Senate body to promote conservation

Mustang Daily — Alan Kennedy

Precious energy radiates from the area between the Administration Building and the University Union.

Input from the unlikely combination of the Pacific Gas and Electric Co. and the University of California at Berkeley served as the basis for the ASU's Energy and Resources Conservation policy, according to the author of the plan.

Larry Greene, chairman of the Ad Hoc Committee in the Student Senate, said he was given a copy of Berkeley's conservation plan by ASI President Dennis Hawk. Hawk had received the policy from a PG&E campus representative.

"I took Berkeley's plan and expanded on the idea," Greene said. "The original did not call for the organization of a committee on conservation. It just was in favor of supporting conservation on campus."

"I took it one step further and proposed a committee which will deal with the best utilization of energy sources," he said.

The committee will consist of students, faculty and administration, and PG&E and Southern California Gas Co. representatives will serve as advisers.

So far, Greene has sought the participation of the dean of students, and the University Union manager as well as others. He said student clubs will also be asked for input.

"The committee will be university-run," Greene said. "Pacific Gas and Electric and Southern California Gas will have a minimal part in our committee."

In a memo, Greene asked prospective members to gather information on what has been done in the past in the way of energy conservation and bring their ideas of what should be done in the future.

Greene is also trying to set up a fund with the money that will be saved through conservation efforts.

"If possible I would like to direct the saved revenues for alternate energy sources," he said.

Greene hopes to form the committee by the end of the school year.

"I hope to have set goals, ideas and the structure. I don't think that is too much to ask," he added.

With his conservation proposal, Greene presented a list of procedures to be implemented by the committee. They included the following:

- support for the development of the Chancellor's Committee on Energy to identify and implement energy conservation measures.

- solicit the active participation and support of students, university staff and campus community members.

Permit decision should improve communication

BY ANGELA VENDEL
Staff Writer

Cal Poly fraternities and sororities and the City of San Luis Obispo can hope for a better working relationship, according to a member of the Planning Commission.

A sub-committee of the city Planning Commission, with the help of the Inter-Fraternity Council and the Panhellenic Council, has standardized Greek house use permits.

"The main reason for this was to establish a direct line of communication between the city and the Greeks," said Geoff Grote, acting director of the sub-committee.

"It is definitely a lack of communication between the two that creates the majority of the problems," said Grote.

The city has agreed to forward all complaints received by the Community Development Department concerning neighborhood relations to representatives of the IFC and Panhellenic Council for review and comment prior to scheduling the matter for Planning Commission review.

The Greeks have agreed to respond to all complaints forwarded by the Community Development Department within 10 days.

"This should help solve the problems between the frats and their neighborhoods. The sororities don't seem to have much of a problem," said Grote.

In the standardizing of the use permits the committee has established conditions which ensure safe occupancy of buildings and promote compatibility with surrounding land uses.

Concerns of those living near the houses had to be taken into consideration when setting the guidelines for the permits, according to Grote. Fire and safety codes must be complied with and the house site must be kept clean and orderly.

"We didn't like the original guidelines that they'd set up so we asked the commission if we could have some input," said Tim Leets, IFC president. "We worked together with the commission and came up with the present guidelines," he said. "I think the guidelines that we came up with are quite reasonable."

The two groups originally met in November. In January they drew up the final guidelines for the house use permits, and the Planning Commission accepted the guidelines for the use permits at a hearing on Feb. 11.

This will give us a further chance to work with the city and create a better relationship," said Leets. "When we get the complaints we can do something about them before they become a real problem. This gives us a chance to police ourselves."

Probation notice: A warning not to be taken lightly

BY LORI MARLETT
Staff Writer

The letter usually arrives in the middle of the quarter. "Your academic record has been reviewed and our records indicate that you received less than a 2.0 grade point average for the past quarter, and/or your cumulative or overall grade point average is less than a 2.0, and/or you are deficient in progress points for the current quarter."

It's confusing, depressing. How are you going to tell Mom that you're on academic probation? But you're not in it alone. Every quarter hundreds of Cal Poly students receive a copy or revised version of this letter.

It is intended to be a warning and one that should be taken seriously. A student will never get a second consecutive letter because he/she will have already been dismissed. There are ways to make up the grades, however, get rid of deficiency points, get off probation, and put a smile back on Mom's face.

A few basic rules apply to students of all majors.

Buy and read the new catalog. Academic policies and procedures are explained in detail in the front of the catalog. Class numbers have been

known to change and this information can be found as well as other scholastic requirements.

Don't take 300 level classes as a freshman or classes for majors only (when you are not in that major). Spend time working out your class schedule and take classes in sequence.

Forgiveness policy

If a student receives a "D," "F," or "U" in a class, there is a "forgiveness policy" of repeating a course in order to change the grade. This policy can be used for up to 20 units. (You must file a notice to repeat.)

It is important to be aware of your academic performance. Malcolm Wilson, vice president of academic programs, hopes to see the status of academic probation printed automatically on grade lists so that students are fully aware of where they stand.

"Early intervention is important," stated Wilson, "so that we don't let students destroy their academic record."

There are two types of disqualification—academic and administrative. The latter will probably play a

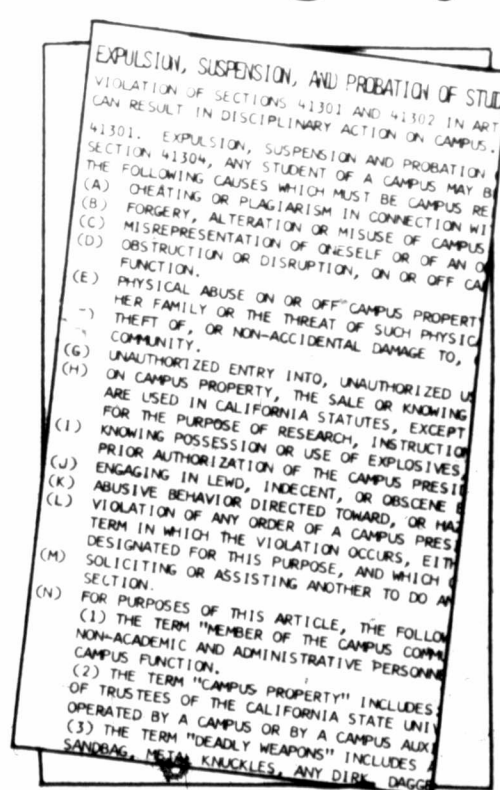

more important role as the school becomes more impacted, according to Wilson. An administrative disqualification could apply to, say, an animal science major who took all business classes.

Academic probation and/or disqualification will never show up on official student records. It is Cal Poly's policy to keep that information off student transcripts, according to Wilson.

Harry Busselen, associate dean of the School of Human Development and Education, finds it "odd that transcripts do not show dismissals." Although it is positive for the students, Busselen sees it as a detriment to Cal Poly.

To be in good academic standing at Cal Poly, you must meet three requirements. You must have: 1) an overall grade point average including all college work attempted of at least 2.0; 2) a Cal Poly GPA (only Cal Poly work) of at least 2.0; and 3) the equivalent of C's and credits or better in your last quarter of enrollment (if you have an "F," "U," or "NC" you should have an equal number of units of "A" or twice as many of "B" to counteract it).

Please see page 9

State gas consumption drops

SACRAMENTO (AP) — Gasoline consumption in California during 1981 was the lowest in five years, the state Board of Equalization said Tuesday.

Tax was collected on 11.1 billion gallons in 1981. The 1976 total was 10.7 billion. It rose to a high of 11.8 billion in 1978.

The year's low total was recorded despite a surge in December, when 961 million gallons were distributed, up 4.8 percent from the previous December.

Board Chairman William Bennett attributed the decline to more fuel-efficient vehicles and "the conservation consciousness of the state's drivers."

He said gasoline prices rose in the first three months of 1981 following the decontrol of oil prices late in January, but leveled off for the rest of the year.

The number of cars and trucks registered in the state rose 2 percent during the year.

Castro endorses Mexico plan

MEXICO CITY (AP) — Fidel Castro has endorsed a Mexican peace plan for Central America that calls for talks between Cuba and the United States. But he set a condition—that the Reagan administration stop what he called "continuous threats" against its neighbors.

The Cuban president, in a letter to Mexican President Jose Lopez Portillo, also said he was "ready to offer the fullest guarantees" that weapons in Cuba will not be used for aggression anywhere in the Western Hemisphere.

The Cuban news agency Prensa Latina made the letter public here Tuesday. Castro was responding to a three-part peace initiative outlined Sunday by Lopez Portillo in Managua, Nicaragua. It called for a negotiated settlement of El Salvador's civil war.

Newsline

'I'm innocent,' Williams asserts

ATLANTA (AP) — Wayne B. Williams angrily turned back attempts by prosecutors to shake his story Tuesday, saying out at his accusers and declaring: "I'm innocent, and that's all there is to it."

"Did you experience any panic at any point during the time you were killing these victims?" Assistant District Attorney Jack Mallard asked the 23-year-old murder defendant at one point during the afternoon cross-examination.

"Sir, I haven't killed anyone," Williams replied.

"Isn't it true you killed them?" Mallard asked.

"I'm as guilty as you are," Williams told him.

"If you're guilty, then I'm guilty."

At one point Williams said he could have been a victim himself in the string of slayings of 28 young Atlanta blacks that outraged the nation.

Williams also said that policemen threatened him, that eye witnesses made up stories and that he feared for his life after being questioned last spring in the series of slayings.

"I haven't done anything, I'm innocent, and that's all there is to it," Williams insisted.

Jurors furiously scribbled notes as Williams, who was dressed in a dark three-piece suit with no tie, testified for more than four hours Tuesday, his second day on the stand. Cross-examination is to continue Wednesday.

Allies drag on Polish sanctions

LONDON (AP) — America's allies have moved only hesitantly toward joining the United States in sanctions against the Soviet Union and Poland because of the imposition of martial law in Poland.

The impact of most of the actions appears minor, although together they represent growing displeasure at the Polish clampdown Dec. 13. In addition, a major deal with the Soviets to pipe gas to Western Europe apparently is going ahead with the participation of West Germany, France and Japan despite U.S. opposition.

In mid-January, the NATO allies announced that further credits for goods other than food for Poland would be placed in abeyance, and negotiations on 1982 payments on Polish debts would be suspended.

On Tuesday, the Common Market agreed to limit imports of certain goods from the Soviet Union to apply pressure for a relaxation of martial law in Poland. The decision affects a small but still undetermined percentage of the \$11 billion worth of goods the countries import annually from the Soviet Union.

Christopher Boyce resentenced

LOS ANGELES (AP) — Convicted spy Christopher Boyce was sentenced to three extra years in federal prison Tuesday for his escape from the federal penitentiary at Lompoc, a crime which the government called "cunning and calculated."

U.S. District Judge Lawrence Lydick rejected without comment the government's request that Boyce, a former Cal Poly student, be given the maximum possible sentence of five years. He said the three-year sentence would be tacked on the end of the 40 years Boyce was serving at Lompoc for espionage when he escaped.

WHY ARE YOU WAITING?

Tired of waiting in line for a terminal at the Computer Center? Then get your own portable home computer that will link with Cal Poly's Timesharing system. Coastal Computers is pleased to announce the arrival of the new **OSBORNE 1**, a 24 pound portable computer the size of a typewriter. The **OSBORNE 1** is set up for a variety of uses including scientific, engineering and word processing capabilities, and comes with these features:

STANDARD HARDWARE:

- ★ Dual floppy disk drives with 100 bytes storage each.
- ★ 5" CRT.
- ★ Business keyboard with numeric keypad and cursor keys.
- ★ Weatherproof, portable housing.
- ★ RS-232C and IEEE 488 interfaces.
- ★ Z80A CPU with 64K RAM.

STANDARD SOFTWARE:

- ★ CP/M Operating System.
- ★ WORDSTAR word processing with MAILMERGE.
- ★ SUPERCALC electronic spreadsheet.
- ★ CBASIC and MBASIC.

all for only \$1795.

ORIGINAL DEFECTIVE

Hunter treks the world for bighorn sheep

He's not the same man you see in his snapshots, sitting proudly, rifle pointing to the sky, next to a downed bighorn sheep. He is clean shaven now, no cowboy or hunting hat, or the tan-over-tan from a week in the Afghan mountains.

The snapshots show places like Iran, Mongolia, Spain, Nepal, British Columbia, the Yukon, Mexico. And in each of them there is the bighorn sheep, the smiling native guides, and the bearded man in the hunting cap, his rifle butt resting on the ground.

Ernie Righetti, the man in the hat, has hunted bighorn sheep around the world, beginning in the Rocky Mountains of British Columbia in 1974. Before then, said Righetti, he had hunted only deer; that changed.

"I decided I wanted to shoot all the world's sheep, one each of all of them," said Righetti. "I thought it would be a unique collection."

And a unique collection it is, filling two unused bedrooms of his house off Orcutt Road outside San Luis Obispo. There are mounted heads on the wall, and a veritable herd of full body mounts of bighorn set up on rollers on the floor.

"I think the animal is one of the noblest," explains Righetti. The horns, he said, are unique to the bighorn sheep.

"It's a real challenge to catch up with the animal" in the mountains, said Righetti. He once spent fifteen days hunting for a ram before finally shooting it on the afternoon of his last day. It is also the country through which he makes this chase that attracts him to bighorn.

Please see page 6

Photo courtesy of Ernie Righetti

Top: a Marco Polo bighorn in full body mount in Righetti's home. Above left: Righetti shows part of his mounted collection of bighorn sheep, including the Rocky Mountain, lower front, and Desert, on wall facing right. Above right: Righetti smiles after dropping the Marco Polo pictured above in Mongolia in 1977.

Senators reject EPA waste dumping proposal

BY SHAWN TURNER

Staff Writer

A proposal from Washington, D.C. to resume offshore nuclear waste dumping does not please some of the people who could be affected by it in California.

The proposal comes from the Environmental Protection Agency, which plans sometime in spring to present new guidelines that would allow dumping of low-level radioactive waste off the California coast.

Raymond Johnson, the EPA chief of ionizing and radiation surveillance, said two factors have prompted his agency to rewrite the guidelines.

Those factors include requests by at least two organizations for permits to dump radioactive wastes, and the federal government's responsibility to incorporate 1978 international dumping laws into its own books.

But soon after EPA spokesmen announced the spring proposal, the Senate Rules Committee in Sacramento approved 5 to 0 a resolution urging President Reagan and Congress to prohibit any radioactive waste dumping off the coast.

At least one legislator for San Luis Obispo County, Senator Henry Mello, (D-Watsonville) said he opposes radioactive waste dumping off the coast. His field representative in San Luis Obispo,

Mustang Daily — Alan Kennedy

Barbara Atkinson, said Mello has not yet reviewed the Senate Rules Committee resolution, sponsored by Senator Barry Keene (D-Elk).

"But he is opposed in concept to offshore dumping," she said.

"His main concern is if dumping is to take place, how the waste products will

be dealt with by the EPA," she added.

The last time radioactive waste was dumped in the Pacific was in 1970, ending 24 years of dumping in an estimated 20 to 30 sites off the coast of San Francisco and Los Angeles.

An EPA report indicates, for example, that 45,000 to 50,000 55-gallon

drums of waste were dumped at the Farallon Islands, 50 miles off shore from San Francisco Bay. Reports of leaking drums near the Islands created a great deal of concern in 1980 by San Francisco officials.

But EPA spokesman Larry O'Neill said the offshore dumping will be allowed only for low-level waste such as industrial and medical debris, contaminated clothing and similar items and there have been no reports of harmful effects caused by leaking waste.

Waste from nuclear power plants may not be dumped off shore.

Such regulations for low-level waste could allow for proposed dumping by the Navy of the reactors from nuclear submarines 500 miles off the coast of Mendocino County, or the scuttling of about 100 whole submarines, said O'Neill.

That is all it would take to resume dumping off the coast — agreements by the EPA to issue dumping permits, and a revision of the dumping laws.

No moratorium was imposed in 1970 to end dumping, said O'Neill, as the *Los Angeles Times* and other newspapers have reported.

"We just never had a request to do any dumping," said O'Neill. "The reports that the EPA imposed a moratorium are a misnomer."

FILLING IN THE GAPS

Raymond Yee, Eng. & Tech.; Larry Greene, Bus.; Sue Smith, Science & Math; Mark Fisk, Engr. & Tech.; Brian Reynolds, not pictured. Photos by Dan Sternau

The Ad Hoc Committee that "does what everyone else doesn't," as described by Larry Greene, chair of the committee, is a unique part of the A.S.I. Senate body. There is no one specific field that the committee handles. As a rule, they are given special and miscellaneous projects that do not fall within the boundaries of the other committees.

The committee is made up of five people taken from the senate body. They are Larry Greene, Sue Smith, Raymond Yee, Mark Fisk, and Brian Reynolds. They meet once a week. Because they have no single area of work and each project they work on is different, their work involves a great deal of diversification and a lot of research.

The Escort Service on campus is one of the Ad Hoc Committee's current endeavors. The idea of an escort service had been given to the committee to develop. It was their job to work out the details of the program. The service is described as "going well" by chair Greene. According to Greene, there have been a few bumps but overall the program is going smoothly.

Another point of interest the committee is involved in is conservation on campus. Recently the senate passed an Energy and Resource Conservation resolution. The Ad Hoc Committee was assigned responsibility for setting up a special committee to handle a conservation program for the university.

As shown by these differing programs, the Ad Hoc Committee is a diverse committee that can handle a broad range of ideas and projects. It is a flexible committee and one that offers limitless possibilities.

GIVE THEM A CALL!

Have you escorted yet? Over 400 members of the university community have been since the program began January 17th. The senate Ad Hoc Committee working in conjunction with the Interfraternity Council and the campus police have spent many hours refining and remodeling the structure of the service to best serve the needs of the of the students.

The changes that have been made and some things to note are as follows: the phone number to call for an escort has been changed to 546-1182. The location of the escorts in the union has been moved from the Activities Planning Center to in front of the Galerie which is across from the information desk. The jackets for the escorts in addition to having "ASI ESCORTS" printed on the front now have the escort service logo on the back of the jacket. Reflective tape will soon be put on the sleeves to make the jackets more identifiable. Laminated ID cards for each fraternity will be supplied within the next week and must be worn at all times.

As the escort service is further refined and modified, we will keep the student body informed. Thanks for your support in getting the program off the ground. Please continue to use this valuable service.

OUTINGS FOR SPRING BREAK

HAVASU CANYON BACKPACK

A leisurely backpack down Havasu Canyon, a tributary of Arizona's Grand Canyon, to the Havasupai Indian reservation. Spend five days dayhiking around spectacular Havasu and Mooney Falls where beautiful aquamarine water pours over red travertine cliffs. A popular trip, Havasu is a great place to relax between quarters. At a price of only \$76 you can't afford to stay home.

GREEN RIVER CANOE

Canoe down the Green River through the incomparable canyon country of Southeast Utah. The twisting, looping river winds its way between sheer, colorful sandstone walls. Vast canyon systems branch off in all directions, inviting explorations. This trip is a fantastic opportunity to visit some of the most remote wilderness in the continental United States at the bargain price of \$85.

Congratulations!

From Your Associated Students

As a result of your Letter and Postcard Writing Campaign last quarter, (which your A.S.I. encouraged) the Governor has lowered his budget reduction for the C.S.U. system by half. From 5% to 2.5%! He also reduced the fee increase from \$216 to \$55!

Thank you, and congratulations.

Cal Poly State University, SLO

SPEAKER FORUM PRESENTS:

RAY BRADBURY

Popular and prolific author Ray Bradbury will speak in Chumash Auditorium on Thursday, March 11 at 8 p.m. A lover of space travel, Bradbury doesn't fly; he doesn't even drive a car. He's the screenwriter for John Huston's film of "Moby Dick," and author of "The Illustrated Man," "Martian Chronicles," "Fahrenheit 451," "Dandelion Wine," and other bestselling books.

An autograph party will be conducted for Bradbury at 3:30 in El Corral, followed by a free screening (for those who already hold tickets) of the film he wrote, "It Came from Outer Space," in Jurid 3-D at 6:15.

Students will pay for \$3 advance; public is \$4, and a dollar more at the door.

Ray Bradbury

"IMAGINATION"

The award-winning multi-media program, "Imagination," will be presented at Cal Poly on Thursday, Feb. 25, at 8 pm as a feature of ASI Speakers Forum.

Narrated by "Star Trek" star William Shatner, the musical astrological suite is open to the public. Advance Tickets are \$2.50 for students, and \$3 for the general public. They are available at Cheap Thrills and Boo Boo Records. Door prices will be 50 cents more.

Featuring 12 projectors, 900 color transparencies, and a three-screen rear projection format, "Imagination" will be shown in Chumash Auditorium on the Cal Poly Campus.

"Imagination" creator Joe Sohm will discuss the origin of his concept, and the future of multi-media presentations.

Primary music for the show is Tomita's version of Gustav Holst's "The Planets," a 20th century classical work.

Outdoors

Trailing the bighorn...

Page 6

Mustang Daily Wednesday, February 24, 1982

From page 3

"I love the kind of country sheep are found in," Righetti said, "high and rugged." It is landscape full of grass, explains Righetti, with beautiful lakes and magnificent scenery. In Nepal it is over

15,000 feet high, in the Canadian Rockies it may be only 5,000 feet.

Righetti, a member of Safari Club International and other big game organizations, points to the aid such clubs give to the treatment of ailing bighorn herds as evidence the hunters' affections for their prey extend past the way it looks when mounted.

Safari Club International holds an annual convention, this year in Las Vegas, where artists donate paintings; gun-makers, guns and outfitters, hunts. These are auctioned off to club members to raise, claims Righetti, upwards of \$500,000 a year to be donated to game management projects around the world. Such

monetary concern is more potent than that of "strictly protectionist" groups like the Sierra Club, he said.

"We're right up front with money," said Righetti. "They (groups like the Sierra Club) have big mouths, but not any money to help protect the animals."

Righetti is looking forward to his next hunt which will go into the Caucasus Mountains in the Soviet Union near the Caspian Sea and Iran. He will be hunting the tur, and if he gets one will complete his collection of the world's bighorn that can be politically reached. But there is another political frontier yet, said Righetti, the People's Republic of China.

Mainland China is as yet unopened to bighorn hunting, although it is for wild boar and smaller game animals. Righetti wants to be one of the first to hunt for three or four bighorn species that are not found outside of China proper.

But, he said he will let others go in first to see what the situation is before he spends his money to go. At over \$15,000 a hunt, "it's worth just waiting to see," he said. Also, an area of Siberia might open up to Western big game hunters in the next few years, another development Righetti is watching.

So there will probably be a few more added to the herd in the bedrooms, and even more snapshots of the man who is not himself to look at when he returns.

Outings fills break

Looking for a great way to escape over Spring Quarter break? ASI Outings committee is offering two low budget adventures in the American Southwest.

HAVASU CANYON BACKPACK — A leisurely backpack down Havasu Canyon, a tributary of Arizona's Grand Canyon. The Indian village of Supai, accessible only by foot or horseback, lies in the canyon beneath towering red sandstone cliffs. Spend five days hiking around Havasu and Mooney Falls where beautiful aquamarine water pours over red travertine cliffs. A popular trip, Havasu is a great place to relax between quarters. At a price of only \$76 you can't afford to stay home.

GREEN RIVER CANOE — Canoe down the Green River through the incomparable canyon country of Southeast Utah. The twisting, looping river winds its way between sheer, colorful sandstone walls. Vast canyon systems branch off in all directions, providing unlimited opportunities for exploration. Ancient Indian dwellings, old settler's cabins, vast caves and hidden spring fed paradises await discovery. This trip is a fantastic opportunity to visit some of the most remote wilderness in the continental United States at the bargain price of \$85.

The cost for each trip includes food, transportation and group equipment. All Cal Poly students and guests are welcome. For more information and trip sign-ups, visit the Escape Route, downstairs U.U.

Campus officers work to stay in shape

BY SANDRA GARY

Staff Writer

Campus police officers and firefighters are not required to exercise as part of their jobs, but they do anyway. Their jobs demand it.

Director of Public Safety Richard Brug said even though there is no physical agility exam given, he encourages police officers and firefighters to stay in top physical condition by running and lifting weights.

Members of the Cal Poly fire department do just that. They also swim, play racquetball and lift heavy hoses and ladders to stay in shape.

Leslie Webster, fire engineer, hopes to start a complete exercise program for the department. She

may even incorporate competition to get the fire fighters' blood pumping.

Fire Chief Carmon Johnson said physical and mental stamina are imperative to the fire engineer. Exercise can help provide both, he said.

"You can't go around telling your staff you have to work out one or two hours a day," Johnson said. "I try to set an example and it works."

Johnson swims and works out three days a week in Crandall Pool and Gym with other fire engineers from Cal Poly and the California Department of Forestry.

To become a fire engineer, candidates must pass a stringent physical agility test. The test consists of four events. The

first involves climbing a 50-foot aerial ladder to the roof of a building and pulling a 50-pound hose to the top hand-over-hand. For the second event, the candidate must lift and remove a 14-foot and 24-foot ladder from the fire truck and replace them. The third event entails dragging a hose full of water, weighing over 300 pounds, for 150 feet. The candidate has to carry 50 pounds of hose up and down five flights of stairs in Kennedy Library for the fourth event.

Up until two years ago all police officers and fire fighters employed by the CSU system were required to pass an annual physical agility exam, Brug said. The tests included rigorous exercise such as running

one and a quarter miles in 12 minutes, and a strenuous display of strength, such as a 20-minute arm hang.

A moratorium was placed on the agility test by CSU Chancellor Glenn S. Dumke two years ago because of complaints received from public safety departments throughout the system, said Frank Razartti, personnel specialist for the chancellor's office.

test was put on hold, however, the collective bargaining issue cropped up and the study to clear up the alleged unfairness of the test has had to wait.

The biggest complaint voiced by officers and firefighters against the test was that it did not take into account the effects of age on physical ability, said Brug.

Mustang Daily — Sandra Gary

Leslie Webster, a full-time Cal Poly fire engineer, stretches out to stay in shape. Other public safety personnel work out on a regular basis to stay fit.

Women's water polo to hold breakfast

The Cal Poly Women's Water Polo Club will serve a pancake breakfast with help from campus firefighters from 8 a.m. to noon, Saturday, March 6 at Poly

Grove.

On the bill of fare will be all the pancakes, eggs, sausage, orange juice and coffee you can eat.

The Water Polo Club

hopes to raise \$3,000 to pay travel expenses, said Karen Jern, a sophomore recreation major and goalie for the women's water polo team.

AN EQUAL OPPORTUNITY EMPLOYER

Stay ahead of the game!

Reinforce your college degree by getting a better start
through Army ROTC's special Two-Year Program.

It includes six weeks of challenging summer training that's both tough, but rewarding. When you finish, you'll be in the best shape ever. And proud of it!

Earn good money during your training, plus an additional \$100 per month when you return to college as an Army ROTC Advanced Course student.

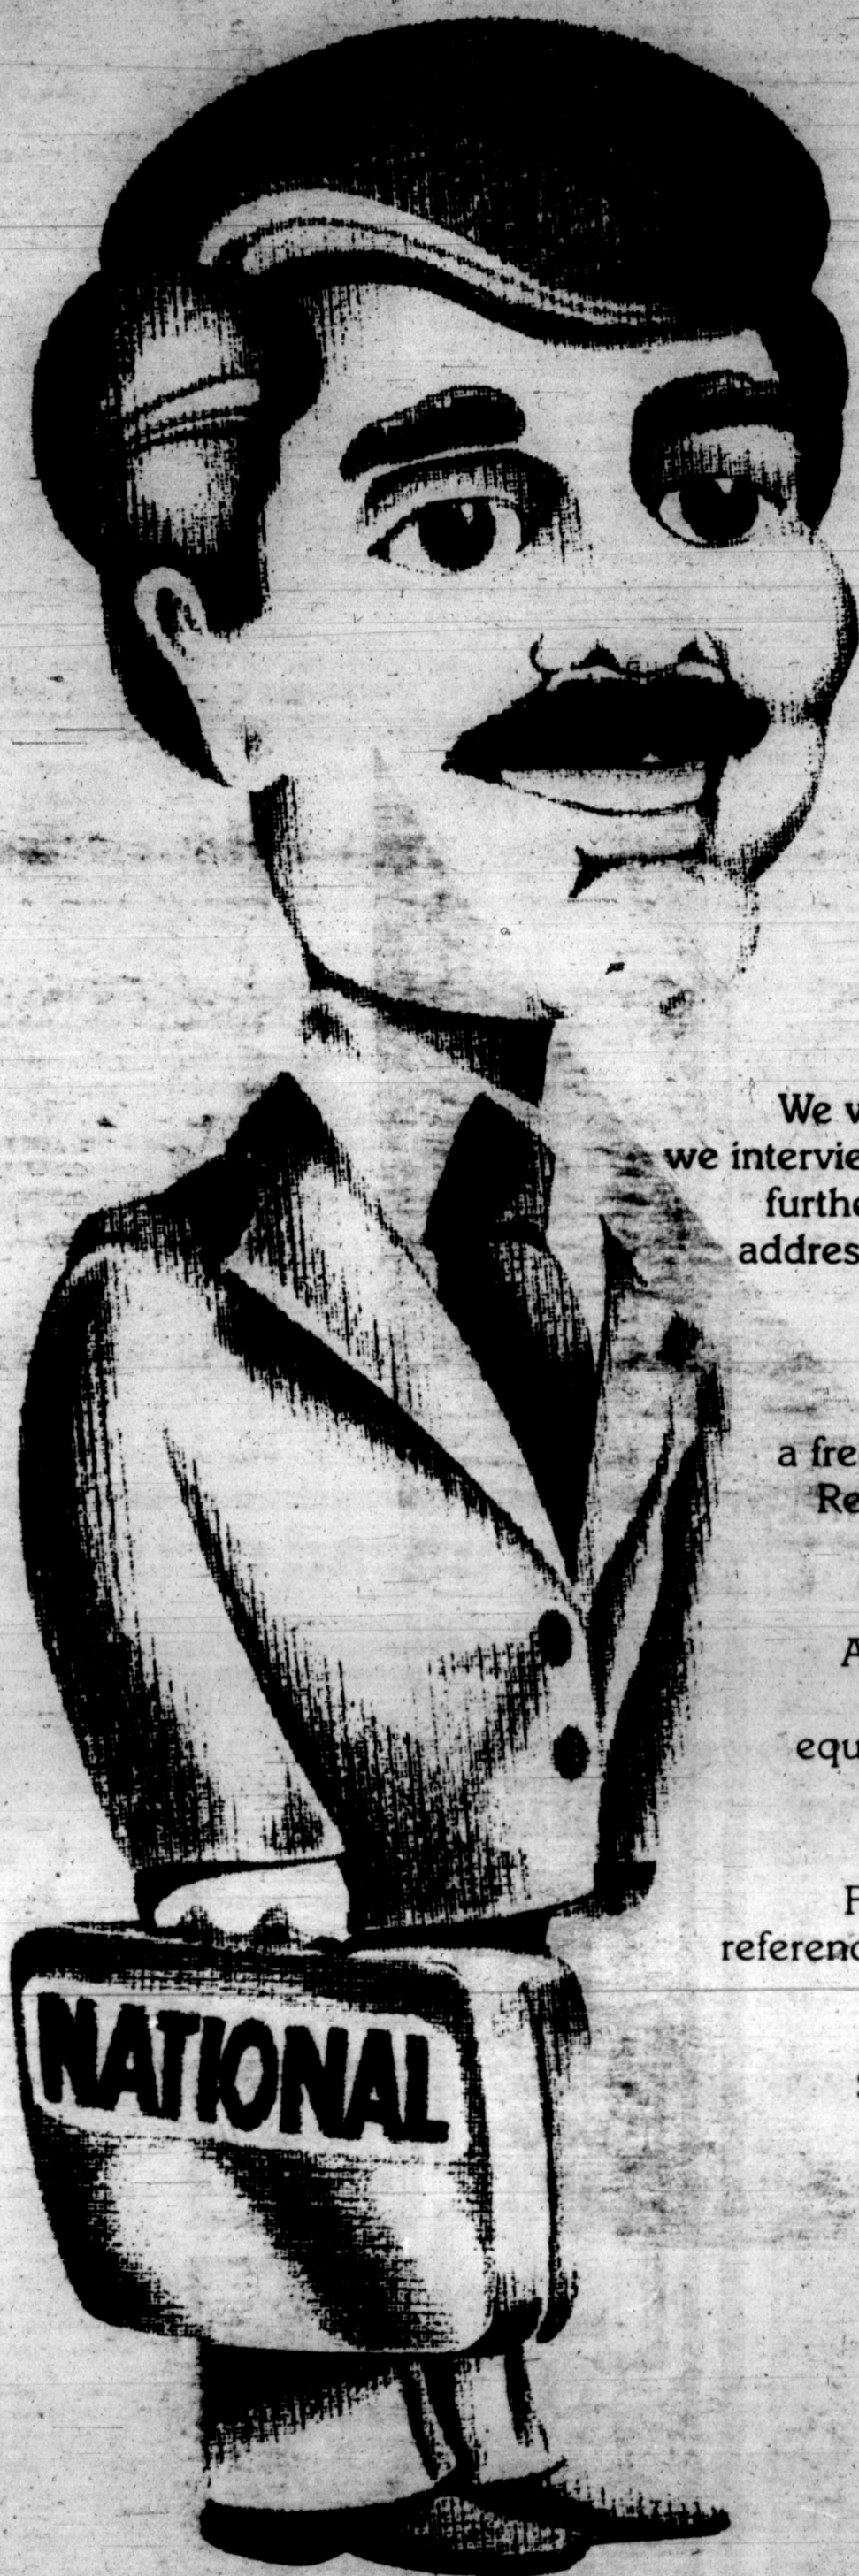

Meet students like yourself from more than 275 college campuses all over the country — making lasting friendships you'll never forget.

So take the best shortcut to your future, no matter what your career goals may be. Begin the Basic Start with Army ROTC — and stay ahead of the game!

For details and more information, call or contact the Department of Military Science.

Major Dick Jones, Bldg. 34, Rm 115,
548-2371

Army ROTC. Be all you can be.

Thank you, Mustangs!

We were impressed by those of you we interviewed last week. If you have any further questions, just write us at the address below. If we didn't talk to you at all, please send us a resume.

And if you'll include a note requesting it, we'll send you a free copy of our "Oil & Gas Pocket Reference 1981." It's a compilation of facts about the U.S. petro-energy industry.

As the world's largest supplier of oilfield drilling and production equipment, National Supply is part of that industry, too.

We'd like to hear from you. For your free copy of the pocket reference, if you have some questions, or you'd like to send us your resume, write to:

ORIGINAL DEFECTIVE

Grade not only problem indicator

From page 1

To eventually graduate you need to make progress in your major and have at least a 2.0 GPA in major courses.

Problem indicator

Grades are not the only indicator of problems. Grade points are also useful indicators of potential trouble.

If a student is deficient from one to six grade points of having twice as many grade points as units, he/she is subject to probation. However, if the deficiency is seven or more, the student is subject to disqualification. For example, if a student has attempted 50 units of college

work (exclusive of "Cr/NC" courses), and has 100 or more grade points, he or she is in good standing.

If you have less than 100 but more than 93 you are on academic probation. If you have 93 or less grade points (a seven or greater grade point deficiency) you are subject to academic performance disqualification.

The actions taken by the deans' offices involving students having academic difficulties are treated individually for the most part.

Among factors taken under consideration are the frequency of academic deficiency, the severity of the

grade point deficiency, how long the student has been at Cal Poly, the personal situation, etc.

Be careful in selecting your classes in order to do better the following quarter. Check prerequisites. Take a course load you can handle. Follow the curriculum outlined in the catalog.

Not a punishment

Disqualification should not be thought of as a punishment but more as a practical necessity.

"The most humane thing you can do is let the student out for a breather," said Wilson.

Whether and when a stu-

dent can resume his or her studies at Cal Poly depends on the individual situation. The general rule of thumb is to let students stay out for a year.

Many students benefit by attending a community college, pulling up their GPA and removing deficiency points.

Where can students get help? First, talk to your adviser or department head (whoever is in charge of academic probation in your school). If an emotional problem or lack of motivation is causing the problem, then make an appointment at the Counseling Center or Learning Assistance Center.

Schools differ on handling probation

BY LORI MARLETT

Staff Writer

A hefty pile of computer printout is delivered to the various schools at Cal Poly each quarter — called the Deficiency List. The stack is high and it is dispersed and handled differently by each of the seven schools.

Discretion for probation and dismissal is handled by the dean of each school and the deans have the option of granting that authority to their associates or to the department heads.

A student on probation must find out who handles that responsibility and then seek their help in advisement.

Robert Coe, dean of the School of Business, handles all probation and disqualification cases personally and he is the only dean on campus to do so.

In the School of Agriculture, the eleven department heads have the responsibility for dismissals and also reinstatements of students who have been dismissed.

"There are 3,638 students in our school and one person can't know that many students," commented Associate Dean John West.

The responsibility is handled differently throughout the university but the restrictions and limitations imposed are all basically the same.

After speaking to deans, associate deans, and other staff members, various views came out as to how they saw students reach academic probation and what led them to that predicament.

"Freshmen are notorious," states Thomas Johnston, associate dean of the School of Communicative Arts and Humanities. "Their interests are social and economic, it takes them awhile to adjust."

With so many part-time students at Cal Poly it doesn't produce the academic qualifications or performance of a full-time student body, according to Johnston.

"I think students are given every chance," said Johnston. "We'll permit anything in the name of psychology."

Philip Bailey, associate dean of the School of Science and Mathematics said, "basically they end up here because they didn't study — it's a hard habit to break if you haven't studied for eighteen years."

Engineering building plans discussed

BY MARY KELLY

Staff Writer

In a talk before engineering students and faculty Tuesday, President Warren Baker discussed the plans for a new engineering building.

Construction of the building is scheduled to begin in the summer of 1983, and if all goes well, the building should be completed by the fall of 1985, said Baker.

The building will cost approximately \$9 million to construct, and another \$3.5 million will be required for equipment once the building is finished.

The building will be located west of the new library, and north of the architecture building.

Baker also expressed his concern for solving the faculty and staff shortages in the Engineering Departments.

He said there is no quick and easy solution for solving the staff problem, because other industries

and universities are competing for the same people.

However, Baker said Cal Poly does have a means of solving the problem of engineering faculty shortages. He said Cal Poly is trying to enter into some form of partnership with industries in an effort to locate faculty.

One student expressed his concern to President Baker that some of the tenured engineering faculty are poor teachers.

"That problem is a rather difficult one to deal with," said Baker. However, "the magnitude of this problem should be one of concern," he said.

"The school's reputation won't be able to stand up to what it has been, if students are leaving here disenchanted."

Baker stated the decision to consolidate some of the engineering departments was done so that there would not be a duplication of courses among the departments. If departments stopped duplicating classes, they would be able to offer more courses, he said.

"When you have limited resources," stated Baker, "you can't afford to duplicate faculty."

Another effort to help in the shortage of faculty is

that there will be less freshmen accepted into the engineering school this fall. There will be 495 freshmen accepted this year, as opposed to the 790 that were accepted last year, stated Baker.

Baker said we cannot maintain a good undergraduate program if most of our faculty are involved in research, however, it should be done in various forms, so faculty can provide a window into what's going on in industry.

"I encourage research in the broad sense," said Baker, "As a means of staying up to date."

Women cagers' playoff hopes set back

The Cal Poly women's basketball team's chances for post-season play suffered what could be a fatal blow Saturday night as the Mustangs dropped their fourth California Collegiate Athletic Association game of the season to UC Riverside, 68-62, in the Main Gym.

The loss drops Cal Poly to third place in the conference—a full game behind Chapman College in second place—with only two games remaining on the Mustangs' schedule. Cal Poly Pomona, No. 1 in the nation (Division II), clinched the CCAA title Saturday night with a 100-62 romp over Cal State Dominguez Hills.

CCAA scoring leader Donna Hammond connected on 11 of 16 shots from the field and 12 free throws en route to a game-high 34 points to pace the Highlanders in their upset over the previously 13th ranked Mustangs.

Hammond's torrid shooting pace was reflective of her team's overall performance as Riverside shot a sizzling 60 percent from the floor in the game compared to Poly's disappointing 34 percent.

Riverside's hot night from the floor was enough to stifle a second half Poly comeback which saw the Mustangs turn a 13-point deficit into a five-point lead with four minutes remaining in the game. Poly could muster only two more points in the final minutes, however, as Riverside reeled off 13 to win easily.

Poly's leading scorer and rebounder on the season, Laura Buehning fouled out in the second half along with forward Chris Roete to make things that much harder for the Mustangs.

Six-foot center Sherri Rose led all Mustang scorers with 16 points (8 of 14), while grabbing a game-high 10

rebounds. Buehning had one of her worst nights in a Mustang uniform, hitting only five of 26 shots from the floor for 15 points.

The Mustang's somewhat flat performance could possibly be attributed to an emotional letdown following their dramatic 67-65 triumph over Central Coast rival UC Santa Barbara on Friday night in the Main Gym. The win tied the four-game season series with the Division I Gauchos at 2-2.

Buehning led all scorers with 16 points, including two free throws with 17 seconds left that put Poly ahead to stay. Carolyn Crandall and Roete were the only other Mustangs in double figures with 12 and 11 points respectively.

The Mustangs' overall season record now stands at 21-10, while their CCAA mark dropped to 6-4.

Poly will host Chapman Thursday night at 7:30 in a must-win situation for the Mustangs if their playoff aspirations are to stay alive. However, at this point the playoff picture for the women is dim and getting darker as 12 teams have already been selected for the 16-team NCAA Division II playoff field.

To further complicate matters for Poly, the Mustangs will take to the road on Saturday for their regular season finale with top-ranked Cal Poly Pomona.

Despite all the odds against the Poly women, the Mustangs could still possibly gain a playoff berth if Chapman loses to Poly and Riverside (chances of this occurring could be estimated at 6 to 4 in favor of Chapman) and if the Mustangs defeat Pomona on the road (chances of this occurring could be estimated at slim and none).

Women's track preview

Poly women picked to go the distance at nationals

Editor's note: This is the first part of a three-part preview of the women's track team with the series being divided between distance runners, middle-distance runners and athletes competing in field events. Today's story will focus on the distance runners.

BY VALERIE BRICKMAN

Staff Writer

Cal Poly's women's track team has gotten itself off to a good start this season after running away with nine first place finishes and a number of seconds and thirds at the Cal State Bakersfield All-Comers meet two weeks ago. In addition, the team won the California Collegiate Athletic Association track and field relays this past weekend at Cal Poly Pomona.

According to Head Coach Lance Harter, this team has been in the making for three years and he refers to it as "a team with tremendous depth, with no weaknesses and with national ability in every event."

Harter will be heading the coaching duties with the help of three assistants. Dennis Esquivel will team up with Harter again — he was also the cross country assistant coach. Esquivel will be working with the middle-distance and distance runners as well as with the hurdlers.

Other assistant coaches will be Kevin McCarthy, who will also be working with hurdlers and will be helping in training the long jumpers, and Fred Harvey who will be working with the sprinters.

"We have the greatest assembly of talent in any Division II program," Harter said.

Last year's team was undefeated in dual meets and won the Division II Nationals, which included two individual champions: Eileen Kraemer at 1,500 meters and former Olympian Karin Smith in the javelin.

Distance races are run at 800, 1,500, 3,000, 5,000 and 10,000 meters.

The Mustangs have a number of quality distance runners on the team, some of whom have been in training since late

last summer in preparation for the cross country season. The cross country team won the CCAA conference meet and finished second in the Division II Nationals, placing six All-Americans.

Leading the pack of top distance runners will be senior Eileen Kraemer. Kraemer is a two-time national champion and All-American. She received these honors while competing on the track team last year with her win in the 1,500 meters. She was also this year's individual champion in the Division II cross country nationals.

"Eileen is devastating, she is truly rising to her level," Harter said.

The liberal studies major from Corona will be competing with great versatility in events from the 800 to the 5,000 meters, concentrating on the 1,500 and 3,000 meter events.

"Eileen is a great threat in the 1,500 on the Division II level," Harter said.

Junior Kristin Allyne is a returning All-American from last year's squad and should be a potential national scorer in the 800 meters.

Allyne is a transfer from West Valley Junior College where she ran in the 400 meters and in the distance and sprint relays. The biology major was awarded all-conference honors in both cross country and track while attending West Valley.

A native of San Jose, Irene Crowley returns for her senior season. Last year Crowley finished fourth in the 5,000 meters, qualifying for All-America honors, while picking up the honor this year with her 15th place finish in the cross country nationals.

"Irene is a threat to win the national title in the 5,000 or 10,000," Harter said.

While a senior at W.C. Overfelt High School, Crowley was named All-America Track Runner of the Year in Cross Country in the state of California.

In her first year as a Mustang runner, freshman Jenny Dunn collected All-America honors at the Division II Nationals in cross country by capturing fourth place. According to Harter, Dunn is a versatile runner who will com-

pete in all events from the 1,500 to the 10,000.

"Jenny has the potential to be a national title-holder," Harter said.

A physical education major, Dunn hails from Camarillo where she graduated from Camarillo High School. While a senior, Dunn was selected Athlete of the Year and MVP of her cross country team.

A junior college transfer this year, Shari Ewing will be a dual runner for Harter competing in the 800 and 1,500 meters. While attending Glendale College, Ewing was chosen as Woman Athlete of the Year.

A two-time junior college state champion in the 1,500 meters, Diana Figliomeni transfers into the Mustang program from West Valley Junior College.

"Diana has the ability to run in anything from the 400 to the 1,500 meters," Harter said.

Figliomeni was chosen most valuable runner in track and cross country while at Saratoga High School. The natural resources management major also won the 800 meters at the JC state meet.

An All-America in cross country with a 22nd place finish in the cross country nationals, freshman Carol Gleason should add her speed in the 5,000 and 10,000 meter races.

"Carol has already broken the school record in the 10,000," Harter said.

Gleason, a native of San Jose, helped her Lynbrook High School track team to four conference championships.

A sophomore math major, Amy Harper enters her second season for Poly. Harper finished 10th in the cross country nationals this year, qualifying her for All-America honors.

"Amy has great versatility, she could be an All-American in any event at the nationals," Harter commented.

Harper, who will compete in the events from 800 to 5,000 meters was an

All-American last year as she placed seventh in the 1,500-meter event at nationals. Harper was named Senior Athlete-of-the-Year while attending Prospect High School in Saratoga.

Jennifer Jammeson will be competing in the distance events from 1,500 to 5,000 meters. Jammeson has already been named an All-American while finishing 25th in the cross country nationals.

While attending El Camino Junior College, the biology major placed fourth in the state meet at 1,500 meters.

Janice Kelley will be running in her senior season for the Mustangs. Kelley received All-America honors last year while competing in the 800 meters.

An ag management business major, Kelley was chosen most outstanding senior girl athlete while at Hemet High School. She finished fifth in the state while competing in the two mile race. Kelley will compete at 3,000 meters.

Another junior college transfer, Rhonda Patcha will add her strength and speed to this year's squad. Patcha finished third in 1980 in the 800 meters and second in 1981 in the junior college state championships.

The junior liberal studies major will continue competing in the 800 meters. While running for Fullerton Junior College, Patcha was named Most Valuable for two years and was Southern California Champion in 1980 and 1981 in the 800 meters.

Running in the 800 meters this year, Esther Scherzinger will be in her senior season.

"This lady has unbelievable talent," Harter said.

Rounding out the list of top distance runners is a young-upcoming competitor, freshman Aida Sterns.

"Aida has the potential of being a future superstar for us," Harter said.

Sterns will be a competitor in the 800 meters.

ASI inaction

The small shaft of light which shone dimly at the end of the tunnel for seven so-called minor sports may have been extinguished permanently thanks to an organization which has been one of their biggest supporters in the past — the ASI Student Senate.

The Student Senate was presented with three alternatives at its meeting last week to provide the Instructionally Related Activities Board with \$20,000 to bail out the floundering soccer, water polo, men's volleyball, and men's and women's swimming and tennis teams. The three proposals consisted of taking funds from an ASI budget surplus or from an expected \$45,000 increase in student fees, or from funds earmarked for the proposed Aquatic Center at Lopez Lake. Instead, the ASI devised an alternative of their own: Not to support minor sports at all financially, but offer moral support instead.

Athletes from seven sports may now have lost both the thrill of intercollegiate competition and a chance to pursue a career in their particular sport, as the Athletic Department indicated that they will be willing to finance the seven teams only if the ASI Student Senate (or any other group) were willing to shoulder \$20,000 of the tab. The decision made last week makes one wonder who the ASI Student Senate actually represents — clearly not the students.

By voting not to fund the seven so-called minor sports, the Student Senate has sent a dangerous signal up to the Administration Building. Whether or not their actions warrant the claim, ASI is perceived as being the voice of the students. Though the Student Senate is actually telling the administration that they support minor sports in spirit but not in the pocketbook, their garbled message might be interpreted as general student disinterest in keeping the sports program intact. The odious task of telling athletes that their sport has been slashed from the budget would be made that much easier.

The Student Senate could be excused if \$20,000 just wasn't available to give to the sports program, but such is not the case. As mentioned earlier, \$45,000 is guaranteed from the ASI fee increase. The *Mustang Daily* Editorial Board can think of no better use for that money than by giving it back to the students in the form of a \$20,000 allocation to minor sports.

Members of the Senate argued that it is not their job to help subsidize minor sports year after year. If it is not the Student Senate's duty to aid students by saving their programs, then whose duty is it?

But there is hope that the light at the end of the minor sports tunnel can be relit. Proposals will probably be made to rescind last week's motion at tonight's Senate meeting which begins at 7:30 in U.U. 220. Show your support for minor sports by attending the meeting. Force the Student Senate to act in the students' interest — for a change.

Animalistic acts

Editor:

It has lately become apparent that it is no longer sufficient for a good percentage of an audience to simply enjoy an event, such as the recent Pretenders show, they insist on becoming an event themselves. This is evident from the piles of trash and broken bottles, the dozens of twisted and trampled chairs and the exhaustion felt by the concert workers.

These unnecessary occurrences result from a variety of reasons, the most important of which is the social acceptance, or relative "coolness" of certain behavior. At a concert, it is now "cool" to get drunk, butt in line, discard any

unwanted item randomly, stand or jump on your chair, and abuse verbally or otherwise anyone who attempts to stop you. I cannot see any positive results occurring because of any of these animalistic acts.

I can see, however, the probable limiting of the number and type of concerts that will be allowed, a larger and more restrictive security force, and a higher ticket price to account for the damages incurred. As George Harrison said, "All things must pass," and many of us think that a good time at a Cal Poly concert is becoming one of those things.

Bradley S. Dyruff

Registration no solution

Editor:

There are other ways of killing people besides shooting them with a registered gun. If you will think back to the time of Lennon's death you may remember another man was murdered in a public building, in a busy city just a few days before, with a knife, not a gun. As long

as there are people with problems there will be problems and taking away our handguns will not solve the problems. Thank you.

Phil Paris

P.S. You are willing to criticize other people in print, now let's see if you can print some about yourselves.

Daily policy
