Mustang Daily—Jack Bradford

The Clyde P. Fisher Science Hall contrasts greatly with the Spanish-style architecture of older campus buildings.

Finals change is against the rules

BY KAREN GRAVES
Daily Staff Writer

Final examinations should be given only on the days they are scheduled for, but unfortunately violations of this do occur, said Hazel Jones, vice president of academic affairs.

"I don't think there is widespread violation, but there is some," said Jones.

In order for a final exam date change a request must be made by the concerned faculty member to the department head, according to the Campus Administrative Manual.

The manual says "The request will indicate the course and section to be changed, the reason for the request, the new time and place for the alternate examination, an indication that at least two-thirds of the class is in agreement with the change, and a statement that an examination will be held at the regularly scheduled time and place for those students who are unable or unwilling to attend the final examination at the rescheduled hour."

A resolution was recently brought before the Academic Senate concerning the problems of faculty members who give finals on the last day of class, said Max Riedlsperger, chairman of the Academic Senate.

The resolution, tabled by the senate, states faculty have responsibility to maintain the integrity of final examinations, and also that they have the right to expect that student's attention not be distracted from classes by final examinations given during the last days of a

quarter.

The resolution also states that students have complained about pressure and that "students have the right to take examinations in an atmosphere free from the normal pace of the regular daily schedule."

The resolution was tabled because some senate members felt "it was inappropriate for the Academic Senate to urge faculty to do something they were already supposed to be doing," said Riedlsperger.

Final exams should be held on the date they are scheduled unless exceptions have been made, said Riedlsperger. He said finals held on the last class day distract from a student's ability to concentrate on other classes.

Other problems Riedlsperger mentioned are that professors should use the last day of class as a concluding lecture, and that a 50-minute class period does not reflect what a teacher will get out of a student in a final exam situation.

Riedlsperger suggested the resolution was offered to the senate because some people had witnessed students telling professors they were not able to complete assignments in their classes because they had final exams during the last week of class.

If a student has problems with a faculty member scheduling an early final, the first thing the student should do is complain to the faculty member and then to the department head.

"It helps if students will put these things in writing and sign them," said Jones.

Mustang Daily—Jack Bradford

The business administration hall represents an original architecture style on campus. It was given up for cheaper, more energy efficient concrete buildings.

Gerard: building costs are to blame for gray concrete

BY TOM KINSOLVING
Daily Staff Writer

That colossal gray fortress-like structure called Clyde P. Fisher science building is a blatant contrast to the Spanish-style business building.

Why does Cal Poly, a college campus with one of the nation's renowned architecture schools, have this architectural hodgepodge of buildings?

Doug Gerard, executive dean of facilities planning, calls the campus "an architectural zoo"

and recently explained how it got that way.

"There's no particular individual or group to blame for it," said Gerard, who attributes reasons for the conflicting structural design to high financial cost.

"The bottom line was dollars," he said, citing the tremendous cost of constructing more buildings in the Spanish-style of the business building, which would involve two to three times the cost of building reinforced

concrete structures.

The Cal Poly campus plan of the 1950s centered on the idea of having a small campus of approximately 4,000 students, according to Gerard. Thus, the first buildings constructed—the library and business buildings—were done Spanish-style, which at the time was economically feasible. But Poly continued to expand as it gained more students.

Composite photo of attacker made

A female dorm resident was attacked Feb. 29 by a white, clean-shaven man between 20 and 25 years old who was described as being 6 feet tall and 200 pounds, but nothing more was known—until Tuesday.

This composite photo was released by San Luis Obispo identification technicians after the victim compiled these features out of a police ID kit.

Wayne Carmack of the campus public safety department said the victim was confident the photo resembled the man who she said attacked her. This photo was compared to police mug books, but the victim did not match it to faces in the book.

Carmack said the search is continuing, but no new leads have surfaced. He said a poster is being distributed around campus because there are indications the man may be a student here. The victim said the man was young.

If this photo is recognized or any information is known about the man, call Carmack at 546-2281 or contact the San Luis Obispo City Police at 541-5151.

The campus public safety department released this composite of a suspect in an attempted rape case.

BAKER PROPOSES PRE-SCHOOL RELOCATION

Where the buck stops

ASI officers worry constantly that Cal Poly student's don't seem interested in student government, which each student has to support with \$20 a year in ASI fees.

Less than a fifth of all Cal Poly students vote in ASI elections. Student input to the ASI is rare.

But, the theory goes, if each student could vote which ASI club or group received \$1 out of the yearly \$20, students would feel they had a stake in student government. They'd surge to the polls, ASI officers would feel they represented a lot of students, and everyone would be happy.

Author Melissa Hilton is a senior journalism major and Mustang Daily staff writer.

So the theory goes. But should students be required to pay ASI fees?

This vote-on-a-dollar idea, called "general revenue sharing," was part of Vice President Jeff Land's campaign platform last spring. Now it has finally reached the student senate and will come up for a vote right after spring break.

It will probably pass. Anything that appears to give students more say over where their money goes sounds like a nice idea.

Once revenue sharing gets going, a

few thousand dollars will be distributed according to student votes. Then the rest of ASI's \$750,000 budget will be divided up as the Finance Committee and student senate see fit.

That could mean giving extra money to groups that student voters left out, and cutting back on groups that got too many votes.

Bob Walters, the student senate's adviser said students should also be given the option of voting to keep their dollar themselves.

If most students voted not to give \$1 of their fees to any ASI group, it would make a real difference in the ASI budget. On the other hand, if most students voted to give their dollars to ASI groups, student government would actually get the backing it yearns for.

But why not take it one step further? Why not let each student decide whether he or she wants to pay any ASI fees at all?

Students should not be forced to join the ASI just because they're enrolled at Cal Poly. If they don't want the benefit of the ASI programs, they should be allowed to exclude themselves.

Fee-paying members could have special stickers on their student body cards entitling them to student rates at ASI films, concerts and other activities. Non-members could pay the same rates as the general public.

If ASI officers really want student interest and backing, they should make ASI membership a free choice, not an inescapable requirement sugar-coated with \$1 revenue sharing.

Letters

Spoon-fed reply

Editors:

There have often been occasions when I felt prompted to write letters to various publications, but I never have until now. I can only respect Mike Trachiotis and his roommate for taking the time and effort to work with the university and the San Luis police department to resolve the problems resulting from their Feb. 21 party.

I have no respect, however, for Mr. Bob Berger after reading his March 5 editorial. After attacking the university administration and San Luis community and police for their "conditioning" of students, he suggests student control because "We have the power." Somehow, it brings to mind Orwell's *Animal Farm*.

Really, Mr. Berger! Please make an attempt to face reality! There will always be problems like these, but we must work to solve them as a community, with many differing constituents. And therein lies our first chance as adults to help change the system for the better, by working together. If this sounds trite, consider the alternatives!

Don't abuse your editorial privilege as a member of the *Mustang Daily* by taking cheap shots at this community. My great-grandparents moved to this county in the 1800's and, like many others, made a living, not by "parasitizing tourists" but as ranchers, farmers, teachers, and police officers. We have worked for this community as a whole, Cal Poly included. But, I remind you, this little town was there long before Cal Poly was even on the drawing board and shall continue even after you leave.

I almost hate to burst your bubble of superiority, Mr. Berger, but no amount of bell ringing, spoon-fed answers, or conditioning can destroy a person's freedom unless that person wishes to acquiesce. Instead of bombarding us with psychological cliches, why not exercise your brain thinking of ways we can work together.

Likes wine better

Editors:

In reference to the recent controversy over the serving of a malted beverage at the Poly Royal barbeque, we say: "Nyet, nyet!" This type of petition only exemplifies the utter classlessness of an ever-present, traditional Cal Poly attitude.

May we suggest a lesson in culture to these people behind this event we call Poly Royal. Think for a moment, sitting down with good friends for a well-planned, well-prepared meal. You lean over to make a toast, pick up your glass of beer, belch, and say, "Here's to good friends!" Is this the type of impression you want? We say, "Nyet, nyet!"

We believe that wine should head the list. Wine adds a note of graciousness to the meal. It should be the true Cal Poly drink. It embraces botany, chemistry, agriculture, carpentry, economics, and a number of sciences whose names we can't pronounce! Wine enhances the meal.

May we suggest for starters a pre-dinner drink such as a martini containing that little known wine, vermouth. When the host announces "Dinner is served," we prefer either a dry wine with a superb bouquet, such as a pinot noir '73 or a slightly more full-bodied wine such as cabernet sauvignon (for this, '72 is a good year).

Remember, this is wine, not beer, so please sip, don't guzzle. Wine enhances the dinner conversation. The scope and subject of wine is never-ending, whereas conversations concerning beer usually consist of "Have you seen the latest Miller Lite commercial?"

Therefore, we would like to conclude that not out of snobbery but common

Be committed to becoming a salivating dog, if you wish! I have better things to do with my life!

Mary Lee Bianchi

Under their thumbs

Editors:

I am writing somewhat in response to Bob Berger's piece entitled, "Losing Freedom: It Starts Small."

Yes, Bob, they do have us under their thumbs, but I'm not sure where our power is.

Dormies are under the thumb everytime they choose to eat in the Dining Hall or Vista Grande. I've heard of three cockroach incidents since the beginning of winter quarter. The latest one even made the *Mustang Daily*. Cockroaches in pancakes? Really sparks up the ol' appetite, doesn't it?

In an effort to avoid these conditions, my roommate and I vowed to stick to "safe" things such as fruit, hard-boiled eggs, packaged crackers and the salad bars.

Just today I hit VG to fill up a salad plate with carrots. I didn't want lettuce or other salad items—just carrots. A worker stood over me and said I couldn't have just carrots. "That's not what a salad is," she said, "and this is a salad bar."

To my distress, the women said carrots could only be sprinkled over the top of a salad. Now they're telling me how to make a salad. My eating privileges are further limited.

I'm all for the proposed 10-meal plan, but that's been turned down as "uneconomical." In other words, they need the people who eat like me to pay for the people who eat like football players.

For many dormies, mealtime is the only break in the day to relax and talk with friends. This is getting less and less enjoyable with frequent cockroach appearances and stringent rules limiting us.

Under the thumb? You bet. But what can we do?

I wonder if they'll let me use my whole meal card on tea bags...

Jenny Coyle

sense is our reasoning for suggesting wine instead of beer at the Poly Royal barbeque. As Grandma Poly said to Orson Wells, "We will not serve wine before its time." Now is the time! Bon appetite.

Cities tighten land-use strings

Student awareness of regulation explosion, zoning, procedures essential

It is essential that students and nonstudents alike gain greater awareness of the environment in which municipal governments like that of San Luis Obispo operate. There are 420 cities in California and all of them, including the city of San Luis Obispo, are affected by the proliferation of government regulations, the scramble for new revenues to replace what the Jarvis-Gann initiatives have taken away and the demand for new services and housing.

The regulatory explosion is greater than most people realize. In the area of land-use, for example, all local governments are required by the state to have nine element general plans which include elements on land use (zoning), housing, circulation, conservation, seismic safety, noise, scenic highways, safety, and open space. Further, zoning ordinances must be consistent with what is designated on the general plan land-use map.

Author Allan Settle is a political science professor and former San Luis Obispo city councilman.

Recently students at Cal Poly who lived in the city observed how zoning ordinances are a factor in housing with the ordinance that limited the number of unrelated people living together in the R-1 single family zone. While general plans serve an important purpose to cities there are many other state and federal regulations that are making it far more expensive for city governments to operate such as new laws on labor relations, pensions, transportation, housing and air quality maintenance. New legislation and court decisions will also reflect an increase in what one government entity will charge another to operate.

Probably the largest impact city government is having upon Cal Poly students is in the area of housing and housing costs. Because of limited city service capacity involving the provision of water, sewer, fire, police and the cumulative impact of Propositions 13, 4 and possibly 9 (Jarvis-Gann initiatives), limiting revenues for city services, the following actions will be taken: City governments will continue to reduce the number and density of dwelling units and take greater care in growth management so as development doesn't expand beyond the city's ability to provide essential services.

The service capacity of San Luis Obispo is about 43,000 people and the current population is about 35,000. The limiting of new housing along with inflation and record high interest rates approaching 20 percent will continue to force housing prices to incredible new heights and rents along with them.

A vicious circle begins to take place at even a faster rate. As rents go up more demands for rent control develop. As the threat of rent control increases, more apartment owners tend to move for conversion of apartments into condominiums, which in turn, if successful, results in less apartments with even higher rents. Also, with higher interest and housing prices fewer people qualify for mortgage loans. Further, less are willing to sell because under Proposition 13, all newly sold property is reappraised by the county assessor at a current (1980) market value rather than at a 1975 market value with a two per cent limit per year increase.

Some of the savings and loans have completed studies showing that prices of single-family homes have jumped more than 41 percent in the last thirty-six months. Thus before Proposition 13, a city with new residential development got to tax all the assessed value from that development. No more is this the case.

Inflation is increasing at more than the Proposition 13 assessment increase limit of two percent, unless the property is sold, and cities will rely more from "bail-out" (SB 8) funds from the state and upon service charges for city services. In short, new residential development does not pay its way for city governments but the housing demand is increasing.

With the increasing housing costs and the possibility of tuition for Cal Poly students, greater economies of funds are vital and particularly as they relate to housing costs. For example, students may want to encourage the city to increase the number of unrelated people living in the multifamily zone to permit more people to share rents and reduce rent costs per person. Fraternities and sororities may want to seek an overlay zone in what is now called a P.O. or office zone which would not be a conflicting use in the zone, could provide improved parking, and go along with the spirit of limiting the conversion of apartment units into non-apartment uses.

Students should support the continued moratorium on condominium conversion because this limits the available rentals available to students. Also the general plan can be made to accommodate increased infill or densities in the areas around Cal Poly to limit the travel time as well as encourage development of student housing for married students and fraternities and sororities to build on state land with lease agreements. Furthermore, a shortened development review time and less overlapping or redundant regulations and fees are necessary to limit the crushing burden of government charges on housing costs.

It is necessary that students as current or potential voters become informed on municipal affairs and participate actively in limiting regulations that affect housing costs, jobs, and sound land use policy. Cities will understandably seek environmental preservation and protection of adequate service capacity but may overlook important community relations with students unless there is greater knowledge of city affairs and policies as well as participation in policy making.

Students support Foundation, should have vote on Board

Did you know that Cal Poly students spend an average of about \$250 annually at the El Corral Bookstore?

Or that a student spends an additional \$275 annually consuming campus food services?

That means students spend at least \$500 each year to support Cal Poly Foundation. We are not only investors in this campus corporation but primary consumers as well.

Typically, investors in a corporation vote for the corporate board of directors. This board is responsible for making all significant financial decisions.

Unlike the "outside world" the Cal Poly student investors have no Foundation voting power. We do not vote for the board of directors, and, more importantly, we do not even have a student member on the board. The board has seven voting members—all administrators or faculty.

It is indeed ironic student investors are not given a single vote on a board that so directly affects Cal Poly students.

Author Theresa Bauer is an administrative council member and Mustang Daily staff writer

For example, last year El Corral's book sales exceeded \$2.5 million. Who do you think bought those books? Administrators and faculty didn't contribute to that sum—it is \$2.5 million of students' money.

In addition, Food Services' income is almost completely generated by students through the Snack Bar, Dining Hall, Sandwich Plant, Burger Bar, and Vista Grande.

Considering these facts, it doesn't seem so unreasonable to request that a voting student be included on the Foundation Board of Directors.

An ASI officer presently attends board meetings as a non-voting advisor. This student input carries little authority when it comes time to vote on an issue.

The board of directors is the mastermind behind all Foundation financial policies, from capital outlays for Dining Hall carpeting to textbook pricing at El Corral. Student input on issues such as these should be expanded to voting authority.

After all, students have proven

themselves capable of making responsible decisions on 30 university-wide committees. We even have a student member on the Presidential Selection Committee and a student CSUC trustee.

Maybe Cal Poly can learn from the experiences of the other universities in the state system. An ASI survey of the other 18 campuses showed students are included as voting board members on their auxiliary organizations. These campuses gave very positive responses about the effectiveness of their student members, commenting that they add a necessary dimension to the decision-making process. Students have a better understanding of their peers' needs, they said. One campus responded that they have three voting student members, while another said the vice-president of their foundation board of directors is a student.

However, members of Cal Poly's Foundation board have voiced several concerns about including a student. One of these is the Title 5 requirement that a community member be added if a student is extended voting privileges.

But other campuses have said their community member is helpful because they are very aware of higher education's needs. Wouldn't a citizen from San Luis Obispo give the same dimension to our Foundation?

Cal Poly's board is also concerned that a student would not have enough time or the background to adequately understand the Foundation's financial structure since the student would be on the board for a short period of time.

The student position on the board would be filled by an ASI internal affairs officer. This position is appointed every spring by the new ASI president. The new officer would be trained by the outgoing student board member to prevent a gap in student representation on the board. This would adequately prepare the student to vote logically and soundly, taking into account the liability of voting as a member of the Foundation Board of Directors.

Students have proven themselves to be capable, responsible adults in the past. I urge the Foundation board to acknowledge this by being open to a constructive change—the inclusion of a student as a voting member on the Foundation Board of Directors.

Senate kills sex ed. bill

SACRAMENTO (AP)—Fundamentalist groups warning of "pornography and perversion" buried legislation Wednesday that would have allowed televised sex education in Los Angeles schools.

After hearing from a parade of sex education opponents, the Senate Education Committee voted 10-1 to kill a bill, AB542 by Assemblyman Herschel Rosenthal, D-Los Angeles, that the Assembly had passed without controversy.

Rosenthal said the measure would allow Los Angeles schools to show sex education programs offered by a local instructional television station.

He said the programs covered such areas as pregnancy, childbirth, parenthood and rape prevention.

Current law allows parents to see all books, films and other materials to be offered in sex education classes and then keep their children out of the classes. School officials say few parents keep their children out of class and even fewer review the materials.

Rosenthal's bill would have provided parents in advance with a written description of each program so they could decide whether their children could see it.

That proposal ran into a torrent of criticism that often spilled over into sex education in general.

A vote for the bill is "a vote for pornography and perversion," said John Banducci of a San Francisco Bay area group called Lifeline.

Margaret Scott of a group called United Parents Under God said passage of the bill would prompt a statewide taxpayers' strike, and denounced "these raunchy sex programs."

The bill's only supporter on the committee, Sen. Diane Watson, D-Los Angeles, a former Los Angeles School board member, contended sex education classes are "in good taste...healthy and wholesome," and said that without them, youngsters "learn their sex in other ways."

Natural History

A Cal Poly Extension course, Introduction to the Natural History of California, is offered beginning in April. Lectures are April 10 to May 1, Thursdays from 7 p.m. to 9:30 p.m.; there will be three five hour field trips. Cost is \$54 and preregistration is recommended. The class, an introduction to California's flora, fauna and geology, is taught by Gregory Forbes. Call 546-2053 for more information.

No Coffee House

There will be no ASI Special Events Coffee House on Thursday night. The music and get-together session will start again in spring quarter.

Newscope

KCPR

Tune in to KCPR 91.3 FM to hear Foreign Vinyl, the biweekly show of progressive rock, pop and jazz. This week, on Saturday at midnight, tracks from the new Keith Emerson and Dave Greenslade albums will be featured.

Mini classes

The Cal Poly Folk Dance Club is holding an Armenian dance workshop taught by Tom Bozigan in Crandall Gym on March 14 from 8 p.m. to midnight. The cost is \$2.50. Bozigan has studied and taught Armenian dance and folklore in many countries, including Armenia.

Logo contest

The Business Council is sponsoring a logo contest. All majors are invited to participate; rules are posted in the Business and Graphic Communications buildings. Submit entries to BA and E 127. \$50 in prizes will be awarded.

Pot luck

Sign-ups for the Recreation Administration Club's pot luck dinner and hot tub party will be taken at the March 13, 11 a.m. meeting in Science E-47. The dinner is at 7 p.m. at D'Ann Lawson's house; party is at the Sycamore Mineral Springs, \$1/hour for the hot tubs.

Dance workshop

The Recreation and Tournaments Committee offers the following classes for spring quarter: belly, aerobic, disco, New Wave and beginning jazz dance, frisbee, mime, beginning and intermediate karate and sign language. Prices range from \$7 to \$20. Classes begin the second week of quarter at locations to be announced later.

Frog contest

The ASI Recreation and Tournaments Committee is holding its second annual frog jumping contest April 3 at 11 a.m. in the UU Plaza. Frogs will be available for rent for 25 cents. Prizes will be awarded.

NRM Club

The Natural Resources Management Club plans a meeting March 13 at 11 a.m. in Science B-5 to discuss Poly Royal and winter activities.

New members

The University Union Board of Governors is accepting applications for new members for one and two year terms. The last day to turn in applications, available at the UU information desk, is April 11.

Bruce Lee

The Chinese Student Association is showing *Enter the Dragon*, starring martial arts superstar Bruce Lee, in Chumash Auditorium at 7 p.m. and 9 p.m. on April 7. Price is \$1.

Minority enrollment on rise

SACRAMENTO (AP)—Last year, 12 months after Allan Bakke amde his historic entrance to medical school at the University of California at Davis the first-year class of 100 included exactly one black.

That lonely statistic would seem to bear out predictions by university officials that minority enrollment would plummet if the U.S. Supreme Court ruled against racial quotas at professional schools.

But other statistics tell a different story—that applications from blacks to the Davis school surged in 1979; and that overall minority enrollment acutally increased at Davis and at UC medical schools as a whole.

"Last year 1978 we really felt the Bakke decision in admission," said Vicki Saito, information officer for the Davis medical school. "This year, we felt it less."

"I talk to students all the time," said Gary Perkins, head of the information office at the largely minority Extended Opportunity Program on the Davis campus, "and it's the Bakke decision meant some real hesitations...It's created much more of a pessimistic attitude."

"On the other hand, it's

probably created other things more positive. Students realize they're going to have to be 200 percent better now because of the added barriers."

Bakke, a white engineer, entered the medical school 15 miles east of Sacramento in September 1978, under a Supreme Court ruling outlawing a Dacis program that reserved 16 of the 100 places in each class for low-income minorities.

The court also ruled, however, that a school could use an admissions program that gave preference to race as one of several factors to promote diversity among students.

Such a program has since been adopted by Davis, and was already in effect in varying degrees at the other four UC medical schools: UCLA, Irvine, San Diego and San Francisco.

In fact, according to John Steward, dean of student affairs at Stanford University medical school, a nationwide study last summer of the 120 medical schools with white majorities showed that UC Irvine had the highest proportion of black, Hispanic and American Indian minorities, 22.5 percent. UC San Francisco was also among the top 10 with 16.5 percent.

Moonshine use legal for gas

(AP) — The backwoods science of moonshining is coming back, this time in a grassroots, legal effort to beat the rising costs of common gasoline.

Farmers throughout the country are using or trying to use corn, wheat, potatoes, sugar beets, barley, oats and even watermelons to brew alcohol.

The modern moonshiner says that with little modification, any gasoline engine can run on alcohol. And they're not talking about the much-touted gasohol, which is usually a mixture of 90 percent gasoline and 10 percent high-proof alcohol.

They're talking about ethyl alcohol, as low as 150 proof, or about 25 percent water.

The Bureau of Alcohol, Tobacco and Firearms, which used to chase moonshiners through southern swamps, is now apologizing for the red tape necessary to set up private stills.

Federal regulations permit backyard distillers to post a \$100 bond to make up to 2,500 gallons a year, but they cannot sell or give away the alcohol and must add other liquid gases to it to render it undrinkable. Any brew that leaves the still in drinkable form is taxed at \$10.50 a gallon.

ATF spokesman Howard Criswell said no fuel distillers have been arrested so far for failing to denature their brew: "People who are getting permits for stills are serious about producing fuel."

By the end of February, the government had issued

2,200 special permits to distill fuel, nearly all of them to individual farmers.

A national alcohol fuels hotline in Colorado reports it is taking 300 calls a day with requests for information. Each caller gets a book called "Fuel From Farms."

Several companies are selling stills or equipment to build them.

A North Carolina-based national magazine, Mother Earth News, says its alcohol fuel seminars in the Midwest and South have attracted up to 1,000 people per session. The magazine has sold thousands of alcohol fuel kits at \$45 each, including a "motor fuels cookbook," chemicals and plans for a wood-burning still.

Richard Freudenberger, associate editor of the 850,000-circulation magazine, said one of alcohol's prime benefits is its lack of pollution, with hydrocarbons emissions 87 percent lower and carbon monoxide 98 percent lower than in gasoline.

Jerry Wilkerson of Provo, Utah, a 44-year-old former moonshiner turned non-drinking Mormon, has logged 33,000 miles in eight months in his mostly alcohol-powered pickup lecturing Americans on the advantages of brewing their own fuel.

With cost estimates for moonshine gas ranging around 50 cents a gallon—less when the leftovers are sold for high-protein animal feed—Wilkerson predicts low-proof alcohol will be competing directly with gasoline in a few years.

"There's no way the oil industry can compete," says Wilkerson, who demonstrates a solar still

he says anyone can build for about \$130. Last year's model cost only \$22, but Wilkerson says the new design—a door-sized unit of wood, glass, metal pipe and black Astroturf—is better.

"If I have my way, in five years this country will not need to import one drop of OPEC oil," says Wilkerson, a father of eight who lives off Navy disability retirement.

Wilkerson, who studied engineering technology in college, says it took a lot of "trial and error" to develop the right formula for the fuel.

He says such problems as alcohol's lower vapor pressure, which makes it tricky to start engines in cold weather, and its corrosive effect on engines because of its water content can be overcome with further experimentation.

Grant Kohlor, a Shelley, Idaho, farmer, says he has been burning homemade alcohol in four pickup trucks, an Opel passenger car and some farm equipment.

Kohlor's trucks are equipped with two gas tanks, one for alcohol and one for regular gasoline to start up the engine.

Sierra Club hike

Experienced hikers are invited to join a strenuous 20-mile overnight hike to Pine and Machesna Mountains on March 22 and 23. The trip is sponsored by the Santa Lucia Chapter of the Sierra Club.

Most of the slopes are covered with a dense growth of chaparral, oaks, manzanita, ceanothus and other drought-resistant plants. Coulter or bigcone pines are found along some of the ridges and peaks.

Chapter president John Ashbaugh said the Sierra Club supports designation of the Machesna-Garcia Mountain area as a proposed wilderness area to protect its rare animals and plants.

Until recently, this area was a wild and unfrequented region.

Today there are still many animals around, including deer, mountain lions and bears. The cliffs are breeding places for falcons, eagles and many other birds.

Hikers will carry their own camping equipment and food for two days. For reservations call Tim Gaskin at 541-1273.

For more information call John Ashbaugh at 489-4683 or 543-7057. Or call Betty Schetzer at 541-0715.

State is fined for no auto safety inspection

(AP) — A federal judge has refused to block the U.S. Environmental Protection Agency from penalizing California because the state does not require annual vehicle inspections.

U.S. District Judge Lawrence Karlton ruled recently he lacks authority to keep the EPA from freezing certain industrial construction permits. He also said the agency has authority to cut off some federal funds to the state.

The EPA, citing the federal Clean Air Act, stopped issuing permits last July for certain types of pollution-causing projects, like power plants, oil refineries and dry cleaners throughout the state.

The action hasn't had much effect so far because permits take a long time to process. But its effect could increase in coming months if the Legislature maintains its refusal to require every motor vehicle in California to be inspected each year for

pollution.

The Clean Air Act also authorizes the EPA to cut off federal highway and sewage treatment funds to states that don't establish a testing program.

The Pacific Legal Foundation filed suit last December on behalf of 13 legislators, contending the EPA was engaging in "unconstitutional coercion of the Legislature."

The suit also said the law required the EPA to adopt a testing program for states that failed to do so, rather than punishing the states.

In refusing to issue a preliminary injunction against the EPA, Karlton said Monday that he believed the construction permit cutoff could be challenged legally only in the federal appeals court in Washington D.C.

He also said the federal government has "unquestioned" authority to cut off funds to states that fail to comply with various federal laws.

Pacific Legal Foundation lawyer John Findle said he would appeal the ruling in the federal appeals court in San Francisco.

The desert offers many people a chance to see unusual rock forms and fauna. These people are exploring the Joshua Tree National Monument and area around.

Joshua Tree is escape

BY BOB BERGER

Daily Sports Editor

We pulled into a gas station just south of Ft. Tejon as a Sunkist orange without the navel melted into the snow-capped San Jacinto mountains.

Mt. Baldy was sporting a white winter coat. It was nice to know we were headed east into the on-rushing evening, away from L.A. There would be no American Gigolo's in Twenty-Nine Palms; just Joshua trees, cactus and climbers.

The Joshua Tree National Monument is the winter mecca for climbers training for extended summer ascents. For me it would be an indoctrination into the "J-Tree" ethics. For my climbing partner, John Larrick, it was like going home.

In Ft. Tejon it was feeling like a long road trip ahead. Our only traveling companions were Adolph Coors and the hum of 18-wheelers ripping by us, enjoying the open road.

We pulled over somewhere north of Banning to relieve ourselves of the gifts wrought by Adolph. Of the four gas stations occupying the corners, only one was open. The other three stations were a part of a modern day ghost town. The curtains waved through broken windows, the pumps were stripped of everything valuable and the huge revolving signs had been dismantled or destroyed beyond recognition. They were the remains of an era.

It all seemed so strange; abandoned gas stations and a few cars on the freeway at a peak time on a peak day. Those cars that were out, were new. There were no gas-guzzling clunkers like my whale. The open stations, with gas, were sparse. The character of the mom and dad fly-trap restaurants had been replaced by

shiny, antiseptic McDonald's, selling computer food. It was like a huge vending machine with people trapped inside. The only smile was the one in the mirror.

When we arrived, there was no moon, but the desert sky was wiggling with stars. The air was crispy cold. It was a desert night out of a Marshall Tucker song. We were told to turn down the car stereo. The Rangers were everywhere. Yogi and Booboo would have to be careful with goodies and picnic baskets.

The Saturday sky was bright blue with dollops of white puffy clouds that looked like they had been made on cookie sheets.

The climbing was as intense as the rays from the warm spring sun. In the Monument there are

miles of hiking trail and hundreds of climbing routes. There was no running water at the monument so water jugs were a necessity.

The best time to visit Joshua Tree will be later this month or early April when the wild flowers carpet the desert floor.

Khomeini urges Iranians to vote

Ayatollah Ruhollah Khomeini on Wednesday urged his countrymen to "dash the hopes" of Iran's enemies, "especially the oppressive U.S. government," by voting in parliamentary elections Friday. Khomeini and other top Iranian leaders have said the parliament will decide the American hostages' fate.

Khomeini urged the

election of those "who are faithful to Islam and the constitution, are free of tendencies toward left or right, and are renowned for their good record and commitment to Islam. The nation should know that to stray from this important Islamic task would be treason to Islam and the country." His message was broadcast by Tehran Radio.

Hospital security tight for Shah

PANAMA CITY, Panama (AP) — Doctors and officials worked under tight security Wednesday to prepare a local hospital ward for a delicate spleen operation on the deposed Shah of Iran, medical sources said.

The sources, who asked not to be identified—said Paitilla Hospital—a private Panamanian clinic—was declared a security area by authorities and all employees and medical personnel were ordered not to talk about what they were doing.

A New York spokesman for the deposed monarch said Shah Mohammad Reza Pahlavi's spleen is inflamed, enlarged and probably associated with a tumor, and that he will undergo an operation soon to have it removed.

The former monarch now

lives on Panama's Contadora Island. His last medical checkup a week ago showed he had severe anemia, and low white cell and platelet blood counts, the New York spokesman said.

Dr. Benjamin Kean, the shah's personal physician, refused to disclose the date of the operation for security reasons, the spokesman said. But sources in Panama said it probably would be sometime within the next week or so.

The spokesman quoted Kean as saying the operation would be "hazardous" and that the shah would require major blood transfusions during and after the operation.

Vance, Waldheim advise patience

WASHINGTON (AP) — Secretary of State Cyrus R. Vance sees no breakthrough in the hostage crisis before May. U.N. Secretary General Kurt Waldheim says even that forecast may be too optimistic.

In separate statements Tuesday, Vance and Waldheim counseled patience despite the failure of the U.N. investigating commission to make progress toward release of the approximately 50 American hostages being held in Tehran.

Vance was meeting with Waldheim today in New York to see if the commission can be revived. Waldheim said Iran needs time to iron out the "strangepower situation" which prevails in that country. Vance, after briefing members of Congress, said no breakthrough is expected

before the elections for the Iranian parliament are concluded. The first phase of the elections begins Friday but the parliament is not scheduled to convene until May. Iranian President Abolhassan Bani-Sadr predicted the hostages won't be released before "mid-May at the earliest."

But Waldheim, in an interview with PBS' "MacNeil-Lehrer Report," said the resolution of the crisis may hinge on how well supporters of Bani-Sadr's moderate policies do in the elections.

"The kind of support he receives will be of great importance for a possible solution to the problem," Waldheim said. Implicit in his remarks was the possibility that the crisis could go on indefinitely if backers of the militants holding the U.S. Embassy compound win a majority.

Oil companies obeyed Iran embargo, says DOE

WASHINGTON (AP) — Department of Energy officials denied today that oil companies have broken President Carter's embargo on oil imports from Iran, despite government figures showing January shipments of 7.3 million barrels.

Ed Vilade, a DOE spokesman, said all of the Iranian oil received in this country in January had been loaded onto ships before the president's Nov. 12 order cutting off Iranian oil purchases in retaliation for the seizure of the American embassy.

"The embargo has not been broken. Any other story is just not factually correct," Vilade said in denying a broadcast report.

He said DOE figures

showed 11 shipments of oil received in January and none for February or so far in March, thus proving that Carter's embargo is taking effect.

"The only landings since the embargo have been landings of oil that left prior to the embargo," Vilade said.

Vilade refused to name the oil companies that received the January shipments. Zbigniew Brzezinski, Carter's top national security adviser, told reporters today that while all of the oil was shipped before the embargo, some of it had been stored in the Caribbean before entering the United States.

"There is nothing unusual or remarkable about that," Brzezinski

said, adding that the administration was certain the embargo was not being broken.

NBC News, citing Commerce Department figures, reported Tuesday night that the 7.3 million barrels received in January were 1.5 million barrels higher than January 1979.

Gacy is guilty

CHICAGO (AP) — John W. Gacy Jr., whom prosecutors called the "worst murderer" in the nation's history, was found guilty in the sex killings of 33 boys and young men Wednesday by a Circuit Court jury of seven men and five women. The jury deliberated only one hour and 50 minutes.

The former building contractor was convicted of 33 counts of murder and of taking indecent liberties with a minor and deviate sexual assault. Both those later charges stemmed from the disappearance of 15-year-old Robert Piest.

The verdicts were read by the clerk of the court while Gacy sat without expression, staring straight ahead.

When he was taken from the court, his lips were clamped and he walked briskly under heavy guard.

Airlines to up prices 9 percent

WASHINGTON (AP) — The Civil Aeronautics Board, citing increased fuel and other costs, gave U.S. airlines permission Wednesday to raise fares on international routes up to 9 percent.

On April 1, carriers can raise standard fares 6.1 percent in Latin American markets, 8 percent in the North Atlantic and 9 percent in the Pacific, the board said. The CAB is

required by international treaty to establish a standard fare level and adjust it periodically to reflect changes in operating costs for U.S. airlines flying overseas routes. The board predicted aviation fuel costs will exceed \$1 a gallon on affected routes by May 1, up from an average of 40 cents a gallon in January 1979.

JUST ASK MARGARITA

Dear Maggie,

The other night my boyfriend, Mark, came over for dinner. We had a few drinks before we ate, wine with dinner, and a couple more afterwards. Well before I knew it I was feeling a little tipsy, and I guess Mark was pretty cranked too. It came time for Mark to leave, but he told me that he was too drunk to drive, and he said he wanted to take a cold shower to sober up. Then he told me that I should try to sober up too, but because of the water shortage, we would have to take one together. Was Mark trying to feed me a line, or did he just want to feel friendly?

Signed,
Friendly

Dear Friend,

This scene looks like a washout to me, and as far as I'm concerned you should tell Mark that he's all wet. Your relationship is headed down the drain, and if you don't bail out now, you'll end up in hot water.

Love,
Maggie

Confidential to Lucky Draw in the Ninth: What's good about a goose is good for the gander. Or vice versa. While the away the mice are at play, something like that. I know what I

Contrary to popular opinion, cold showers and coffee do not sober you up. Only time, one hour per drink, will bring your blood alcohol level down to normal. There are a lot of ways to sober up, but only one that works.

Men's volleyball plays USC

The men's volleyball team calls on Pepperdine University and USC for a pair of California Intercollegiate Volleyball Association (CIVA) matches Friday and Saturday in Cal Poly's Main Gym.

Pepperdine will visit San Luis Obispo Friday night while USC meets the Mustangs Saturday night. Both matches begin at 7:30 p.m.

Pepperdine has been struggling this season, but USC is another story. While the Waves own a 3-4 CIVA mark and 9-6 overall record, USC is 6-1 in CIVA play, and knocked off No. 1 ranked UCLA in the Golden Dome Classic last week.

The loss snapped UCLA's 48-match winning streak over a three-year period, but UCLA is still atop the CIVA standings with a perfect 7-0 record.

Cal Poly split two CIVA matches last week, defeating U.C. Berkeley in three straight games and

losing to Stanford in three straight. Last week USC defeated Pepperdine in its lone league match, after Pepperdine upended winless Loyola Marymount earlier in the week.

The Mustangs are 2-5 in CIVA action and 5-9 overall. After this weekend's matches, Cal Poly is idle for 10 days, and travels to Brigham Young University on March 25 before resuming CIVA play against UCLA on

Saturday, March 29 at 7:30 p.m. in the Mustangs gym.

"Pepperdine is rated down this season, but has a lot of potential," noted Cal Poly coach Mike Wilton. "They have a center blocker (Craig Buck) who is 6-9, and two other players in their line-up who are 6-5 (Gary Cunitz and Brian Ehlers, a CIVA honorable mention selection a year ago)."

USC is rated No. 2 in the nation behind the Bruins of UCLA.

Mustang Daily—Vince Bucci

A Mustang volleyball team member goes to the floor to save the ball in season play. Cal Poly's squad did well in the face of tough competition.

SCAA gives Buehning best player honors

The women's basketball team's star player, Laura Buehning, was named the Player of the Year in the Southern California Athletic Association, it was announced Saturday.

The 5-11 sophomore guard led Coach Marilyn McNeil's 1979-80 Mustang women's basketball team in virtually every category, scoring 188 points in 10 SCAA games and 498 overall in 29 games (17.2 average).

Buehning led Cal Poly in scoring in six of the 10 conference games and in 15 of the 29 total games. Her highest league single-game point total was 28 points against UC Santa Barbara in an SCAA game, although she set a Cal Poly school record in scoring 31 points against UCSB in the Cal Poly Classic in the third game of the season. In that game, she also had 10 assists to shatter another school mark. She had 106 assists for the season (3.7 average).

She led the Mustangs in overall rebounding with 178 (6.1 per game) and was

second in conference play among Poly players with 59 (5.9).

The 20-year-old biology major made 202 of her 464 overall field goal attempts for a .435 percentage, while she was 72 of 179 in the SCAA (.402). She converted 94 of her 133 free throw attempts (.707), and was 44 for 60 from the line (.733) in the conference.

Buehning was one of the players Coach McNeil brought with her to Cal Poly from the University of Calgary in Canada. Buehning is a native of Hood River, Oregon, but attended high school at Queen Elizabeth HS in Calgary where she competed in volleyball, track and field hockey in addition to basketball.

She came to Poly from Calgary along with junior forward Colleen Finney and assistant coach Darla Wilson.

Other all-SCAA members are: Sherryl Pate and Ruth Smith, Cal State Los Angeles; Robbi Beyer and Carolyn Topf, Cal Poly Pomona; and Katherine Hamilton, UC Irvine.

From the mountain tribes of the Philippines, this group of primitive objects have been selected for their uniqueness, adaptability to modern life and just plain interest. The collection runs the gamut from fish traps and rain capes to knife sheaths, ox saddle stools and cradles. They enhance every area of the modern, traditional or eclectic household, especially as wall decor.

The white look in this willow/straw group is imported from the People's Republic of China. In early spring, the newly sprouted willow shoots are cut, bundled and stored in moist places to keep them fresh, green and elastic. After peeling off the skin, craftsmen weave the shoots into baskets. Straw is also cut green and kept moist until ready for weaving.

An eclectic collection of boxes from China, the Philippines, Taiwan and Thailand to store those special treasures, sewing needs, pills or whatever. Selected for their shapes, textures and colorations and for interesting materials such as bamboo, fern, seagrass, straw and wheat, they create a wonderful montage for the collector.

Fern basketry comes from the Kwangsi Province in the People's Republic of China. Kwangsi is a southern province with mountainous areas that abound with virgin forests and deep valleys where a unique species of fern grows. The stem, when dried, has a soft glossy tan-brown color with the pliability of rattan and the strength of bamboo.

Mustangs end best cage season

Mustang Daily—Vince Bucci

Rob McKone, shown in regular season action, was the Mustang's second highest scorer with a 10.6 points-per-game average. Mark Robinson led the team, 119 field goals for 221 attempted.

Basketball at Cal Poly is a team sport, and Coach Ernie Wheeler really puts the emphasis on the word "team." That was the prime ingredient in the Mustangs' 22-7 season in 1979-80.

"The team effort on the part of the players is what I'm really proud of," began the eight-year head mentor. "The kids battled hard all year long. They played well together and made great sacrifices."

The result was Cal Poly's winningest season in 28 years, and the 22 victories tied a school record matched during the 1950-51 campaign by Coach Ed Jorgensen's Mustangs.

Wheeler listed numerous positive aspects of the season, overshadowed only by a loss to U.C. Riverside in the finals of the NCAA Division II West Regionals at Tacoma, Washington.

Cal Poly captured its fourth California Collegiate Athletic Association (CCAA) title in the last nine years, "which was our goal all year long."

The Mustang defense finished second in the nation with 58.8 points per game allowance (a school record, eclipsing a six-year mark of 59.9 points per game average).

A new field goal percentage school record was established. The Mustangs made 49.8 percent of their floor shots, breaking the old mark of 49.6 percent set three years ago.

"Our 13-1 record at home was outstanding," noted Wheeler. The home court mark is the best in school history since World War II. No Mustang team since that time has ever been unbeaten on its home hardwood.

"We had great crowds this year," added the head mentor. "The backing of the student body and the community was super."

A year ago, Cal Poly finished with a 13-14 overall record and 3-9

Dec. 5 to Jan. 5. Most teams don't do well with CCAA mark. Coach Wheeler's first losing season in eight years at the helm of the Mustangs.

Thus he went out on the recruiting trail and nabbed Fullerton College guard Jim Schultz, who stands at the most 5-9. Wheeler needed a point guard to run the offense, and he figured Schultz could fill the bill.

Wheeler was right, for Schultz, in being honored as co-most valuable player of the CCAA, set a school record for most assists in one season, average 8.9 assists per game.

Schultz was named to United Press International's all-Pacific Coast all-star team as an honorable mention, one of only three players from NCAA Div. II schools in Southern California so honored.

Schultz was Wheeler's perfect answer to the "team" concept of the game. He averaged only 4.7 points per game, yet he was co-MVP of the CCAA. "That really shows the type of program we have here," noted Wheeler.

"None of our players were honored as CCAA Player of the Week during the regular season, which I guess shows great team effort," Wheeler added.

"Making the regional playoffs was quite an honor for the team," continued Wheeler. "This was the second team ever at Cal Poly to reach the regional finals."

Cal Poly was 9-6 in road games this season, which pleased Wheeler. "We were able to go to Bakersfield and win our first conference game. Then we split with Riverside and Pomona on the road and got a jump on the rest of the league."

"Our record on the road was excellent because of the type of schedule we

Mustang Daily—Vince Bucci

Kent Keyser helped the Mustangs achieve a 13-1 home record for the 1979-80 season. It was the best season for the Cal Poly squad in 28 years.

Wheeler added. "We were on the road from that kind of a schedule, but I was really happy with our road record."

Also, "the thing that really helped us this year was that we didn't have a lot of injuries and illnesses. Our players played with their injuries and when they were sick...made sacrifices," Wheeler added.

"The development of (Bill) Tos helped us, the tremendous improvement of (Mark) Robinson as a total player, the maturity of the returning players, the addition of Schultz as our quarterbacking guard and the play of (Rob)

McKone and (Pete) Neumann really helped us," summarized Wheeler.

Wheeler will have six of his top eight players returning next year, losing only Tos and Robinson to graduation. He will also lose seniors Andy Gust, a reserve center, and Earl Muse, a reserve guard.

"We will have to bring in one or two centers, including one big guy," said Wheeler. "We would also like to bring in one strong forward, but we do have Bob Skophammer and Mike Burris back."

"The guard position looks very good," added Wheeler. Schultz and Wheeler's son, Ernie, are back, along with a pair of redshirts, Rich Alvani and another Wheeler son, Keith, who will join much-used reserves Kent Keyser and Alex Lambertson in the backcourt.

"We are not recruiting any guards," said Wheeler flatly. "We are basically going to recruit a power forward and two centers, one freshman and one junior college transfer or both jaycee transfers."

Women cagers in slump at end

The 1979-80 season was the best ever for Cal Poly SLO women's basketball but it's difficult for first-year coach Marilyn McNeil to celebrate because of the way the season ended.

The Mustangs started the year shakily at a .500 pace, then won a school record 12 straight games, swept the first half of conference play, then lost six of their last eight contests, including both games in the AIAW Western Regionals at Pomona last weekend.

Eleven of Cal Poly's last 15 games were decided by eight points or less and nine of those were settled by five points or less. The Mustangs won seven of the 11 and five of the nine.

"We had a whole bunch of close games," McNeil said, "and in the first part of the season we won them and in the second part of the season we lost them. And we lost when it counted."

Poly finished with an 18-11 overall record and tied for second place in the Southern California Athletic Association with Cal State Los Angeles at 6-4. Cal Poly Pomona won the league title at 9-1. Pomona's lone loss came at the hands of the Mustangs. The 64-62 win was settled by guard Laura Buehning's 17-foot basket at the buzzer and was the Broncos' first SCAA loss since the conference began 3½ years before.

Buehning was largely the key to Cal Poly's success in 1979-80. The 5-11 sophomore from

Mustang Daily—Vince Bucci

Laura Buehning, named Player of the Year by the SCAA, led the women's team with 188 points in 10 SCAA games. She earned 498 points overall for 29 games. The team ended with an 18-11 overall record.

Calgary, Alberta, who came to California with her coach from the University of Calgary, was named the SCAA Player of the Year, but McNeil feels her star player could have perhaps increased her 17.2 scoring average at least 50 percent if Buehning hadn't been Poly's tallest player.

"Our No. 1 recruiting priority," claimed McNeil, "is height, because that's where we're getting killed." The Mustangs averaged only 36.3 rebounds per game in 1979-80, dead last in the SCAA, to the opponents' 40.8.

"We need to be able to pull Laura out away from

the basket," the coach insisted. "If we could do that, I feel Laura could increase her average to 25 or maybe 30 points a game. We're one good shooting player away from really becoming a top team."

McNeil will have to find replacements for graduating seniors Jeanine Cariff and Joyce Bergner, Poly's fourth and third leading scorers, respectively.

Another improvement the Mustangs will have to make is the psychological problem of playing poorly on the road. Overall, Cal Poly was 12-3 at home but only 6-8 away. The Mustangs were 4-1 in home SCAA games and 2-3 away from San Luis Obispo.

But still Cal Poly was able to participate in its first-ever playoff appearance last weekend in the Western Regionals at Cal Poly Pomona, even though the Mustangs lost both games, to Cal State Los Angeles, 85-80, and to Cal State Dominguez Hills, 77-75.

"The weekend was disappointing," McNeil analyzed. "Our problem was our lack of bench which caused us to have a little bit of lack of poise. Jean (Evans) and Erin (O'Hagan) have a good year of experience behind them after their freshman year, and they'll be strong next year." Poly will also look forward to having top reserve Carolyn Crandall back after missing the Mustangs' last eight games due to a stress fracture in her right leg.

New library to open fall 1980 Style

BY BEV BRINTNALL
Daily Staff Writer

If all goes well, the Robert E. Kennedy Library will be complete and fully operational by fall quarter 1980.

"If the library equipment arrives and is installed on time, the library will be finished in August," said acting Library Director Angelina Martinez.

"However, we don't want to jeopardize library services for summer quarter students, so the transfer into the new library will take place after the summer quarter."

The main improvement in the Kennedy Library is space, said Martinez. The old library, built in 1962, was designed for a student body of 6,000. Its seating capacity is 1,510, and holds 150,000 books.

The Kennedy Library will accommodate 2,500 students and 625,000 volumes.

Construction on the Robert K. Kennedy Library is ahead of schedule.

The five-story building will be served by a grand stairway. The ground floor will have a central courtyard with reading terraces on each of the upper floors overlooking the courtyard.

The Kennedy Library will have 13 group study rooms, five photoduplication rooms,

three typing rooms, one faculty reading room, and one microform room containing both microfilm and microfiche.

"It will be the largest building on campus," said Martinez.

The gross footage of the concrete building is 203,605 square feet, with a

total cost estimate of \$11,540,000.

Planning for the new library began in 1970. In 1977, it was fully approved by the California Public Works Board. On March 17, 1978, the groundbreaking ceremony took place.

"The library is actually

ahead of schedule," Martinez said.

With more than 86 percent of the construction completed, facility planner Peter K. Phillips said the library is 6 percent, or one month ahead of schedule. This means the library may be finished in the beginning or middle of July.

From page 1

trustees established the campus planning commission, and architect Bob Grant was appointed campus planning architect.

Gerard said Grant had hoped for a "cohesive" campus structural design, but was discouraged by the inflated costs required to duplicate such styles as that of the business building.

"The cost constraint made this totally impossible," explained Gerard, who said state trustees would not furnish the extra funds required.

There was little architectural control exercised when the campus added new buildings, many of which were built of financially practical concrete.

Yosemite Hall was one of the first gray concrete structures to be built. Painting the multi-tower dorm, which, if anything, would have given it a unique aesthetic appearance, would

have cost \$80,000, and would have required repainting every five years, according to Gerard.

He said gray concrete structures are "cheapest in the long run" to maintain.

Cal Poly is not the only campus in the state system with a motley assortment of class buildings and dormitories.

"Most other larger campuses, such as Santa Cruz, San Jose State, and San Francisco State, have some degree of hodgepodge makeup," said Gerard, who attributed the diverse design as being "controlled more by the dollar than anything else."

Some students have complained about the unsightly appearance of fortress-like Fisher Science Hall.

"It looks like a giant cement battleship," said natural resource management major John Mason.
