Report: toxics pose no present hazard

Landfill leach is possible

BY MIKE CARROL

Editorial Assistant

A report from the California Department of Health concerning the status of a now-sealed trash dump in Poly Canyon where toxic wastes were once buried "illegally" states the site poses "no immediate hazard to human health" but also makes recommendations to maintain the safety of the area.

The report, dated March 25, says the results of two ground samples taken at the site last quarter would be known by mid-May. Water samples of Brizzolari Creek, which flows through the canyon, are also scheduled to be taken, according to Cal Poly Health and Safety Officer Donald Van Acker.

The report, based on a March 17 onsite inspection carried out by Sue Stack of the department's Abandoned Site Project, cites a U.S. Geological Society finding that there are two springs in the area of the dumpsite. Due to the location of these streams—one of which runs "directly through the fill"—the report says "there is a strong possibility of rainwater leaching through the landfill and eventually entering Brizzolari Creek."

The health department study also indicates seepage was observed at the base of the landfill during the on-site inspection, "although the last rain was more than a week previous."

Because of the nearby springs and possibility of leaching, the report says, there should be continual monitoring of the area.

Van Acker said the monitoring of the dumpsite would be carried out by the California Regional Water Control Board in conjunction with professional staff on campus.

"We intend to follow the recommendations (of the

Coaches ired by athletic commission exclusion

BY GREGOR ROBIN

Staff Writer

A Coaches-Cal Poly administration meeting on the new Athletic Advisory Commission might end up on the football field today after a few quarters of play in Associate Executive Vice President Howard West's office.

The meeting will be a closed door session and all athletic coaches have been summoned, according to a flier sent to the coaches. If the discussion turns to the commission (which will not include coaches as voting members), the coaches may get hot, said Coach Steve Miller.

"How can you have a commission voting on something when there is no input from the group of individuals who are involved?" Miller asked. "The consequences are that maybe you have a group of unaffected people making decisions in an area they don't have a good handle on."

Appointments to the commission cannot include staff members of the intercollegiate athletics program, a release from the university president's office stated. There will be five members on the commission from the athletic department, but they will not have voting rights.

West defended the decision to leave coaches off the commission by saying, "The concept of an athletic commission is one that is broadly representative of the total university. I feel that the com-

mission composition represents that concept."

West added that the athletic department will have five representatives, including the department head, so they will have adequate representation.

The commission will function as an advisor to the administration department of Cal Poly in:

- reviewing short and long range plans of the intercollegiate athletic program.

- reviewing the relationship between the Physical Education Department and the Intercollegiate Athletic Department.

- making sure the intercollegiate athletic program provides equity of opportunity for men and women.

- aiding athletes in their educational pursuits.

- reviewing the athletic recruitment program.

Coach Mike Wilton had much the same sentiments as Miller about how the commission would not have voting members on it from the intercollegiate athletics department.

"Does the science department have a board without science people as voting members?" he asked. "We'd like to have somebody do something. After Dr. Buccola's resignation there has been a lot of foot dragging around here."

"I really think there are a lot of people around here who would be happy if

Free issue voting 'heavy'

RALPH THOMAS

Staff Writer

The turnout at the polls for the first day of the ASI fee increase election was surprisingly heavy, according to ASI Vice President Nick Forestiere.

"I'm really surprised—and happy (about the voting)," said Forestiere.

He said most of the polling sites reported a "steady flow" of voters. According to an informal tally at 4 p.m. Wednesday, about 1,800 votes

had been cast and about 200 more were expected before the polls closed.

Forestiere said the heaviest voting occurred at the polling booths at the post office, in the University Union Plaza and outside the Main Gym.

Stephanie Nelson, chairperson of the ASI Program Board and volunteer worker at the post office polling booth, said many students were uninformed about the issue and asked many questions.

Please see page 8

Assault reported on coed

An 18-year-old Cal Poly woman was reportedly sexually assaulted Tuesday night in the 600 block of Romona Drive, according to the San Luis Obispo Police Department.

The student was reportedly walking from the Tropicana bus stop at about 10:15 p.m. when a male, described as 5 feet 10 inches tall, 150 pounds and in his 20's, forced her to the ground and committed alleged assault.

The suspect then fled, running east

toward Broad Street, according to San Luis Obispo City Police Detective Mike Kennedy.

An investigation of the case is underway, said the detective.

It is believed there were other students in the area while the attack was occurring, said Kennedy, and anyone with any information concerning the case should contact the San Luis Obispo Police Department.

Soviets fear space shuttle use

MOSCOW (AP) - The Soviet Union, which once warmly praised American space missions, has taken a hostile attitude to the U.S. space shuttle and is warning that the program may lead to a cosmic arms race.

Soviet space officials and the state-controlled news media are portraying Friday's maiden flight of the space shuttle Columbia as the start of a new "militarist and chauvinistic effort" by America to blackmail the world with "super-weapons."

Official commentaries indicate Moscow is determined to counter whatever military advantages the shuttle brings America. Despite official denials, there are some indications the Kremlin has already started its own shuttle program.

Lt. Gen. Vladimir Shatalov, the chief of Soviet cosmonaut training, attacked the possible military uses of the American shuttle at a Moscow news conference Wednesday.

"Of course, if the United States and the Pentagon leaders take this road, it will be a great tragedy for the entire world," Shatalov said. "It will mean a new spiral in the arms race, and certainly will bring the United States nothing, no advantages, except new enormous, colossal expenditures and more international tension."

U.S. officials say the shuttle is primarily a civilian research craft, but it also is expected to be used for putting spy satellites in orbit and for other military missions. The Pentagon has "reserved" for its use more than one-third of the shuttle flights planned by late 1986.

State appeals Melones ruling

SAN FRANCISCO (AP) - The state of California, attempting to limit the water level behind the New Melones Dam, on Wednesday filed an appeal of a federal judge's decision prohibiting the restricting of water storage for power generation.

The petition, filed with the 9th U.S. Circuit Court of Appeals, claims that unless Congress directs otherwise, the state has the right to limit storage at the reservoir, about 120 miles east of San Francisco on the Stanislaus River.

U.S. District Judge Edward Dean Price ruled on Feb. 27 that the state can limit water storage for agricultural and other purposes but not for power generation.

The \$341 million earth-and-rock dam stands 625 feet high.

Environmentalists claim the reservoir doesn't need to be filled completely to provide irrigation and flood control, while farmers downstream say it should be.

Newsline

Democrats fight Reagan plan

WASHINGTON (AP) - House Democrats labeled President Reagan's tax-cut proposals "the fiscal equivalent of faith in a free lunch" Wednesday and said the spending cuts he wants would hurt poor and middle-income Americans.

Renewing their attack on Reagan's economic program in an unusual eight-page statement of "Democratic economic principles," party members declared their willingness to back an effort to restrain federal spending, provide tax relief and reduce the size of government.

But the statement, approved by voice vote after a closed-door session of the party caucus, took issue with the specifics of the Reagan approach and said Democrats would reject the program "that puts the main burden of fighting inflation of the backs of the middle and low income workers while providing unprecedented benefits for the privileged few."

On taxes, the statement said belief that the administration's three-year tax cut plan will stimulate the economy without fueling inflation "is the fiscal equivalent of faith in a free lunch."

Student recruiting plan backed

SACRAMENTO (AP) - A controversial plan forcing California's high schools to give the names and addresses of graduating seniors to military recruiters won the backing of a Senate panel Wednesday, despite opposition from students, educators and legal activists.

The measure, SB246 by Republican Sen. John Schmitz of Corona Del Mar, was approved by the Education Committee on a 6-2 vote. It would also require colleges and universities to release the so-called "directory information" on any student.

Schmitz's bill would force the schools to supply the information "on demand" for recruitment purposes.

"The issue here is a privacy issue," said an opponent, Brent Barnhart of the American Civil Liberties Union. "This information should not be required to be given out."

But the committee disagreed, with Sen. John Garamendi, D-Walnut Grove, saying students "have a responsibility" to serve their country.

Solidarity blamed for troubles

PRAGUE, Czechoslovakia (AP) - Czechoslovak officials Wednesday accused the Polish independent labor federation Solidarity of "counter-revolution" and "anti-socialism" and the Soviet media made new attacks on the Polish union.

Despite announcement that Warsaw Pact military exercises in and around Poland had ended, U.S. Secretary of State Alexander M. Haig Jr. said in Rome that Soviet-led forces on Poland's borders remained in a state of "military readiness."

NATO defense ministers meeting in Bonn called the Warsaw Pact military exercises "menacing" and issued a new warning to the Kremlin against intervention in Poland.

The head of the Czechoslovakia's official trade unions likened continuing labor unrest in Poland to the situation when Soviet forces invade.

A Czech spokesman said Soviet President Leonid I. Brezhnev—a special guest at Czechoslovakia's 16th Communist Party Congress here—would address the meeting again before it closes Friday.

In his speech to the Congress Tuesday, Brezhnev momentarily eased tensions surrounding Poland by expressing confidence that Polish communists were capable of putting their own house in order. But in Moscow, the Soviet media carried new attacks on the 10-million member Solidarity labor organization that grew out of last summer's Polish strikes.

Liternaya Gazeta, the Soviet weekly, accused Solidarity of receiving aid from West German "anti-socialists," including former Nazis.

The Liternaya Gazeta article was headlined "Conspiracy: Who solidarizes with Solidarity?" It hinted the federation, through alleged contacts with West German political organizations, was linked with the Central Intelligence Agency and the American-funded Radio Free Europe.

Farm labor law repeal rejected

SACRAMENTO (AP) - A grower-backed attempt to scrap California's historic 1975 farm labor law was narrowly rejected today by a state Senate committee.

On a 3-4, party-line vote, the Industrial Relations Committee defeated SB50 by Sen. William Carven, R-Oceanside, who said after the hearing that "the bill is dead."

His measure would repeal the state's 1975 Agriculture Labor Relations Act and replace it with a law modeled after the National Labor Relations Act, in effect repealing several pro-labor provisions in the state law.

El Salvador called land of inequality

BY MICHAEL WINTERS

Staff Writer

El Salvador—does it represent an effort to stem Soviet schemes of world domination, or just another blunder by Uncle Sam in someone else's civil war?

This question was the subject of a speech last Sunday by a Cal Poly political science professor who disagreed with the Reagan administration's policy concerning El Salvador.

While the administration and some of its supporters may see El Salvador as just one more domino in the series of Latin-American states falling to leftist intrigue, others are certain that U.S. involvement is designed merely to prevent the escape of one more nation from the U.S. sphere of influence.

Speaking at the United Methodist Church of San Luis Obispo, Dr. Reginald Gooden Jr. outlined the history of El Salvador and offered some attempts to make sense out of the difficult situation.

Salvadoran society is one of vast inequality, Gooden told the audience of about 50. Since the 16th century, he said, a small elite has controlled the country.

In more modern times, said Gooden, this elite has enjoyed a symbiotic economic relationship with major world powers such as Britain and the United States, in order to reap the benefits of modern industrial production.

"Here," said Gooden, "is where the seeds of today's troubles begin." Instead of a nation of a small subsistence farmers, El Salvador became one of masses of migrant agricultural employees dependent upon the graces of what Gooden called "a class of super-rich absentee landlords."

Land once used for food was, by the 20th century, primarily devoted to export crops, especially coffee.

The collapse of coffee prices accompanied the Great Depression of 1929, and, as Gooden told the audience, "A monoculture economy leads to a true disaster in hard times."

Unrest among the

unemployable, desperate workers led to brutal reprisals by the army in 1931, leaving up to 30,000 peasants dead.

"What you have, then," said Gooden, "is a history of repression...There is no legitimate means of expressing opposition to the government."

American support goes to a liberalized, if not liberal, government, say those who support a military aid to El Salvador. The government of Jose Napoleon Duarte is a moderate, centrist one, and

"The centrists...have joined forces with the very forces the U.S. perceives as its natural enemy—the radical left. The centrists are no longer in the center...Failure to comprehend this alignment is one mistake we ought not to make in El Salvador."

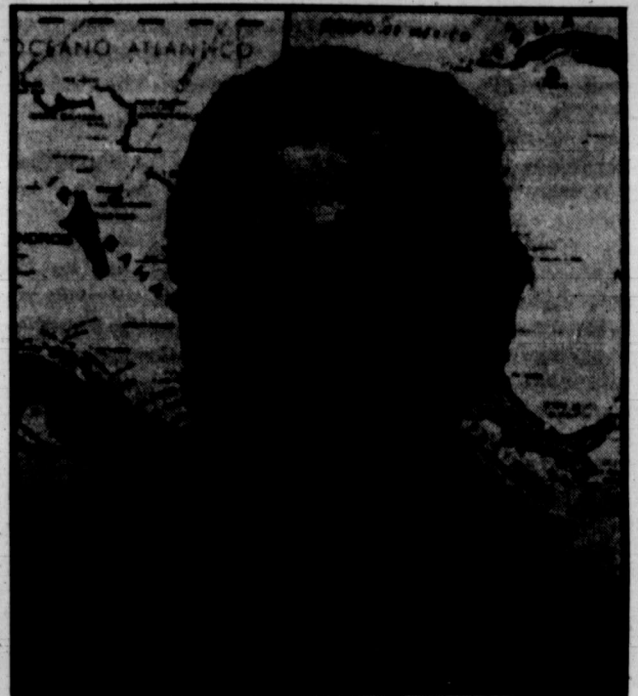

Concern over this mistake is shared by Gooden. "I fear," he said, "that we will go on supporting the right until they are unsupportable short of sending in marines."

If a mistake it is, the Reagan administration

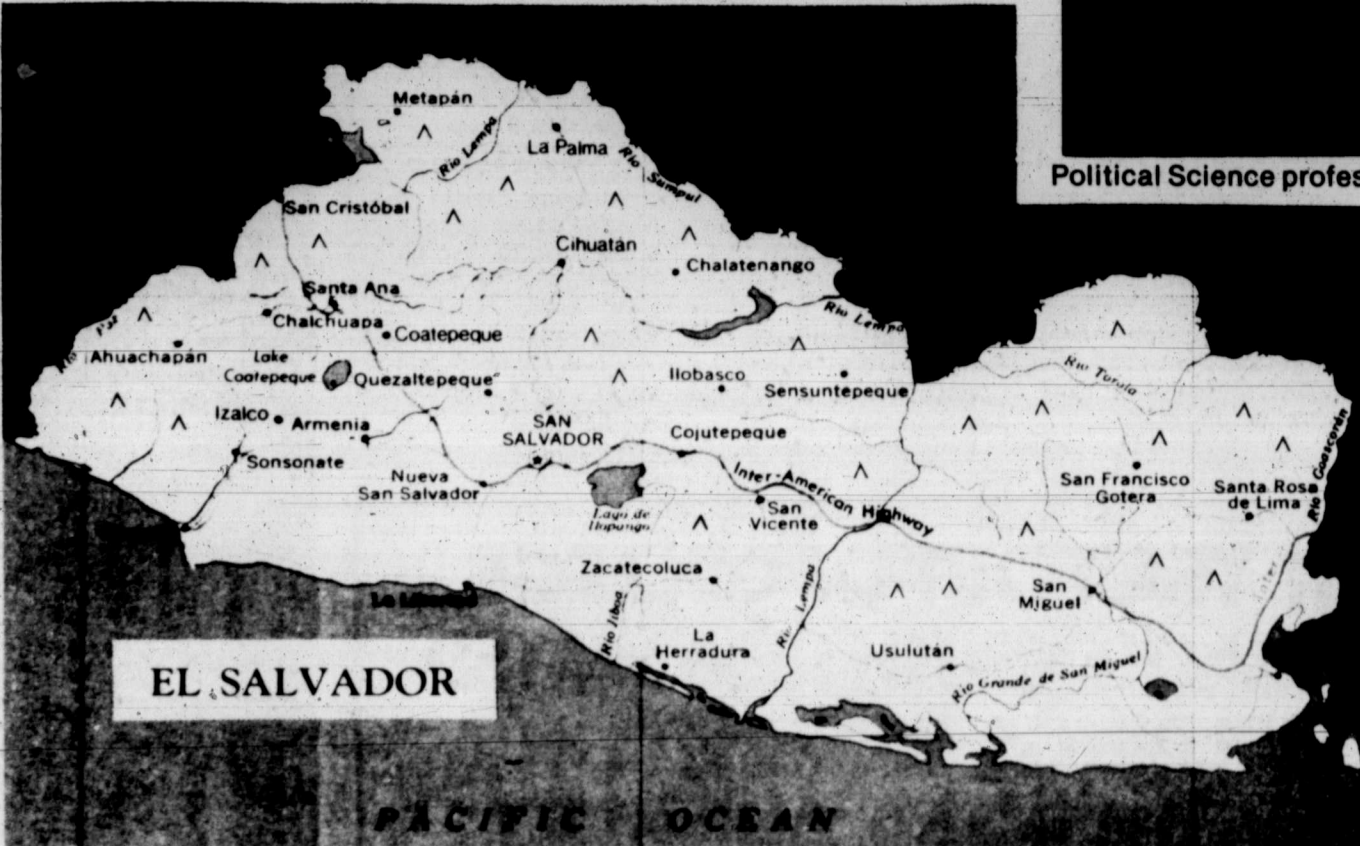

State one week," he said, "was of rebels with none but the most rudimentary weapons. Then all of a sudden they have tons of sophisticated arms. And all the while, the government controls all transportation's routes. How is it possible?"

Repeated challenges to many points of the State Department evidence in the White Paper has caused a halt to its distribution recently, it should be noted.

Support for American policy on El Salvador from

Political Science professor Reginald Gooden, Jr.

Mustang Daily—Michael Wrisley

there it would become another story."

Hannigan sees continued American manipulation of the situation, but through less violent means.

"The ultimate approach is through economic aid," he said. "If Nicaragua is sending arms, we can apply pressure. It's a pity because people may starve, but money talks."

Gooden could see no prospects for deep U.S. military involvement in the country either. "It would be more difficult today," he said, "people are more mobilized" to protest armed intervention.

Political science professor Gooden saw no easy long-term solution. "A transformation is necessary, but no transformation is possible there without a revolution," something, he added, that the Reagan administration is not sympathetic to.

"I see a long process of attrition," he said, as more and more Americans see the current policies as bankrupt and withdraw their support from them, making it unpopular to sustain repressive governments abroad.

KCPR 91.3 FM

the best hope to thwart the evil of both left and right aid, advocates claim.

Others contend the very existence of a centrist power is an illusion, that polarization is complete.

The present so-called centrist junta stays in power, said Richard Millet, writing in the February issue of *Current History* magazine, only because of the U.S. foreign aid that would be withdrawn in the event that the real power, the army, came out of the closet in the form of a coup.

"The government has long since lost control of the security forces," said William Leo Grande and Carla Anne Robbins in the summer 1980 issue of *Foreign Affairs*.

shows a great deal of readiness to make it. Administration officials are taking a confrontatory stance, as voiced recently by Reagan-appointed ambassador to the United Nations, Jeane J. Kirkpatrick.

"Jeane Kirkpatrick's view of the situation," said Gooden, "defies all logic. It is glaringly apparent that she has no knowledge of Latin-American history."

Gooden expressed considerable skepticism about the recent White Paper compiled by the State Department showing evidence of world-wide communist arms shipments to the Salvadorean insurgents.

"The picture painted by

traditional allies in Europe and the Americas has ranged from luke-warm to none. Furthermore, there was outright objection to the American stance by countries such as Mexico and Costa Rica, countries that, if anything, could be most vulnerable of all to the rising tide of insurrection in Central America.

Or could it be that these other nations are possessed of a more enlightened view of the predicament?

"The (Reagan) administration," said Gooden, "is becoming increasingly isolated from its normal allies...They have a more cosmopolitan outlook."

He called the Reagan administration's position

"the last throes of the ancient way" America has treated her southern neighbors, a "desperate" attempt to cling to obsolete attitudes.

What can be done, then, to right the situation? Prescriptions for a solution are more elusive than points for criticism, to be sure.

Cpt. Hannigan discounted prospects for significant escalation of American intervention in El Salvador, a repeat of the Vietnam story. "The similarity is that we sent advisors, period. I don't see any way it could turn into another Vietnam. We have forgotten Vietnam today, but if American troops began getting killed

Subject: Concerning why the fees should continue to support services offered to students and student organizations.

We feel that the services that are offered through student fees by ASI, are beneficial to everyone including those students who are not in organizations.

These funds provide the students with health care, entertainment, sports and other programs for which Cal Poly has gained statewide recognition, as you stated in the April ASI Inflation Increase Demand newsletter. These programs provided, especially the entertainment programs, make life at Cal Poly a little less stressful and enjoyable. The stress that comes from studying morning, noon, and night.

Sororities and fraternities who need to solicit funds for services projects such as "Sickle Cell Anemia" and for cancer research, should be available to them.

We too encourage everyone to vote yes on April 8 and 9 in favor of the proposed fee increase, but if the increase does not pass; we feel that the services rendered should be continued.

Newscope

HUG workshop

A Human Understanding and Growth workshop will be held April 10, 11 and 12 at Camp Pinecrest in Cambria. The workshop will deal with small group communication and self-expression. The cost is \$8.50 for students and \$9.50 for non-students.

Aggie Stomps

Two Aggie Stomps will be held this weekend, both featuring the music of Monty Mills and the Lucky Horseshoe Band. Both stomps will be held in the SLO Vets Hall, and will be from 9 p.m. to 1 a.m. Friday night's dance is sponsored by the Audio Engineering Society and Saturday night's by the Cutting and Reining Horse club.

Fine Arts

Pianist Anna Teng will be featured during the Fifth Quintessence Series Concert at 8:15 p.m. on April 10 in the Cal Poly Theater. The cost is \$4 for students and \$6 for general admission. The event is sponsored by the ASI Fine Arts Committee.

ASI Outings

"Mountains of America," a unique mountaineering and alpine climbing presentation by Fred Beckey will be held April 13 at 7 p.m. in Chumash Auditorium. The cost is \$1.

Royal Parade

Entries for the First Annual Poly Royal Parade are due by 3 p.m., April 10. Entries (along with fees) can be submitted at the Poly Royal desk in the Activities Planning Center.

Trull concert

ASI Special Events and Women's Programming are sponsoring a concert to feature Teresa Trull and Band. The rhythm and blues band will perform in Chumash Auditorium tonight at 8 p.m. Student costs are \$4 in advance and \$5 at the door.

Journalism majors

The Society of Professional Journalists, Sigma Delta Chi, will meet today at 11 a.m. in room 303 of the Graphic Arts building. Discussion topics include: Poly Royal exhibit, a field trip to San Francisco, the regional conference in Reno and other fund raisers.

GSU work party

The Gay Student's Union will hold a Poly Royal work party April 11 from noon until 5 p.m. and April 13 from 7:30 to 10 p.m.

Civil engineers

Civil Engineers will nominate new officers, discuss Poly Royal and Dr. Lee's party at a meeting today at 7:30 p.m. in the traffic lab.

Wrestling

Cal Poly Intramurals is sponsoring a wrestling contest April 11, from 8 to 11 a.m. in the Cal Poly Main Gym. There will be both men's and women's competition and T-shirts will be given to the first 100 entries. Entry fee is \$4 per person.

English club

English majors and faculty should check their department mailboxes for information about a potluck dinner to be held this Saturday.

Campus Crusade

The Campus Crusade for Christ will present a women's conference entitled "Women of Significance" at a luncheon on April 11, 10 a.m. at the Madonna Inn. The cost is \$11.50.

Mono Lake

The Morro Coast Audubon Society is sponsoring a four-mile run on April 11 at Laguna Lake. The run is an effort to raise money to protect the environment of Mono Lake. The cost is \$8 with a T-shirt and \$4 without. Registration will be from 7:30 to 8:30 a.m. The race will start at 9 a.m.

Poly Wheelmen

Students with bikes needing minor repairs can bring them to the Cal Poly Wheelmen "Fix Your Bike Day" today in the U.U. Plaza from 9 a.m. to 3 p.m. The club members will perform minor repairs for small fees.

Recreation Club

Poly Royal activities will be discussed at today's Recreation Administration club meeting. The meeting will be held at 11 a.m. in Science E-47.

Interface

The Interface club will meet tonight at 9 p.m. in CSC room 251 to discuss Poly Royal booth and activities, a trip to the Melodrama and the logo design contest winner will be announced.

Delta Sigma Theta

A dance to welcome new and old students back to Poly is being sponsored by the Delta Sigma Sorority. The dance will be in the Mustang Lounge, April 10 at 9 p.m. The cost is \$1.50.

ASI Films

"Oh Heavenly Dog" will be featured by ASI films at 7 and 9:45 p.m., April 10 in

Chumash Auditorium. The cost is \$1.

Newman Fellowship

The Newman Catholic Fellowship is holding a marriage seminar for all persons interested at 10:30 a.m., April 11, in U.U. 220. The seminar will consist of three 50 minute talks: "What is love?", "What is forever?", and "What is required of a person before marriage?"

Autocross

The Cal Poly Sports Car Club will sponsor an autocross in the library parking lot April 12 at 10 a.m. Entry fee is \$4 per entrant and trophies will be awarded to the winners.

Frisbee club

The Cal Poly Disc Magician Frisbee Club is sponsoring a bake sale today in the U.U. Plaza from 10 a.m. to 2 p.m.

HIS FIRST YEAR OUT OF COLLEGE, FRANK QUACKENBUSH RENOVATED THREE BUILDINGS, WORKED ON A DAM, PAVED A ROAD, AND BUILT TWO CHOPPER PADS.

"Most of the engineers I graduated with probably wound up as an assistant engineer to somebody else. Maybe doing the details for somebody else's design or supervising some small aspect of construction."

"But my first year as Engineer Lt., I've designed many of my own projects and supervised the construction on everything from baseball dugouts to the concrete work on a dam. Earthmoving, grading, filling, paving, concrete work, masonry—you name it, I've supervised it."

"Whether I stay in the Army or go into civilian construction work later, I've got experience that some engineers won't have when they're 30!"

"More than supervising construction, I've learned how to manage people. I've got 40 right now I have to plan for and see to in terms of a myriad of details of their lives."

"What I learned in Army ROTC about leadership and management, I've put to good use."

Army ROTC got Frank off to a good start, and it can do the same for you whether you're a civil engineer or an English major. You will also earn \$1,000 a year during your last two years. You can start ROTC this summer at Cal Poly, or you can go to ROTC Basic Camp and earn an extra \$500.

For more information, see CPT Ed Hanigan, Dexter Building, Room 115, or call 546-2371.

2nd Lt. Frank Quackenbush majored in civil engineering at the University of Arizona and was a member of Army ROTC.

Extended education program offers credit for travel

BY THERESA
LUKENAS

Staff Writer

Individuals who wish to participate in a travel-study program can now do so through Cal Poly's Extended Education Program.

This marks the first time that Cal Poly has offered academic credit for this type of study program. Three travel-study courses will be offered through the Cal Poly Extension this year.

The first of these courses is a five-week program instructed by Professor E. Wesley Conner of Cal Poly's ornamental horticulture department.

Conner, who teaches landscape design, history of horticulture, plant materials, and park administration, and authored *The Back Pocket Guide to Ornamental Plants*, said the course will trace the path of landscape history from the first century through the present.

According to Conner, the course is structured to introduce students to the history and geography of civilization through observations of the horticulture, architecture, and art of Greece, Spain, France and England.

The cost of the program is \$2,395, which Conner said included air fare, tours, and most meals. Students may earn one to three units of senior level ornamental horticulture and one to two units of senior level humanities credit for the course.

Conner, who has instructed travel-study programs for nine of the last 11 years, said that credit will "require student papers on various topics covered by the tour." Tours will include visits:

—in Greece; to the Acropolis, Delphi, Corinth, Epidaurus, Argos, Idras, Egina, and Sunion;

—in Spain; to Barcelona, Granada, Madrid, Valencia, and others to compare Moorish architecture and landscapings with that of California;

—in France; to the Louvre, Tuilleries, Versailles, St. Cloud, Bois de Boulogne, Bois de Vincennes, Chennoueau, Villandry, the Loire Valley, Fontainebleau, and Vaux le Vicomte with an emphasis on the "formalism and order of French design during the 17th century";

—in England; Kew Gardens, various city parks in London, Oxford, Blenheim, Stonehenge, Stourhead, and Hatfield House, Welwyn Garden City or Cambridge.

Conner who has conducted study tours in Scotland, France, East and West Germany, Italy, Spain, Austria, Greece, Denmark, and Switzerland, said that "students respond favorably to on-site instruction such as this course will provide," adding that not only will

students learn about European influences on Western landscaping, horticulture, and art, but also to feel at ease in foreign environments.

The second of these

travel-study courses offered by Cal Poly Extension, Biology E470, provides the student with an on-location experience in tropical marine biology. This 16-day program will feature lectures by Dr. Tom Richards of the biological sciences department on the marine tropical ecosystems of the Hawaiian Islands, with an emphasis on coral ecosystems.

According to Richards, who is also coordinator of Extended Education travel studies, the course will coordinate lectures on the structure and composition of these ecosystems with field work, which will concentrate on providing students with a precise view of coral ecosystems.

Students will be expected to present an oral seminar during the study tour on a selected topic in tropical marine biology. Field study will involve snorkeling, and all participants must be able to swim, although a

knowledge of scuba diving is not necessary.

Richards has an extensive background in invertebrate zoology, marine resources and aquaculture and has participated in many tropical marine biology symposia.

According to Richards, a third program is available to students who are interested in earning academic credit for their summer travel plans. Such students may enroll in Extended Education E400: Independent Travel Studies.

This program is super-

vised by Richards and consists of submitting a bibliography and plan for study prior to beginning one's travels to a supervising Cal Poly faculty member. Then following culmination of one's travels, the completed project must be turned into the faculty member for evaluation and a final grade. Students may earn up to two units of academic credit for this project.

Additional information on these programs may be obtained by contacting Professor Conner or Richards.

Shakespeare film to be aired

"The Taming of the Shrew," starring Elizabeth Taylor and Richard Burton, will be shown at the Cal Poly Theatre on Sunday, April 12, at 7 p.m.

Admission will be free to the public for the film, which is being sponsored by Cal Poly Extension in cooperation with the

university's English Department and Alumni Association.

Nominated for two Academy Awards, the story pits Richard Burton as Petruchio and Elizabeth Taylor's sharp-tongued Katharina in the archetypal battle of the sexes.

APRIL 10

VITRO VITALS:

AN ILLUMINATING CAREER

Vitro Laboratories, a division of Automation Industries, Inc., is an outstanding systems engineering and management support organization involved in defense programs which include airborne and shipboard weapon systems.

Vitro Vitals, those vital elements that make us a leader in our field, focus light on the kind of career you can expect with us.

We've established an excellent reputation by finding solutions to difficult problems in a wide range of Naval applications.

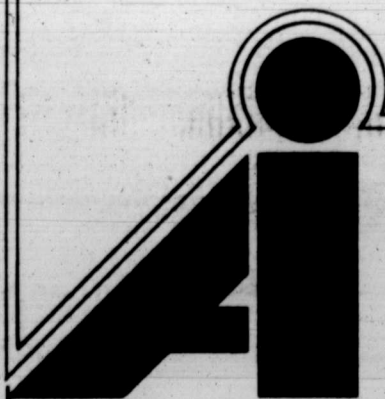

As an Engineer at Vitro, you find challenge in the development, integration, and management control of vast programs, primarily long-term air and surface weapon system programs vital to the support of the United States Navy.

Over 30 years of solid, consistent growth, and our impressive backlog of contracts offer you exceptional opportunity to expand your career.

At the Oxnard facility, you have a rural atmosphere with a pleasant climate and you enjoy a top salary and excellent benefits.

Shed more light on your career at Vitro. Please contact the Placement Office to arrange for an interview with the company recruiter when they visit your campus in the next few weeks.

Women shun "Ms." label

Every year since its inception back in the early 1970s, a poll has been taken comparing what women think of the title "Ms." and whether they prefer it to the more conventional Miss and Mrs.

The study, published in

1980 by the Roper Organization's 1980 Virginia Slims American Women's Opinion Poll, confirms a preference for the traditional Miss and Mrs. titles by 77 percent of women 18 years and older.

Among the many ques-

tions asked was, "Recently, there has been a move to change the form of address for women from Miss and Mrs. to Ms. Which form of address do you like best for women?" The responses broke down like this:

	Ms. %	Miss and Mrs. %	Don't know %
Total 1980	16	77	7
Single	32	62	6
Married	12	81	7
Divorced/Separated	38	54	8
Widowed	7	88	5
White	15	78	7
Black	24	70	6
18 to 29	26	66	8
30 to 39	19	74	7
40 to 49	14	79	7
50 and over	8	87	5
Non-high school graduate	10	85	5
High school graduate	14	80	6
College	23	69	9
1974 POLL	14	81	5

Radio auction to benefit Poly station

It's time once again for radio station KCPR-FM's annual auction!

Sunday, April 12, is the date for the sixth annual sale, which will be held from 3 p.m. to midnight. Dinners, gift certificates, haircuts, auto stereo speakers, a \$200 foosball table, and other items have been donated to KCPR by local merchants.

Listeners to the station, which broadcasts from the Cal Poly campus at 91.3 MHz., will be able to call in

their bids for the item or items they want. Student auctioneers will be announcing the merchandise throughout the evening.

To phone in bids, all the listeners have to do is to remember the number of the item and call 544-4640. High bidders will be announced during the broadcast.

Money received from the auction will be used to purchase equipment needed to keep the station running.

Last year's sale brought in \$1,878.

The Cal Poly station is run by journalism students working with faculty advisor Ed Zuchelli. Nearly 100 students work on its news, production, engineering, air and management staffs.

Other information about the auction can be obtained by telephoning KCPR-FM, 544-4640, or the auction coordinator, Mary Ann Pfeiffer, 546-3628.

Disabled given recorder

Disabled students on campus now have access to a new tape recorder, thanks to Tau Beta Pi, the National Engineering Honor Society.

The organization donated the tape recorder to the Disabled Students Services after raffling off a bicycle in February.

"The bicycle was given to us so we decided to release it in the same general way," said Program Chairman, Gary Stevens. "It's also a requirement to get into the club to do a fund raiser and service project. It's a worthwhile cause."

Tickets for the bicycle raffle were sold

for \$1 during engineering week. A total of \$120 was raised.

The Disabled Students Services Center was quite pleased with the new addition of equipment available to students.

"We really appreciate their efforts," said acting Coordinator of the Disabled Students Services Harriet Clendenen. "This is the only time since I've been here that a student group has had a specific fund raiser for us."

The tape recorder will be available to all permanently and temporarily disabled students.

Astronauts readied for shuttle launch

CAPE CANAVERAL, Fla. (AP) — Two astronauts, eager "to give this country something to be proud of," put aside their books Wednesday, said goodbye to their flight controllers, and inspected the fire-belching rocketship they'll ride into space Friday.

John Young and Robert Crippen were flying solo from their training site in Houston to the launch site at Cape Canaveral in twin T-38 jets after a final meeting with flight directors "at mission control. The first task on their schedule was the traditional visit to the spaceship being readied for liftoff.

The countdown, after a trouble-plagued start, was right on target. And the weather was predicted to be fine.

The Kennedy Space Center, expecting a million

people to watch from the roads and beaches, was pulsing with excitement unmatched since men last went to the moon from the same pad 39A in 1972. All the major television networks were at the site to carry the launch live and the press compound was transformed into a tent-and-trailer city.

Since 1975, Americans have yielded space travel to the Soviets. In the nearly six-year hiatus, 43 cosmonauts have gone up and Young said it's time the American climate favors science again.

"It's absolutely essential to the survival of the free world the way we know it," he said. "I really feel like we're doing something very important for the country and to the human race in the long run."

"This country is in need of something to be proud of. We really need some

kind of thing to cling onto and say, 'We in the United States did that,' " said Crippen, a space rookie, who will pilot the Columbia alongside the veteran Young in the commander's seat.

Not content to idle away time after the most extensive training ever given to astronauts, Young and Crippen elected to spend time practicing emergency landings on the Cape Canaveral airstrip.

They'll use that strip only if their engines quit early and they can't get into orbit.

The flight of the Columbia is scheduled to start at 6:50 a.m. EST Friday in the first hour after sunrise. If all goes well, it will end 54½ hours and 36 turns around the earth later with a wheels down landing at Edwards Air Force Base in California.

What will happen if the fee increase fails?

Should the fee referendum fail the ASI will again have to cut its budget next year. Some activities and services will have to be cut. Those currently being considered are:

- ★ Moratorium on new student groups
- ★ Cutting the intramural program
- ★ Elimination of minor sports (Rugby, Polo, Swimming, etc.)
- ★ Higher ticket prices for ALL activities and events
- ★ Establishment of charges for services now rendered free

In addition, such services as free postage and long-distance phones will be lost to student groups and the fun of free movies and plaza concerts may be eliminated.

If the increase passes the ASI will be able to continue offering its extensive services to students. This will enable students to continue saving money through ASI services. Also quality and quantity of programming will improve without passing on higher prices to students.

Vote Wednesday and Thursday, April 8 & 9

Study warns toxic waste could leach into spring

From page 1

report) and, if necessary, to go beyond the recommendations to rectify any unhealthful situation," Van Acker said.

The Poly Canyon dump was a "Class III" site, Van Acker said, meaning toxic chemicals were never supposed to be dumped there. The *Mustang Daily* reported last quarter that an unrecorded quantity of toxic chemicals from the chemistry department

were buried at the dump between 1972 and 1976.

The report says the past burial of these substances was "illegal." The study, however, mentions nothing about criminal penalties or who would be liable for subsequent environmental damage.

"Although volatile wastes, having most likely oxidized years ago upon their disposal into the fill, are unlikely to be vented from the site, it is assumed

that the organic matter disposed of illegally into the landfill has been decomposing to form gas," the report says.

Because of the possibility of escaping gases, Van Acker said there would be no core samples taken at the landfill.

The report recommends "minimum security" precautions for the dumpsite, which is located about a mile from the canyon's entrance on the right side

of the road. The precautions include "final" site cover of two feet of soil, drought-tolerant landscaping and a sturdy fence."

Additional recommendations include posting the site to prohibit entry of unauthorized personnel

and advising the public of possible hazards.

Van Acker said the site should remain posted until all safety hazards are removed. He added that the dumpsite should be included in the university's Master Plan to prevent

development of the area as long as possible toxic hazards exist.

The health and safety officer said if the samples indicate leaching has occurred, a move to relocate the wastes "as best as possible" would be considered.

Coaches feel unrepresented

From page 1

athletics would just go away, you know, get out of sight."

When asked if he thought one of the functions of the new commission would be to drop some intercollegiate sports, Wilton said that at a meeting on Monday the possible dropping of seven sports was discussed, and the commission might have a say in that matter.

"This was presented at the Associated Students Incorporated budget meeting Monday night," he said. "The dropping of seven sports passed, and now it is up to the universi-

Track and cross-country coach Steve Miller.

ty to say 'yes' or 'no'."

As West stated in an April 2 *Mustang Daily* article, "One of the thrusts of forming the new commission was to have intercollegiate athletics looked at by a more broad body of the university."

"Prior to this, the commission was made up largely of individuals who had direct responsibilities to the intercollegiate program."

Both Coaches Miller and Wilton see this as a hinderance to the athletics program and, as Coach Miller said, "Today we'll have a meeting and I assume there will be some answers given to this."

Voters comment on fee hike

From page 1

"It's amazing to me how many people think they pay \$80 a quarter for ASI fees," said Nelson.

If the fee increase passes student activities fees (now \$20 a year) will be raised by \$6 next year and \$3 for each of the next three years.

Although there was no indication of whether the fee increase was passing or failing, some students did comment on the issue after casting their ballot.

John Rachuy, a crop science student, said he

voted "no" on the ballot because the ASI is "over-budgeted and over-staffed."

"I think the ASI is wasting a hell of a lot of money and we shouldn't give them anymore," commented Rachuy.

Student Carl Hulick said he also voted "no" because he fears other fees might be raised if the ASI fee increase passes.

One student who asked to remain anonymous asked, "Why pay more money when they're (ASI) not going to help us anyway."

On the other side of

the issue, Julie Cheatham said she cast a "yes" vote because she did not want to see a deterioration of ASI services.

"I think they have good programs and I don't mind paying extra money to support them," said Cheatham.

Mechanical engineering student Dave Porter said he voted "yes" to prevent "sports and small interest groups" from being severely cut.

Polls will remain open until 9 p.m. this evening. Forestiere said the results will be available on Friday.

Children's Plaza Day

A Plaza Day program on Saturday, April 11, will be both the highlight and the climax of a series of activities being planned by two Cal Poly child development students for the local observance of "Week of the Young Child."

Miss Gravenhorst and Miss Colombara said the Tri-Counties Association for the Education of Young

Children, Child Care Resource Center, Headstart, Family Services Center, and the Cal Poly Child Development and Home Economics Department are cooperating sponsors of "Week of the Young Child" with a number of the other children's and community service organizations.

Former Olympian debuts at Cal Poly

Karin Smith

BY VERN AHRENDES
Sports Editor

Karin Smith has decided to give her collegiate career a second chance, which means a lot of disappointment for javelin throwers across the nation.

Smith, a native of West Germany, is starting over at the collegiate level and she has decided to make San Luis Obispo her home away from home which is good news for Central Coast track fans.

She will make her one and only home performance of the year this Saturday as the Cal Poly women's track team hosts Washington State in a dual meet. The field events have been set to start at noon with the running events getting underway at 1 p.m.

The 25-year-old history major turned the track and field world on its ears last weekend, when she heaved the javelin 204-6 to easily win at the Cal Nike Invitational at Berkeley.

The throw, which was the best toss on the collegiate level this year, was the second best collegiate throw in history behind Kate Schmidt's 209-7. She has quickly shown that she is the odds on favorite to repeat as the top-ranked javelin thrower in the United States.

With her trademark—a red bandana—around her neck, Smith has caught Cal Poly and the rest of the nation by surprise.

She came to Poly as a transfer from UCLA. After

winning the 1980 Olympic trials last year, she returned to West Germany last summer and finished 14th in the world. Some of Smith's other credentials include an eighth place finish at the 1976 Olympics at Montreal and a personal best of 212-6 set last August in Europe.

But why did a world-class javelin thrower decide to resume her collegiate career at Cal Poly?

"A lot of changes had occurred in my life after I left UCLA for Germany in 1978, and I couldn't go back there," she said. "But, it was time for me to get back into school and I was really drawn to this area."

Smith has been the center of attention on the track not only for her long-range javelin heaves but for her endless number of unorthodox workout routines and drills, which was one important reason for not returning to UCLA.

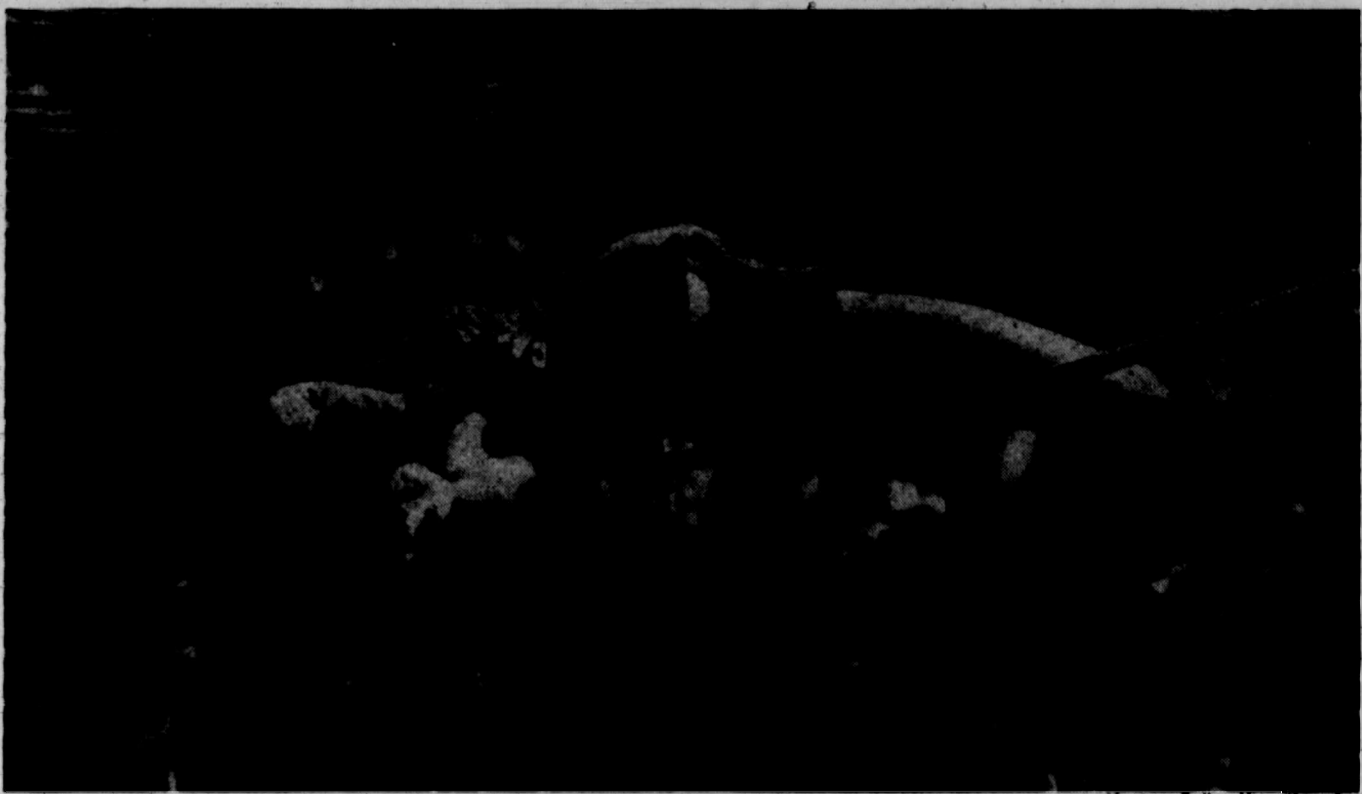

"I have learned a lot of new drills and routines to help my technique in Europe, and if I went back to UCLA now, everyone would probably laugh at me," she said. But in the same breath she emphasized that, "I do all of my drills because I enjoy them. I left the UCLA program because it had become ultra-competitive and all that the coaches were concerned with was how many points I could score for them at the meets."

"The atmosphere here at Cal Poly is completely different," she said. "The philosophy of coach Lance Harter is to keep the pressure off of us. Everyone is casual during the workouts but intense in the clutch and I like that."

When she left for Europe in 1978, she wanted to get back to her roots in Germany, but she just wanted to be a part of the European training.

"I wanted to personally experience the European training techniques and

Mustang Daily—Vern Ahrendes

The Cal Poly women's track team will host its only track meet of the season this Saturday against Washington State. Sue McNeal, the school record holder in the high jump, will be one of the featured performers.

Poly women face home meet

BY VERN AHRENDES
Sports Editor

The Cal Poly women's track team will be taking it easy this weekend—in a way.

The women's team, coached by Lance Harter, has scheduled a non-scoring dual meet this weekend against Washington State. The meet will be the one and only home appearance by Harter's Mustangs this season. The field events will begin at noon with the running events to follow at 1:30 p.m.

The team, fresh off a strong second place showing at the Cal Nike Invitational behind host Cal Berkeley, will use the dual meet this weekend as a light tune-up before the real work begins in preparation for the national meet in four weeks.

Washington State will only be bringing 18 athletes to the meet, but it should still be a showcase of talent for Central Coast

track enthusiasts.

"We will be testing a lot of people in secondary events this week so this is essentially a week off for us," coach Harter said. "The most important thing for us, though, is that we still have four or five possible qualifiers for the national meet and they could unleash it all at anytime."

The Mustangs have already qualified 25 for the AIAW Division II national meet scheduled for May 14-16 in Indiana, Penn.

The main events on Saturday will highlight Sue McNeal, the school record holder in the high jump, Eloise Mallory, the school record holder in the 200 meters and a member of the record setting 400-meter relay team; Dana Henderson, the school's shot put record holder; and Karin Smith, the former Olympian and school record holder in the javelin.

The meet will feature some tough head-to-head competition. Washington's

Debbie Lombardi posts a mark of 42-2½ in the shot put which matches up with Henderson's 42-9 toss at the Cal Nike last weekend. Michele Williams will carry a 200-meter mark of 24.74 against Mallory 24.88 set last weekend.

The dual meet does not mean that much to Harter because the season only rides on what happens in the next four weeks.

"The national meet is right around the corner for us and it is time to start getting at it," he said. "The girls are starting to get excited about it and next week's dual meet against Cal Berkeley will be a good indicator of our potential."

"Indiana PA's coach said that we would have the largest team at the nationals," he said. "We have athletes in each event with the exception of only a couple. The amazing thing about it is that we have potential scorers and contenders in 80 percent of the

events."

"The way this team is shaping up right now, I would not trade places with any coach in the nation and that is a good feeling," he said. "The best thing about this year is that we have everyone coming back next year. That is awesome."

National qualifying standards that were met last weekend at Berkeley included Irene Crowley in the 10,000 meters (36:26.4), Liz Strangio in the 5,000 meters (16:50.2), the 400-meter relay team of Liz Douglas, Liz Carroll, Cathy Jones and Mallory (47:78), Amy Harper in the 1,500 meters (4:33.7), Smith in the javelin (204-6), Chris Dubois in the 400-meter hurdles (63.32) and Laura Held (62.54), Mallory in the 200 (24.88), McNeal in the high jump (5-11½), Henderson in the shot put (42-9) and the 1,600 meter relay team of Held, Mallory, Jones and Douglas (3:48.65).

World class thrower debuts Saturday

From page 9

compare mine to the European's. I wanted to see for myself if they were really on steroids," she said jokingly. "As a matter of fact, I would have gone anywhere to be a part of the European circuit, to France or Switzerland, even Russia if I could have taken my jar of peanut butter along."

When this year's season is over for most collegiate athletes, Smith's will only be beginning in Europe. After the AIAW Division II and Division I national meets, Smith will be returning to her training site in Stuttgart, West Germany and to her coach Wilfried Hurst.

"I hope to hit some good throws before I leave for Europe, but I would like to average over 207 or 208 consistently," she said.

"Last year I averaged 203-3 for 15 meets, so I felt good about last week's throw. I didn't expect to be at my best though until August which will be during the height of the European season."

Smith, who is only 5-6 and 145, makes up for her lack of size with speed and quickness.

"She is relatively small but she more than makes up for that with speed and quickness," coach Harter said. "If there is any such thing as a sure bet, it is that Karin will win the national title. There is no one who can beat her. She is just a phenomenal athlete."

"Strength is not as important in the javelin but technique and speed are," she said. "I learned in Germany to be aggressive on

the runway. I might have been too fast on the runway last Saturday but I threw well because I balanced my horizontal speed. In simpler terms, I just hauled down the runway and stopped."

"Everyone has been very nice and cooperative. The team didn't swarm me but they introduced themselves one by one with open arms," she said. "There were a lot of frustrations at first but I am finally getting comfortable."

According to Harter, Smith has been a boost to the entire team.

"Karin is very coachable and fantastic as a team player," he said. "Right after she was done with the javelin at Berkeley, she was over with Sue McNeal urging her on and then she

was cheering on the mile relay team. She is just a blessing in disguise."

Karin is such an outstanding athlete that she could possibly qualify for the Division II national meet in the heptathlon, according to Harter.

"We have both been discussing about giving the heptathlon a try along with Chris Dubois at the conference meet," Harter said. "She already long jumps and sprints well, but she is so well coordinated and flexible that there is no

telling how well she would do."

The heptathlon is a seven-event, two-day competition including the long jump, high jump, 200, 800, javelin, shot put, and hurdles.

Smith is only a junior scholastically, so there is a chance that Central Coast track fans will get another chance to see her in action. Whether or not she returns next year, there is no telling how far she will go as long as she hangs on to her jar of peanut butter.

Poly seeks wins on road

If anything could go wrong for the Cal Poly baseball team, as Mr. Murphy used to say, it did last weekend as the Mustangs dropped four out of five starts.

Cal Poly will try to right itself this coming weekend with a three-game series at UC Riverside. The Mustangs will meet the Highlanders Friday in a single game and for a double header on Saturday.

The losses to Northridge and Dominguez Hills dropped Cal Poly's California Collegiate Athletic Association record to 4-6-1. The Mustangs, 19-7-1 overall, hope to regroup against the Highlanders, 22-10 overall and 7-4 in the CCAA.

Jeff Arney leads the Highlander pitchers with a 4-2 record and a 2.60 earned run average.

The Mustangs saw their team batting average slip from .343 to .315 over the weekend and the pitching staff's ERA ballooned from 2.72 to 3.43. Craig Gerber leads the Poly hitters with a .385 average followed by Eric Peyton .344 and Paul Hertzler at .333.

Umps forget Poly softball

Both teams were warmed up and ready to go but someone forgot to let the umpires know they were supposed to work the Cal Poly-Santa Barbara women's softball game on Tuesday.

Despite the miscue by the referees, the break could be a welcomed one for coach Kim Graham's Mustangs.

After winning one game out of three starts at the Pony Easter Tournament last weekend, Cal Poly faces a rugged weekend schedule. Cal Poly, unfortunately, has been scheduled to play six games in three days beginning this afternoon in San Diego against U.S. International.

Cal Poly, 10-10 overall, then takes on the University of San Diego on Friday and Cal Poly Pomona on Saturday. Poly will play a double header each day.

Mustang Daily—Peggy Gruenberg

Cal Poly math professor Boyd Johnson will be looking for a new world record in three weeks when he travels to Irvine to take part in the AAU Masters Program Southern California regional swim meet.

Johnson eyes new mark

BY TOM CONLAN
Staff Writer

A Cal Poly professor has turned a fight to "stave off old age" into a world record.

Boyd Johnson, a 53-year old math professor, will be looking to lower his own world record in three weeks when he competes at the AAU Masters Program Southern California regional in Irvine.

Johnson's 34.69 second timing at the Pacific regionals last year shaved .26 of a second off of the previous 50-meter backstroke record for the 50 to 54 year old age group.

Johnson said the Masters Program gives people who are 25 years old and over the opportunity to compete in most Olym-

pic sports, but swimming and track and field are its main events. Starting at 25, people compete in five-year age groups.

"Staying healthy is the number one idea behind the Masters Program," Johnson added.

The program was started in 1970 but Johnson only found out about it two years ago. Since then, he has been working out four times a week, swimming a half a mile at a time.

"A good swim at the end of the day feels great and gives me a new perspective," he said.

Johnson was captain of his college swim team at the Naval Academy more than 30 years ago, and did not swim competitively until finding out about the

AAU program.

He said he has always kept himself in good physical condition by jogging and lifting weights but now he is convinced that swimming is the best exercise for overall conditioning.

"I feel like I am 30," said Johnson.

Besides setting the world record for the 50-meter backstroke, Johnson was ranked second in the country for the 50-meter freestyle and was named to the 1980 AAU All-American swim team.

In two months, he will travel to Irvine to compete against swimmers from around the country in the Masters Program's national meet.

Mustang Daily—Peggy Gruenberg

Boyd Johnson will be looking to lower his own world record in three weeks. The math professor is the current world record holder in the 50-meter backstroke in his age bracket, at 34.69.

Discount fee increase horror stories

Editor:

I think it's time somebody spoke out with some facts about the ASI fee increase and how it will directly affect the Intramural program.

At the present time, Cal Poly students are paying \$20 of their annual fee to ASI to sponsor all the programs which are provided (concerts, Craft Center, films, Poly Royal, rodeo team, Rose Parade float, Intramurals, etc.) This is a very nominal fee for all these activities, and I believe any student would gladly pay one or two dollars more to enjoy them. That's all it comes down to, simply paying a couple of dollars more each quarter to continue their enjoyment of these activities and to offset inflation.

Currently, Intramurals serves seven to eight thousand individuals. Among their services are open gym, open swim, racquetball reservation, Crandall Gym reservation for groups, tennis court reservation, and organized activities. If the fee increase passes, it is hoped to expand these services to include between ten and fourteen thousand individuals (or roughly 60 to 80 percent of the student, faculty and staff population).

Actually, what could happen if the fee

increase does not pass will happen during Spring Quarter. Activities will drop from 24 each quarter to 13. Only one pool will be open, and this will be only for two hours each day. The Intramural Office hours will be limited, and this will, therefore, adversely affect racquetball, swimming, open gym, use of Crandall Gym by clubs, and equipment check-out.

I think the overriding reason for voting "Yes" on the fee increase is because of what will happen to team entry fees if it doesn't pass. The team entry fees for any organized activity (basketball, etc.) will jump from \$10 to \$45; but if the fee increase goes through, the entry will actually drop to \$5.

I urge everybody to vote "Yes" on the ASI fee increase. In spite of the horror stories, ASI fees will increase only \$6 next school year, and minimally thereafter. A voting booth will be located in the Main Gym, as well as at other places around campus. Thank you for your support.

Rob Casjens
Student Representative
Recreation and Intramural Advisory Committee

Fee increase charade

Editor:

Willie Huff, Roy Gersten, Nick Forestiere and the entire student senate must think that the students on this campus are total morons. They have boldly used ASI funds for pamphlets and ads to push the proposed fee increase... a move that is, of itself, highly questionable. They now claim on campus public radio that these expenditures are justified because they are part of an effort to "educate the student body" and present a "balanced view" on the issue. This is a bald faced lie in the finest

tradition of political fast footwork. There has been no effort whatsoever to present a balanced view or the standard pro and con statement in these ads and brochures.

This charade is an excellent example of the predominate attitude taken by the present ASI administration, namely, that Cal Poly students are ignorant serfs who wouldn't know the difference anyway. Hopefully, the students will reply at the polls with a resounding rejection of the fee increase.

Stephen E. Jensen

Artists thankful for support

Editor:

I personally want to thank you for your editorial (7 April 81) defending the poster Ms. Wasch and I designed for Poly Royal. You touched on many of the areas, such as the "lack of professionalism" exhibited by the Board, that has been our main complaint about the whole experience.

We can live with the rejection of our design because artistically we feel it is a good design and communicates the theme as we interpreted it. If the Board felt it was not representative of the theme then that is their decision.

I began to question my own abilities as an artist but the positive feedback I have received has erased my doubts and strengthened my belief in the decision to stand behind our design. Much to my astonishment, I have even been receiving letters in the mail from people-I don't even know who are requesting posters.

Again, thank you for the support at a time when Ms. Wasch and I needed it the most. It is much appreciated and not unnoticed by us.

Marcellus Pope III

Leadership ability questioned

Editor:

I am glad you brought to light the abusive powers of the Poly Royal Board in your editorial "Royal scam." I was sickened by the thought of \$2,500 spent on a second Poly Royal poster when the original was fine. The original will be on display in the library as part of the Graphic Design Show. Let's let the public decide if the Poly Royal Board was working in the public's interest when they scraped the original and ended up with the final poster after spending \$4,500!

The sad part is the original poster was

rejected, I feel, not because of artistic reasons, but for personal feelings against the designers. Unfortunately for us, the Poly Royal Board does have the ability to make unnecessary decisions such as dumping a perfectly fine poster, and answer to no one. What was their reason? Nothing that makes any sense whatsoever. I find it disgusting that this board made such an expensive and unwarranted blunder. It makes me question their leadership abilities.

Ron Brannen
former publicity chairman
of the Poly Royal Board

Mustang Daily policy

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Mustang office in Room 226 of the Graphic Arts Building, or sending them to Editor, Mustang Daily, GrC 226, Cal Poly, San Luis Obispo, CA 93470. Letters must include writers' signatures and phone numbers.

Editors reserve the right to edit letters for length and style, and to omit libelous statements. Letters should be

kept as short as possible. Inordinately long letters will not be printed.

The Mustang Daily encourages readers' opinions, criticisms and comments on news stories and editorials.

Press releases must be submitted to the Mustang at least a week before they should be run. All releases must include phone numbers and names of the people or organizations involved, in case further information is needed.

Financial aid threatened

Editor:

Open Letter to Cal Poly Students:

The new administration in Washington has embarked upon a major effort to reduce the cost of government. While, certainly, the idea, in general, is commendable, certain of the proposals will directly affect the students, faculty and staff of Cal Poly. I would like to briefly recap the proposed changes, without personal opinions pro or con, and the potential impact on Cal Poly students.

1. The administration has proposed phasing out educational Social Security benefits.

—750 Cal Poly students who are presently receiving educational support under this program will have to seek alternate funding.

2. The administration has proposed phasing out the federal contribution to the National Direct Student Loan Program.

—843 Cal Poly students are presently receiving loans from this program totalling some \$940,000.

3. Basic Educational Opportunity Grants (renamed Pell Grants): The administration has proposed the following:

A. A \$750 self-help requirement for every applicant.

B. Eliminate state/local tax deduction from eligibility calculation.

C. Increase family contribution requirements, affecting eligibility.

D. Essentially restricting eligibility to students whose family's adjusted gross income is less than \$19,000 per year. This will cut about 400 students from the program.

—2700 Cal Poly students are presently receiving these grants. Disbursements will be over \$2 million this year.

4. Guaranteed Student Loan Program: The administration has proposed the following:

A. Limit loan amount to remaining need after all other projected resources are considered.

B. Eliminate the in-school interest subsidy paid by the federal government. The borrower would either have to pay the interest while in school or the interest would accumulate and be added to the principal for payment after leaving school.

—Some 5000 Cal Poly student will receive loans through this program this year totalling about \$12 million.

Summary:

The Congress is presently considering the administration's proposals. Passage of these proposals could have a significant negative impact on many areas of Cal Poly. Certainly, one of the most significant effects would be the limitation on an individual's access to college or continuation at Cal Poly due to a family income level. While even low income families would be affected, the major impact would be borne by families in the so-called middle income bracket; even students who met the eligibility requirements for independence will be affected.

The most effective way to make known your opinions is by contacting your elected representative and senators in Congress.
