes. Two "escaped" in a private boat waiting below. Three were grabbed by the U.S. Coast Guard, one of them fished from the water, 220 feet below the bridge floor.

'THINK LESS THAN 20/20 EYESIGHT WILL KEEP YOU OUT OF THE MOST ADVANCED AIRCRAFT IN THE WORLD? ... WRONG!!

If you want to get in the top in aviation, the Navy is the way to go. We offer unlimited opportunities as pilots and Naval Flight Officers.

As a pilot, you'll be trained to fly the most advanced jets ever developed. As a Naval Flight Officer, you'll operate the sophisticated weapon systems, computers and advanced electronics. As either, you'll wear the wings of Naval Aviation.

Commuter plane crash in Ohio

CINCINNATI (AP)—A twin-engine commuter plane lost power in an engine and crashed on takeoff at Greater Cincinnati Airport today, killing eight people, authorities said. Fred Farrar, an official with the Federal Aviation Administration in Washington, said the pilot and six other people died when Comair Flight 444 crashed while taking off for Nashville about 10:15 a.m.

The eighth person died at Booth Memorial Hospital in Florence, Ky.

Capt. Louise Bennett of the Salvation Army's Boothe Memorial Hospital said one victim was dead on arrival at the hospital and a second had died while being treated. The six other victims were reported still at the airport.

Newsline

Derailment called deliberate

GOLETA (AP)—The derailment of a train carrying acid and flammable gas that forced the evacuation of several hundred persons Sunday night and slightly injured three men was "apparently sabotage," a spokesman for Southern Pacific announced today.

Spokesman Rich Hall said, "It was apparently sabotage. There was a barricade on the tracks. The engineer reported seeing a barricade that was piled pretty high—timber, wood, concrete and that kind

of thing."

An 18-year old hitchhiker near the scene, Dean Burke, also said he saw something on the tracks just before the accident.

Hall said the damage to the 100 box cars and four locomotives would run well over \$1 million.

None of the 39 derailed cars contained the dangerous materials, said Southern Pacific trainmaster Bill Giles.

Testimony on nuke wastes

SAN FRANCISCO (AP)—The head of a California-based pro-nuclear group today called for "an end to constant vacillation" by the federal government on how to dispose of highly radioactive nuclear waste. "Radioactive wastes can be handled, transported, stored, and even permanently disposed of in a safe manner," Michael R. Peevey told a panel appointed by the U.S. Department of Energy.

Peevey is president of the California Council for Environmental and Economic Balance, a 6-year-old coalition of labor and business whose chairman emeritus is former Gov.

Edmund Brown Sr.

Peevey was one of a number of people scheduled to testify on a draft environmental impact report by the DOE on how to dispose of nuclear wastes.

The DOE will use the testimony to determine specific policies and sites for waste disposal.

W. Andrew Baldwin, of the San Francisco-based Friends of the Earth, assailed DOE's conclusion that radioactive wastes can be disposed of in the earth "with minimum environmental consequences."

Author Peter Marin

Author urges students to go places, experience people

BY DEBORAH TUCKER
Daily Staff Writer

Schools tend to isolate and create a caste system, causing students as well as Americans generally to be removed from "the real world," said educator and writer Peter Marin.

"I have a lack of trust for institutions," said Marin, the first speaker in the Communicative Arts and Humanities fall lecture series.

"People are damaged a lot by schools.

"There is no sense of moral responsibility. College makes you waste your time. The mind begins to deteriorate and so does human empathy."

But Marin did not say everyone should immediately quit school in pursuit of a free life.

"This is a society in which it is important to have credentials," said the graduate of Swarthmore and Columbia Universities.

Marin said people should begin to experience the world. He suggested that people travel and take odd jobs so they can form their own idea of the world and its people instead of simply taking the images that are popularized by the media.

"We are primarily responsible for teaching ourselves what the world is.

"Then we begin to judge for ourselves. Experience can change things faster than anything else," said the author of several books including "Understanding Drug Abuse," a book about adolescents and drugs, and "The Limits of Schooling."

"People should make decisions in terms of the people they know, and should have direct contact with people that are unlike them," said Marin. "It is only in this way that people

can judge for themselves and not draw their images and conclusions from media images and books."

"How can you be on their side (the minorities and disadvantaged) if they are not numbered among your friends?" he asked.

Marin suggested that people go to places that they ordinarily would not go, such as Watts and other poor areas of cities, to see how others live.

"In school students don't get the chance to practice relating to the world. Everything is scheduled for

you. You never get to see people being free," said Marin, a teacher and former director of Pacific High School in Palo Alto.

"Schools should teach people to educate themselves. They should make people ready for responsibility. Each group should decide what to study, how to evaluate, when to meet and what time to stop meeting," the educator said.

He added that in our present system the teacher and the student don't decide anything. Everything is scheduled by others.

Awareness, involvement discussed

BY VICKI MILLER

Daily Staff Writer

Awareness and involvement of the individual in his worldwide community was the theme of a speech by author Peter Marin last Thursday.

Work, Conscience and the Pursuit of Community, was the topic of Marin's lecture which kicked off the 1979-80 Arts and Humanities Lecture Series.

"We concentrate on

liberty very often at the expense of equality," said Marin to a crowd of about 80 people.

"Everything—work, play and worship—occurs in a context that is defined by other persons' existence," said Marin.

"All of us have an innate sense of distributive justice," said Marin. "But if we don't see the starving or poor first hand we are likely not to follow our natural desire to

help them. Only by taking an active part in working toward the common good of a world community can people develop a sense of meaning in their lives."

Marin, the first of several Arts and Humanities lecturers in the series "Work, Play and Worship" is author of the book "In a Man's Time." His criticism of American culture and cultural history has appeared in the *Los Angeles Times* and in *Harper's* magazine.

Dickens and defense whip Fresno

BY KELLYE WISE

Daily Staff Writer

Fullback Paul Dickens rushed for 163 yards and with the defense picking off five passes, the Cal Poly football team pounded the Fresno State Bulldogs 26-0, Saturday night before 8,600 fans, the largest crowd ever at Cal Poly.

"They beat us everyway

they could," said Bulldog coach Bob Padilla. "They outplayed us and outhit us."

With the Mustangs top two tailbacks, Louis Jackson and Jim Colvin, out for the game, Dickens responded by gaining 163 yards in 35 carries, by far his best performance as a Mustang.

Cal Poly's veteran offensive line opened holes all

night for Dickens and Robbie Martin. Martin, usually a wide receiver, showed his versatility by playing tailback in certain situations against Fresno State. He carried the ball for 61 yards, and even threw a touchdown pass. Martin hit Mike Gilmore with a pass for a seven yard score midway into the third quarter. Quarterback Reid Lundstrom also used Martin as a receiver, hitting him with four passes for 69 yards.

In the first half, the Mustangs' defense did all the

scoring. Defensive end Tom Gilmartin tackled the Fresno State quarterback in the end zone for a safety during the first quarter. Then, early in the second period Ralph Gallagher intercepted a pass and returned it 22 yards for a touchdown.

This week the Mustangs challenge Northern Colorado in the Homecoming game. Last year the Mustangs were undefeated when they traveled back to play Northern Colorado, and were upset 15-10.

Mustang Daily—Kris Angell

Cal Poly running back Dan Craig dives for extra yardage against the Fresno State Bulldogs. The Mustangs overwhelmed Fresno 26-0. The football team will play the University of Northern Colorado next Saturday night in the Homecoming football game here.

ENGINEERS WANTED

By Morrison-Knudsen Company, Inc. to Support Construction and what a better way to help today's growing world and to build for tomorrow's generations by leaving something concrete behind! Morrison-Knudsen's Corporate Engineering Department has superior engineers with the experience and expertise to do it all—from dams, off-shore islands outfalls, pipelines and power plants to tunnels and even concrete cities—you name it and chances are we have done it almost everywhere within North America, the Arctic, Indonesia and the Middle East to name a few.

Morrison-Knudsen's constant success worldwide continues to be attributable to the retainment and development of the most qualified individuals willing to walk that extra mile.

If construction and engineering are in your future, we want to talk to you. See your placement director about arrangements for a personal interview with one of our Personal Representatives. If you have additional questions we will be glad to answer them for you. Morrison-Knudsen representatives will be here on October 10 and 11. If you are unable to meet with our representative send your resume to:

CHICAGO (AP)—
"That's enough" said the
strangely dressed robber.
Then she took the money and
ran, although the teller was
ready to hand over more.

Police were searching
today for a young woman
who was wearing both a pair
of jeans and a skirt when she
robbed the Pioneer Trust and
Savings Bank of \$2,000
Tuesday.

Police said the woman
entered the bank about 3:30
p.m. and handed a woman
teller a note saying: "This is
a stickup. Do not press the
alarm. Give me all your 5s,
2s and 1s. No one will be
hurt."

The teller handed over two
bundles of \$50 bills and was
getting more money when the
robber suddenly said "that's
enough" and fled the bank,
police said.

Keyes continues to shine on the cross country courses

Maggie Keyes again won a cross country meet in course record time at the Cal Berkeley Invitational.

The women's team placed third overall, with Arizona taking first over Cal Berkeley. Coach Lance Harter was pleased with Keyes' performance and was glad to see the rest of the women run in a tight pack.

"Maggie has claimed two

records in as many weeks and her upcoming race at Stanford already has her name on the course title."

NEW YORK (AP)—A part-time sociology instructor has pleaded guilty to biting off the end of his estranged wife's nose during a heated quarrel over custody of their two small daughters.

Harter said. "Our second through sixth runners also ran

well as a unit."

The team goes to the

Stanford Invitational next weekend to face many of the same teams they ran against last Saturday.

Mustangs run against Kenyans, come in close second

Mustang Daily—Gregor Robin

Jim Schankel is shown finishing a recent race in first place in the Aztec Cross Country Invitational last Saturday. He finished third to two Kenyans, but not without putting up a fight over the 1,000 meter course. He held on until the three-mile mark in 13:56 before the Kenyans surged ahead.

BY GREGOR ROBIN
Daily Sports Editor

"I would say we're one of the three best American teams in the country, and one of the five best teams in the country."

Coach Miller's words were put in gear last Saturday when the Mustang cross country team went up against the defending division I champions, The University of Texas at El Paso. Miller made the distinction between "best American team" and "best team" because there are foreign athletes competing on cross country teams across the country. UTEP is one such team and their top two athletes placed one and two in the Aztec Cross Country Invitational at Balboa Park in San Diego.

Cal Poly's top runner, Jim Schankel, placed third to UTEP's winner Jim Rotch and runner-up Suleiman Nyambui on the 10,000 meter course. Nyambui ran the fastest 5,000 meters in the world last track season, but Rotch beat him on the course in San Diego because, said his coach, Ted Banks, he is in the best shape of his life. Schankel was there to witness

Rotch's as well as Nyambui's shape and he was impressed.

"It was the quickest I've gone in my life," Schankel said about the 4:37 first mile time. "At the first mile there were five of us. By the second mile Rotch was a little bit ahead. After the third mile I was just trying to hold on."

And that he did, beating Thom Hunt, who was the third place finisher in the division I Cross Country Championships last year and ran the second best time for the steeplechase in the country (8:26.8) in track competition last season.

Schankel's time was 30:04, while Rotch's winning time

was only 14 seconds faster, 29:50.8.

Coach Steve Miller's main concern before the race was that the team not be intimidated by UTEP.

"If we got blown out it would destroy our mental outlook," he said. "I know that Schankel is making a bid for the Olympics, and Danny Aldridge is also. But our third through seventh men aren't great athletes by standards of comparison, and they were running against the greatest athletes in America. The only powerhouse that didn't show at this meet was Oregon, and we placed second."

Individual finish: Jim

Schankel, 3; Danny Aldridge, 8; Eric Huff, 14; Manny Bautista, 20; Ivan Huff, 26; Terry Gibson, 29; Jack Marden, 53.

Team finish: UTEP, 41; Cal Poly, 69; Northern Arizona, 93; Arizona, 110; Northridge, 161. There were 14 teams in all.

The men's B team competed in the Cal Aggie Cross Country Invitational at UC Davis and it came in third out of 12 teams. Tom Becker led the team in scoring, coming in eleventh over the five mile course with a time of 24:52. He was followed by Jeff Small (fifteenth) and Paul Duelo (nineteenth) of Cal Poly.

Congratulations to our new Members:

Love Your Sisters!

Me, take another exam? Are you crazy?!

Q. The Navy Officer Qualification Test (NOQT) is a piece of cake, right?
A. Not necessarily.

If you're majoring in engineering or another technical area, we would expect you to do better on the test than an inner Mongolian Cultural Arts major, but you won't hear us telling anyone that the test is easy. The NOQT is an aptitude exam dealing with number and letter comparison, instrument interpretation, word analogy, practical judgement, mathematical reasoning, and mechanical comprehension involving gears, levers, pulleys, fluids, etc. For those interested in an aviation program, there is an extra section dealing with aircraft orientation.

The Navy Officer Information Team will be administering the test Fri., Oct. 5, at 8 A.M. and 1 P.M. in Trailer 260-2 (by the Graphics Dept.), Mon., Oct. 8, at 8 A.M. and 5 P.M. in Trailer 260-2 (by the Graphics Dept.), Tues., Oct. 9 at 8 A.M. and 1 P.M. in Trailer 260-2 (by the Graphics Dept.), Wed., Oct. 10, at 8 A.M. and 5 P.M. in Trailer 260-2 (by the Graphics Dept.), and Thurs., Oct. 11, at 9 A.M. in Trailer 260-2 (by the Graphics Dept.).

Tests will be scored immediately and an Officer will be available to discuss your results and the various programs you may want to consider.

Taking the exam in no way obligates you to the Navy, but it just might tell you something about yourself. Come in and give it a shot—you might even pass!

THE SKY'S THE LIMIT IN NAVAL AVIATION.

If you want to get to the top in aviation, the Navy is the way to go. We offer unlimited opportunities as pilots and Naval Flight Officers.

As a pilot, you'll be trained to fly the most advanced jets ever developed. As a Naval Flight Officer, you'll operate the sophisticated weapon systems, computers and advanced electronics. As either, you'll wear the wings of Naval Aviation.

If you're a college man in good physical condition, Naval Aviation could be your route to the top. Find out about it and inquire about a free flight at our booth in the snack bar today and tomorrow from 9:30 a.m. until 2:00 p.m.
