Crime, Brown top Republican hit list

BY MAURA THURMAN

Staff Writer

Candidates for state and local office emphasized concern about crime and their dislike for Governor Edmund G. Brown Jr. in a Thursday evening forum before more than 100 county Republicans.

Gubernatorial candidate George Deukmejian was the first, and obviously favorite, speaker at the event, which was organized by the Central Division of the California Republican Women Federated.

"I assure you I am not going to appoint any Rose Birds."

Gubernatorial candidate
George Deukmejian

Representatives also spoke for Lt. Gov. Mike Curb, another candidate for governor, Assemblywoman Carol Hallett, candidate for Lt. Gov., and several U.S. Senate candidates.

Deukmejian, who was welcomed with a standing ovation from local candidates and some audience members, stressed his experience as a state senator and currently as Attorney General.

He claimed crime and law enforcement are his primary concerns, and pledged to appoint judges who will "protect the rights of victims" and enforce the death penalty.

No to Rose

"I assure you I am not going to appoint any Rose Birds," he said to a round of applause.

Deukmejian claimed he has increased productivity among Justice Department employees, and promised to bring efficient management to all state agencies.

"I want to restore quality government and a commonsense Republican administration to Sacramento," he said, a theme that was echoed throughout the evening.

Deukmejian said in a question-and-answer period that he supports an identification card system and a guest worker program as "solutions to the illegal alien problem." He reiterated support for "the intent and validity" of Proposition 13 and for completion of the Peripheral Canal.

Rex Hime, who spoke for Mike Curb, claimed leadership is the most important issue in the race for the state's highest office.

Hime said Curb demonstrated leadership in several actions taken during his 200 days as acting governor, including a judicial appointment which Brown later rescinded.

Hime also stressed Curb's support for the initiative which would recall Brown-appointed Chief Justice Rose Bird.

"We have to get rid of her now," Hime said, "if we're going to sweep the state of every vestige of the eight lousy years Brown has been governor."

Private experience

Hime also cited Curb's experience in private business as evidence of his ability to provide efficient management which would "make the state great again."

Arroyo Grande resident John Niven spoke for Rep. Paul N. "Pete" McCloskey, a candidate for the U.S. Senate nomination.

Niven cited McCloskey's 14 years of experience in the legislature as a quality that makes him "especially electable." He claimed McCloskey has the support of industrial and agricultural leaders and read a letter of support written by San Luis Obispo County Supervisor Steve MacElvaine.

Brian Reynolds of the Cal Poly Young Republicans delivered a speech on behalf of San Diego Mayor Pete Wilson, who also seeks the Republican nomination to the U.S. Senate.

Wilson wants to send Brown to "a retirement the state richly deserves," Reynolds said.

Mustang Daily—Vern Ahrendes

Attorney General George Deukmejian, candidate for governor, stressed the need of appointing law-and-order judges.

ASI Senate fails to override Hawk's veto

BY PETER HASS

Staff Writer

ASI President Dennis Hawk's veto of last week's changes in the ASI budget was upheld by the Student Senate at their Wednesday night meeting.

Hawk's veto concerned only the four revisions made by the Senate before they passed the record high \$1,219,647 budget last week. Hawk recommended his own revisions which were accepted

through a motion by School of Engineering and Technology Senator Bill Doyle.

The veto was served because, as Hawk stated in his memorandum to the senators: though "I approve of some of the Student Senate changes to the budget... (I) feel that a different source of funds should be considered."

Hawk's recommended changes reduced ASI's contribution to the In-

structionally Related Activities fund by \$2,443. To maintain the same IRA donation, the Senate passed Chair Michael Carr's motion to add \$2,443 to the additional IRA contribution that will be taken from prior year savings, making that total \$17,837.

The senate-approved revisions give an additional \$1,170 to the ASI Fine Arts Committee from the \$31,163 ASI contribution to the IRA fund for a total

subsidy of \$6,275. The Senate originally moved \$680 from an addendum item in the budget that will raise membership dues paid to the California State Student Association from 30 to 35 cents per student and eliminated a student officers' public relations fund of \$500. The \$500 fund helps to improve school relations with the city, said Hawk.

Mustang Daily—Alan Kennedy

ASI President Dennis Hawk

Frustration and success mark year for Hawk

BY JEANETTE VAN BERKEL

Staff Writer

On June 15, Dennis Hawk will pack his books and clean out his desk and leave behind a year that has been both frustrating and successful.

He will leave the office he has come to each day as ASI president, a place that will "seem strange to leave."

Looking back on his year, Hawk put his feet up on a table and sighed. "It's been an exciting year from the state and national scene," he said, "but it was also depressing with the problems of inflation, the 2-percent cut by the state and the financial aid problems..."

Hawk admitted that many roadblocks prevented him from achieving all he set out to do a year ago.

"I spent a lot of time dealing with the issues of fees, and also with the financial aid problems," he said. "It did keep me from doing other things."

Not only was Dennis Hawk student president at Cal Poly, but he was also a

member of the California State Student's Association. As a result, he spent a great deal of time traveling and representing the CSSA. But Hawk said he didn't feel his work with the association was a major setback this year. "Sure, it took a lot of time," he said, reflecting. "But, it needed to be done... I think it was a crucial year for this."

The working relationship with his executive staff, according to Hawk, was "very good," but the president was on the outs with his second man a great deal of the time.

He (Mike Carr), didn't present the type of leadership expected in the senate," said Hawk of the 1981-82 vice president. The senate, according to Hawk, was also an area of difficult working relationships.

"I don't think the Student Senate has really helped me out this year by finding out the real needs of the students," said Hawk.

The ASI president was also rueful

about the issue of minor sports, stating that it "really hurt my effectiveness," and kept him from accomplishing other matters.

Hawk did, however, come through on much of what he promised his voters last spring.

"I am satisfied with the work we did on the budget for this year, and I'm excited about the possibility of the new student union," he said. The satellite union Hawk proposed to be built opposite the Architecture building could have been "more successful, but the (union) board sat on the issue the whole year long," according to Hawk.

The automated tellers Hawk promised constituents will "hopefully become a reality by fall." In Hawk's 1981 campaign, he suggested teller banks to be an on-campus feature at Poly. Representatives from Wells Fargo and Bank of America will meet with Hawk this month to discuss further plans.

Argentina has 48 hours to settle

(AP) — Prime Minister Margaret Thatcher said Monday that Britain will give U.N. talks one more chance to settle the Falkland Islands conflict, but she reportedly warned Argentina it has 48 hours to make peace.

"We have gone as far as we can," she told Independent Radio News, clearly exasperated at what she called Argentina intransigence.

"They are the invader. They are the aggressor. We are the aggrieved. It is up to them."

Asked how long she would wait before abandoning efforts by U.N. Secretary General Perez de Cuellar, Mrs. Thatcher said: "My guess is that we shall know this week whether we are going to get a peaceful settlement or not."

Earlier, Britain's domestic news agency Press Association quoted military sources as saying Mrs. Thatcher told U.N. Ambassador Anthony Parsons to warn Argentine negotiators they must settle in 48 hours. Otherwise she would order troops aboard the Royal Navy war fleet to storm the South Atlantic islands.

Newsline

Reward offered for missing child

NEW YORK (AP)—The parents of Etan Patz, last seen three years ago on his way to first grade, say a \$25,000 reward is being offered for information leading to his return, or proving that he is dead.

"It might work. It probably won't. But it's so hard to sit back knowing there's something we haven't done," said Stan Patz, a commercial photographer.

The case has become a cause celebre across the country, with Patz and his wife, Julie granting hundreds of interviews, speaking before legislative and civic groups and distributing thousands of posters with the picture of the smiling, blond boy.

Republicans must save money

WASHINGTON (AP)—Senate Republican leaders told their colleagues Monday they have a "moral duty" to find \$40 billion in Social Security savings over the next three years, but conceded that they may lack the votes with an election only six months away.

"We are right on Social Security and the American people know it," Sen. Pete V. Domenici, R-N.M., chairman of the Senate Budget Committee declared as the Senate resumed debate on a 1983 budget plan that also includes \$95 billion in tax hikes through 1985 and a \$22 billion reduction in what President Reagan initially proposed for a military buildup.

But faced with at least eight Republicans and numerous Democrats opposed to the Social Security provision, Domenici conceded it "probably cannot pass the Senate."

He said the GOP leadership, seeking to avoid an embarrassing defeat, was hoping to work out a compromise that could enlist broad support from both parties.

Republican candidates tell views at election forum

From page 1

The governor "takes his farm policy from Cesar Chavez, his social policy from Tom Hayden and his foreign policy from Jane Fonda," Reynolds said, to laughter and applause.

Cal Poly Young Republicans President Brian Perry and other members were introduced

at the forum, and moderator Nanette Rigby described the club as "the most dynamic we've had in years."

Carol Hallett representative Leslie Ramsey said the state under Democratic leadership has become "a job-creation wasteland."

She claimed Hallett is running for Lieutenant Governor to "put an end to

liberal control" which is "working to dismantle the fabric of society."

Ramsey said Hallett provided legislative leadership which frustrated plans for bigger taxes and bigger spending, and would work to complete the Peripheral canal, reform inheritance tax and put redistricting into the hands of an independent committee.

A letter of support from Hallett was read by Eric Seastrand, a Salinas businessman who is running unopposed in the Republican race for Hallett's 29th district post.

He reiterated the claim that government "is the problem, not the solution" and said the legislature is unresponsive to the needs

of California citizens. Several candidates for supervisor also had a moment or two before the microphone.

District 2 candidates Bill Coy and Ken Day stressed their experience in county business and agriculture ventures. Cal Poly art history lecturer Jeanne LaBarbera, also a candidate for the North Coast district, stressed her support for "individual and independent property rights" and her concern for adequate law enforcement.

District 4 candidates Ruth Brackett and Mark Millis emphasized their concern for efficient and thrifty government. Brackett, a former poultry ranch owner who now runs a salvage yard in Nipomo, pledged to keep close watch on "our most treacherous enemies—laws which deprive us of life, liberty and property." Millis stressed his experience as an Arroyo Grande city councilman and mayor.

This unobtrusive American Telephone and Telegraph building houses an operation capable of withstanding a nuclear attack. It also extends three stories underground.

Mustang Daily - Evelyn True

Little building a big key to SLO communications

BY GAIL PELLERIN

Staff Writer

Travelers have driven by the structure many times without giving a second thought to its existence.

The reason is simple—the little piece of real estate off of Los Osos Valley Road doesn't look like more than a small building with one door.

However, under the inconspicuous little entrance lies an \$8.5 million American Telephone and Telegraph operation, capable of withstanding any natural or man-made catastrophe.

The structure extends about three stories underground, and is protected by concrete, steel, and an 8000-pound, 7-inch-thick steel "blast" door which guards the entrance, to insure the world will have communication at all times.

The 42,000 square-foot facility, owned and maintained by Long Lines, the Bell System unit responsible for long distance operations, houses terminal equipment for both the transcontinental cable to New York and for two of the three submarine cables connecting San Luis Obispo with Hawaii and the Pacific Basin countries.

In case of a nuclear fallout or bombardment, the subterranean operation is capable of functioning

with its own water and air supply and power resources.

Some of the typical office supplies at the facility are bedding and clothing, books and games, food, decontamination showers, closed circuit television cameras to see the countryside, and radiation monitoring devices.

The impression at the "Junction"—as it is called—for the 22 employees is a reality; each new workday could bring demanding technical and emotional challenges.

In the event of a disaster the employees must not only keep the machines going, but practice survival skills as well.

According to Jim Bourn, operation manager at AT&T Long Lines, "The facility can provide for the key people in the system for 21 days in case of an emergency," noting that it is not a public shelter.

He added that the only way the entire AT&T system can be destroyed is if the whole country is demolished. But then there would be no need for communication.

The Long Lines advanced operations and the knowledge of its technicians are aimed at only one goal—to insure that the people can communicate with each other even under the most threatening con-

ditions.

The plant, which was built in 1964, has submarine cables connected at Montana de Oro capable of carrying 845 simultaneous two-way conversations.

Some cables which travel the continent can carry as many as 135,000 calls at one time.

Bourn said that because longer distance phone calls travel in bulk utilizing less equipment, they are cheaper than shorter long distance calls. The shorter distance calls are kept in a lower band of frequency and use more equipment, which cause the rates to go up, he added.

"The United States has the most advanced communication system of any other country," Bourn said, "and at the least cost."

For those travelers who pass by the unassuming little entrance, a piece of advice: don't judge a book by its cover.

Oil glut hurts ethanol research

BY KATHLEEN HORIZON

Staff Writer

Even though many Cal Poly students are pleased by lower gas prices, the oil glut has hampered research of alternate energy sources.

According to a member of the Cal Poly Crop Science Department, the ethanol fuel project has lost support from both industry and government.

Howard Rhoads, adviser of the project, said that research is not moving as quickly as it was a year ago.

"The grant money we had last year has run out," he said, "and we have only been able to acquire a couple of smaller grants within the college and university structure."

Currently, the cost of producing alcohol fuel exceeds the cost of producing gasoline, Rhoads said.

Ethanol fuel can be produced for a minimum of \$1.25 a gallon, he said.

Rhoads became interested in the project as an agriculturist. If fuel runs out, the logical place to look for raw materials is in agriculture, he said.

The three-year-old project was commissioned to function for a period of 10 years, Rhoads said. He is trying to keep the plant going, but the interest is waning.

Local residents will be able to learn more about the project in an extension class that will probably be taught by Mark Merritt, a graduate student who has been involved with the project for a few years.

A solar addition to the existing plant will help to cut down on the cost of heating the mixture that is used to produce the fuel, said Rhoads. The project

has produced about 20 to 25 gallons of fuel during a series of trial runs, he said.

The national energy policy dictates where money is going to be spent for research, said Rhoads.

If you have an existing project that operates feasibly, then that project will get first chance at acquiring a federal grant, he said.

"The main goal of the project is education," said Rhoads. "If we can get the project to break even, that would be even better," he added.

River rafting trip

ASI Outings is going rafting down the American River and exploring historic sights this weekend leaving 5 p.m. Friday and returning 11:30 p.m. Sunday. Sign-ups begin Wednesday at 9 a.m. in the Escape Route. Cost is \$40.

C.D. Club meeting

The Child Development Club will meet at 7:30 tonight in Agriculture 216. This is the last meeting of the year, and there will be an ice cream social.

Senior Breakfast tickets

Tickets are now on sale for the Senior Breakfast in the U.U. Box Office. The breakfast is 8:30 a.m. on June 12 and tickets cost \$4.50.

Tri-Beta meeting

An ice cream social is scheduled for the last Tri-Beta (Biological Sciences Society) meeting of the year, to be held today at 11 a.m. in Science North 206. This is the last meeting of the year, and new officers will also be elected.

Raquetball Club meeting

The Raquetball Club will meet tonight at 6 in the Craft Center to make signs and banners for the upcoming tournament.

Spring Fever Run

The Civil Engineering club is sponsoring a 4.5 mile "Spring Fever Run" beginning at 9:30 a.m. at the Main Gym and ending at Cuesta Park. Entry is \$3, and there will be awards, prizes and beer provided by Schlitz at the finish.

Poly Notes

Dietetics Club meeting

The Dietetics Club will meet Thursday night at 7 in the Home Economics Living Room. The speaker will be Nancy Carlton, a consultant dietician.

Bicycle tour

The U.U. Travel Center is sponsoring a bicycle tour of the Napa Valley wineries over Spring Quarter Break. Included is a canoe trip down the Russian River. For more information, come to the U.U. Travel Center or call Shauna at 543-3088.

CPRS meeting

The California Parks and Recreation Society will meet Thursday at 11 a.m. in Science North 213. There will be a recreation administration curriculum forum and planning for the spring banquet.

Council elections

Positions are now open on the Communicative Arts and Humanities 1982-83 School Council. For more information, call Ashley Michaud at 544-6445.

Windsurfing lessons

Basic instruction in windsurfing is being offered through the Meadow Park Recreation Center, 2333 Meadow Street, San Luis Obispo. Eight hours of instruction, with all equipment provided, costs \$49.50. For more information on times, call 541-1000.

AIA meeting

The American Institute of Architects will meet at 7:30 tonight in Architecture 106. Officers for 1982-83 will be elected.

Intramural horseshoes

There will be a Cal Poly faculty horseshoe tournament on Sunday, May 23 in Santa Rosa Park starting at 10 a.m. Entries will be accepted in U.U. 104 until Thursday, May 20 at 6 p.m.

"Dance for Your Heart"

The American Heart Association is sponsoring a free jazzercise class on Wednesday at 8 p.m. in the Yosemite Hall lobby. There will also be information on nutrition and blood pressure available. Men and women are both welcome.

ASI Film

The film *Breaker Morant* will be presented Wednesday night at 7 and 9:30 in Chumash Auditorium. Cost is \$1.

Student liaison post

The California State Student Association is accepting applications for a full-time staff person to manage its Long Beach office. Interviews will be conducted in June at CSU Chico. For more information, contact Chris Hartley in U.U. 217A.

President blasts effectiveness of Student Senate

From page 1

Hawk claimed he was given an opportunity to focus in on "some real hopeful issues," in his year, and he was able to restore a good working relationship between members of the

ASI and administration. "We're all pretty much on a first-name basis now," said Hawk. "And, I've made certain that I keep in touch with President Baker at least once a week."

Hawk said he was not surprised by anything this year, as he knew the inner-workings of student government before he became president.

"But, I feel a lot stronger about the power the (ASI)

president has, as well as the senate," he said, adding that students in government can "really make a difference."

He cited an example of the effectiveness of student power. "We sent a

resolution to President Baker about the Disaster Preparedness Plan, and a committee has already been formed to study it," he said. The student senate was also involved in the selection of a new vice president for academic affairs.

Hawk shifted his feet to the floor and looked out the window of his office in the University Union.

"Sure, it obviously gets frustrating," he said of his job, "but, I really did enjoy the dynamics. Each day is different, that's for sure."

Hawk said he felt he has laid a good groundwork for his successor, Sandra Clary. "I hope that I can be available next year in any way possible," said Hawk, remembering the support Willie Huff had given him in his first few months as president. He added that he will "probably still be involved in ASI," next year. "I'll try to concentrate on some of the things that I've started and seen this year," he said.

But, in the following quarters, Hawk will be able to spend most of his time being a student. "I have to graduate one of these days," he said. For now, the junior business major has some plans for relaxation. "I need a vacation," he said.

The personal computer for people who take success personally.

OSBORNE 1

Coastal Computers is proud to announce the OSBORNE 1... the incredible little computer that's changing the way students & educators work! No longer is it necessary to have a desktop cluttered with messy gadgets: the Z-80 mainframe, dual floppy drives, display monitor, and keyboard are all contained in one neat little package including 64K of useable RAM, an IEEE parallel I/O port, RS232 serial I/O port, external video monitor port, modem port, and battery connector. And... the computer is housed in a truly portable, weatherproof case that can literally be folded up and carried away in less than a minute.

But the most powerful feature of the Osborne computer is not the machine itself - look what comes with it:

CPM	including system & utilities
CBASIC	BASIC compiler
MBASIC	Microsoft BASIC Interpreter
WORDSTAR	word processing/text editing
MAILMERGE	mailing list manager
SUPERCALC	financial & scientific forecasting

Six of the computer industry's most powerful and respected software products come standard as part of the complete Osborn package. The price: \$1795!

Mustang trackmen a mile short

1,600 relay drops men to third; women embarrass league

BY ANDY BERGHER

Sports Editor

Poly track coach Tom Henderson was lugging a box full of trophies to his team after the California Collegiate Athletic Association championships Saturday, but he no doubt wished that the box was just a tad bit heavier.

In an unimaginably competitive meet, where four teams had legitimate chances of winning the conference title going into the final event of the two-day contest, the Mustangs finished third behind Cal State Bakersfield and Cal State Northridge. Bakersfield scored 125 points, Northridge tallied 124, Poly had 123, and Cal State Los Angeles was fourth with 121.

As expected, the Mustangs women's team devastated the rest of the conference, rolling over the competition with 279 points. Bakersfield was a distant second with 101 points.

Entering the 1,600 relay, Northridge's men's team apparently had the meet wrapped up. The Matadors had 122 points, while the other three had 115. All they had to do was finish in the top four out of five teams in the relay to clinch the meet. If they finished last, then the winner of the race was the conference titlist. And that's exactly what happened.

After the first 400, Northridge was fifth, and Poly's Brad Underwood was a close second to Bakersfield's Erwin Hickman. With the infield cleared and all of the

Demetrius Cook of Cal Poly Pomona hits the finish line in first place to win his second consecutive conference title in the 400. Bakersfield's Jeff Garrett (right) placed second, and Mustang Pat Croft (left) was third.

athletes and fans yelling their hearts out, two races came into focus. The first was between Bakersfield and Poly for first place; and the second was between Northridge and Cal Poly Pomona for last.

Mustang Rick Richard blasted a good 300 to catch Bakersfield's Roosevelt Frierson, but tightened up during the last 100 to hand the baton off in second place. Shon Bowles narrowed the Roadrunners' lead for the first 200, but died and fell to 10 meters

behind Bakersfield when he handed off to Pat Croft. Croft couldn't catch Bakersfield's Jeff Garrett, who blasted a 46.6 anchor leg, and the CCAA had a new men's champion for the first time in five years.

But to many, including Henderson, the meet was decided some three hours earlier, when pole vaulter Steve Thomas no-heighted. Thomas, who was the conference's leading vaulter with a season best of 16-6, opened at 15-6 and missed all three tries.

"He cracked," said Henderson. "His attempts were non-jumps. His run went to pieces, and he was sitting on the runway instead of getting a good takeoff. He had no control on the runway, and he suffered for it."

Since the winning jump was technically 15-6, a successful jump by Thomas

would have given the Mustangs eight second-place points. Mark Kibort, who was declared the winner after clearing 15-6, went on the jump 16-6 for the win.

Aside from the loss of eight precious points in the vault, Poly lost other points in the short relay, which missed first place by

.03 seconds; Croft, who went out in 21 seconds in 400 but faded to third behind Pomona's Demetrius Cook and Garrett; and in Joe Green's seventh-place finish in the 5,000.

Green's finish might not sound too disastrous, but the 5,000 is the last race before the 1,600 relay and the sixth-place runner wore a Northridge jersey. Although the sixth-place finisher only gets one point and seventh place none, take that one point away from Northridge and add it to Poly's score and you have a different outcome.

While the first five scorers in the race were decided, Green and Northridge's Syd Leibovitch battled for 12 1/2 laps in the Pomona night. Green chased down Leibovitch from the start and caught him after 1 1/2 miles, and the two ran together for a mile. Green made two charges for sixth in the last three laps and both runners were flying down the homestretch at the end of the race. Leibovitch was timed in 14:46.66, and Green finished in a gusty 14:48.85.

Said Henderson, "The 5,000 was a super race. The race for sixth was the highlight of the day. To me, that was a display of digging way down, having to kick for that one point. Joe was tough. He was very impressive."

Women win league track championship

From page 5

The Mustangs had three conference champions, including two repeaters from 1981. Vernon Sallaz ran two strong races in the trials and finals of the 800, and outran Riverside's Frank Assumma 1:51.60 to 1:52.38, leading all the way. On Friday, Sallaz ran a season best of 1:50.79 to win his heat.

Ron Waynes won the long jump Friday, jumping 24-11 1/4 to defeat teammate Terry Armitage, who came in third in the triple jump. Waynes also led off the short relay, finished fourth in the 100 with a lifetime best and national qualifying mark of 10.56, and took sixth in the triple jump. The other winner was Kibort, who won the 1982 title with a

16-1 effort.

Green took second in the 3,000 steeplechase in 9:20.9, and Ron Soyka cleared 6-8 to take fourth in the high jump. Underwood took fifth in the 110 high hurdles in 14.69 and second in the 400 intermediates in 52.19, and Doug Avrit took third in the 10,000 in 30:23.9.

"What a goddamn track meet that was!" said Henderson. "That was an unbelievable finish to the meet. I was impressed by the whole team. I thought we competed really well. We had few bad performances, and Bakersfield competed over their heads."

For the women, it was just another day at the races. The Mustangs humiliated their opponents by winning 15 of the 17 events and getting more than 60 percent of the total scoring.

Although there were legions of outstanding performances by Poly individuals, none compare too favorably with the feats of Esther Scherzinger. The slim senior started Friday with season bests of 5-6 1/2 in the high jump and 2:11.08 in the 800. By Saturday night, she had sailed over 5-10 in the high jump and broke the second record in the 800 twice.

Scherzinger took third place in the jump, behind teammate Sue McNeal and Bakersfield's Phyllis Blunston, as she cleared 5-10 on her third try. Scherzinger has a best of 5-10 1/2 she did two years ago, and she narrowly missed at 6-0.

In the 800, she slipped under Maggie Keyes' two-year-old mark of 2:07.7 with a division I mark of 2:07.2, winning her race by six seconds. To prove this was no fluke, she ran a 2:07.83 in Saturday's finals, defeating teammate Eileen Kraemer by two seconds and leading a 1-2-3 Poly sweep.

Scherzinger couldn't explain her remarkable improvement in one week, but she thinks it had something to do with her mental attitude.

"I was very positive going into the second lap," she said. "Most runners have a mental block of how tired they feel. They say that once you break the 2:10 barrier, the race goes so easy. I guess I finally relaxed through the entire race."

The Mustangs overpowered everyone with finishes like first through third in the 800, 400, 1,500, and 100 high hurdles, first through fifth in the 3,000, and first and second in the discus and 400 intermediate hurdles.

Janet Yarbrough long-jumped a foot over her season best and six inches past her lifetime best as she won the event with a leap of 20-2 1/2, which qualifies her for the Div. I meet.

Amy Harper ran a lifetime best of 4:22.82 in breezing to a 22-second win in the 1,500, and Eloise Mallory ran a personal record of 55.16 in winning the 400, followed closely by Arlene VanWarmerdam and Liz Douglas. Karen Kraemer took fourth in the high jump, but the freshman qualified for the Div. II meet with a jump of 5-6 1/2.

Other winners included Danella Barnes in the javelin (156-9), Irene Crowley in the 5,000 (17:22.9), Kathy Kahn in the discus (133-5), Liz Carroll in the 100 high hurdles (14.9), Tamela Holland in the 100 (11.63), Chris Dubois in the 400 intermediate hurdles (62.46), Mallory in the 200 (24.88), and Eileen Kraemer in the 3,000 (9:37.43). Both relays also won.

Five mustangs competed in the prestigious UCLA-Pepsi Invitational Sunday, with impressive results. McNeal won the high jump at 6-1, and Karin Smith won the javelin with a heave of 199-2 on her fifth throw. Smith defeated Lynda Hughes of Oregon, who led for most of the competition with a best of 199-1. Barnes took fifth with a toss of 166.6.

Yarbrough placed fourth with a personal best of 13.73 in the 100 high hurdles, and Holland ran a lifetime best of 24.1 in the 200.

Arlene VanWarmerdam takes the baton from Janet Yarbrough and sprints for the tape in the conference championships Saturday. Cal State Bakersfield (inside lane) was second.

Mustang Daily—Andy Bergher

Hawk recommends budget revisions

From page 1

Worthwhile organization

Hawk wanted to maintain the increase in funding to CSSA because "It is a worthwhile organization that has helped students,"

he said, adding, "their funding is very tight right now."

As for the public relations fund, Hawk said it was used to pay for luncheons and other events that ASI officers attend, and this helps strengthen relations between the university and the city.

Another change offered by Hawk and accepted by the Senate was a \$1,078 allotment from the IRA contribution to the polo team for travel. Last week, the Senate gave the team \$1,506 from the ASI officers' grants-in-aid program, which pays the president, vice president and

controllers salaries. These will now remain at their

current rates of \$3,600, \$2,000 and \$1,000 per year respectively.

The chess team was given \$348 for travel to a national tournament, which will now come from the ASI officers' telephone budget (\$153) and from the IRA contribution (\$195). That \$195 had been taken from the grants-in-aid budget.

Hawk's veto also eliminated a \$123 contribution to the Interfraternity Council for the fraternities' volunteer work in the ASI Escort Service.

Bright spots many in spring football affair

BY MIKE MATHISON

Staff Writer

It is said a tie is like kissing your sister or taking mom to the prom.

Well, this tie is the exception to the rule. Sure, both teams wanted to win. But the biggest thing on the minds of all the players who suited up and played in Saturday night's Green vs. Gold intrasquad football game at Mustang Stadium was to impress the coaches.

After all, this was the culmination of the daily spring drills. It was full contact in game-like situations. It was the chance to prove oneself. And many players did.

After last week's draft of each Poly player to see who went on which team, head coach Jim Sanderson thought the teams were divided up about as even as they could be. And Saturday's 7-7 final proved why Sanderson is the man calling the shots.

Calling the shots is what Sanderson didn't do in this affair. He sat in the press box and observed the proceedings like a head coach in the pros and allowed his four assistants to do the sideline coaching honors.

Coaching the Green were the two assistants with the most experience—offensive coordinator Dave Grosz and defensive backfield coach John Crivello. Grosz, who was a finalist for the head coaching position, is entering his 16th year at Poly. Crivello is only three years behind him.

Headlining the Gold act was the youth—offensive line coach Vic Ecklund, who came over from the head job at Paso Robles High, and Chris Smeland, the defensive line coach. Smeland, like Ecklund, is a former Mustang football player. Smeland, a 1974 Poly

graduate, comes to the Mustangs after spending three years as the offensive line coach at the University of Nevada-Reno.

The teams were also split somewhat, although arbitrarily, into youth vs. experience. The Green had 26 players in gear with one or more years of Mustang football experience. Among those were 11 returning starters, and only four freshmen. The Gold had only 19 players with one or more years of experience, nine returning starters and 11 freshmen.

And that's exactly how the game started. The Green got the ball first, there were no kickoffs, and promptly marched 70 yards in nine plays to go ahead 7-0 just 5:04 into the affair. Junior College transfer Brian Gutierrez, a 6-foot, 200-pound running back, covered the final three yards for the score. On the night, Gutierrez rushed for 72 yards in 14 attempts.

"Seventy yards, no mistakes, and we took it into score," Grosz said, "that offensive drive pleased me. I was pleased with the running game of both teams. We have to be more consistent with our running game. Gutierrez was a bright spot. And Vernell (Brothers) was a little surprising."

Brothers was the workhorse for the Gold. He picked up 81 yards on 19 carries. Brothers is a 6-0, 205-pounder from Porterville Junior College, where he rushed for 1,400 yards.

"Brothers really looked good," Ecklund said. "He seemed to get stronger as the game went on. We had more opportunities to score than the Green did, but we converted only once. I thought we executed well considering we changed so many things. (sophomore

quarterback Clark) Sorenson was the surprise of the scrimmage."

After an interception by Mark Grosz of a Tracy Biller pass, Sorenson led the Gold in for their only score of the contest. On a fourth down situation, Sorenson rolled right and threw a strike to tight end Greg O'Connor, who caught it in the back right corner of the end zone. Sorenson finished the game hitting on four of his seven passes for 32 yards and the one score. O'Connor caught two of them for 11 yards.

"O'Connor surprised me," said coach Grosz. "He made a big play there on the goal line. He was also one of the Gold's key blockers. They were running the ball effectively and it was on his side." O'Connor is a 6-4, 215-pounder freshman from San Luis Obispo High. The touchdown came with :09 seconds left in the first half.

The second half was all defense. The Gold intercepted three Biller passes and recovered a fumble. The Green recovered a fumble. But that one fumble stopped the Gold four yards from the end zone late in the game.

"We weren't holding them off then," Crivello said, "we were holding our breath. It was a good game. It was a good way for us to evaluate our personnel at the end of spring practice. We are pleased with the defensive play of both teams. The secondary did a good job. We have eight good defensive backs for next year. Mike Stewart intercepted two passes and played well."

"Steve Booker (6-3, 210 senior linebacker) gave us a good game and good leadership," Smeland said. "I was pleased with everybody's attitude about the defense we played. The defense didn't have the flexibility to use our entire package. And at times that frustrates the defensive personnel because they feel they are handicapped. I thought Gene Underwood and Dale Barthel played well for the Green. I was pleased to see both defenses were fairly stingy giving up points."

Along with Gutierrez, Brothers, Sorenson and Booker, Grosz also named Tom Gilmartin (6-6, 250, senior defensive lineman), Paul Sverchek (6-4, 230, sophomore defensive lineman), and Jerry Schmidt (6-3, 230, senior linebacker) as having excellent games on the defensive side of the ball. On the offensive line, Grosz singled out Kirk Anderson (6-8, 230 freshman), Brian Moore (6-3, 240, sophomore center), and junior college transfer Chas Sanders (6-2, 240).

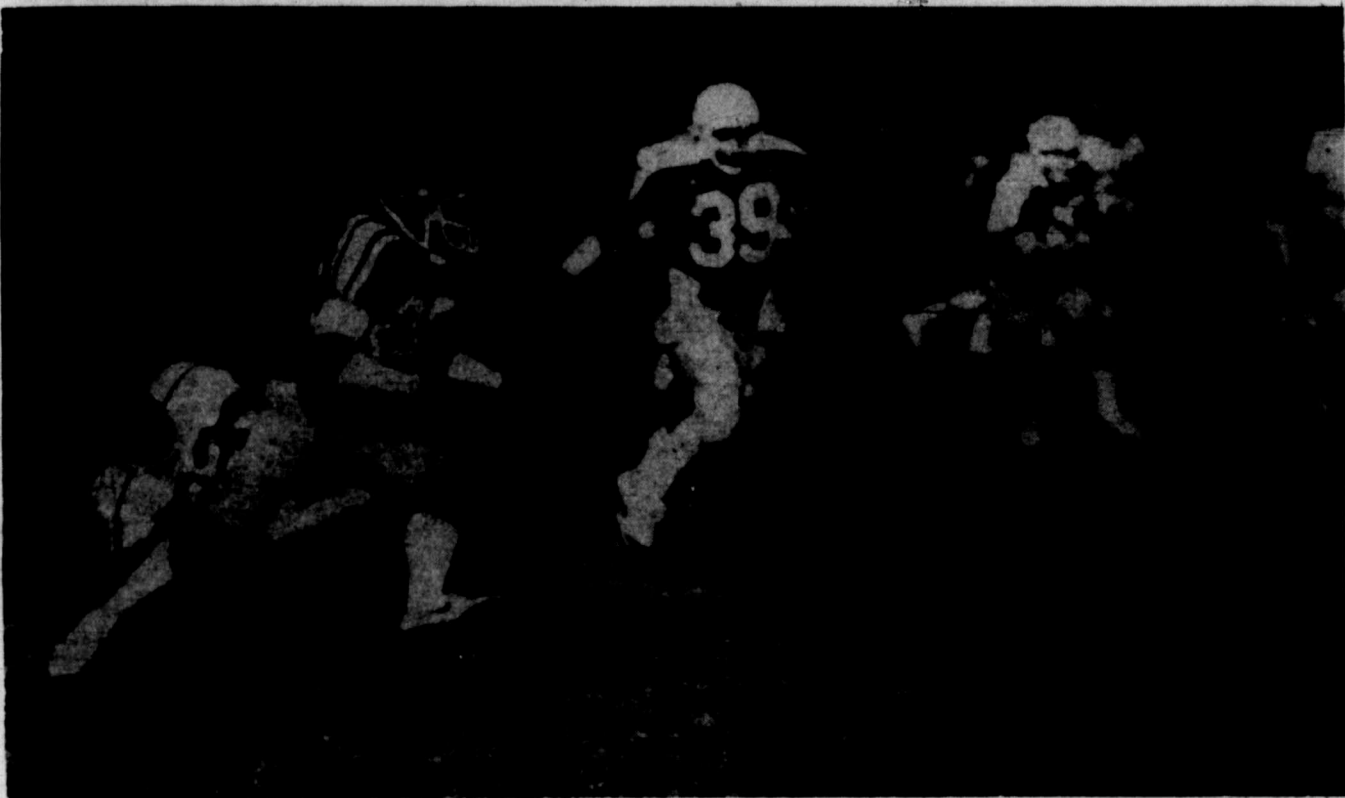

"I think we are going to have a good, strong defense," Grosz said. "On offense, I was disappointed we didn't throw the ball better than we did."

"There were some things we wanted to do with the passing game that we couldn't because Fresno St. (Poly's first opponent) was in the stands. We have to get the ball to our wide receivers because we have some good people there."

Namely 6-0, 175-pound senior Lloyd Nelson, senior Steve Mitchell, who was the same dimensions, 6-4, 195-pound senior Noel Ledermann, who caught two passes for 26 yards; and tight end Damone Johnson (6-4, 220, sophomore), who hauled in two Biller aerials for 31 yards.

"I thought the kids all performed pretty well," Grosz said. "The kids really enjoyed the competitiveness. It was healthy competition. And they got little deals going within themselves."

But the only problem with that is—how does one settle a bet that ends in a tie?

Mustang Daily - Vern Ahrendse

Green tailback Brian Gutierrez looks for a hole around right end as Gold linebacker Byron Campbell waits for him with open arms. Fullback Valentin Lango (39) looks on.

Opinion

Quarterly decision

Page 8

Mustang Daily Tuesday, May 18, 1982

Cal Poly's Long Range Planning Committee is helping President Warren Baker make a decision which will leave its imprint on students and faculty for years, if not decades, to come. The committee is helping to decide the fate of Cal Poly's academic system—if the campus should remain with the current quarter system or switch to a new approach, such as semester, trimester or a revised quarter system.

The final decision will be tough and the stakes are high. Fortunately, though, the committee has recognized this by appointing a task force to study the issue in proper detail. It will likely consist of one administrator, one faculty member and one student representative.

Such a specialized task force is the only way to give this issue the amount of attention it deserves, for there are literally hundreds of financial, educational and administrative questions to consider. The group will study the various academic systems in use around California and the nation, examining the many benefits and drawbacks of each.

The task force will likely complete its study sometime during Fall Quarter. They should then be able to present the ASI Senate with a well thought-out recommendation as to which academic system is best suited to Poly. The senate will in turn submit a recommendation to Baker, who will use it to make a final decision, as well as faculty input and a student referendum.

The Long Range Planning Committee made a wise decision in moving to set up an academic systems task force. The task force members will be able to devote far more time and energy to the issue than the committee itself could ever hope to. They will also help the Senate make the best possible recommendation to President Baker—whether to retain the present quarter system or convert to a new one.

Clarifying some points

Editor:

We, at the Children's Center, appreciate the story you did on our program in your April 28 issue.

I would, though, like to clarify some of the points made in the article as there was some confusion of past and present. It was stated that the program improvement over the past few years was due to the ASI and faculty wives, and this is somewhat inaccurate. The program was originally begun by some faculty wives and the ASI, but the program improvement is due to hard working staff, parents, university "friends" and help from the ASI.

Another point needing clarification is the center's relationship past and present, with the Child Development and Home Economics Department. There

were no direct ties between the program and the Department when I came to the program in 1977, but now there is a very different situation. There has been yearly increasing cooperation between our program and the department. This cooperation includes the use of our Center by students for training and observation for classes in child development and home economics, the sharing of resources and equipment with the Child Development Labs, the use of Children's Center staff as resource for child development classes and coordination of services to families and children which are in both programs. This relationship is an important one for both our program and the department.

Letters

Apathy of the majority

Editor:

Neither Sandra Clary or Kevin Moses won the election—apathy was by far the winner, 4 to 1. Unaccounted for in the May 7 issue of the *Daily* were the views of the 80 percent who did not participate in the election. The *Daily* did mention that the turnout was the highest in recent years and this is gratifying if it represents a trend. However, there is so much farther to go.

The turnout at the polls is probably a good indicator of the concern that the majority has all year with the ASI. Its lack of interest raises some serious questions as to whether this campus is, or has ever been, ready for any kind of self-government.

It is unlikely that the majority believes that the student government does everything that they desire of it.

If the government is not doing as the majority wishes, why not disband it? Certainly many students could find ways to use the \$21 that it collects each year to keep itself solvent. Or, maybe

even better, why not run it only some days a quarter to take care of the few clerical functions that it is responsible for. There are some state governments that work part-time like this even today.

But to maintain a government in which the majority has no interest, is to give power where none need be and is to contradict the precepts of a democratic society. If the student government does not deal with issues that are pertinent enough for the majority of the student body to take responsibility in their government, then the ASI is a fraud—it claims to represent the student body.

The apathy of the majority, for whatever reason, sharply contrasts with Jefferson's ideals of the participation of the common man in government.

Is the majority so satisfied that it doesn't need to speak up? On this campus, as in this country, we seem to have not the tyranny, but the apathy of the majority—a ruling elite and a silent majority—not a democracy.

Alan Bruno

Greeks and claustrophobic chickens

Editor:

After being a member of the Cal Poly Greek community for three years, seeing what the Greeks do for Cal Poly, San Luis Obispo, and many charity organizations, it amazes me to see almost zero *Mustang Daily* coverage for Greek Week.

The Greeks represent 1/16 of the student population, and a much higher percentage of the many boards and committees on campus. The Poly Royal Board, WOW Board, and Student Senate are just three examples of boards that the Greeks are involved in. We also take care of the "P" and man the escort service.

I guess front page articles about

sheep dogs, cruelty to pigs and claustrophobic chicken are more important than what the most active body of students is doing.

I have a feeling those claustrophobic chicken did not read your paper, but they probably put it to good use.

Greek Week was our time to shine and really enjoy each other's company. We did not forget the non-Greeks though; the Rape Crisis Center was the beneficiary of our charity Greek Sing.

It just seems that what 1/16 of the student population does might be interesting reading.
