## Senior Projects: many topics, one goal

BY CINDY BLANKENBURG

Staff Writer

Senior projects vary from department to department at Cal Poly but the purpose of each remains the same.

The definition of a senior project, according to the Campus Administrative Manual, is "a formal report of the results of a study or experiment selected and completed under faculty supervision by each student prior to the receipt of the bachelor's degree."

The project that each student undertakes is left up to each department. The nature of the project is dictated by what the student is studying.

Crop Science and Fruit Science majors basically do field research, department head Corwin M. Johnson said.

"I'd say 99.9 percent of our senior projects are field and applied research. These are things like trying to determine the best variety of sweet corn, the effects of pruning methods on grapes, residual effects of herbicides, and the timing of emergence of insects," Johnson stated.

Before starting on a senior project there are a number of things the senior must do first, Johnson said. He must meet with an instructor with an idea of what he wants to do. Then the student talks to a committee of faculty members who discuss and narrow down his idea.

Then the student is assigned to an instructor who helps to define the project and construct a form to be followed.

Many times a field project will include a literary search before the applied field work.

Senior projects in the Soil and Fruit Science Departments are designed to teach students how to do a literary review in the specific area of field research, how to define specific problems and try to solve these problems in a scientific, systematic way and how to write up the results in a format adopted by the department.

"We believe in senior projects," Johnson said. "They are a very valuable tool. The problem with senior projects occurs when the student procrastinates."

In the English Department, the variety of senior projects is very broad, Bill Wahl, professor of English and head of senior projects said.

"One student made a movie, one student wrote down her experiences in a journal. We allow almost anything that pertains to English, literature or communication," he said.

The students are encouraged to pick something that interests them, he continued. When they decide what they want to do, they are assigned to an instructor who supervises them.

"A lot of students write short stories or poetry," he said.

Once students present their projects to their professors and receive a grade, Wahl sends the project to the library archives where it is put onto microfiche. Wahl keeps one copy of the project in his files.

All departments on campus require that projects be submitted to the library to be put on microfiche. However not all senior projects are transcribed to microfiche, as some students make models and do experiments which

## Union building considered for south campus

BY MARY KELLY  
Staff Writer

A university committee is currently working with the School of Architecture and Environmental Design to create a "satellite" to the University Union on the south side of campus.

The U.U. Board of Governor's Building Improvement and Expansion Committee has been working on the project since last summer. Plans for a satellite union (or a "west facility") have been a part of Cal Poly's master plan for several years.

The proposed site for the satellite union is at the south end of campus between the Business and Architecture Buildings.

David Wolf and Grant Mah, members of the committee, believe that a facility in that area would prove to be a service to students.

The Cellar is going to be closed this summer, said Wolf, and Kennedy Library and the new engineering building will create a lot of student traffic on that end of campus. There will be a need for some kind of food service facility in that area, he said.

Originally, it was thought that a third story would be built on the union building, said Wolf.

"However, it would cost \$400,000 just to make that building structurally safe to house a third story," stated Wolf. "So the board thought that the idea of a satellite union would be more prevalent."

The proposed satellite union would provide food services, study, recreation, lounge, and programming areas, plus retail and rental space, said Wolf. And possibly in time, we might be able to incorporate a campus pub if the political climate changes, he added.

The west facility would be available for student, alumni, and faculty use. Some faculty don't feel that their needs are being met on campus at the present time, stated Wolf, and this would provide space for faculty to gather.

The building will take on an indoor-outdoor concept. "We are looking at buildings that will work harmoniously with the natural environment down there," stated Mah.

## Apartment fire reported

A fire broke out Monday night in an apartment located in Woodside apartment complex, 200 N. Santa Rosa.

According to city Fire Marshall Doug Flaherty, the damage in apartment 401 was estimated at \$20,000.

The fire was caused by an electrical popcorn popper being used in the kitchen, Flaherty said.

Flaherty added that the person who called in to report the fire lost crucial minutes dialing the operator rather than using the emergency number "911" for fire department or police in the city of San Luis Obispo.

"They lost about 10 minutes because they didn't use this number," Flaherty said.

The flames in the four bedroom apartment were reported at approximately 7:15 p.m. Monday night. Fire Duty Chief Bob Neumann said local residents cooperated in alerting their neighbors in surrounding apartments to evacuate.

A total of nine men responded to the call, Neumann said.

## Working women earned respect, professor says

BY LORI MARLETT  
Staff Writer

"Women have carved themselves a place in the work force that is both acceptable and respectable and I don't think that position will change," said a Cal Poly professor of Art/History.

"American Working Women" was the theme of Annette Cox's 45-minute presentation Tuesday which provided a historical introduction to the film "Rosie the Riveter" which was shown at 1 p.m.

At the beginning of the 20th century, the leading occupation for women was that of a servant. Generally young single females were employed and then only because they were forced to economically, according to Cox.

The few professional women did not usually marry because society dictated

that a career and family don't mix, said Cox.

During the first World War, women went into heavy industry, but they were fired at the conclusion of the war when the men came home, she said. George Gallup took a poll in the United States after the war and over 80 percent responded that if husbands were working then their wives should not.

### Working women

World War II seemed to help the working women, said Cox. War production was the key to Allied victory and the government promoted women as a significant part of the war effort.

"Rosie the Riveter" was created to glorify and celebrate the working woman. She was strong, able-bodied, and took the scandal out of wearing overalls, said Cox.

Slogans in magazine ads and radio commercials attempted to get women involved, she said. "Every idle machine means a dead soldier" was used to appeal to the patriotic individual. "Running a riveter is just like running a sewing machine" attempted to simplify the work involved.

Even the military got into the act by telling women that "uniforms were created by designers to flatter face and figure."

Songs heard on the radio at that time included "The Lady at Lockheed" and "We're the Janes that make the Planes."

Unfortunately perceptions of women did not really change, said Cox. Propaganda played on the traditional values of a woman to be a good wife, mother, and worker (in war plants) so

that you can bring your son home sooner from the war.

Traditional expectations didn't change. When the men came home they took their old jobs back and the women were left with secretarial positions, said Cox.

Betty Grable, the popular pin-up girl, was what the soldiers were coming home for, not a "Rosie," said Cox.

During World War II the government got women to take up the burden of the work, but only temporarily. An estimated 4 million women (who had never held a job before) went to work.

Attitudes have changed in the United States and more and more women are joining the work force. In the 1980s the figure is about 50 percent, which is getting closer to the male rate of employment, said Cox.

## Guatemala's Election Protested

GUATEMALA CITY (AP) — Opposition candidates called for a demonstration Tuesday to protest what they called widespread fraud in Guatemala's presidential election, but the military-dominated government warned the demonstration would be "repressed."

The three civilian candidates, who trailed in Sunday's election, scheduled the rally for 5 p.m. — 6 p.m. EST — in front of the National Palace.

It was not clear if they still planned the demonstration following the government announcement.

Presidential spokesman Carlos Toledo Vielman, speaking at a news conference with Defense Minister Gen. Rene Mendoza and the army chief of staff, reminded protest organizers of a law that requires a permit three days before a demonstration.

"All illegal demonstrations will be repressed," Mendoza said.

Opposition parties withdrew their representatives from the vote counting on Tuesday, claiming there was widespread fraud and manipulation in the vote count.

Gen. Angel Anibal Guevara, candidate of a coalition that includes a party that has shared power for 12 years, held a lead that gave him 37 percent of the votes counted. He apparently will not get more than 50 percent, which will force Congress to choose the president from the top two candidates.

Leftists boycotted the election, claiming their candidates would be killed by right-wing death squads.

## Novelist enters senate race

LOS ANGELES (AP) — Novelist Gore Vidal still thinks the U.S. political system doesn't work, but he said Tuesday that wouldn't keep him from filing as a candidate for the Democratic nomination for the U.S. Senate.

"Of course it doesn't work," Vidal said in a telephone interview Tuesday morning, just hours before he planned to file the papers with the Los Angeles County Registrar's Office in the City of Commerce.

"If it worked, I'd just sit at home," he said.

The man who claims he hasn't voted in a presidential election since he supported Lyndon Johnson, the "peace candidate," in 1964 says he wants to go to Washington to "cut back the Pentagon and reform taxes. Those are the most urgent things."

And he said he expects to do those things in six years and then go home.

## Newsline

## Drug Link in Belushi's Death

VINEYARD HAVEN, Mass. (AP) — With Dan Aykroyd riding to the gravesite on a motorcycle and James Taylor mournfully singing "That Lonesome Road," comedian John Belushi was buried Tuesday in a gentle snowfall on an island off Cape Cod.

Meanwhile in Los Angeles, where Belushi died last Friday, reports surfaced that his death may have been caused by a cocaine overdose.

"We can hear the call of his solitary warning: 'Wise up!'" the Rev. Ilia Katre of Boston's Holy Trinity Church told the 200 friends and relatives who gathered at a church on Martha's Vineyard for a 45-minute requiem service and brief eulogy.

The phrase, "Wise up!" was a trademark of the 33-year-old Belushi, whose manic comedy made him a star of TV's "Saturday Night Live" and then such motion pictures as "Animal House."

Among the mourners who gathered on the overcast, chilly morning at the Congregational church were Belushi's wife, Judith, his parents, comedian Bill Murray and producer Lorne Michaels, who worked with Belushi on the hit NBC late-night comedy show.

Lee Salter, Belushi's New York publicist, said the comedian chose to be buried on the island where he owned a summer home because "it was the one place he really slept well."

"Seriously, he's always really loved it here," said Salter.

The funeral service was performed by two Albanian Orthodox priests with soft organ music and the smell of incense in the small, traditional New England church. Belushi's parents emigrated from Albania.

The Los Angeles Times reported Tuesday that a source in the coroner's office said Belushi died of complications from a cocaine overdose. ABC News also reported that sources said a drug overdose killed him, and said the drug was "probably cocaine."

The Los Angeles coroner's office declined to comment on the reports, saying only that the autopsy and other tests have been inconclusive.

## Brown to Declare Bid for Senate

SACRAMENTO (AP) — Gov. Edmund Brown Jr., who has been an active but undeclared candidate for the U.S. Senate for more than a year, plans to make his campaign official Wednesday in a series of announcement meetings and parties.

Brown enters the Senate race as the heavy favorite over three poorly financed and less known rivals for the Democratic nomination in the June 8 primary: Fresno Mayor Daniel Whitehurst, state Sen. Paul Carpenter and novelist Gore Vidal.

But Brown is rated as the underdog in the November general election against all three top Republican hopefuls, Reps. Barry Goldwater Jr. and Pete McCloskey and San Diego Mayor Pete Wilson. Incumbent Republican S.I. Hayakawa is retiring.

After a formal announcement at a Los Angeles hotel Wednesday morning, Brown plans campaign appearances with senior citizens, Jewish leaders and labor leaders, plus a tour of a Los Angeles job training program, before a campaign kickoff party in the evening.

With more voter recognition than all of his rivals combined, Brown has been able to conduct a low-profile campaign so far, concentrating on fund-raising and delaying his formal declaration until the final two days before the deadline for candidates to file papers.

He has held 100 or more fund-raising events, most of them with little or no publicity, during the past year, and has a campaign bank account of \$1.6 million — more than the current campaign bank balances of all three Democratic and seven Republican rivals combined.

## Woman jailed in River Protest

ANGELS CAMP (AP) — A woman who chained herself to an oak tree in the Stanislaus Canyon to protest the continued filling of New Melones Reservoir was arrested Tuesday for trespassing.

Linda Cloud, 30, of San Francisco was taken into custody shortly before noon by Tuolumne County sheriff's officials who snapped her chain with special cutters, then took her to the county jail in Sonora.

She was accused of trespassing and interfering with federal government operations and was held on \$1,000 bail.

Last month, a federal appeals court ordered a halt to the filling after the state sued to require that contracts for New Melones water be signed before the reservoir can be filled.

# Housing director offers tips for apartment hunters

BY GAIL PELLERIN  
Staff Writer

The prospect of searching for housing in itself can be both frustrating and bewildering, but the frustration is being compounded this year by San Luis Obispo landlords who are slow in releasing listings, the Cal Poly off-campus housing director said.

The off-campus housing office is facing a hard time at the moment, Director Walt Lambert said, as students want to begin their search for housing, but the office has not yet received any listings.

It is suggested that students come in and check the office — which is sandwiched between Trinity Hall and the North Mountain Residence Halls — on a daily basis at the beginning of Spring Quarter, Lambert said.

It's also a good idea to check the newspapers and talk to friends about possible housing. But then be prepared to find landlords beginning their contracts June 15, he added.

In that case, students either stay here over summer or sublet their apartments. When subletting apartments, the tenants accept the role as the landlords and should get a signed contract and a security deposit, as the original tenants are responsible for the upkeep of the room, Lambert said.

Many students feel more secure by putting their names on waiting lists of a specific apartment complex.

Landlords don't spend much of their time trying to contact students, who are usually difficult to reach.

They would much rather take a check from a prospective renter standing in their office, he added.

Those students who want their leases to begin in September, should look for housing in August. But success is uncertain. During the past 3-4 years, the off-campus housing office would have 100-300 listings for fall, but this year started with a mere 10-12 listings.

When students decide to lease, it is safe for them to check out the room before they sign the contracts. If the carpeting needs cleaning, or a room needs painting, the prospective tenants should get in writing that these matters will be taken care of before they move in.

Before signing a contract (a contract is essential), the students should read it over, make sure they understand it, ask questions and be certain that there is no additional set of rules and regulations.

As far as legal matters go, students need not be too concerned, for the landlords cannot waive tenants' rights, because they are protected by the law.

Once the contract is signed, the deposit must be paid. Be aware that the only rent payment is the first month. When landlords also ask for "last month's rent," this amounts to simply a deposit. It can be kept two weeks after the tenants have moved out, and after the actual last month's rent has been paid, Lambert said.

Too often, people shy away from demanding their refund, or leave without it because it's not worth their time, Lambert said noting that in reality, landlords will often be left with \$100,000 worth of unreturned

Though the search for student housing has officially begun, Santa Lucia dorm resident Kathy Harris has yet to get into the hunt.

## City, Poly discuss possible Greek Row

BY ANGELA VENDEL  
Staff Writer

In an unprecedented move, city and university officials met with ASI officers and Greek representatives last week to discuss

Greek relations with the community and the possibility of developing a "Greek Row" at Cal Poly.

Representatives from the city police department and planning commission were also present.

"The purpose of this conference is to air all of our concerns and find a common ground," said Jeff Arambel, ASI Greek relations assistant, when opening the meeting. "Our relations have improved since the summer. This is to keep it that way."

Representatives from the different groups presented their positions and concerns briefly and later in the conference they were allowed to discuss them in more depth.

The meeting was a success, according to Arambel.

"I think that this meeting was a ground

breaking for better communication and understanding between the Greeks and the city," said Arambel. "There's never been a formal meeting like this before. The Greeks were able to state their wants and views. The city

was able to respond and state their views."

Those who attended the conference felt that more such meetings should be held in the future.

"It will definitely help relations," said City Councilman Allen Settle.

## English awards committee formed

BY BRIAN RAILSBACK  
Staff Writer

Students in Cal Poly English courses now have the possibility of being awarded more than just a grade for their work.

An awards committee is being formed within the English Department which will recognize excellent work produced by students for English classes, said Al Landwehr, the English professor who originally proposed the idea.

The awards committee, which will consist of three persons in the department, will be responsible for choosing (among recommendations from English instructors) winners in three different award categories. They include:

— Awards for three outstanding student essays written for English 104 and 114 classes.

— An award for the best essay written for 300 to 500 level literature or linguistics courses.

— An award for the

outstanding English major of the year, based on his or her ability to analyze an aspect in literature or linguistics, articulate their point of view, and write well. Grade point average will also be a factor.

The committee will also be responsible for deciding the English Department's nomination for the Herbert E. Collins Scholarship, an

## ASI unveils list of spring films

The Spring Quarter films were decided at the ASI Films Committee meeting Tuesday after members completed voting on the nominations (made previously within the committee).

One nomination that failed was *Deep Throat* when the committee could not muster the two-thirds vote needed to override the automatic veto of the film (because of its X-rating) by the group's advisor, Doug Jones.

annual award of \$600 to a student for academic achievement.

The awards will be annual, and are hoped to be announced on the first Monday in May — beginning this spring, Landwehr said.

Winners will have an acknowledgement of their achievement on their academic record.

A special film series, The World's Worst Film Festival, was approved by the committee and will be shown free on five consecutive Monday nights.

The general list for films to be shown in Chumash Auditorium includes: *Blow Out*, *Body Heat*, *Breaker Morant*, *Camelot*, *Escape From New York*, *Murder By Death*, *Only When I Laugh*, *Superman II*, *Time Bandits*, *The Fox and the Hound*, *The French Lieutenant's Woman* and *The Stunt Man*.

## Projects 'promote confidence'

From page 1

could not be put on film, a library official said.

Wahl hopes the students gain self confidence from the project. He also thinks the project is useful because it is self-guided and self motivated.

For mechanical engineering majors, the senior project usually includes designing, testing and building something, Peggy Hardaway, department secretary said.

She said there are many

options open to students.

They can do a senior project on dynamics, fluids, solar paraphernalia, pumps, or almost anything that the student wishes.

As in most departments, the student is given two quarters to complete the project.

Hardaway also said that sometimes the student's future employer has helped to defray costs. However, she said the project doesn't always have to do with the person's future job.

## What? You say a mechanic makes house calls?

BY GAIL PELLERIN

Staff Writer

Hey, look who's coming to our apartment!

It's the postman!

It's the milkman!

No, it's Steve Brown the Mechanic, and he makes house calls.

After starting his family business, B & B Enterprises in Atascadero nine months ago, he decided that the best service he could give his customers, is service at their convenience.

Brown will either service foreign or domestic vehicles at the home of his customers, or he will take the vehicle and work on it in his well-equipped home garage.

His clients don't ever have to leave their homes. Brown will do all the running around; if he takes the car, he will

bring it back. Also, he is in constant contact with his clients, letting them know about the progress he's made.

Brown can do complete engine overhauls, tune ups, and general auto repair. His fee is \$25.00 per hour for labor.

"I don't put out the overhead," Brown said. "I work on the cars myself. I feel that it gives my customers better service."

He never really advertises, instead he gets his business by word of mouth.

This method has worked well for Brown, as he has been very busy, working five days a week, starting at 7:30 a.m. and sometimes ending at 8 or 9 in the evening.

Brown said there are a few things students can do for their cars to keep them in good running condition.

For one thing, they can change their oil and filter after 4,000 miles or six months. Also, the students should check their coolants, water and oil levels every day.

"They should be kept up to full," he said. Vehicle owners should also keep an eye on the belts, and the air pressure in

the tires, Brown added.

Brown has been a mechanic for over 20 years. Before he went into his own business, he worked for Transportation Services at Cal Poly for 10 years, servicing state cars, buses and trucks.

For anyone wishing to contact Brown, they can call anytime at 466-4405. If he's not there, he will get back to you.

## Tough choice: A date or a BMW

BY SHAWN TURNER

Staff Writer

Oh, those First-Date Blues:

Sandra threw open the door of her apartment and announced, "I'm home."

Her roommate looked up from her book. "Hey, how did you like the movie—what happened to you?"

The woman stumbled in.

The straps had broken on her high heels and there was a run in the front of her left stocking. The hem of her dress was askew, letting her slip peek out. Her hair had lost the bounce it had when she left the apartment earlier that evening.

Her face was streaked with dirt.

"I had to walk home," she said.

"What?" her roommate said. "You come sit down and tell me about this. I'll get some coffee." She went to the kitchen and returned with two cups.

After a while Sandra caught her breath.

"Oh, Julie, it was terrible. Right after the movie my date left me for a...for a..." she began to cry.

For what?

"What? What did he leave for?" Julie asked, patting Sandra's shoulder. Then she recoiled. "Not for

## Cal Poly parking fees, fines mean money for CSU system

BY DEBRA KAYE

Staff Writer

Between parking stickers, parking tickets and overdue fines, parking means big money to Cal Poly.

According to Lt. Leroy Whitmer and Sgt. Steve Schroeder of the Public Safety Department, the university collects about \$100,000 a month in parking fees. A 1981-82 parking sticker costs \$10.00. Overdue stickers were \$10.00. Overdue stickers were \$10.00. Overdue stickers were \$10.00.

In addition, the municipal courts return 50 percent of the overdue parking fines they collect from Cal Poly, which amounted for another \$25,000 between July and January.

All the monies finally go into the statewide general parking fund for the CSU system, but the money goes to Cal Poly. The money goes to Cal Poly. The money goes to Cal Poly.

taining the lots, patrolling, and accounting staff and equipment, said Schroeder, while the rest goes to lessen the impact of car travel on campus. This includes subsidizing bus tokens, building bus parking lots and bus lanes, and other measures.

As for the parking stickers, Whitmer said they are sold at the Public Safety Department. The stickers are sold at the Public Safety Department. The stickers are sold at the Public Safety Department.

The stickers are sold at the Public Safety Department. The stickers are sold at the Public Safety Department. The stickers are sold at the Public Safety Department.

## Infatuation with slick cars hurts student's love life

From page 4

another woman! Oh, I don't believe this! I just don't —

"No, he left me for a car," said Sandra.

"Did you say, a car?" Julie asked.

"Yes, yes, a car. Isn't it horrible? A B-M something."

"BMW?"

"Yes. Oh, I can't even bear to think about it. We were walking out and he saw this — this BMW, and he just dropped me. It was like he was fixated or something. Finally I told him I was leaving, and all he could say was, 'In a second.' So I left. And here I am." She cried some more.

Car happy

"Oh, that's simply terrible," said Julie. "That guy better have a good explanation for this. But I should have warned you. Didn't you hear the way he roared in here with his car to pick you up?"

"You're telling me?" said Sandra. "The inside of his car is like the dashboard of a 747, all those lights and switches and everything. And he kept telling me about his car, saying things like — like dual cams and headers and cylinders."

"I just smiled and nodded like I knew what the hell he was talking about," she continued. "I'm not sure half the time he wasn't cussing me out in some language."

The phone call came later that evening.

"Man, I'm so sorry I let you walk home like that," said Kevin. "I don't know what came over me. I'm sorry."

"I'm not speaking to you," Sandra said.

"Come on, now. Don't be that way. You just don't understand. I mean, well, BMW!"

"I said I'm not speaking to you," she said.

BMW 320i

"Not just any BMW — a 320i. Can you believe it? A BMW 320i with an air damp and an air foil on the back. I mean, we're talking Blaupunkt car stereo and Bosch parking lights and —"

"I said, I'm not —"

"Oh, please, Sandra, please go out with me again," Kevin said. "I won't leave you like that, ever again. I won't even talk about cars. I'll even drive my roommate's car, his old heap. Or we can walk even. Oh, please."

"I don't know —"

"Sure, we can talk about other things. I know about lots of other things. Baseball. Do you like baseball? We could talk about that like how well the Giants are gonna do this season, and about what Reggie Jackson's gonna do for the Angels."

"It's too bad about Jackson," he went on. "He didn't get near enough for that car he sold at that auction last month. Not near enough. What was it, a Rolls-Royce? No, it was a Mercedes-Benz. Or it could have been a Chalmers. It looked hot, I know that. It might have been —"

"Kevin, good night," said Sandra.

# Counseling group helps students deal with death

BY LORI MARLETT

Staff Writer

## Dying. DEATH.

It's an unmentionable subject to most. Hard to comprehend and hard to deal with.

"Learning to Say Goodbye" is a program designed for young adults who have a loved one with a life-threatening illness. Those who have experienced the death of a loved one are also encouraged to attend.

The idea originated with Linda Madrigal, a volunteer at Hospice in San Luis Obispo. The program is designed for an age group of high school and college students who might benefit from group counseling.

The group meets twice a month — every second and fourth Thursday from 7-9 p.m. at the Hospice house at 559 Marsh St.

"We try to make it a safe environment for people to express their feelings," said Kathryn Schwarzer, a counselor at Hospice.

Group counseling offers a network of support to those who are grieving. Finding out that you're not alone, that others are experiencing the same crisis, can be a real comfort, said Schwarzer.

Learning facts about grief and loss and figuring out how to handle such matters as insurance papers, wills, and funerals will be presented in the discussions, said Schwarzer.

Students who experience grief usually reflect it in their attitudes and behavior. They have little energy, feel confused and overwhelmed and generally guilty and angry at the same time, said Schwarzer.

Denial is a very strong feeling at this stage, especially with young adults. They have just begun to form an identity and purpose in life and then a death in the family undermines everything they were taught to believe, said Schwarzer.

"Learning to Say Goodbye" is one way of venting your feelings by sharing your experiences with others. The group

Mustang Daily—Lori Ortiz

Counselor Kathryn Schwarzer (left), Linda Madrigal, the Hospice volunteer who founded the student program and peer counselor Susie Webb (right), help students deal with death through "Learning to Say Goodbye."

is small, situated in a "homey" atmosphere where there is no pressure to participate in discussions until the individual is ready.

Statistics show that it isn't until three months after the loss that survivors really feel the emotional blow. That is when intense feelings of grief begin to show. It takes 1½ to 2 years before sur-

vivors function the way they had been before the loss.

Prior to that, the survivor will go through the motions of school or work (everyday life), but it will be more or less a mechanical action. It takes time to become a fully adjusted individual again, commented Schwarzer.

Most people turn to their friends for

comfort during this time but after awhile friends get "tired of hurting for you" commented Schwarzer.

For more information regarding "Learning to Say Goodbye" contact Kathryn at 544-2266 (Hospice) or Linda Madrigal who also works on campus 546-2816 (admin. 220).

## Survey finds school supplies cost less at campus bookstore

If you have ever asked yourself the question: Where can I find the best bargain on school supplies, you probably will not have to go off-campus to discover the answer.

Prices for 10 of 13 school supply items were found to be cheaper at El Corral Bookstore than at four other stores in San Luis Obispo, according to a survey conducted by the Poly Association of Consumer Economics.

El Corral bested Law's Hobby Store, Lucky's, Thrifty's and Ogden's Stationery in a comparison of 13 common paper goods items. PACE representatives added, however, that their organization surveyed only a small sample of paper goods on the market and said that all the items were not available for comparison in each of the five stores.

Though at times the saving at El Corral amounted

to a few pennies, often they were substantial. The survey revealed, for instance, that El Corral charges 30 cents for 3" by 5" index cards while Lucky's and Ogden's ask 54 cents and 60 cents respectively. Neither Law's Hobby nor Thrifty sells index cards in this size.

El Corral had only one item priced more expensively than the other four stores: an 18-inch long

steel ruler. El Corral asked \$4.98 for the ruler, while Law's Hobby and Ogden's charged \$3.65 and \$3.50 respectively.

No store charged consistently more for their products, although Ogden's priced nine of the 13 articles the same or more than their competitors. However, Ogden's asked the lowest price for the steel ruler.

Both El Corral and Ogden's had all 13 items

surveyed. Law's Hobby did not have seven of the articles, while Lucky's and

Thrifty's did not have four and two of the paper supply items, respectively.

## Police recover bicycles

Cal Poly police have recovered \$1,500 worth of bicycles and miscellaneous parts believed to have been stolen from on campus and San Luis Obispo.

The recent theft of a \$500 bicycle on campus led police to the Foothill

residence of Art T. Louie, 27, a Cal Poly student. Officers, armed with a search warrant, discovered five bicycles in the house. Louie was taken to jail and booked for grand theft and possession of stolen property.

# Fire department's dispatching system gets a 10-4

BY SANDRA GARY  
Staff Writer

Cal Poly's fire department dispatching system is back under its own roof for the first time in five years, said Carmon Johnson, Cal Poly fire chief.

The \$40,000 radio dispatching system was in the planning stages for three years, but was not put into full use until Feb. 1, said Patti Wilhelm, public safety dispatcher. The reason for the delay was twofold, she said. To eliminate any possibilities of the university becoming liable for emergency situation mistakes — all dispatchers had to be thoroughly trained to use the equipment — and the equipment had to be installed in top working order.

The dispatch system was originally in-house, but the equipment became inadequate as the campus grew. In the past, when a person called the 2222 emergency number, the Cal Poly dispatcher would take the information and relay it to the California Department of Forestry. CDF would then dispatch Cal Poly fire trucks under the correct code.

Using CDF to dispatch the Cal Poly Fire Department was inefficient, Wilhelm said.

"There was a slight delay in the dispatching procedure," she said. "Now that we send the fire department out, dispatch time should be reduced."

Fire Chief Carmon Johnson said it was frustrating knowing there was an emergency call and having to wait until CDF dispatched them.

"A lot of times we would just go anyway," Johnson said.

There are two codes to which the fire department responds. Code two is a minor emergency in which the fire engineers do not turn on the engine's lights or siren. Code three is an extreme emergency and the engine's lights and siren are used.

Two advantages of the new dispatch system are reduced time in dispatching fire engines and the ability given to the dispatcher to crosspatch.

Johnson explained the advantage of crosspatching. He said in emergency situations the new radio equipment enables police officers and fire engineers to talk to each other over their radios. With this added feature, less confusion and better coordination results, Johnson said.

Another feature that will soon be possible with the installation of a second crosspatch system, is the crosspatching of telephone conversations, Johnson said. With this system, a fire engineer will be able to speak from his radio directly to a person on a telephone. In situations such as rescuing people stuck in an elevator, this system will be useful, Johnson said.

The radio system is also used to dispatch police and parking officers. Seven channels are monitored on the radio which enables Cal Poly to join a county-wide safety network, Wilhelm said. For instance, if the city police were pursuing a suspect near campus, Cal Poly police would know and be able to help locate the suspect, she said.

The radio dispatch system is part of a larger communication console purchased by the Cal Poly Department of Public Safety in an effort to modernize the system. Included is a California Law Enforcement Telecommunications System. With CLETS, dispatchers can teletype messages anywhere in the United States.

The system is used mainly to gain access to driver's license and vehicle license numbers from the Department of Motor Vehicles in Sacramento. The dispatcher can type in a name or license number and within 10 seconds read on the video display terminal whether or

not a car is stolen, who the car belongs to, when the car was last registered, and other facts about the license and person in question, Wilhelm said.

"When people say we don't have our act together when it comes to emergency situations, I beg to differ with them," Johnson said.

The dispatch office is manned 24 hours a day, seven days a week with one or two people. Three full-time dispatchers and six part-time students work in shifts.

Another system being developed by the fire department to help organize the in-house dispatch system is the use of response cards. Response cards tell the dispatcher the correct department to call (police, fire, radiation safety, environmental protection), who (or how many) should respond, what to do according to the nature of the emergency and under what code the department should respond.

To compliment the response card system, the fire department is pioneering the development of a Building Access Guide (BAG). The BAG system works to guide fire engineers to the quickest route to a room where an emergency is occurring.

Other universities are looking into Cal Poly's response card and BAG systems, Johnson said.

## Godspell auditions announced

Auditions for the Cal Poly spring production of "Godspell" have been announced for Tuesday and Wednesday, from 7 to 10 p.m. in Room 212 of the H.P. Davidson Music Center.

No prior preparation is required for the auditions. Music will be provided at the audition by the musical director. Individuals interested in auditioning are advised to wear clothing that would permit easy movement.

## Author Ray Bradbury to speak at Poly

Author Ray Bradbury will speak in Chumash Auditorium Thursday night at 8. Tickets in advance are \$3 for students, \$4 for the public and a dollar more at the door.

**KCPR 91.3 FM**

One of America's most popular and prolific science fiction writers loves outer space, yet won't travel on airplanes. He enjoys traveling throughout the country, yet doesn't drive a car.

Ray Bradbury refuses to be placed into those neat little slots that book critics like to assign to "genre" writers. Yes, he's written science fiction, but he also writes screenplays, poetry, essays, book reviews, short stories: the "complete" writer.

Bradbury will speak at Cal Poly on Thursday, March 11, at 8 p.m. in Chumash Auditorium. Tickets are \$3 for students at the Julian A. McPhee University Union ticket office, and \$4 for the public, available at Cheap Thrills and Boo Boo Records. Door prices are \$1 more.

For those purchasing tickets in advance, Speakers Forum has arranged for a complimentary screening of a film Bradbury wrote, "It Came From Outer Space." A special treat, the movie will be shown at 6:15 p.m. in 3-D, complete with those red and blue 3-D spectacles. A Universal production made in the 1950s, the film boasts an all-star sci-fi cast of Richard Carlson and Barbara Rush. "It" will play in Chumash

Auditorium.

The prolific author has literally hundreds of stories to his credit, among the most famous being "Dandelion Wine," "The Martian Chronicles," "Something Wicked This Way Comes," and a new paperback collection, "The Vintage Bradbury."

When the film director John Huston was preparing the screen version of "Moby Dick" with star Gregory Peck, he selected Bradbury to write the screenplay of Melville's great American novel. Bradbury leapt at the chance to bring coherency to Melville's poetic allegory, and it remains one of his proudest works.

His books, "The Illustrated Man" and "Fahrenheit 451," have been filmed, the latter by famed French director Francois Truffaut. Two years ago, "The Martian Chronicles" was made into a network TV movie that played to critical acclaim.

Last year, Bradbury played himself in George Cukor's film that starred Candice Bergen and Jacqueline Bisset, "Rich and Famous." He lectures on the college circuit throughout the year when he isn't in his Los Angeles home writing yet another piece for publication.

## Poly might take church

BY SANDRA GARY

Staff Writer

After seven moves, which included meeting in Cuesta Park for several weeks, the Vineyard Christian fellowship of San Luis Obispo may settle in Chumash Auditorium. The decision hinges on whether the group becomes a recognized campus organization, said Jack Little, one of the church's three pastors.

Little, together with Pastors Danny Daniels and Joseph Goodwin, are in the process of deciding whether or not to take steps toward gaining official recognition as a campus organization.

"We are not trying to slip behind the cover of being an on-campus group and in actuality be a church," Goodwin said. "We want to do it in the open."

Goodwin pointed out the reason Chumash Auditorium would be an ideal place for the Vineyard to meet is the large number of Cal Poly students who attend the church. Approximately 1,300 people attend the Vineyard regularly, of which at least half are Cal Poly students, said Daniels.

Currently, the Vineyard is meeting in the San Luis Obispo Assembly of God church building on Sunday afternoons after that church meets. In the past, the Vineyard has met in Madonna Theater, Oddfellows Hall, and San Luis Junior High School. The church began as a home Bible study four years ago.

Chumash Auditorium is rarely used early Sunday mornings during the time the Vineyard would hold two services there, said Ken Raasch, ASI executive liaison. Raasch attends the Vineyard and has charted the channels through which the Vineyard's pastors would have to go before the church could meet on campus regularly. He pointed out to the pastors the rule in the Campus Administrative Manual which says a group must be officially recognized by the campus administration before it can meet regularly in a campus facility.

Raasch has given the Vineyard pastors all the necessary papers to complete which would start the process leading to the possible recognition of the Vineyard as a campus organization. The chain of events would follow the normal steps any group would take to become a recognized campus club or organization.

Paid Advertisement

March 10, 1982

## MINOR SPORTS OVERVIEW

### MINOR SPORTS OVERVIEW

This issue of ASI Times is featuring the minor sports problem. There has been some concern among the officers and senators that the current presentation to the students has not touched on all aspects of the issue. It is more complex than has been shown. There are three ideas we would like to convey.

1. That there is a wide range of opinions within ASI on this subject.
2. A clear understanding of the IRA/ASI relationship.
3. That ASI has not dropped the problem, but is currently working on it.

## IRA—HOW DOES ASI FIT?

The issue on minor sports and their future at Cal Poly has raised questions about the relationship between ASI and the IRA (Instructionally Related Activities Fund.) The IRA is supported by a ten dollar student fee separate from the ASI fee, and in order to be funded by IRA, an activity must be associated with a class offering at Cal Poly and approved through the Chancellor's office.

### WHAT PROGRAMS DOES IRA FUND?

The following programs currently received IRA support:  
Ag Judging (Dairy Cattle, Dairy Products, Livestock, Flower, Soil, and Poultry Judging.)  
Music (Marching, Symphonic, and Jazz Bands, plus Choral Groups.)  
Debate/Readers Theatre  
Art Exhibits  
Drama  
KCPR  
Mustang Daily  
Dance Orchestras  
Model UN  
Athletics (NCAA Sports)

### WHY WAS IRA CREATED?

The IRA fee was established about five years ago to take over the instructionally related areas of ASI funding. At that time the student programs were expanding (with athletics at the top of the list), creating a scramble for ASI funds. Since there was a state mandated ceiling on the fees, the ASI had no feasible way of raising the extra dollars the student groups requested. To overcome the problems associated with discontinuity which may occur when the student funds are faced with (1) inflation, and (2) an increasing number of competing uses for the limited funds, the state passed AB 3116. This bill removed the responsibility of maintaining and funding activities of an academic nature and established a separate fee structure.

### WHO OVERSEES THE IRA FUNDS?

To oversee the IRA Budget, a board was created of a cross-section of University personnel, in following:  
Voting Members: ASI President, Chair of IRA, Student-at-Large, ASI Senator, ASI Finance Chair, Dean of Students, Director of Business Affairs for the University, University Academic Affairs Representative, Faculty Representative.  
Non Voting Members: Director of ASI Business Affairs, Academic Senate Budget Chair.

### WHERE DOES ASI FIT INTO THE FUNDING OF IRA GROUPS?

Executive Order No. 290, (March 28, 1978), clarifies ASI's role. "The Associated Students will no longer be expected to provide support for the Instructionally related Activities on a regular basis. It is understood, however, that the Associated Students may, at their discretion, support individual instructionally related projects."

The ASI has no financial obligation to the IRA, however, in recent years it has given from 0 to \$57,000 as a contribution to the IRA from its own fee revenues. Last year's contribution of \$57,000 included \$8,000 earmarked for the support of minor sports. Two years ago, part of the ASI's contribution (\$14,000) was used to save the minor sports.

### WHAT DOES ALL THIS MEAN?

The bottom line is that IRA is independent from ASI, and that ASI doesn't have to give any money to these programs, but has done so in the past only to insure continued success of these student activities.

## ASI ELECTIONS: COMING UP

As Spring Quarter approaches, so does our yearly ASI Elections which will be held on May 5. The Cal Poly students will be given the chance to cast their votes for the ASI President, Vice-President, and the Senators which will be representing them for the 82-83 school year. Through ASI Elections, students will also be able to take part in the general revenue sharing. This will enable you to allocate one dollar of your ASI fee to any club on campus.

Two new features of the ASI Elections will be the voting referendums (if any exist at that time), and a Student Relations Board poll. These will be made possible by the use of scantron ballots which will greatly simplify the voting process.

If you are interested in running for an ASI office, please pick up an application and campaign rules between April 8-20 in the Activities Planning Center which is located in the University Union.

## PERSPECTIVES ON MINOR SPORTS

### PERSPECTIVES ON MINOR SPORTS

Trying to make sense out of minor sports is a task in and of itself. The amount of information and details serve to only complicate the issue. This is evident in the confusion and the difficulties Senate is having coming to a reasonable decision. It isn't as simple as allocating another large sum of money to these programs. There is no obvious answer.

This issue of the times is not trying to defend Senate or defend students, but to try and facilitate an understanding between the two. The following three sections are intended to show three different opinions or perspectives on the issue of minor sports.

### LACK OF COMMUNICATION

The first and foremost problem is the lack of student input on administrative decisions that clearly affect students and their programs. Examples include Z Lab, Disaster Plan, and most talked about Minor Sports. Even after all these years, the university administration and Associated Students have not established a foundation of shared university governance. There is still no clear process that exists for continuous communication, and the administration is no more to blame for this situation than the students. Communication is a two-way street.

This lack of communication follows in decisions made concerning the Intercollegiate Athletic programs. In the original look at the sports programs, adequate student input was not sought as a basis for the decision to cut the sports program. The Athletic Department does not really know what students want. Therefore, the decisions end up being based on other conditions such as financial costs, facility problems, and administrative problems.

Although these all play a major role in managing an athletic program, the particular priorities within the total program suffer from lack of student input. In the case of minor sports, the easiest answer is to cut them, freeing funds, facilities and getting rid of administrative hassles. Minor sports ends up as a low priority on the list. But is that the same priority the students have? Is the "athletic interest" the "student interest?"

Despite claims otherwise, some don't think that ASI contributing another \$20,000 (on top of the \$57,000 we gave last year to IRA) will clear up the problem as there is a distinct attitude on this campus of "make the decision, then ask for input." That problem cannot be solved with money and it cannot be dealt with by extending the situation for another year.

What must take place is that the students—government and constituents—become actively involved on a continuing basis in this university. Students have to become aware of what is happening in and out of the meetings. If the university is not going to involve, or at least inform students, in a timely fashion of the problems at hand, then it is up to the students to keep an "ear to the ground." Moreover, the students should not accept every single decision lying down. In the case of minor sports, everyone should keep in mind that these are student programs and, although ASI has no obligation to fund them, we do so only because we want to see them continue. However, the last minute bandaid approach to the minor sports problem won't cut it anymore—not in the long run and not in the short run.

There must be some meeting of the minds on when and how student input is going to be used before ASI starts doling out the cash.

If we can get past the problems of communication then we are well on our way to making the funding of student programs a well thought out, cooperative effort.

### LACK OF FUNDING

The problem is clear—lack of funding. Instructionally Related Activities lacks the proper dollars to maintain the programs at their present level.

Two situations are occurring to cause this problem. First, IRA revenues are at a stable level. The IRA Fee has a maximum ceiling of \$10 imposed on it, causing the total dollars from that source to be constant. The other sources that are used include State, ASI, and gate receipts funds. The availability of state funds and gate receipts is slowly declining. ASI is depended on more and more to pick up the slack.

The second problem is the rise in expenditures. Most of the program—or at least those with the most dollars—have extensive travel budgets. The nature of the program dictates that they travel to other parts to compete.

The situation stands at constant revenues vs. increasing expenses. Somewhere along the line alternatives must be studied to ease the problem. One alternative is to increase the IRA Fee. Other possible solutions include, but are not limited to, ASI subsidizing larger portions of IRA, hiring a person to handle fund-raising for athletics (currently in the works), and cutting programs to fit the budget.

### BROAD BASED vs BIG TIME SPORTS

The problem of minor sports stems from the lack of a clear philosophy to what type of Intercollegiate programs Cal Poly wants, or rather, Broad Based vs. Big Time. A broad-based sports program would be the status quo. That is, a wide range of intercollegiate sports. Big time sports would mean sizing down the program to a more manageable level and concentrate efforts and funds on "Big Time Football, Big Time Basketball, or Big Time Women's Volleyball, among others.

Although the Athletic Department has hashed around these two ideas, no clear concise plan has been made to decide where the programs are going. Without a plan, the budgeting process becomes lost and the programs end up nowhere. This is where we are now.

It is possible that the Athletic Department has already made the decision, by virtue of the proposal, to cut some of the sports. The move, by this action, would be toward "Big Time Sports" over broad based. The students, on the other hand, have in the past years continually given money to support these programs. This action would indicate the desire for a broad based intercollegiate sports program.

Exactly what kind of athletic program should Cal Poly have? Where do students fit in making that decision?

### CONCLUSION

These three perspectives are not the only being voiced in the ASI. There is also the idea that we should fund these programs no matter what, and that we are committed to them. Another is that intercollegiate athletics should be funded by the state and students have no business being involved in this area. Whatever the opinion, again stressing opinion, the problem of minor sports is not simple.

## MINOR SPORTS TASK FORCE

Funding Intercollegiate Athletics, or more specifically, who should shoulder the responsibility of funding Intercollegiate Athletics, has become a major problem during the past year.

Members of ASI have been asked to make a decision, yet have not been able to get an entirely clear picture of the situation due to large amounts of discussion during Senate meetings. To alleviate the problems of the senators, Michael Carr, Chair of Senate, proposed that four task forces be formed to conduct some investigation on four questions dealing with the responsibility of funding.

Instructionally Related Activities (IRA) is a committee that was formed for the primary purpose of funding Intercollegiate Athletics. Now the question has come up as to whether or not ASI should contribute to Intercollegiate sports either directly, through IRA, or not at all.

The first question asks if ASI should contribute to the Athletic program above annual IRA contributions. The force of six will look into past fundings and their amounts; whether or not ASI has control over the direction of these contributions and if not, who does; what the justification of the contributions is and where, specifically, the money has gone and whether it has helped or not. The senators will use these facts to answer their question.

The second question asks whether or not ASI should make annual IRA contributions. This task force will delve into the history of IRA and any past ASI contributions. They will also investigate how "instructionally related" the IRA activities are and the possible ramifications if ASI does not contribute.

The third task force will try to decide on which level ASI should fund/contribute to either the IRA or the athletics, and who should do the deciding: ASI, Administration or the Athletic Department.

The fourth and final group will try to come up with some alternative to aid in their decisions.

These committees were formed by interested senators in order that they may get a clear, precise picture of the entire situation. This involvement will allow them to really feel the magnitude of the problem without being confused by the many angles discussed and argued at Senate Meetings.

With the task forces formed, a larger amount of research can take place in the short amount of time given. By the beginning of Spring Quarter, the entire group of Senators should be able to make a logical, educated decision of the problem of funding intercollegiate athletics. A special session of senate will be called within the first two weeks of Spring Quarter to discuss the results of the task force.

Mustang first baseman Kirk Perry tags out Dominguez Hills base runner Derrick Foley in a pick off play in Poly's 3-2 win Sunday. The Mustangs are now ranked 13th in the nation

## Poly 9 climb to top of CCAA

For a young, supposedly rebuilding ball club, coach Berdy Harr's Mustang baseball squad is fast making a name for itself.

After two weekends of California Collegiate Athletic Association play, the Mustangs are tied for first in the conference with UC Riverside — both sporting 4-2 marks — and ranked 13th in NCAA Division II polls.

Cal State Dominguez Hills became the latest believer as Cal Poly took two out of three from the Torros during the weekend. It was the second conference series win for the Mustangs, who won two out of three at UC Riverside last week to open conference play.

The Mustangs opened their three-game homestand with the Torros by winning the first game of a double-header on Saturday, 9-6.

Poly hurler Joe Fiamengo picked up the win with a nine-inning performance, his second straight, to raise his season record to 2-3.

Fiamengo was given all the support he would need in a seven-run third inning which featured three consecutive doubles.

Torro pitcher Ernie Villaloboz got into trouble early in the inning by walking Jason Maas, Monty Waltz and Larry Pott to load the bases. But it was only the beginning of the end for Villaloboz as Mustang right-fielder Steve Neel brought home two runs with a single and was followed by three run-scoring doubles by Bryon Darling, John Silacci and Kent Bachman.

Sloppy defensive play proved to be fatal for the Mustangs in Saturday's seven-inning nightcap. Dominguez Hills capitalized on two Poly first inning errors to take a four run lead — a lead the Mustangs could not overcome as the Torros won 7-2.

Poly starter Greg Gilbert (2-2) was saddled with the loss while pitching all seven innings and giving up five earned runs on 11 hits.

The Mustangs pulled off the decisive third game on Sunday when Darling scored from third on a Torro error in the eighth inning to break a 2-2 tie and give Poly a 3-2 victory.

Darling scored all three runs for the Mustangs, as the center fielder had a perfect day at the plate, walking three times and hitting a double in four appearances.

Poly's starting pitcher Steve Compagno regained his early season form with a complete game victory — his second of the season against only one loss. However, Compagno needed the help of some sparkling defensive play by third baseman Silacci to end a shaky ninth inning.

Please see page 11

## Gymnasts lose last home meet

The Mustang gymnasts finished their regular season competition last weekend trailing Cal State Northridge (136.85) and UC Santa Barbara (118.30) in their last home meet of the season. Poly tallied 113.85 points.

Coach Andy Proctor's team went 3-18 for the 1981-82 season.

## Netters best in league

The Cal Poly men's tennis team added two more California Collegiate Athletic Association wins to their record over the weekend, leaving them a perfect 4-0 mark in league play.

The Mustangs edged out Cal State Northridge at home on Friday by the score of 5-4 despite failing to play up to their potential, Poly coach Hugh Bream said.

"The match should have never been that close," he said.

On Saturday the Mustangs were playing up to par, routing the visiting Chapman Panthers, 7-2.

Andrew Weber, Poly's No. 4 singles player, and Tom Steingraber, the No. 6 man; both won their two singles matches to remain undefeated in CCAA play.

In doubles play, the No. 1 team of Martin Dydel and Jon Magin and the No. 2 team of Weber and Tom Morris also remained undefeated in league competition.

Magin won his match at the No. 3 singles spot against Northridge, but was defeated when he moved up to the No. 2 position against Chapman. Dydel, Poly's No. 1 player, lost both of his singles matches over the weekend.

Bream pointed out, however, that the Mustangs' freshman No. 2 singles player Brian Bass and the No. 5 man Mike Masciorini "bounced right back from losses to Northridge to pick up wins against Chapman."

The Mustang netters will host Sonoma State on Thursday in a non-conference match and will travel south on Friday for a CCAA showdown with Cal State Los Angeles.

Poly now sports a 6-4 overall season mark, but has yet to lose to Division II competition.

## Batters host Westmont today

From page 10

Leading Poly's hit parade on the season is Waltz with a .352 average followed by Kirk Perry at .327 and Pott at .315.

The Mustangs will host Westmont College in a double-header today, beginning at noon at San Luis Stadium. Poly will then resume CCAA action this weekend with a three-game series at Chapman College.

Poly's No. 5 singles player, Mary Patridge readies for a volley in her shutout over the Torros' Donna Stocker.

## Poly women blank Torros, lose shutout

The Cal Poly women's tennis team was involved in a couple of shutouts over the weekend.

Unfortunately for the women netters, however, after blanking conference opponent Cal State Dominguez Hill (9-0) on Friday it was the Mustangs' turn to be humiliated.

Cal State Northridge, a strong contender along with Bakersfield for the California Collegiate Athletic Association title, handed the Mustangs their third conference defeat of the season Saturday, winning all nine matches in the contest.

"Overall the team played super tennis this past weekend," Poly coach Orion Yeast said. "The match against Dominguez Hills was a fairly easy win. The better matches were played by Mary Patridge and Colleen Mohan."

Both Patridge and Mohan, Poly's No. 5 and No. 6 singles players, totally shut out their opponents in straight sets, 6-0, 6-0.

So complete was Poly's domination over the Torros that No. 3 singles player Tracy Goddard was the only Mustang to take three sets to dispose of her opponent. Goddard defeated Dori Gipson, 3-6, 6-2, 6-3.

"However, Jen Stechman had to play top tennis to beat their No. 1 player," said Yeast.

Stechman had an easy time of it in the first game, beating Janice Mersing 6-2, but struggled in the second game to win, 7-5, and take the set.

It was a whole different story when Poly met Northridge as the Matadors won all but one match in straight sets.

Lori Becker, playing in the No. 6 singles spot, was the lone Mustang holdout of the day, winning the second set of her match with Debbie Creath before losing 6-4, 4-6, 6-1.

The only other Mustang to give her opponent any kind of a struggle was Stechman. The Mustangs' No. 1 singles player played aggressive serve and volley tennis before bowing out, 6-4, 6-2.

The Mustangs are now 2-3 in conference play, both wins came against Dominguez Hills — and will host UC Riverside today at 2 p.m. on the Poly courts.

## Battle continues

While the moguls on Capitol Hill have seen it fit to laud the numerous outstanding contributions made by women in building this nation by declaring this National Women's History Week, Congress and the Reagan administration have made every effort to dismantle the foundation they are standing on.

National Women's History Week is designed to underscore the struggle women have made to gain basic rights such as the vote. But while National Women's Week focuses on the gains, accomplishments and successes of American women in the past, it also serves as a reminder that the struggle is not over.

Women are still fighting to gain basic rights such as guaranteed equal treatment in the job market. A main part of this fight involves the passage of the Equal Rights Amendment. The message of the amendment seems clear: The rights of an individual should not be abridged on the basis of sex. But this basic message has been garbled by many conservatives who equate equal rights with the destruction of the family unit. Such misguided thinking will probably defeat the ERA and keep women from attaining equal status with men.

The need for ERA becomes readily apparent when one peeks behind the doors of Congress. For example, Congress is currently considering a bill which would require doctors to inform parents whose children inquire about birth control. This legislation not only imposes an unfair restriction on the private lives of teen-agers, it is also blatantly discriminatory. Such a law would apply only to women; men need only stroll over to the nearest drugstore to purchase birth control devices.

The Reagan administration has long toyed with the idea of removing the "burden" of affirmative action programs from big business. Reagan is listening to the mournful wailing of business which claims affirmative action programs are merely reverse discrimination and produce nothing but extra paperwork. Reagan has failed to respond to the pleas of those who realize that the elimination of affirmative action will weaken future work advances for women.

Finally, Reagan, by using a recession to break the grips of inflation, is pursuing an economic policy which discriminates against the woman worker. Because affirmative action is a relatively recent phenomenon, women are often the newest employees on the job. When recession hits and companies begin to lose money, these women are often the first to go. This is reflected in the February unemployment figures which revealed that adult women accounted for most of the increases in February unemployment.

This being National Women's History Week, it is natural to look back at the battles women fought to attain their current status in society. But it is also a time to look forward and reflect upon the battles which have yet to be won.

### The Last Word:

## Self-destruction

Day faded into the last minutes of twilight, as the sun's blush retreated over the eastern hills. The dark silhouettes of trees seemed to stand guard. The birth of lights across the valley tried to deny nature this beautiful evening. A speaker on a pole stood its own kind of guard, its gaping mouth waiting to herald the end of it all.

Looking almost any direction, one could see the earth girdled and stifled by concrete, asphalt, and buildings whose dark squatting shapes seemed to say "We are the rulers here."

Man's inhumanity to man is matched only by his stupidity in dealing with his fragile home. He is like some demented child, tearing up good healthy land to leave it a broken and useless thing. But as a child should not, man cannot eventually avoid punishment for his wrongdoing.

One day he'll find all the broken gifts have come back to haunt him, turning him into a sick and broken being scratching for food or vomiting his life away in the aftermath of a war game.

There are a few who see the truth of this, but will they be heard in time? Even now our ancestors would never recognize or feel at home in the environs

we have created, though they are the very ones who set the path.

But what is the authority of bureaucracies and governments, after all, compared to the wisdom and balance that existed between man and earth once upon a time? No bureaucracy can prevent the laws of nature from taking their logical, and for a blind mankind, disastrous course. We need to learn from the earth, how to balance our efforts at progress with the ultimate and inevitable effect any action engenders.

Modern science, which is only learning from nature, has known that "every cause has its effect" for some time. But until leaders, those who have served to break the earth, understand the cyclical nature of our world, or until the few ones knowing it can become a world movement, our present path — of stockpiling nuclear weapons, building nuclear threats in our own backyard, demanding too much, too fast from the earth, only to return it in a poisoned state — can only lead to eventual and sure destruction of ourselves.

Author Debra Kaye is a senior journalism major and Mustang Daily staff writer.

## Letters

### Service is no joke

Editor:

How could you print such a poorly conceived comic (Poly Wally, March 3)? The ASI Escort Service, manned by the many fraternity men of the Interfraternity Council, is a very worthwhile and important service offered to the students of Cal Poly. The ASI decided to offer the students a very needed service. The Interfraternity Council was asked, and has provided, the manpower

to perform this service.

San Luis Obispo County has a very high rape occurrence rate. The Escort Service offers protection against this and other attacks. The service is well received, very utilized and completely volunteer. Why don't you give credit where it is due instead of portraying a valuable service as a joke.

Douglas Morrissey  
Interfraternity Council Vice President
