A reformed alcoholic now a grad student

## Student's 10-year nightmare is over

BY JOHN KELLER

Daily Co-Editor

"I had to realize that the shit they sold on the shelves was poison."

Those are the feelings of Bill Arblaster, 32, a reformed alcoholic who is in the second year of what he called "starting life all over again." After suffering from alcoholism for 10 years, the lean, bearded, slow-talking man is enrolled in an English graduate program at Cal Poly.

I met Bill while researching information at the Cal Poly Health Center on alcohol abuse. At the time he wanted to write a letter to

From age 20, when he became an alcoholic, Bill said his life was one big blank until he reformed at age 30.

"I look back and I had beautiful experiences," he said. But he said he did not have any personal growth. He called the period of his addiction a "big joke."

### First of three parts on alcoholism

The earliest stages of Arblaster's alcoholic health problem took place after he quit school to work for the U.S. Postal Service. In 1967, Arblaster decided to tem-

changed his friends and environment and helped solve part of his problem. Arblaster moved in with a girlfriend two years after graduating from UCLA. Then the pair moved to New York.

The couple had a son, but Arblaster wanted to leave because of his alcohol problem. His abuse was such that he turned away from his baby and the mother because he "wasn't good enough for them."

At age 25, he left New York to return to Venice and the postal system.

"I knew I could get by," Bill said.

"With the same job in the same town," Bill said, "I could keep drinking."

He lasted as a postman for three years.

His health declined and early stages of emphysema were developing. Alcohol circulated in his bloodstream for 10 years and burned the cilia lining his lungs.

The drug rehabilitation program at Camarillo State Hospital was a turning point for Arblaster, but it was a single traumatic incident that initiated his turn-around:

Arblaster saw a four-year-old girl killed at an intersection in Venice that had no light. The intersection was dangerous to pedestrians.

Seeing the young girl killed moved Arblaster to try and change the traffic death trap. He petitioned to have a street light constructed at the corner. With 5,000 signatures and TV news coverage, Arblaster realized what a waste his life was with alcohol.

"I knew I was capable of doing other things," he said.

He decided to commit himself to Camarillo State Hospital to detoxify his system. It took three days to flush his body of the drug, yet he said, "I began feeling it three weeks after that."

It was then, "I felt the monkey sliding off my back," said Arblaster.

Bill saw his young son again after he left Camarillo and "it was like seeing him for the first time."

Mustang Daily—Glen Coleman

And now, two years after shaking alcoholism, Arblaster is living in Morro Bay hoping to open a shop to sell imported goods from Mexico and second-hand merchandise.

"I'm pretty community-minded these days," he said.

The graduate student is back in school again and wants eventually to teach and counsel on alcohol abuse based on his exposure to an increasing knowledge of alcoholism. He plans to work at the Health Center with the Alcohol Education Program, which is six

months old.

Alcohol abuse is something Bill never learned about while growing up. He said he fell into alcoholism without knowing it because no one ever warned him of habits and symptoms and what they lead to.

"I had all the classical symptoms," Arblaster said. "I don't think I need to tell everyone to scare them. My story is nothing. If someone wants to get scared, tell them to go to an AA (Alcoholics Anonymous) meeting. They'll get the message."

Bill Arblaster

Mustang Daily—Glen Coleman

the editor in response to an editorial appearing Oct. 3 in the Mustang Daily advocating the selling of alcohol on campus. He intended to voice his disagreements through a letter, but wanted the chance to share his alcoholic nightmare in an article as well.

"People say once an alcoholic, always an alcoholic and that's the truth. But you don't have to drink," said Arblaster.

"That point is that I'm a reformed alcoholic. I never even met a reformed alcoholic and the whole point of this interview is my desire not to hide my experience in life. It is to share it and to confront the bias against reformed alcoholics."

He requested that the article include his name.

"I'm proud that I'm a reformed alcoholic. Not saying who I was, is like not becoming sober," said Arblaster.

It took him 10 years to sober up. Arblaster said he first realized his dependence on alcohol eight years before knocking it out of his life.

"I was drained," Arblaster said. "I realized I was capable of doing other things."

porarily quit UCLA after three years to go to work for the post office in Venice. Many postmen there were older than he was or were war veterans and had serious drinking problems. At lunchtime, about 80 percent of the crew in the building where he worked drank their lunch from noon until three p.m. he said.

"The first day (at work) I cased mail from six (a.m.) until nine. I delivered from nine until twelve and drank from twelve to three before I went back to work."

One day a full-time mail carrier left for six weeks. Arblaster substituted and during those six weeks he drank consistently.

Working among heavy drinkers and establishing a daily drinking period were not the only factors hanging Arblaster up on alcohol. His first girlfriend ended their relationship six months after they had begun living together.

Arblaster enrolled again at UCLA after she "cut him loose" and he received his bachelor's degree in anthropology. About this time, his drinking problem became evident.

A second love relationship

## Prostitution hunting

In an effort to crack down on prostitution, Mayor Edward Koch of New York has instituted a modern day witch hunt of sorts.

Last week the mayor ordered a New York City radio station to begin broadcasting the names of men caught patronizing prostitutes.

"We're going to call it the 'John Hour'," Koch said in a quote from a United Press International article.

The mayor said he is bothered by what he views as unequal treatment by the courts between prostitutes and their clients, and he thinks public pressure can be applied to both partners in a "sex-for-sale" liason.

"I believe that the best way to deter people from committing some crimes—not all crimes—is to bring on public pressure and attention," said the mayor.

Koch's bold move can be applauded in one sense—someone is finally taking steps to see that the man, as well as the woman is chastised when both are arrested for prostitution. For too long, laws dictated responsibility for the act fall entirely on the women who solicit their favors and not the men who receive them. This is a gross injustice.

On the other hand, it seems silly the mayor is even trying to stop prostitution in The Big Apple. Isn't there enough crime in New York—and for that matter in the rest of the country—to keep police busy, instead of utilizing their time trying to stop a so-called "victimless crime?"

Koch's move is a hilarious example of the time, money and effort wasted in trying to stop these crimes.

People of one sort or another have probably opposed the world's oldest profession since the day it was begun. In fact, one of Koch's statements confirms that idea.

"You know in the old days, the Pilgrims put people in the stocks," said the mayor. "People would pass by and say, 'look at that guy, he's in the stocks. He must have been with a prostitute.' That deterred people."

It might have deterred people, but it obviously did not stop them or we would not still have the problem. Koch broadcasts the names of men who were caught soliciting "tricks" as his modern version of the stocks—a way to publicly embarrass people for their behavior.

The Puritan ethics our country has been raised on can clearly be seen. Prostitution is a no-no.

If prostitution must continue to be looked upon as a crime, Mayor Koch is doing a service by judging equally the men and women who indulge in it.

But announcing mens' names over the radio is not protecting anyone—possibly because there is nothing to be protected from.

Frawls

### Econ counterfeit

Editors:

The *Mustang Daily* editorial on Friday, "Economic Lifesaver", was a poignant example of the patent nonsense so prevalent among the media and among establishment economists. Inflation is not caused by greedy businessmen. Neither is it caused by workers demanding higher wages. And, the Carter administration notwithstanding, neither is OPEC the culprit.

An overall decrease in the supply of goods and services has almost never happened in recent years. Therefore, if consumers must pay more for things, it must be because the money they use is not as valuable as before. They must use more of it to buy the same item. The focus, then, must be on money, or more precisely, on the supply of money. The more money that enters the marketplace, the less valuable each unit will be.

Now, who controls the money supply? Your government through the machinery of the Federal Reserve does. The government essentially engineers "legalized counterfeiting" through the banking system by authorizing new bank deposits. In short, the state monetizes its burgeoning debt. That is inflation.

Contrary to your editorial, the Federal Reserve has not "bravely extended a helping hand... to hoist the United State economy..." The Federal Reserve and the government are desperately trying to stem the tide of a runaway inflation that is the direct result of years of political flim-flam that has brought our economy to the brink of disaster. We must all strive to pierce through this cloud of obfuscation and scapegoating. The Federal Reserve is not the doctor. It is the disease!

### Petition refusal

Editor:

We urge you NOT to sign a petition which is being passed around by the real estate interests—calling themselves "Californians for Fair Rents." In contrast to the large print description of the initiative which deceptively suggests that it is a rent control measure, the initiative itself is really an ANTI-rent-control measure.

This initiative would amend the California Constitution to deprive California citizens of the right to vote on any meaningful rent control ordinance.

1. It prohibits ANY state-wide rent control law.
2. Any local rent control law would have to be voted on over and over every time there was a local election (every two years for the City of San Luis Obispo).
3. If a short-term local law were passed, the initiative would guarantee that any time a tenant moved out, a landlord could raise the rent to ANY amount he/she desired.
4. It prohibits local representatives, such as the City Council or County Supervisors, from enacting any form of fair rent ordinance. It makes any fair rent action go to the people for voting at the expense of the taxpayers.

If you are interested in making housing more affordable, you may be interested in the formation of a Housing Acting Group for the county of San Luis Obispo. A meeting to organize this Group will be held in the recreation building in Meadow Park in South Street in San Luis Obispo on Saturday, October 20, from 3 p.m. to 5 p.m. All are welcome.

For faculty, staff

## Expansion of Health Center services discussed

**BY JEANNINE FRANUSICH**

A proposal that the Health Center offer services for faculty and staff members was discussed Wednesday night at the ASI student senate meeting.

Dean of Students Russell Brown said the Health Center is suffering from "a financial crunch" and of-

fering health services for faculty and staff members may be one way to alleviate the problem.

Currently, faculty and staff members are offered emergency care and immunization services. If faculty and staff use of the Health Center is approved, they would pay on a fee-for-service basis.

Some senators expressed concern that the Health Center may become too crowded and that the wait for an appointment could be longer if faculty and staff were to use the facilities.

Brown said the Health Center has adequate space to accommodate the increased number of patients.

The possibility of the Health Center offering physical examinations as a basic health service was also considered.

Several senators were opposed to the five to six dollar increase that would occur in health cards if the service were included in the health card program.

Senator Anne Perry, business, questioned whether students would even use the service if it were offered.

Brown said in order for the Health Center to accommodate rapidly increasing operation costs, the fee-for-service rates of all services will probably be

raised to more adequately reflect current prices.

"Costs have gone up more than the income (of the Health Center)" Brown said.

Brown said a 25 percent salary increase was approved for the physicians in July. He said the salary increase still sets Health Center physicians' salaries below other physicians in San Luis

Obispo.

ASI vice president Jeff Land said a \$430,000 cut in health services in the CSUC system largely contributed to the financial crunch the Health Center is feeling.

In other student senate action:

—ASI President Rose Kranz presented a survey

that will be conducted this quarter to find out how students feel on the issues of alcohol on campus, athletics and commencement.

Kranz said the major objective of the survey is to "help us understand where they (the students) are coming from and what they would like to see."

## Poly student killed

A Cal Poly student was killed Sunday morning when the car in which he was a passenger collided with another car. The driver was also killed.

A spokesman from the California Highway Patrol said Brian Johnson, 18, a mechanical engineering major from Costa Mesa, was pronounced dead at Sierra Vista Hospital after resuscitative action by the emergency room personnel failed.

Joseph Hindman, 18, from Huntington Beach, was dead at the scene.

Deputy Richard Powell of the San Luis Obispo Sheriff's Department reported that at 12:26 a.m. Oct 14 Hindman was traveling north in the southbound lane of Highway 101. His car collided with a southbound vehicle on the Morro Street overcrossing.

The seven passengers and driver of the other car received minor to moderate injuries.

## Physicist: Third World needs nukes

**BY ANDREW JOWERS***Daily Staff Writer*

Edward Teller, pioneer advocate of nuclear power, called for the continuing development of nuclear reactors to stop the "hemorrhage of dollars" spent on Arabian oil and to insure enough energy to feed the starving Third World.

Teller, who helped develop the hydrogen bomb, gave his keynote address at a nuclear power symposium Thursday night at Cal Poly.

Calling California the "greatest sinner" in worsening the energy crisis, Teller said nuclear reactors are necessary for humanitarian reasons.

"We need all the energy we possibly can get," he said.

Teller said the economic ailments accompanying a severe oil shortage—accelerated inflation rate and increased unemployment—would be off-set if the United States relied more on nuclear reactors.

Industrialized countries including West Germany and Japan face greater energy problems than the United States, he said. But he said underdeveloped countries are the worst off. Those with budding economies have increased their per capita energy consumption three fold between 1950 and 1975 (the per capita energy consumption in the United States rose 70 percent in the

## SLO lacks radiation treatment

BY VICKI MILLER

Daily Staff Writer

"Totally unprepared" is the way one San Luis Obispo official described the county's readiness for nuclear power at a recent symposium.

"We are likely to have a nuclear power plant functioning in this area in the near future and we are totally unprepared," said Howard Mitchell, San Luis Obispo Health Agency Director.

Mitchell was a panel member at a public forum on *Nuclear Power and Public Health* at Cuesta College last Wednesday night. The health director was the only speaker to be applauded by the over 250 people present, many of whose cars in the parking lot carried "anti-nuke" bumper stickers.

"What we have been hearing so far are future subjunctives. I would like to talk to you in the present tense," said Mitchell, the last of the speakers.

Presently, a small facility at French Hospital is prepared to care for patients exposed to excess radiation said Mitchell. The hospital facility can handle six people.

The emergency services that the San Luis Obispo Health Agency is trying to develop are:

—a working evacuation plan for all people within the danger zone of Diablo Canyon, including special services for the disabled

—preparation of food, drugs, shelter, sanitation, and water supplies

—a potassium iodide distribution plan (a drug used to prevent thyroid cancer)

—a long range plan to monitor the health of those exposed to excess radiation.

Communications during a nuclear disaster would be a problem, said Mitchell. The last time a nuclear disaster drill was held the radio equipment was insufficient and participants had to resort to using a pay phone. A radio signal booster is needed, he said.

The greatest risk from operation of a nuclear power plant said Conyers Herring, is not the "spectacular accident," but the risks of cancer and future genetic problems.

"The likelihood of a major release of radioactivity to the environment is one in 300," said Herring.

Mitchell said that San Luis Obispo is not prepared for any type of radiation problem.

"I don't think a plant should start until we can deal with it," he said.

ALBANY N.Y. (AP) You can take it from Captain Kangaroo children who grew up glued to the television antics of Mr. Greenjeans and Bunny Rabbit are reading more books than ever.

That part of the message the durable children's idol brought to educators at a "Parents as Reading Partners" conference sponsored by the state Senate's Education Committee. Captain Kangaroo, known off screen as Bob Keeshan, said that in the early days of

Mustang Daily—Bill Gutoff

## Teller

From page 4

same period). Other Third World countries have barely surpassed their Stone Age energy consumption.

"There is no chance of human existence that is worth of the name human existence," without adequate power, Teller said.

The symposium was sponsored by the agricultural fraternity Alpha Gamma Rho in cooperation with the Scientists and Engineers for Safe Energy, California Council for Environmental and Economic Balance, and Pacific Gas & Electric Co. It featured a panel of scientists to support Teller's pro-nuclear stance. On the panel were Professor Miro Todorovich and Dr. David Bodansky, physicists; Dr. John Blume and Dr. Douglas Hamilton, geologists; and Dr. John McCarthy, a computer scientist.

Each panelist gave his view of the nuclear issue. The consensus was that:

—nuclear power is the safest and cleanest form of energy.

—fear of radiation is the anti-nuclear movement's main concern.

—nuclear waste disposal is a surmountable problem because of the small amounts involved (Bodansky said one reactor produces 70 cubic feet of waste per year).

—nuclear arms proliferation is a concern, but by insuring underdeveloped countries of enough power to boost their economies, fighting would be made unnecessary.

—nuclear power plants are safe enough to withstand

projected earthquakes.

Teller received a standing ovation from the capacity crowd of more than 500 when he left the stage.

## 300 nuke supporters gather at Cuesta College

BY MARYANN GILPATRICK

Daily Staff Writer

Diablo Canyon supporters gathered Saturday in Cuesta College auditorium to discuss political, economic and scientific issues related to nuclear energy.

Speakers from as far away as New York stood at a podium beneath a banner boldly lettered "Nuclear Energy Education Day." A crowd of about 300 cheered eight speakers in a program sponsored by the pro-nuclear groups Alliance for Safe Available Future Energy and Nuclear Energy for Environmental Development.

John R. Stoessinger, a political scientist from the City University of New York, said nuclear power is essential for American's "life, liberty and pursuit of happiness." He said nuclear weapons have saved lives by preventing limited wars—Korea and Vietnam for example—from becoming world wars.

He said in order to pursue happiness, Americans must value the work ethic. According to Stoessinger, anti-nuclear people are "essentially the unproductive people," who will be unable to provide their children with the present standard of living and happiness.

Self-employed nuclear engineer Sandra J. Keifer, who came from Pittsburgh to speak, discussed the nuclear waste system at Diablo Canyon. She said she helped design numerous nuclear power plants.

Keifer said nuclear waste, or spent fuel, would be converted to an inert ceramic form and stored in pools of neutron-absorbing water at the power plant. She said it would be handled under water, by remote control, to insure plant workers' safety. The spent fuel would remain stored at Diablo until a permanent underground disposal site in a geographically stable area could be developed.

## Mustangs fight back in third quarter to beat UNC, 17-3

BY KELLYE WISE

Daily Staff Writer

On Saturday night, the Northern Colorado Bears almost upset Cal Poly agains—almost, but the Mustangs pulled it out 17-3.

Behind 3-0 late in the third quarter, the Mustangs appeared as though they might get upset. Last year an undefeated Cal Poly team traveled to Greeley, Colorado to play the Bears and was upset 15-10.

On Saturday night it was a different story.

The Mustangs started moving the ball, and scored a touchdown with just over two minutes left in the third period. Paul Dickens scored the touchdown on a nine yard sweep around left end.

After a high snap from center, Graham Wiggill missed the extra point. Wiggill had made 49 consecutive extra points going into the game.

Earlier in the third quarter, Northern Colorado's starting quarterback, Al Winslow was injured. With less than a minute left in the period, Winslow's replacement, Frank Boyce had a pass picked off by Ralph Gallagher. Gallagher, for the second game in a row, returned the pass for a touchdown. This time he went 33 yards for the score.

After the ensuing kickoff, Wiggill kicked a 44 yard field goal to end the game's scoring.

Cal Poly's offense moved the ball in the first half, once all the way down to the Bear 2 yard-line, aided on the drive by a fumbled punt. The Mustangs powerful defense held, and the Bears settled for a field goal.

Paul Dickens had another

outstanding game for Cal Poly. He gained 142 yards on 33 carries. Tailback Jim Colvin returned to the lineup with 77 yards on 14 carries, an average of over five yards per carry.

In the first quarter, and then again late in the third

quarter, Cal Poly unveiled a new offense. In a lineup similar to that of the Dallas Cowboys, the Mustang ends would lineup in the backfield, and the running backs on the line. Then there would be a shift, with the ends and backs reversing places. The motion seemed to confuse

the Bear defense, as the Mustangs gained yardage every time they tried to offense.

On Saturday, October 20, the Mustangs travel to Northridge to play the Matadors in a 7:30 p.m. game.

## Men breeze at Stanford Invite, women run

BY GREGOR ROBIN

Daily Sports Editor

The fellow who designed the 1978 Stanford Invitational men's cross country course was probably demoted to designer of the women's course, for 1979.

Last year, Jim Schankel took a wrong turn on what

Coach Steve Miller called a course with poor markings. Schankel's mistake cost the 1978 team a victory, but this year he stayed on course and won his third straight meet this season leading his team to its third victory. The problems in course following came in the women's race.

"Maggie Keys saw a faint arrow going the wrong direction, and she started to go that way, but cut back on the right course, losing five seconds because of the

mistake." Women's Coach, Lance Harter said.

She led the women's team to a second place finish out of over ten schools. It was a very large meet with approximately 200 women runners.

The men's team as well as the women's team is still in the hunt for the runners able to fill the seventh spots. Coach Miller said that all questions will be answered after the Cal Poly Invitational next weekend.

Danny Aldridge placed seventh in the Stanford race and remains consistent on the cross country courses, Miller said. Manny Bautista placed ninth, Terry Gibson came in tenth and Eric Huff rounded out the team scoring in thirteenth place.

"Paul Duolo was the first guy in our second seven to finish," Miller said. "The guy's never really run before, I think he ran at Harbor Junior College only one season."

### EE - ME Computer Science Grads:

## THINK About Your Future!

We do - both yours and ours. Ford Aerospace & Communications Corporation, located in Palo Alto, California, has a broad capability in total space and terrestrial communication systems and services. This capability, developed over the past decade and a half, encompasses communication and meteorological satellites, earth stations, space vehicle communication equipment and instrumentation, command and control systems, operation of space vehicle control centers, software development and large computer networking projects.

What does this continued growth and expansion mean to you? Our success means an exciting, challenging and meaningful environment where your ideas and talents will be utilized to the fullest. It also means ample opportunity for career advancement and rewards to match in a truly professional and highly technical state-of-the-art atmosphere.

**ELECTRICAL ENGINEERING** — Engineer or Associate Engineer  
Areas of specialization include digital logic design, microprocessor applications, systems engineering, computer networking, communication systems, signal processing, data control and display, RF microwave, satellite systems, antennae systems, and analog and digital circuit design. BS, MS, PhD: EE

**MECHANICAL ENGINEERING** — Mechanical Engineer - Integration and test, spacecraft propulsion, composite materials, product design, electro-mechanical packaging, mass properties, lightweight aerospace structures. BS, MS, PhD: ME

**COMPUTER SCIENCE** — Software Engineer, or Engineering and Scientific Programmer - Areas of specialization include computer networking, data base management, microprocessor design automation aids, image processing, operating systems, systems architecture, test and diagnostic software. Languages employed are structured FORTRAN, C, ALGOL, PASCAL. Work on large-scale computers, minis and micros in HOL's and Assembly language. BS, MS, PhD: CS

How would you like to join us? Our representatives will be on campus FRIDAY, OCTOBER 19. Please sign up at the Placement Office or write to Professional Employment, 3939 Fabian Way, Palo Alto, CA 94303. We are an equal opportunity employer male/female.

## Volliers begin turn-around

BY BRIAN MILLER

**Daily Staff Writer**

With round two of S.C.A.A. play coming up, Mike Wilton knows his women volleyballers are going to have to play tough to stay in the thick of it.

After a slow start in which they lost their first two conference matches, the Mustang netters have bounced back to win their last two and have an even 2-2 conference mark.

The Mustangs swept Cal State Los Angeles Friday night 15-4, 15-11, 15-6. On Saturday afternoon they bucked the Broncos from Cal Poly Pomona 15-7, 15-2, 15-3, to round off a successful homecoming weekend.

All this is impressive, but there is a small catch. Both L.A. State and Pomona have fairly underdeveloped volleyball programs. Both are floundering in the S.C.A.A. cellar.

Friday night in the Cal  
Poly Main Gym. the

## Mustangs play Irvine.

"This Friday night is the biggie," noted Wilton. "Irvine is looking awesome. They beat Santa Barbara in the San Jose tournament earlier. They've also beaten Northridge, whom we lost to. They lost to Santa Barbara in five during the first round of conference, but then they edged San Diego State in five. San Diego State is ranked fourth nationally."

Against Cal State L.A. Friday night the Mustangs flexed their muscles from the opening point. Both Aileen Semonsen and Susan Forte hit over 40 percent efficiency on spikes. Wendy Lewis and Kathy Lynch were playing excellent defense and CSLA buried themselves in their own mistakes.

"I thought we played very well," said Wilton. "Everybody got to play tonight. I was pleased with the fact that there was a fairly high level of intensity. With a 2-2 conference

record, and an 8-6 mark overall, the Mustangs need to keep right on winning. According to Wilton, Irvine, Santa Barbara, Northridge and Cal Poly are all capable of beating each other on any

given night. For the Mustangs, they hope a given night is this Friday against Irvine. This is Cal Poly's next to last home match and will begin at 7:30 p.m.

## Chess team wins in area tourney

The Cal Poly chess team virtually clinched their third straight league title by defeating Santa Maria 4-0 and Santa Ynez 2½ to 1½ in the Central Coast Chess League Tournament.

In each match the Mustang's top two boards, Michael Wood and Robert Martin, racked up quick wins, but the lower boards

were in doubt until the last move. Eric Neilson, in extreme time trouble managed to checkmate his opponent and Michael McHugh saved his match by holding onto a draw.

Cal Poly is first in league standings with a 4-0 record, while Morro Bay is second, Santa Maria third, and San Luis Obispo fourth.

The Harlem Globetrotters' replacement for Medowlark Lemmon is Twiggy, a lean, but cheerful basketballer. He pulled children out of the audience and buzzed around the court—arms flapping,—like a stork Sunday night in the Cal Poly Main Gym.

Tickets are still available for the game between the Los Angeles Lakers and the Portland Trailblazers of the National Basketball Association. They can be purchased at the University Union ticket office for \$4. The regular price for tickets is \$7. The game is Friday October 19 at 8 p.m. in the Forum in Inglewood. The Cal Poly Band is selling the tickets and will play at halftime.

## Star Trek bloopers

The Circle K Club is sponsoring two showings of the film "Star Trek Bloopers" on Saturday, Oct. 20 at 7 and 9 p.m. in Chumash Auditorium.

Admission is \$2 for students with an ID card and \$3 for those without one. Tickets will be on sale at the University Union ticket office. Profits from the concert will support Circle K service projects.

## Horse Show

A horse show with competition in both intercollegiate and in open class will be held Saturday, Oct. 20 at 9 a.m. in the Cal Poly horseshow arena. English and western competition events will be included. Entry fees are \$3.50 for intercollegiate class and \$4 for open class.

## Dietetics

The Dietetics Club invites everyone interested to attend the first meeting on Thursday, Oct. 18 at 7 p.m. in Home Economics Room 135. Refreshments will be served after the meeting.

## Alpha Rho Chi

The Alpha Rho Chi fraternity will discuss choosing a colony name at a meeting on Wednesday, Oct. 17 at 7 p.m. in the Architecture and Environmental Design Building, Room 224. Those who wish to join the fraternity may come and sign a petition to do so.

## Student service

Student Community Services invites all interested students to an orientation meeting to be held in Chumash Auditorium on Tuesday, Oct. 16 from 7 to 10 p.m.

## Speakers Forum

The ASI Speakers Forum welcomes new members to its meeting today at 11 a.m. in University Union Room 218.

## Classical concert

Classical guitarist Pepe Romero will give a concert in the Cal Poly Theatre on Friday, Oct. 19 at 8:15. Admission to the concert is \$4 for students and \$5.50 for non-students.

## Architects meet

The first meeting of the Cal Poly student chapter of the American Institute of Architects will feature a film and an explanation about the club and its activities. The meeting will be held tonight at 7:30 in the Architecture Building Gallery.

## Foreign study

There are opportunities for students of agriculture and natural resources management to study in New Zealand in 1980. Applications and information about the foreign study program may be obtained from Dr. John Connely in the International Programs Office, Dexter Library Building. The deadline to apply for study in New Zealand is November 10.

## Women Engineers

Speakers will give information on finding summer jobs and will detail upcoming events of the Society of Women Engineers at a meeting tonight at 7 p.m. in Science Building Room A-12.

## Fiesta picnic

Latinos in Agriculture and MEChA are sponsoring a picnic for all Cal Poly students on Saturday, Oct. 20 in Santa Rosa Park. The picnic, which will be from noon until sunset, will include food, drinks and activities. The cost is \$1.50 per person.

## Bagpipe band

The Central Coast Highland Society Pipe Band is looking for pipers, drummers and Scottish-style dancers. Meetings of the band are held Tuesdays from 7 to 9:30 p.m. at 1750 Alto St., San Luis Obispo.

## Law school test

All students who are considering going to law school may attend a special meeting of the Pre-Law Club today at 11 a.m. in Room 214 of the Agriculture Education Building. Several students who have taken the five-hour law school admission test will be at the meeting to share their experience and to answer questions about the test.

## Benefit concert

The Cal State Northridge Wind Orchestra will perform in a concert Saturday, Oct. 27 at 8 p.m. in Chumash Auditorium. The concert is to benefit the Cal Poly Mustang Marching Band. Admission will be \$2.50 for the general public and \$1.25 for students.

## Judo practice

The Judo Club will have practice sessions every Tuesday and Thursday from 7:30 to 9:30 in the wrestling room upstairs in the Physical Education Building. Beginners as well as experienced competitors are welcome.

## Wildlife Society

Wildlife biologist accreditation will be discussed at the organizational meeting of the Wildlife Society on Wednesday, Oct. 17 at 7:30 p.m. in Science North Room 215.

## Hawaiian dance

The upcoming Pepe Romero concert will be discussed at the Wednesday, Oct. 17 meeting of the ASI Fine Arts Committee to be held in University Union Room 218 at 5 p.m.

# MEET THREE PEOPLE WHO FOUND CAREERS WITH NSA.

## ELECTRONIC ENGINEER

"As a college student faced with finding a job and starting a career you are presented many options. NSA should be one of your considerations. Working at NSA has been both a challenge and a continual learning experience since our mission demands that we work on the cutting edge of technology. I have experienced the satisfaction that comes with having been a member of project teams involved with a variety of computer systems and communications problems."

Mark Welch  
B.E.E., M.E.

## MATHEMATICIAN

"As an NSA Mathematician I enjoy the opportunity to apply a variety of mathematical disciplines, including many which fall under the heading 'pure mathematics,' to my job. A wide range of sophisticated cryptologic problems presents a constant challenge to develop new and creative approaches. In fact, creativity is probably the one universal requirement for an NSA Mathematician."

Linda Shields  
B.A., M.A. Mathematics

## COMPUTER SCIENTIST

"My objective on graduating from college was to obtain employment with a leader in my profession. NSA fulfilled that objective. The histories of NSA and the computer have been intertwined since the origins of both. NSA continues to be the pacesetter in the data systems field — presenting opportunities to be a part of the latest technology being developed and used industry-wide."

Edward Johnson  
B.S. Computer Science

## PUT YOURSELF IN THE PICTURE

At the National Security Agency your future will be linked to the nation's. Whether your interests are in electronic engineering, computers, mathematical research or high priority translation, you will play a meaningful role in the nation's communications security or the production of foreign intelligence. NSA is challenge. NSA is opportunity. □ National Security Agency headquarters are located in the pleasant Maryland suburbs, close to Washington, D.C., Baltimore and Annapolis, Maryland — just minutes away from countless cultural, historical, recreational and educational opportunities. □ Find out more about career opportunities offered by NSA; schedule an interview with us through your College Placement Office. Or call us collect at 301-796-6161. Mr. Bernard Norvell, College Recruitment Manager, will be happy to talk with you. □ National Security Agency, Attn: M32R, Fort George G. Meade, Maryland 20755. An Equal Opportunity Employer. U.S. Citizenship Required.

## Salvador rebels seize barracks

SAN SALVADOR, El Salvador (AP)—Army rebels claimed to have seized four military barracks in this Central American nation Monday in an attempt to overthrow Gen. Carlos Humberto Romero's government.

But a spokesman for the right-wing Romero regime said the government "has the uprising under control." Neither claim could be independently verified.

Some shooting was reported in late morning at the barracks in Chalatenango, 35 miles south of here, but reports from the scene said there were no casualties.

A spokesman for the rebels, asking anonymity,

told the Associated Press the dissidents also seized barracks in San Miguel, 12 miles east of San Salvador, in Sonsonate, eight miles west of here, and in San Carlos, near the capital.

The spokesman refused to describe the political leanings of the rebels, saying only that they want to "seek a change in the forces and effect the changes that are necessary in the country."

There were known to have been differences within the military. Some officers feel Romero should liberalize his regime, while others contend a tougher crackdown on the increasingly restive leftist element within the country is needed.

## Submarine explores Tahoe

TAHOE CITY (AP)—A tiny submarine silently glided into icy Lake Tahoe Monday for test dives before carrying its three-man crew into the eerie depths for the first exploration of one of the world's highest, deepest lakes.

The 17-foot-long submarine, dubbed Pioneer I, will explore, photograph and use a mechanical arm to pick up objects during a four-day, around-the-clock probe with an estimated cost of more than \$30,000.

The sub entered the lake at 8:45 a.m. PDT and began its test runs about an hour later. After testing, a barge began a two-hour tow to take the sub to the location of its first dive.

During the first three-hour exploration dive, project

head Dr. Charles Goldman of the University of California at Davis, pilot Don Bolstad and reporter Ken Castle of the San Jose Mercury News, which is sponsoring the project, were to examine an underwater landslide just east of here which is thought to have shifted a large section of the lake wall.

Goldman said he expected about 5 hours of diving, noting that for each eight hours under water, eight more hours were needed to recharge the sub's batteries.

The lake that Mark Twain called "the fairest picture the whole world affords" is estimated to be 1,645 feet deep, third deepest in North America.

# Newsline

## Two Americans win Nobel Prize

STOCKHOLM, Sweden (AP)—Two Americans and a Pakistani who took up where Einstein left off in searching for the key to the universe won the Nobel Prize in physics Monday, and an American and West German who found ways to produce new drugs, pesticides and other important organic compounds were awarded the chemistry prize.

It made 1979 another year of U.S. domination of the three Nobel science prizes. Four of the seven laureates

are Americans, the same proportion as in 1978.

But the happiest winner may have been chemistry laureate Georg Wittig, an 82-year-old retired professor of West Germany's.

The physics winners were two Harvard professors, Sheldon L. Glashow and Steven Weinberg, both 46-year-old New York City natives, and Professor Abdus Salam, 53, a physicist working in Britain and Italy who is the first Pakistani to win a Nobel.

## Carter loan answers expected

ATLANTA (AP) — Some long-awaited answers about loans to President Carter's peanut warehouse are expected Tuesday when Special Counsel Paul J. Curran holds a news conference to discuss his seven-month investigation.

It will be his first extensive public comment since his appointment by then-Attorney General Griffin Bell to examine any possible link between warehouse loans from a bank headed by Bert Lance and financing of Carter's 1976 campaign.
