Plus-minus grades, clearer definitions, before committee

BY SUE BOYLAN
Daily Staff Writer

The possibility of plus and minus grading and clearer definitions for letter grades are two items being considered by a subcommittee of the academic senate.

The subcommittee—made up of members of the senate's Instruction Committee—is studying Cal Poly's grading policy.

Dr. Ron Brown, chairman of the Instruction Committee and member of the subcommittee on grading policy, said there are six issues the subcommittee could consider. Brown said he thinks two issues will receive the most attention: the changing of the grading system to record plus and minus grades, and clarification of the wording of letter grade definitions.

The subcommittee has just begun to consider the question of grades and grading—no recommendations or proposals have been offered yet to the academic senate.

Brown, a member of the physics department faculty, said grading policy is a complex issue with many overlapping areas that directly influence each other. He said he has organized the issues raised about grading policy into six items, including plus and minus grading and grade definition.

The other four are:

—Executive Order 320, from the CSUC Chancellor's Office, requiring the academic senate to establish policy on grading, grade changes and appeal procedures. Cal Poly already has a Fairness Board; the question here is whether the executive order would require changes in current policy or in the wording of the Campus Administrative Manual.

—Credit/no credit grading—should courses taken by challenge exam, field work, independent study and senior project be graded c/n? Are current regulations adequate? There is currently a resolution before the senate calling for the elimination of c/n grading in support courses.

—Administrative grade changes—should any recording procedure involve changing assigned grades? If current policy is adequate, are there procedural changes that could reduce possible abuses?

—Course information—the ASI student senate passed a resolution that instructors be required to hand out syllabi for courses describing the grading methods to be used as well as other information about the courses.

Credit/no credit nixed by senate

Credit/no credit grading came under fire Tuesday when the academic senate recommended letter grades be required for support courses.

Proponents of the measure charged that credits given in support courses prevented students from being adequately challenged in subjects indirectly related to their majors.

Ron Brown of the physics department, who introduced the resolution, said grading is probably the "least desirable job" instructors have to do, but is "an expected and valuable service to students, nevertheless."

Mike Wenzl, an English professor, supported Brown's contention that credit/no credit grading is an inadequate means of measuring what a student is learning in support courses.

"Most institutions nationally are moving away from credit/no credit grading," he told the senate. "It started out as an experiment and now universities are viewing it as an experiment that didn't work."

Delmar Dings of the soil science department pointed out that prospective employers and graduate schools occasionally check student's grade records, and don't look favorably upon credit grades.

"I think it is to the student's advantage to have grades rather than credits on their transcripts," he said.

Claiming students want the opportunity to make their own

judgements on credit/no credit courses, student representative Brad Bessey introduced a compromise amendment that would have placed a 21-unit ceiling on support courses taken for just credit.

The amendment was overwhelmingly defeated.

Brown said he believed many students taking courses on a credit/no credit basis would only be concerned with passing the course rather than gaining an in-depth knowledge of the subject.

"This can mean that students will be underprepared in later major courses," he explained.

"Most institutions nationally are moving away from credit/no credit grading"—Mike Wenzl

Brown added that credits for support courses could also create problems if a student decides to change majors to a department where those courses are required for a grade.

In April of 1979, the academic council unanimously passed a similar resolution recommending that credit/no credit grading be abolished for courses appearing under the support column on a major curriculum sheet.

That recommendation, along with the academic senate's resolution, will be transferred to President Warren Baker for consideration.

City welcomes student bus stop plan

BY MEG McCONAHEY

Daily Staff Writer

San Luis Obispo City Hall workers may be a little drier during next year's rainy season if a senior project plan by two Cal Poly students is given the final go-ahead by the San Luis Obispo Community Development department.

Skip Neville and Chris Gatley presented their design for an improved bus stop to the San Luis Obispo City Council Tuesday afternoon and received a warm response from the five-member board.

Councilman Ron Dunin expressed some doubts about placing the stop near the crowded City Hall intersection at Palm and Osos Streets. The council, however, unanimously voiced its approval of the plan which could have cost the city up to \$8,000 if a private firm was contracted for the job.

Neville and Gatley said they

could construct the stop for \$3,000 in materials and free labor. Both young men assured the council they have some masonry experience and they hope to enlist senior-level construction students to help make the bus stop.

Dunin questioned the practicality of building a bus stop at the Osos Street entrance of city hall because of speculation that buses may be rerouted from the spot sometime in the future.

Mayor Lynn Cooper pointed out if the students' project is held up until rerouting plans are finalized, the bus stop might never be completed.

"I endorse the plan 100 percent," Cooper said. "If we wait for a final determination on the bus route, the project will never get done, and this way, we'll get some use out of it no matter what happens."

For Neville and Gatley, June is the deadline for completion of

the project. Both young men will be graduating then.

Councilwoman Melanie Billig said the project "looks great," but expressed to public services director Dave Romero, the importance of anticipating any problems that might crop up concerning possible congestion or bus rerouting.

In spite of some trepidation on the part of the council, all five members said they were impressed with the students' plans, and will send endorsements of the project to the design review board for careful analysis.

Chris Gatley, a construction engineering major, explained after the meeting that he had

first gone to Romero about making something useful for his senior project because he didn't want to just write a term paper that "nobody will read."

Romero had filed a list of possible projects for Poly students to undertake with the Cal Poly architecture department, Gatley explained, adding that he liked the bus stop idea the best.

Neville, an architecture major, was enthusiastic when his buddy asked him to draw up the plans for the structure as his senior project.

According to Gatley, Romero had personal reasons for wanting the bus stop at that particular site—he was tired of having to fight his way through the crowd of people at the City Hall door on rainy days.

Both young men met previously with the design review board and were given suggestions for improving their plans, such as changing the roof. The main criteria for the design, they said, was that the structure be waterproof and built of non-combustible materials.

They chose brick as the material to construct the walls and heavy timber for the roof.

Gatley and Neville said they hope to have all the political implications of building their bus stop ironed out by the end of the quarter so they can begin construction after spring break.

Extension offers whale-watching trip

Those wanting to observe the migratory habits of the Pacific gray whale and hike on Anacapa Island can enroll in a Cal Poly Extension course scheduled for March 21 through 23.

"Channel Islands Natural History Excursion" will take participants by boat around as

many of the Channel Islands as time and weather permit. The birds, mammals and plants seen during the trip and hike on the island will be discussed in on-board lectures.

A list of suggested items to bring will be provided during an orientation meeting on March

20. Fee, including boat transportation and food is \$152 for those with guaranteed berths and \$142 for those without.

The course offers one unit of academic credit and preregistration is required by March 14. For more information, call 546-2053.

Hallett's cutting mood

As the June 3 election draws closer, so does a decision on the lucrative "Jaws II" proposal, as Proposition 9 is so aptly referred to. Sponsored by Howard Jarvis, the initiative would cut state property taxes in half.

If Jarvis II does pass, as recent opinion polls have indicated it will, the money belt would be tightened throughout the state with education being especially hard hit. Tuition for state universities and colleges, including Cal Poly, will be the most viable alternative to replenishing any budget cuts.

In light of these recent developments it is maddening to hear that Assemblywoman Carol Hallett heartily supports the Jarvis II initiative.

At a press conference last week, the Republican Assembly Leader said the passage of Proposition 13 a year ago last spring hasn't taught state representatives to be frugal with tax revenues.

Said Hallett: "It has become obvious to me that the only way to cut back is to hit the mule over the head with a 2-by-4 yet again."

Perhaps Hallett does not realize that by supporting the tax cut she is hitting some of her own constituents with that same 2-by-4.

Hallett serves a constituency of approximately 250,000. Of that number, 36,292 are students. Should Jarvis II pass, these students will probably have to pay tuition to continue their education. Although a figure hasn't been set, tuition estimates for Cal Poly have ranged from \$750 to \$1,000 per year. Many students simply cannot afford such high sums—they may be forced to discontinue their education.

Consider another group affected by any tax cut—state employees. When Proposition 13 was passed all state salaries were frozen except for a 10 percent inflation increase. Many of Hallett's constituents are employed by Cal Poly, Cuesta College and other state offices. Passage of Jarvis II could once again freeze their wages, meaning no raises in the near future.

Did Hallett consider these problems when she decided to support Jarvis II?

Said Hallett, "I believe we can insure that education does not suffer and that state employees do not have to go without raises or live in fear of massive layoffs."

Supporters of Proposition 13 made the same claims a year ago to no avail, education budgets were still cut and wages were fixed.

By supporting Jarvis II, Hallett has shown she has no consideration for students or state workers—that if cutting the fat means cutting funds, she is willing to be the first to pick up the knife. But in the process the assemblywoman is also going to cut a lot of throats.

Letters

Patriotic

Editors:

I strongly disagree with Justin Brown's letter, "Patriotism?", which appeared in your February 27 issue.

The United States, the USSR, or any other country for that matter, doesn't want to destroy the world. But it is about time that the United States sticks up for itself and starts showing the world, especially the USSR, that we're still the best and the strongest nation on the face of the earth.

He seems to think that it is wrong to be supportive of American patriotism by saying, "Let's realize what it is and not make it out to be something it isn't." What is his definition of patriotism? Patriotism is the support and belief of your country.

For someone like Brown to reap the benefits of a country like ours and then not only refuse to protect it, but also criticize it as he has, is not patriotic in my view. As far as I'm concerned, if he doesn't think the United States' rights and privileges are worth fighting for, he can renounce his citizenship and move to a "better" country.

I'm just damn glad we had patriotic forefathers who had the guts to stand up for what they believed in or we wouldn't be where we are today, enjoying the things we enjoy today. It is my obligation to fight for America so that my children can enjoy the kind of America that I have enjoyed, albeit no thanks to Justin Brown.

Kirk Peterson

Teachers not hurting

Editors:

Doug Hartstock is completely turned around on the facts of higher education. He fails to realize that college professors, particularly in technical departments, can earn much higher salaries as teachers than in industry. For this reason many of our teachers are here for the money and not because they are dedicated educators.

There are certain teachers who will hurt students any way they can by pouring their derision on anything we do. It's a well known fact that when these teachers go home at night their fattened psychopathic wives thrash them within inches of their lives.

Unfortunately, all of the letters refuting Doug's letter do so for the wrong reasons. A similar case occurred several years ago when some *Daily* staff writer wrote an article supporting atheism. Many so-called "Christians" (actually neo-Christians) refuted the article.

These neo-Christians are not unlike atheists: both support the wrong thing. A true Christian is, a Catholic. Catholicism is the only religion sanctioned by God. Neo-Christians have changed the Bible to purport their false prophecies. Their careful deletion of Sirak is an example of this.

Similarly, many of Doug's refuters omit key points in their letters. I have presented them here.

Latent left-handers thought to be illness prone

BY TOM KINSOLVING
Daily Staff Writer

Although only 10 percent of us are left-handed, a retired Cal Poly professor says another 12 percent of the population writing with their right hands are latent southpaws who, as a result, are susceptible to high rates of anxiety, ulcers and heart trouble.

Dean Trembly, 71, who worked 16 years on the faculty of the testing and counseling center, said this is his conclusion drawn from the theory of "crossed dominance," which states some normally left or right-handed people are instead using the opposite hand.

Trembly's idea on the adverse effects of this received publicity in the July 8, 1979 Los Angeles Times and the February 11, 1980 People magazine. Regarded as the world's leading expert in his field, according to the People magazine article, Trembly became involved in research during a study of 98 young polio victims at the University of Illinois in 1961.

An abnormal amount—36—of the polio victims were found to be naturally left-handed, but used their right hands for most tasks. The correlation enabled

Trembly to write his doctorate thesis, which stated:

"Cross dominance appears to be a contributing factor because nervous tension produces a weaker body, a body more susceptible to the virus of polio."

In recent new tests Trembly conducted, nearly one-third (39) of the people in the studies with ulcers were discovered to be left-eyed and left-sided, but wrote with their right hand.

Almost 40 per cent (37) of 93 heart patients were found to be left-sided and left-eyed, yet were right-handed writers.

Another study cited by Trembly showed cross-dominant people incur twice as many broken bones as normally dominant people.

"Cross-dominant children are often slow readers, produce more illegible writing. Some go through life stammering and stuttering," said Trembly.

Trembly believes the subconscious strain of adjusting to cross dominance has an adverse effect on the nervous system, leading to increased vulnerability to illness.

The cross-dominant children afflicted with

polio, according to Trembly, had high nervous energy, possibly played harder, which resulted in fatigue that influenced the contraction of the disease. The nervous tension itself might have increased their vulnerability to polio, said Trembly.

While there have been no independent studies to verify Trembly's stress theory, he has received criticism.

Dr. Richard Trafton, a Boston psychologist, said in the People article, "It's true that a large proportion of people who have emotional and medical problems also suffer from cross-dominance, but it does not necessarily cause those problems. Both are probably results of another cause—heredity, or neurological development, or being dropped on the head as a child."

When asked for a response to Trafton's remarks, Trembly replied, "I know the man. He doesn't know research at all. He's merely done some reading—his view is based on ideas, not research."

Trembly has been testing people for eye dominance since 1947, when he began working for the Human Engineering Lab, a career guidance firm

in Fort Worth, TX. The procedure he uses is called "the hole-in-card" method which is both simple and reliable, according to another left-handed researcher, M.M. Clark, who was quoted in the August 1976 issue of Research Report magazine.

The test involves using two 9-by-12-inch cards, one which has two diagonal lines that cross, the other that has a hole in the center smaller than a dime.

The test subject begins by holding the card with the hole with both hands, arms extended and lowered. Another person holds the card with the crossed lines on the other side of the room. The test subject keeps his eyes on the cross-lined card and raises the card at arm's length until the crossed lines are visible through the hole.

The crossed line card is moved about several times and spotted by the subject, who eventually brings the card slowly to his face. The eye looking through the hole is the dominant eye.

Trembly said he hopes that his research will "serve to alert the public and the professional world to the possible dangers of encouraging or even permitting a left-sided child to become right-handed."

One grateful response to Trembly's work was from M.G. Belen, who read the

People article. Belen, age 30, who referred to himself as a practitioner of meditation, wrote that his mother had finally admitted that in his early childhood he was originally left-handed.

"Almost at once, I began to feel that I was thinking more clearly and somehow faster than ever before, rather like driving down a super highway after being on unpaved roads all my life," wrote Belen.

"The left side of my face,

always more mobile than the right, became even more expressive. I became less high-strung. I felt more myself.

"Now I write equally well with both hands and am ambidextrous without consciously thinking about it."

Grades

From page 1

After looking at these six items, Brown said, the subcommittee might find areas in the policy that need improvement, for both the instructor's and the student's benefit. But, he added, the subcommittee might find there is no need for changing the university's grading system and may not make any

recommendations for resolutions to the senate.

There is no particular reason why the subcommittee is studying Cal Poly's grading policy at this time, Brown said. However, he said, grades and grading procedures have received more attention since Executive Order 320 was issued.

Wildlife Club planting

The wildlife club is going to Big Sandy Wildlife area Saturday, March 8 at 9 a.m. They will be planting saltbrush (atriplex).

This is in conjunction with the State Fish and Game Department with three biologists attending. They will be pointing out interesting wildlife in the

area. People attending can help in the planting and removal of weed species from other plant life in the area.

Carpooling can be arranged from the H parking lot behind the Fisher Science building before leaving.

People attending should

bring their own garden tools. People who like to watch birds, wildflowers or other types of wildlife are urged to attend.

For further information call John Burns at 541-2186 between 6:30 and 8:30 p.m. Thursday or Friday. Or call Cathy Reheis at 544-6242.

JUST ASK MARGARITA

Dear Maggie,

A few nights ago, I went out with "Mr. Macho". I was all ready for a little action, but he spent most of the evening with his hands wrapped around a beer mug instead of me. When he walked me to my front door, he leaned forward to kiss me, missed, and landed face first in Killer's doggie dish. Killer thought he was a pork chop and licked him back to consciousness, but by that time I was so disgusted that I went in and went to bed. Today he called; told me what a great kisser he thought I was, and asked me out for next weekend. Should I accept?

Signed,
Struck Out

Dear Out,

As far as I'm concerned, you ought to fix him up with Killer. After all, you know what they say about man's best friend. If you stick with this loser, you'll just be barking up the wrong tree. So let sleeping dogs lie, and sniff around for a new romantic interest.

Love,
Maggie

Confidential to High and Dry in SLO: As far as I can see, it's 12 of one and half a dozen of another. Of course, a stitch in time saves nine, but remember, the road to Hell is paved with good intentions. Save yourself a lot of grief and get professional help.

Too much alcohol can affect your romantic abilities. If alcohol has come between you and someone you care about, then you have abused it. Alcohol abuse is a serious problem in the Cal Poly community. For counseling, or more information, contact the Health Center.

Outings Committee does it all

BY TOM FULKS

Daily Outdoors Editor

Backpacking through Inca ruins in the Andes mountains in Peru; hiking through caverns and washing in 100 foot blue-green waterfalls in the Havasu Indian Reservation in Arizona; exploring the deepest regions of the Grand Canyon. The ASI Outings Committee does it all and much, much more.

The Outings committee is an ASI sponsored group that is open to all Cal Poly students. It's an active group that always has something planned that is exciting and energetic. Students who are tired of the same old routine on the weekends are welcome to stop by the Escape Route in the University Union, where activities are planned.

Here are just a few of the events planned for the next few months:

Between winter and spring quarter an excursion into the Havasupai Indian reservation in Arizona is planned. Three 100 foot waterfalls will be hiked to. It is a ten mile hike through travertine—or calcium carbonate deposits—canyons and blue-green springs. The Outings Club has been on this trip a few times before and members say it is a very special place to go.

At the same time a trip is planned to explore the Grand Canyon. The group will backpack from the south rim of the canyon, down into the bottom and up the Colorado River to the confluence of the Little and Big Colorado Rivers.

During that same quarter break a group of students will travel by train to Mazatlan, Mexico. They will then board a train at Mexicali and

possibly stop at San Blas and Durango, depending on the will of the majority. Another side trip will be a train ride on the Chihuahua-Pacific Railroad up Copper Canyon. This trip will last about eight days and cost \$156 apiece.

During the spring quarter, on April 5 and 6, a white-water rafting trip will be taken on the Stanislaus River. Signups will be available by April 2. Two more of these same type of trips are planned for May and July also.

A canoe trip down the Russian River, north of San Francisco, is in the forecast also. Students will canoe through the wine country on April 12 and 13.

The cost is \$40 per person and that includes transportation, food and canoe rental.

On May 24, 25 and 26 a horsepacking trip is scheduled. Students will ride from Lake Isabell, near Bakersfield on the Kern River, north into the Sierra to Kennedy Meadows. They will be riding horses used by Cal Poly Agricultural classes this winter quarter that are owned by stables in Kennedy Meadows.

Bike ride

Meet March 9 at 10 a.m. in front of the Main Gym for a free, casual co-op bicycle ride around the San Luis Obispo area, possibly to Lopez Lake. All are welcome.

Coffee House

The ASI Special Events Committee plans a Coffee House March 6 at 8 p.m. in the Mustang Lounge. Enjoy fine music and exquisite taste treats in a warm atmosphere. Admission is 50 cents.

Speakers Forum

The Speakers Forum meets Tuesdays at 11 a.m. in UU 218. All are welcome.

Environment Club

The Environmental Services Club plans its first meeting March 6 at 11 a.m. in Science North 201. All E.S. students are encouraged to attend.

Concert/dance

Yosemite Hall plans a concert and dance featuring The Contagious B&B Band on March 7 from 9:30 p.m. to 12:30 a.m. in Yosemite Hall Lounge. \$1 general admission, 50 cents for Yosemite hall card holders.

Pong-a-thon

Delta Tau fraternity plans a 1 week charity pong-a-thon starting at 6 p.m. March 7. Six percent of the proceeds will go to the Loma Vista Development Center of the handicapped. Hourly pledges are welcome.

Design Club

Women in Environmental Design plan a meeting to discuss Poly Royal preparations, future club events, on March 6, 7 p.m. in Computer Science 235.

MECHA

MECHA plans a meeting to reorganize the Latino organizations on campus into one; also discussed will be the Chicano Commencement Committee, Cinco de Mayo, Poly Royal and next year's budget. Meet at 7 p.m., March 7, in UU 219.

Wildlife Club

The Wildlife Club plans to help the California Department of Fish and Game in planting a triplex at the Big Sandy Wildlife area. If interested, meet in H parking lot behind Fisher building March 8 at 9 a.m.

Silent Running

ASI Films is showing *Silent Running*, starring Bruce Dern, in Chumash on March 12 at 7 p.m. and 9 p.m. Price is \$1.

Have you really thought about your future? We have. Because at Lawrence Livermore Laboratory the future is being shaped every day by people like you.

Lawrence Livermore Laboratory is a mission-oriented research and development laboratory devoted to the achievement of specific technical goals through multi-disciplinary team effort.

As an innovator in several diverse areas the laboratory offers you a unique career opportunity to continue learning where it really counts—your career. You will not only be given the freedom to grow in a challenging environment, but also the opportunity to explore areas of individual interest.

If you're a recent graduate with a basic or advanced degree in engineering, computer science or a computational discipline, see us on campus at your placement office, or contact us for more information about our many career opportunities by sending your resume to: Lawrence Livermore Laboratory, Attn: Employment Division, P.O. Box 808, Dept. JCN, Livermore, CA 94550. U.S. citizenship required. An Equal Opportunity Employer M/F/H/V.

Lawrence Livermore Laboratory is located in California's Livermore Valley, a countryside setting with beautiful hills, natural waterways and vineyards—just minutes away from the San Francisco Bay Area.

Our programs cover a wide range: from our on-going commitment to national defense projects, to laser fusion, from physics and bio-medical research to the development of pollution free energy.

Sports

Mustang Corral

Junior guard Jim Schultz, Cal Poly's record holder in assists, has been named to United Press International's All-Pacific Coast team as an honorable mention, it was learned today.

Schultz, one of three players from NCAA Division II schools named on the squad, broke the school single season assist record this season. In 29 games, the 5-9 junior accumulated 257 assists for an average of 8.9 assists per game.

Last week Schultz was selected as co-most valuable player of the CCAA as he led the Mustangs to their fourth conference title in the last nine years.

The women's tennis team will host UC Irvine Saturday at 10 a.m. and try to break a five-game losing streak.

Saturday's match against Irvine will be on the courts behind the main gym.

The Mustangs, coached by Sonja Marray and Orion Yeast, lost Saturday to Cal Poly Pomona, 9-0. Friday to Cal State Northridge, 8-1, Thursday

to Cal State Bakersfield, 7-2, and Monday to UC Santa Barbara, 9-0.

The brightest spot of the week for Cal Poly was when sophomore Kelly Meredith was involved in both wins against Bakersfield's Roadrunners. Meredith defeated Linda Enemark, 7-5, 6-1 in the singles matches, and teamed up with freshman Cheryl Hansen to beat Enemark and Linda Crawford in doubles play, 6-3, 6-4.

The Mustangs began Friday's Northridge match on the right foot when sophomore Reese Weignadt downed Matador Debbie Pearl, 6-2, 6-1.

Those were the only wins of the week.

Coach Kim Graham's softball team lost its first four games of the year over the weekend. Poly lost to University of the Pacific Friday and a doubleheader, Saturday, to Nevada-Reno before having a twin bill with Cahbot College at Hayward rained out.

Friday, UOP's Teresa Flores tossed a one-hitter at the Mustangs, winning

1-0 and Joan Gallagher came back in the nighcap to win on a four-hitter, 2-1.

The Mustangs travel to Cal State Northridge Friday at 2 p.m. and to Cal Poly Pomona Saturday at 11 a.m. for Southern California Athletic Association doubleheaders.

Spikers stand "pivotal"

Cal Poly volleyball coach Mike Wilton terms this weekend's two home conference matches against UC Berkeley and Stanford as "pivotal."

The Mustangs are 1-4 in California Intercollegiate Volleyball Association play, while Stanford is also

1-4 and UC Berkeley is 0-4. "They are pivotal for us in that we want to stay out of the cellar," explained Wilton.

"We have fallen on our faces at home. We seem to play better on the road," Wilton continued.

Friday's match against California's Golden Bears begins at 7:30 p.m., while Saturday's match with the Cardinals starts at 3 p.m. Saturday's match was moved to a 7:30 p.m. starting time in the Main Gym.

Mustang baseball starts season on the road

The men's baseball team, which lost 12 games to the wet weather, will open California Collegiate Athletic Association play Friday at Cal Poly Pomona.

Friday's game begins at 2:30 p.m., while Saturday's doubleheader starts at noon.

The Mustangs will take a 2-9 record to Pomona. All of their 11 games were against NCAA Division I schools. Cal Poly Pomona's first 11 games have also been against Division I competition. The Broncos have a 6-4-1 record to show for it.

The Mustangs have lost eight straight to Division I teams like Stanford, UC Berkeley and Fresno State, while Pomona lost three times to San Diego State and once to Long Beach State. The Broncos won their first six games before losing four straight and tying one.

Last weekend, Cal Poly blew a pair of leads late in

the games against California. The Mustangs led 7-6 after eight innings in the opener, but lost in 10 innings, 10-7, and in the nightcap, the Mustangs blew a 3-1 lead in the seventh, and eventually lost in 10 innings, 4-3.

"I couldn't ask for our players to play any better," noted Coach Berdy Harr. "We have committed only two errors in the last three games, and the hitters are doing a good job of making contact with the bat (19 hits in last weekend's two games against California)."

"Cal had a 1.95 earned run average coming into the series, and it went up quite a bit because of our hitters," said Harr.

About the two late-inning losses last weekend, Harr said, "Our pitching at this point is off because of the weather. In the late innings, our pitchers are running out of gas. They aren't used to going a full nine just yet.

"Consequently, we are leading in the late innings and losing the games," said Harr. "I'm not suspicious at all about our pitchers' character, depth or abilities, but because of the rain and limited number of games, we're getting this type of result."

"As the season goes along, our pitchers will be getting stronger and tougher to hit against," concluded Harr.

Before the season began last month, Harr predicted Cal Poly Pomona would be the team to beat in the CCAA. "They have

everybody back, and I anticipate them being the team to beat," said Harr.

"The Broncos are very well coached by John Scolinos, and they make all the plays," Harr added. "They are a very consistent team and play well together. They are not awesome in terms of potential, but if we play as well as against Cal last weekend, we have a good chance of taking two out of three, or possibly all three games this weekend."

Two Broncos were first team all-CCAA selections a year ago. Right handed

pitcher Alan Fowlkes, who sports a 2-1 record and 5.33 ERA thus far in 1980, and right fielder Chris Clark (.395, three home runs).

Fowlkes, right hander Joe Chacon (1-1, 4.84 ERA) and southpaw Randy Schauer (1-1, 10.49) are expected to be on the hill for the Broncos this weekend. Other top Bronco hitters are outfielder Gregg Fanner (.413) and designated hitter Mike Ashman (.363, 11 RBIs). Shortstop Jim Camacho has four home runs and a .279 average.

Harr is expected to start

Mark Bersano (0-1, 4.95) in Friday's opener, and Bob Vavrock (0-0, 2.50) in Saturday's nightcap. Harr will choose between Mark Silva (0-1, 16.20), Stu Hein (1-2, 5.02) and Ken Eriksen (0-0, 8.10) for Saturday's first game.

Top Mustang hitters include third baseman Bob Weirum (.366), outfielder Paul Hertzler (.306) and another outfielder, Bob Parr (.297). Infielder Craig Gerber (.278), designated hitter Bill White (.270) and shortstop Frank Silva (.270) are also hitting well.
