## New Poly communication data chief instated

Mustang Daily—Keith Van Dam

Curtis Gerald, campus consultant for computer matters, began his new job on Monday as associate vice president for information systems at Cal Poly.

by Nancy Lewis  
Editorial Assistant

Cal Poly's increasing dependency on communication data has resulted in a new position recently created by President Warren Baker.

Curtis F. Gerald began Monday as the associate vice president for information systems. He is in charge of the university's computer system, the Audiovisual Department, the Computer Aided Productivity Laboratory, and telephone and data communications. As manager, Gerald will oversee the budgeting and planning for the system, and facilitate the entire program. He will also continue his job as campus-wide consultant on computer matters.

The position was created because "we want to recognize the inter-relationship between computing and communications, and the immediate need for coordination of the university's activities in these areas," said Baker. He added that in addition to this, the university will be able to take an integrated approach to the management of voice, data, and video communications.

"I'm excited and appalled at the magnitude of what needs to be done," said Gerald of his new position.

After several years in industry as a research administrator and research

engineer, Gerald came to Cal Poly in 1964 as an instructor in the math department. In 1969 he was appointed head of the then-newly formed Computer Science and Statistics Department.

Since 1980, Gerald has been involved in the planning and coordination of computing and communications activities for Cal Poly. He was influential in the development of the Computer Aided Productivity Laboratory located in the Computer Science building.

This laboratory, in its first operational phase, provides Cal Poly's undergraduate students in engineering, architecture, and other science technology programs with experience with computer-aided manufacturing systems. In his new position, Gerald will report to Tomlinson Fort Jr., vice president for Academic Affairs.

Gerald is a graduate of Iowa State University, University of Cincinnati, and Massachusetts Institute of Technology, where he earned his doctoral degree.

Before moving to Cal Poly, he was involved in teaching and research at University of Washington, MIT, and University of Cincinnati. A registered professional engineer in Illinois, he was also a research engineer and chemist with Universal Oil Products Co. and El Paso Natural Gas Products Co.

## Computerized cataloguing lifts the library load

by Lisa Shidler  
Staff Writer

Getting a book from Cal Poly's Robert E. Kennedy Library is pretty easy. After finding a book on the shelf, patrons walk to a check-out desk. A clerk runs a laser light over the zebra code, and the book is due back in a few weeks.

Putting new books on the shelves in the first place, however, is not so easy.

The Acquisitions/Collections Development Department and the Cataloging Department of the library deal with acquiring new books and getting them ready to put on the shelves.

The Acquisitions Department receives new books in two ways, according to Richard Brumley, head of the department. One way is through the ap-

proval plan, where book vendors get books from publishers and send them to Cal Poly for approval. The vendors try to match a profile of books that support Poly's curriculum set up by the Acquisitions Department.

Faculty and staff review the books before they are approved, said Brumley.

New books are also obtained after requests for certain books are made by faculty, staff, students or library personnel. Brumley said not all requests are fulfilled, such as those for very expensive books or textbooks, but most request that support the curriculum are ordered.

About 15,000 books were added to the library and 6,000 subscriptions were maintained last year, said Brumley. The library has a total of 600,000 books. This year, the department has a budget of \$950,000 for books and periodicals.

Weeding out old or unused books is also part of the Acquisitions Department's responsibilities, but according to Brumley, is not a crucial task at this time. Not much weeding takes place now because the library is new and space is not a problem, said Brumley.

After a book is received and approved by the Acquisitions Department, it must be processed by the Cataloging Department.

"We provide a bibliographic description of every book in the library (except those in Learning Resources and Curriculum)," said Rodger Lewis, Cataloging Department head.

Lewis said the department works with four sources of information, or data bases. The department provides information for and updates the card catalogue on the first floor of the library. It is the department's only manual data base.

The other three data bases are OCLC, CLSI, and PLS, which are all automated. A lot of work hours are used for coding the information differently for all four data bases, said Lewis.

OCLC, which stands for On-line Computer Library Center, is a subscription-based information center that has 9 million records on books and periodicals. It is based in Dublin, Ohio, and has 3,000 subscribers all over the country.

When a new book is received by an OCLC subscriber, the bibliographic information is keyed into a terminal to see if records of the new book are in the system. If it is not, the subscriber keys in the information. When the information is correct, catalogue cards can be ordered from Dublin by pushing a button.

Cal Poly's cataloging was computerized in April, 1978. The main complaint Lewis has of the system regards the response time. Phone lines are sometimes so tied up the response time is very slow and frustrating for the department, he said.

CLSI, which stands for C.L. Systems, Inc., is Poly's in-house circulation device. It now is used only for circulation, but according to Lewis, has the

## Campus housing open to all

by Sharyn Sears  
Outdoors Editor

The on-campus housing resolution passed last week in the Student Senate applies to all student organizations, not just the Greek community, an ASI senator said Friday.

Bob Woolery, ASI Greek Relations officer and a senator for the school of Engineering and Technology, said if the resolution is adopted by the California State University system Board of Trustees, any student organization that meets the criteria could live on campus. The criteria for leasing university property would be determined by the board and the individual universities, he said. The board will discuss the resolution at their meeting in January.

Woolery co-sponsored the resolution with Bill Doyle, ASI external affairs assistant.

The criteria would deal with "the financial capability and 'track record' of the organization," Woolery said. Factors such as how many years the organization has been established, its ability to afford leasing university pro-

perty, and its reputation for having a responsible attitude would all be considered.

The resolution came about mainly in response to the student housing crunch in college communities, Woolery said. At Cal Poly, he added, the Greek community has indicated an interest in leasing for on-campus housing.

The resolution will be taken to the San Luis Obispo city council, where the senate will ask them to sponsor it, Woolery said. He added that more on-campus housing would benefit the city by helping to "alleviate the housing crunch."

The amount of land available for leasing would vary from one university to another, he said.

Woolery said he expects to see on-campus housing for student organizations "within the next year and a half."

Groups qualifying as student organizations would be those which are "recognized student groups," he said. An organization would be required to have codes and bylaws approved by the ASI and would need to have those codes on file in the Activities Planning Center, he added.

### Pong-a-thon

Once again the members of Delta Tau Fraternity are sponsoring a ping-pong marathon. The Pong-A-Thon is a fundraising event featuring 168 continuous hours of ping pong.

The fraternity has collected hourly pledges from individuals and businesses in and around San Luis Obispo. The money the group raises from their fourth annual event will go to Loma Vista School for Severely Handicapped Children. Last year's event cleared nearly \$5,000.

The Pong-A-Thon begins at 2:00 p.m. Friday, Nov. 5 and lasts until Friday, Nov. 12. Information can be obtained by calling John Fumia at 544-8220.

## LSD threat made to Hayden

SANTA MONICA, Calif. (AP) — A man was in custody Tuesday after an anonymous caller threatened to contaminate supermarket food with LSD unless one-time anti-war activist Tom Hayden apologized for his views on Vietnam, police said.

Thomas Blankenship, 29, was arrested shortly before midnight Monday in a phone booth about three blocks from a Vons market — one of two markets where the caller claimed products had been contaminated, said police Sgt. Barney Melekian.

Blankenship, a transient who claimed to be a Vietnam veteran, allegedly was talking with Hayden's Santa Monica headquarters for the fourth or fifth time Monday night when he was arrested.

The caller had said he would not reveal what food had been contaminated unless Hayden, a '60s anti-war activist and current Democratic nominee for the 44th Assembly District, apologized for his anti-Vietnam war views, Melekian said.

"He wanted Hayden to go on TV and radio and issue a statement of apology for basically what this guy took to be slurs against Vietnam veterans," Melekian said.

In several calls to Hayden's office, the FBI and local news reporters, a man had said he had placed LSD-laced produce in two Vons supermarkets, Melekian said. The calls began at about 8:30 p.m., he said, and the supermarkets immediately removed any fruit or vegetable that might have been contaminated.

One of the markets was in Hayden's assembly district in Santa Monica, and the other was in West Los Angeles.

### Fotoclub

Fotoclub will meet Thursday, Nov. 4 in Air Conditioning 105. The club is for people who would like to learn more about the art and science of photography.

### Dance/Auction

The Grandmother's House Children's Center is holding a benefit barn dance and auction from 4 to 10 p.m. Sunday, Nov. 7 at California Cooperage. Cost is \$10. Monte Mills and The Lucky Horseshoe Band will play.

### Fantasy trip

The Campus Crusade for Christ is sponsoring "A College Life," an event

which includes a trip to Fantasy Island with guest speaker Tom Virue speaking on the Good, the Bad, and the Ugly. Don't miss it, at 8 p.m., Friday, Nov. 5.

### Ski Swap

The Cal Poly Ski Club and Mountain Air Sports presents the San Luis ski swap on Saturday, Nov. 13. Registration is from 9-11:30 a.m. and the swap is from 12-3:30 p.m. Registration price is 25¢ per item plus a 15 percent seller's fee. It is in Rose Alley on Monterey St. between Forden's and Granny's.

### 'Poltergeist' actress comatose

LOS ANGELES (AP) — Dominique Dunne, who played the older daughter in the movie "Poltergeist," remained comatose on life-support systems Tuesday as doctors tried to determine whether the 22-year-old actress suffered brain damage during a choking attack, officials said.

"Her condition is the same. She's critical," said Tess Griffin of Cedars-Sinai Medical Center. "They're still trying to find out" if there's any brain damage.

Ms. Dunne's former boyfriend, John Sweeney, 26, was being held for investigation of attempted murder, said Jim Platis of the Sheriff's Department.

Officers said Sweeney, a night chef at the fashionable Ma Maison restaurant in Hollywood, was arrested Saturday night at Ms. Dunne's home after deputies found the actress lying unconscious in the driveway of her West Hollywood home.

Deputy Ralph Martin said that as Sweeney surrendered, he told officers, "I killed my girlfriend."

Since the attack, Ms. Dunne has been in a coma in the intensive care ward with her family at her side. Hospital spokesman Larry Baum said, "The thing to do right now is... to look out for her life."

health professions club, is planning its monthly meeting Thursday, Nov. 4 in Science north 206 at 11 a.m. Dr. Fierstine will be speaking, refreshments will be served.

### Election

Cal Poly Young Democrats will have a meeting Thursday, Nov. 4 at 11 a.m. in Science Room E-29 to go over results of

the election.

### Filmmaking

A filmmaking club is being organized by Alan Brookman (544-9246) who is looking for people interested in a club to promote film production in super 8mm, 16mm, and videotape formats. Call him or Professor John Harrington (English dept.) for further details.

### Slides

A slide presentation and information about opportunities for studying abroad for credit will be available on Wednesday,

## Teachers fired in '50s rehired

LOS ANGELES (AP) — Six teachers fired in the 1950s for refusing to testify before anti-Communist committees will be rehired and awarded a \$200,000 settlement in a lawsuit.

The educators, one of whom has since died, will be reinstated as a symbolic gesture, the Los Angeles school board ruled Monday.

However, an attorney for the teachers said Tuesday they probably will decline.

"One is pretty sick, others have other commitments in their lives. But at least they cleared their records," said their attorney, Lawrence Silverton.

The educators were fired in 1952-53 under the state's Dilworth Act, which in effect allowed employees to be fired if they refused to tell inquiring bodies if they had been members of the Communist Party.

The act was never repealed, but the district stopped applying it to employees in 1968.

Two teachers, Abraham Minkus and Serrill Gerber, brought suit against the school district in 1977, seeking reinstatement and back pay.

June Sirell Spritz, Minna Cooper, Frances Eisenberg and the late David Arkin later filed a similar suit. Arkin, father of actor Alan Arkin, died in 1980, but his estate will share in the award.

Last year a Superior Court judge ruled that the teachers had been legally discharged under the law at the time, but should have been considered for rehiring when they asked the school board for their jobs back.

Both sides appealed the decision, and the district offered reinstatement without back pay.

Nov. 3 at 12 and 3 p.m. in Chumash Room 207.

### Melodrama

English Club members are traveling to Oceano to see "Frankenstein" at the Great American Melodrama. Cost is \$6 p.m. on Sunday, Nov. 14 at President Lori Thompson's house. Money for the trip and \$3 dues are due Thursday, Nov. 4; turn in to Connie at the English Dept. office.

### Movie

The Chinese Students Association is showing the film "Fists of Fury" at 7 and 9:30 p.m. tonight in Chumash Auditorium. Cost is \$1. There will also be a 15 minute martial arts demonstration.

### Crabbing

The Philipino Cultural Exchange is planning a

crabbing and bonfire at Port San Luis on Saturday, Nov. 6. Meet at U.U. desk at 5 p.m. for rides and nets.

### NR Club

The Natural Resources Club's weekend campout costs \$11 for members, \$12 for nonmembers. Money is due today at the NRM office. The trip will take place Nov. 4-5-7 at Lake San Antonio.

### T-shirts

The Graphic Design Club is selling t-shirts in the U.U. Thursday, Nov. 4 from 10-12 a.m. They say "Cal Poly, San Luis Obispo."

### Foresters

Society of American Foresters meets at 11 a.m. in Science E-27 on Thursday, Nov. 4. Norm Pillsbury will discuss important information on new Forestry major.

## What Is CSSA?

In 1959, the student body vice-president of San Fernando State College (now CSU, Northridge) established an organization of student body presidents who informally met to exchange information and ideas. More than twenty years later, this organization still exists. Today we know it as the California State Student Association (CSSA).

The CSSA is composed of a representative from each of the nineteen CSU campuses and works to "advance the quality of education, promote the co-curricular interest and develop the necessary understanding and cooperation of member universities and colleges, and serve as an informed and responsible advocate of student concerns by creating an awareness of student needs in the CSU system among state agencies and public officials."

The CSSA works to represent us on educational issues, fees, and on "the entire atmosphere of our collegiate careers." It represents us on these issues in both Sacramento and Long Beach. In order to carry out this representation, the CSSA has on staff a Legislative Director, a Legislative Advocate, Liaison to the Chancellor's Office, Collective Bargaining Director, and a Staff Assistant for each of the Sacramento and Long Beach offices.

A lobbying office was established in Sacramento in 1970. Three years after this, the Education Code was

amended to allow Associated Students fees to be used for governmental affairs. Since then, the CSSA has been representing the now over 300,000 CSU students on many bills and pieces of legislation supporting an overall philosophical goal of students having greater flexibility and access to higher education (the latter which the CSSA proposed).

Cal Poly is at this time a member of the CSSA. This means that each student here at Poly pays \$.35 to CSSA in yearly dues out of their student fees. This comes to a total annual payment of \$5617 to the CSSA from Cal Poly.

This year's campus representative, ASI Vice-president Kevin Moses, is sent to monthly CSSA meetings to represent Cal Poly's views on the issues being discussed in CSSA. These meetings are rotated among the different CSU campuses and are open to the public.

The question of Cal Poly's involvement in CSSA has been confronted in the past and is again under discussion. CSSA's involvement in social issues is also a topic which is being looked into.

Below are the pro and con views concerning whether or not Cal Poly should remain in CSSA. If you would like to hear more about this or would like to voice your own opinion on this topic, feel free to attend a Student Senate meeting.

## Opposition To CSSA

Senate members dressed in costumes for their October 27th meeting.

## Moses Supports CSSA

Membership in the California State Student Association (CSSA) is beneficial because it gives Cal Poly a system-wide representation in the CSU system, according to ASI Vice President Kevin Moses.

Moses, Cal Poly's CSSA representative, serves on the CSSA academic committee. He said proposals concerning add/drop policies, academic advising and graduation which directly affect students involve the academic committee.

The academic policies that are reviewed by the CSSA directly benefit students, Moses said, but they're not as visible as each school's individual student government would be with committees concerning concerts and intramurals, for example.

In response to the current issue involving CSSA involvement in social issues such as the draft, Moses felt the impression created of the CSSA was invalid. He explained that in a three-day CSSA meeting, only 30 minutes

were spent on the draft topic. Social issues are a very small portion of the CSSA he said.

Moses further added that educational issues must be acted upon fairly quickly at CSSA meetings. But there is time for social issues to be taken back to the individual student governments.

Campus reports also serve as a direct benefit to CSU campuses, according to Moses. He said, "Campus reports serve as a communication mechanism for the CSU campuses. They used to be buried in the middle of the CSSA agenda, but are now at the top."

He said campus reports allow the campuses to share knowledge about the activities of each university.

"Campus reports may influence what some schools are going to get," Moses cited that Fresno State is going to get a Versateller machine as an example of the effect of the communication resulting from campus reports.

In principle, the harms of Cal Poly membership in the California State Student Association outweigh the benefits received by students, according to ASI Controller, Charles Dickey.

Dickey said the CSSA represents a "false government that is not legitimized" because stands are taken without knowing all the students' views. "How does the CSSA know what's in the best interest of the majority of students?", Dickey asked.

The CSSA plays a useful role, he said, but that doesn't justify us being in it. Dickey feels the \$5,000 annual membership fee could be better spent elsewhere. He said he would rather use the money for activities in the University Union Plaza on Thursdays at 11:00 AM.

Dickey went on to say that the line of communication in CSSA is very vague. "A communication line is virtually nonexistent," he said.

He noted that school senators are elected basically on name recognition with no CSSA political platform. The student body is uninformed of the candidates' political views outside of the education realm and, therefore, should not be voting on social issues on which they have no indication of the students' views, said Dickey.

However, Dickey sees no indication that Cal Poly will withdraw its

membership from the CSSA.

Brian Reynolds, Communicative Arts and Humanities senator, sees one specific problem with the CSSA, but feels it can be solved.

Reynolds views the primary problem with the CSSA as a lack of enforcement of policies concerning representatives. He noted that the personality of the CSSA representative can affect decision making. Reynolds said specific guidelines are needed because the CSSA representatives change from year to year.

"For example, there might be good CSSA representatives one year, but the following year there might not be the same good people. Guidelines are needed to solve this problem," said Reynolds.

The CSSA is potentially misrepresentative, Reynolds said, and as long as the potential is there the possibility of misrepresentation exists.

Cal Poly should remain a member of the CSSA as long as misrepresentation problems are solved, said Reynolds. But if there is no active participation to solve the misrepresentation issue, Reynolds believes it would not be credible for Cal Poly to be a member of the CSSA in the future.

However, Reynolds believes the problems concerning misrepresentation of students in the CSSA can, and will be, solved.

## Calendar of Events

The next CSSA meeting will be held in San Bernadino on November 13-14.

Senate meetings are held each Wednesday at 7 p.m. in room 220 of the University Union. Everyone is invited to attend.

The November 10 meeting of Senate will discuss giving the CSSA some criteria to follow concerning of social issues.

potential to be an in-house cataloging system. A pilot project at Chico State University will be evaluated next year to determine if an in-house cataloging system could work. If the project is successful, all California state universities and colleges may get automated catalogue systems. Looking up books would then be done with terminals and card catalogues would be eliminated, said Lewis.

The third data base, the PSL or Public Serials List, is used to catalogue periodicals after the first check is done on OCLC. The PSL is based in Long Beach at the CSUC Chancellor's Office. According to Lewis, periodicals are the hardest to catalogue because names sometimes change or publication will cease.

Finally, after the books are processed by the Acquisitions and Cataloging Departments, they're ready to be put on the shelves.

Periodicals clerk Ann Brinkerhoff checks in a magazine.

# Poly journalism grad spins the tunes at Z-93

Deborah Catlin slip-cues an upcoming song while reporting the latest news between songs.

Deborah Catlin, a graduate of Cal Poly and former general manager of Cal Poly's KCPR, has been playing the tunes for Z-93 since 1979.

Story and Photos by George Kim

The prime time disc jockey on San Luis Obispo's most popular radio station, KZOZ 93-FM, is Deborah Catlin, a 1975 Journalism graduate from Cal Poly.

It was a step up for Catlin from her position as general manager of Cal Poly's radio station KCPR, the second most listened to station in the area.

Hands-on experience is what Catlin credits for her success in broadcasting. Catlin has been at Z-93 since 1979, where she is heard from Paso Robles to Lompoc over the 29,500 watt transmitter on Cuesta Peak.

Catlin said Z-93 attracts about a 25

percent share of San Luis Obispo County's listening audience. The format aims at targeted areas of Cal Poly's music listening audience, the majority of whom are from San Francisco and Los Angeles areas where there are huge open markets for radio stations. Z-93 gears its music for the overall listener from soft rock to new music as it attempts to meet its age group of 18-39 years. It aims for sophistication and big city sound, mixing in a "down home" pattern to keep the programs distinctive of San Luis Obispo. When asked what her favorite music is, Catlin replied smoothly, "I love rock and roll."

"Hands-on experience" is what Catlin gives credit to for her success in broadcasting.

# Taste buds tested during food management lab

Story by Maria Casas — Photos by Stephanie Pingel

Food Management 321 teaches students current trends and developments in food management, marketing systems, consumption patterns and legislation related to food. There is a special emphasis on the planning, preparing and serving of the meals for diverse situations while considering the nutritional, aesthetic and economic aspects.

"It's fun meeting people and getting a good meal once a week," said Claudia Hale, a senior Home Economics major of the

class where students plan and prepare a complete meal each week.

Eight meals are planned and served in the quarter. Each week students have the chance to plan for various situations: breakfast/brunch, low, medium and high cost meal, modified dinner diet, vegetarian meal, buffet and a plan-time budget meal.

"We want to see what types of food can be prepared on various food budgets," said instructor Linda Ellison. "The big-

gest surprise is that for a low-cost dinner, each person in a kitchen will only pay \$1.45 for a complete dinner that is nutritionally adequate, using the principle types of food. Planning a meal can be inexpensive if you rely on more grain, fruits and vegetables in season."

There are six kitchen areas in the lab with four students at each. Individual kitchens plan complete meals that include a main course, salad and a dessert.

"They must use recipes and cooking techniques that they've never used before," said Ellison of her students. "This way they will become familiar with such things as stir fry, deep fry and sauteing." She added the only way students can learn this type of meal preparation is "in the kitchen."

The class has a two-hour limit at each meeting. Ellison said this also provides a challenge for the students. "They have to find a recipe that fits into a two hour lab, then they have to prepare the food, eat it, and clean up within the same two hour limit," Ellison said.

After choosing the food, students must also plan meals for the entire day. In addition, a nutrient analysis form is completed

Home Ec major Kerry Franciscovich concentrates on her major concentration — food. As part of a Food Management class, she has learned to prepare meals in ways which save money and time, and are still nutritionally balanced.

by students which lists the food, quantity and number of servings of the milk, vegetable, fruit, bread and cereal groups. The same is also completed for the breakfast, lunch and dinner meals.

Time and work schedules are also completed by students which detail each step in preparing the meal as well as the approximate time it requires to do it.

"It comes down to a minute-to-minute thing,"

said Ellison. "Time is the trickiest thing because you have to coordinate several people working in a kitchen," she said. Even the little things take time, Ellison added.

Susan Merson and Melanie Barry plan for a Food Management 321 class by selecting recipes. The class is designed to teach students all aspects of food preparation.

## Nutritious dishes are whipped up on a budget

From page 6

"You have to know how long it takes to beat an egg or mix an ingredient," she said.

"I don't take points off for flops or failures . . . I want people to try new things," she said, but added that "if the paperwork isn't done well, things don't run in the kitchen."

Once the paperwork is completed by the students, they purchase fresh produce necessary for the meal. Staples such as flour, sugar, butter and eggs are provided by the lab.

At 4 p.m. the second lab day, students must work with the food according to their schedules. Additional things they must consider is the selection of a tablecloth, placemats, dishes, china and silverware.

"Students in a kitchen all decide on the color combinations," said Ellison. She added that people also "eat with their eyes."

"If we sit down and it doesn't look appealing, we probably don't eat it," she said. Meals, according to Ellison, must be aesthetically pleasing to the eater. This involves serving a meal which has a variety of flavors, textures, contrast in colors, as well as table setting.

By 5 p.m., Ellison expects her students to have their meals ready, with everyone sitting down to eat. At 6:00, the meal is finished, and clean-up is over.

Now the only thing the students have left to do is an evaluation of the meal. Students state what went wrong with the meal, high points of it, how well the kitchen-mates worked together, expected improvements and changes, and if the meal was cooked again.

Of the process, Ellison said, "All the things they do, I want them to learn. Learning is important because they will all be workers with food in a lot of different ways when they leave here," she added. Ellison said the principles the students learn in the 321 class will be demonstrated if they work with the public. It can also get back to them if they become housewives and have families of their own to feed and budget and time.

Ellison said she feels all of her students are "excited about cooking" and trying new recipes. She added that even if the meal is a "flop," new techniques and principles are used.

"I really like the class," said Hale. "It's a good challenge . . . people think that it's easy to plan a meal for a group of people."

L-R: Susan O'Neil, Kristen Nuckels and Kerry Francisovich learn to coordinate the tasks involved in preparing a meal for Food Management 321. Says instructor Linda Ellison, "Time is the trickiest" in a kitchen where entire meals are planned by the students from selecting recipes to eating the meals prepared.

## She's a crowd-pleasing player with charisma that, like her, just won't quit

by Mike Mathison  
Staff Writer

Jolene Huffman was about to step on to center stage when public address announcer John Clark bellowed out over the microphone, "And here she comes, Miss Enthusiasm, Jolene Huffman."

The crowd cheered. No, this wasn't a Miss America pageant in some exotic city in the Caribbean. And, no, Clark wasn't imitating Bob Barker. And, again, no, Miss Enthusiasm isn't a new category thrown into the yearly competition. It's far from Miss Congeniality.

But, like the participants in the annual beauty contest, Huffman does have a lot of charisma.

It shows when she's out on the volleyball court for the nation's No. 4 rated Cal Poly Mustangs. The crowd likes the senior physical education major.

"I don't understand it," she said with a smile, which she is almost constantly wearing. "It's neat, though. I'm not aware of it. Maybe it's my faith which brings it out. I like to put God number one and maybe He brings that out in me. He's changed my life so much. I've had people comment they like to watch me play. And that's a very nice thing for people to say."

"I hear the crowd once I step up to the line (to go on the court). I hear the tempo go up and that's neat. But it's only up to the line. Once I get in, I don't hear the crowd."

Huffman has gone through a few changes since coming to Cal Poly after being a standout on the Orange Coast Junior College volleyball team for two seasons. She was there with Poly teammate Wendy Hooper. Huffman exited the Costa Mesa school after being named the California State Junior College Tournament MVP her sophomore season.

But when the 5-10 performer reached the Mustangs' program things changed. Quickly. Huffman sat the bench for the majority of last season.

"Through high school I never had a coach as far as technique was concerned," said the Thousand Oaks High School graduate. "And at OCC I would just power and push the ball through

the block. But when I got here at a Division I program and with the best of the best, technique started to show up and I realized I needed to learn."

"I learned a lot about myself. I was humbled. I believe you have to fail at times before you are exalted."

She went through another change this season. But it wasn't as easy as accepting last year's near-permanent role on the bench. Huffman was relegated from a starting left-side hitter to the bench. Though not as permanent like 1981, it was still too permanent for her at the beginning. After just seven matches, Huffman was a substitute, not a starter.

"It was hard to take," Huffman admitted. "I felt a little defeated for awhile. It humbled me and made me

Jolene Huffman

start thinking about what I was doing wrong. It gave me a drive to keep going. Sure, I'd like to be a starter, but I'm being positive on the other side.

"I lost a little confidence in myself. The hard part is when coach (Mike Wilton) said I wasn't playing good enough and moved me down. Getting my confidence back has been really hard at times."

But it's not like Wilton has given up on his senior. Huffman comes in when things aren't going right for the Mustangs. And since things rarely go right for any team throughout any match, there is a good possibility you will see No. 10 on the court at some point tonight when Cal Poly hosts the No. 1 ranked University of Hawaii in the Main Gym.

"It's nice to see coach doing that," Huffman said. "When he goes to me I want to go in and do a job. I want to be efficient and get the team up. I want to be on top of things."

"I like pressure. I like a more intense

## Volleyballers want Wahines to say Aloha to No. 1 spot

by Mike Mathison  
Staff Writer

The Cal Poly women's volleyball team has already knocked off two No. 1 teams this year. And tonight at 7:30 in the Main Gymnasium, the Mustangs will try for No. 3.

In the biggest match on Cal Poly's hardwood since the Oct. 8 meeting with the University of the Pacific, head coach Mike Wilton and his crew will entertain No. 1 University of Hawaii. The Wahines are 15-0 and hot.

"This is their second big trip of the year," Wilton said. "The other one, of course, is the national championships. They'll be ready for the match. All I'm hoping for is both teams to be able to say they did a nice job after the match. If that happens, it'll be a whale of a match."

It'll be a whale of a match no matter what. The Mustangs are 19-4 and are riding the crest of a six-match win streak. They are also rated No. 4 in the nation. Cal Poly hasn't had a match since last Thursday's 15-1, 15-9, 5-15, 15-8 whipping of the University of Santa Clara.

Hawaii, though, has been busy. The Wahines and coach Dave Shoji are coming off three tough matches up north—all were wars. In the opening round of the Wendy's Classic at the University of the Pacific last Friday, Hawaii beat UCLA in four rough games 15-17, 15-9, 15-13, 17-15. The Bruins led 13-8 in the fourth game. It could have easily gone five.

In the championship match, the Wahines disposed of the host Tigers

15-7, 15-11, 12-15, 11-15, 15-4. It was the second year in a row Hawaii has won the tournament. It was also the second straight year that 5-foot-11 junior middle blocker Deitre Collins was selected the tournament MVP.

Wilton calls the Hawaii standout, "probably the best middle hitter in the country."

Monday night in Palo Alto was also no cake-walk for the Wahines. They escaped Stanford by beating the Cardinals 13-15, 15-10, 15-12, 16-14. Make no mistake. Hawaii

is a class team. But so are the Mustangs.

"They still have today off," Wilton said in reference to Hawaii playing three matches in four days. "But maybe they've been taking the whole season off with the schedule they've played until now. Hawaii has a lot of experience. They have good ball-handling, are scrappy on defense and just are solid all around."

This is a big week for the Mustangs. Not only do they face Hawaii tonight, but they travel down to Westwood Friday and Saturday, a la Hawaii, to

participate in the 24-team National Invitational Volleyball Tournament at UCLA. This tourney regularly determines who goes where in reference to the post-season playoffs.

"This tournament is a good indication of where teams are at this point in the season," Wilton said. "What we are preparing for, though, is December. Hopefully, that's what every coach is shooting for."

But for tonight, at least, Cal Poly is shooting to knock the Wahines back over to their little group of islands.

Mustang Daily—Jack Drake

Setter Tina Taylor (left) is about to set freshman Ellen Bugalski in the Mustangs' most recent win. Cal Poly will need a lot of precise timing, much like the kind this play needs, when it hosts the University of Hawaii tonight at 7:30 in the main gym. Hawaii is No. 1 in the nation. The Mustangs are No. 4.

Ron Moyer, ousted karate instructor

## No room at the gym for followers' flying feet

by Scott Swanson  
Staff Writer

Once upon a time Ron Moyer was the teacher of a highly successful karate class at Cal Poly.

Now he still teaches karate, but his class has dwindled considerably in size, which really isn't surprising since it isn't held at Cal Poly anymore but has been moved to Atascadero. The reason for the switch? University policies.

Moyer's class was an ASI sponsored Mini-Class, open to outsiders as well as students and faculty of Cal Poly. He held the class for four quarters from Fall 1980 to Summer 1981.

The class had about 50 students, according to Moyer, the majority of whom were Cal Poly students.

"It was the best class I ever had," he said. "Those Cal Poly students were like sponges. They drank it in. They didn't have time to fool around and they were there to learn."

It was a good combination because Moyer wasn't there to fool around.

"We don't just stand around," he said, describing his classes. "We work out for an hour and a half."

Cal Poly physics professor Thomas Schumann, who has been a student of Moyer's for four years, called Moyer a "top notch instructor."

"Ron's a very competent and capable karate teacher," Schumann said. "He makes everybody work hard, but you get out of it what you put into it. It's good, vigorous exercise."

Although the students liked his class, Moyer ran into difficulties when he tried to reserve the wrestling room in the Main Gym, his usual facility, for the 1981 Fall quarter. Several ASI clubs had priority over Moyer's class, and in the end he was scratched from the schedule in favor of another club.

According to Intramurals Planning Director Denny Byrne, it wasn't a matter of class size, but who made up the class.

"What happened was we had four additional martial arts clubs which had priority over Mini-Classes," Byrne explained. "It basically got down to student use over out-of-school users."

Moyer had a hard time understanding what happened.

"I thought, 'O.K., we're proving ourselves,'" he said. "But then we got bumped."

But he didn't stand around arguing. He went home to Atascadero and held the class there for the rest of the year. This fall he tried again to get a room and again ran up against a wall.

## Sports

## Teacher takes kicks elsewhere

From page 10

"I wrote to Denny Byrne first and then Tom Schumann went in to see him about getting a room," Moyer said. "But they did something wrong. All the Mini Classes were about three weeks late getting started this fall."

Moyer didn't get a room. It wasn't that Byrne didn't want to give him one, he explained. There were just none to give.

"We have fewer clubs this year," Byrne said. "But there is demand for more time in the rooms from the wrestling team and various classes."

According to Byrne, the facilities available for martial arts classes are the wrestling room, part of the floor in Crandall Gym, and the dance studio next to Crandall Gym. He said that martial arts classes cannot get into the dance studio until February. Problems are also connected with the use of Crandall Gym, since only half the floor is usable for martial arts.

The facilities are managed poorly, according to Moyer.

"Basically, I think a lot of space there is being

misused," he said. "I don't think it is managed very well, and the students are the ones paying the price because they're missing out."

Moyer is bothered by the quality of instruction for the clubs using the facilities.

"I'm not sure how qualified these guys the

students are training with are," he said.

Tom Schumann wonders, too.

"I think students would benefit from Ron," he said. "I've seen some of these other classes and they didn't impress me too much."

Moyer studied karate for 13 years with Tsutomu Ohshima, the man who introduced the sport to the United States in 1955. He has taught karate himself for eight years and is presently the heavyweight champion of the Southern Pacific AAU regional association, which includes most of California. He was a member of the U.S. National Karate Team in 1975.

Moyer, a third degree black belt (out of five possible), still plans to teach at Cal Poly.

"You have to start at the beginning of the quarter when the students' schedules are free," he said. "After a few weeks they don't have any time left."

"I told Denny (Byrne) that I was going to be a student at Cal Poly," he said. "But even if I don't get a room, I'll teach it somewhere. We'll have a class one way or another."

Mustang Daily — Keith Van Dam

Deadly, or just disciplined? The feet of a Ron Moyer karate disciple stand poised for instruction.

## Soccer team can't pity itself

The Cal Poly men's soccer team is coming off a tough loss, er, tie last Saturday night against California Collegiate Athletic Association foe, and first-place runner, Cal State Dominguez Hills.

But the Mustangs better not feel sorry for themselves too long or the team coming into town tonight just might blow their pride back into the Pacific.

Fresno State, ranked No. 18 in the latest Division I

soccer polls, invades Mustang Stadium tonight for a 7:30 match. The Bulldogs are 14-2-2 on the year. They are led offensively by Rosendo Gutierrez who has eight goals.

Head coach Wolfgang Gartner's club is 8-6-2 in 1982, and 5-1-2 in CCAA activity. The Mustangs are in second place in league behind Dominguez Hills, which is 7-1-1. Cal Poly will try to inch closer to the Toros for first place Friday night when it will entertain

CCAA foe UC Riverside at 7:30 p.m. in Mustang Stadium. Cal Poly defeated the Highlanders 4-0 earlier down south.

The Mustangs held a 2-0 lead over the visiting Toros Saturday night, but couldn't hold it. The win would have put them into the CCAA lead. Dominguez Hills rallied with goals at about the 15- and three-minute marks to force the 2-2 tie. Two 10-minute overtime periods were scoreless.

## Huffman gets defensive about play

From page 9

game. Sometimes I falter when I come in and know the ball is coming to me. I want to make that perfect pass and I want to change the game around, but it doesn't work. Sometimes I feel I didn't do a good job if the game didn't sway."

But that doesn't happen often. Huffman is as effective at coming off the bench as anyone in any uniform. She's proved it once, and she'll prove it over and over again. Against Cal State

Fullerton Oct. 23 when the majority of the team seemed to be out to dinner. Huffman came off the bench and performed quite well. She was six-for-13 in kills, had four service aces and three defensive saves. Huffman is third on the team with 40 defensive saves.

"My defense comes easiest for me," Huffman said. "It's something I don't give a great deal of technique work to. It just flows."

Like a river.

## Shenanigans

Three women recently discovered the hopeless frustration of filing a sex discrimination suit — even after they “won” the class action complaint when the employer was found to foster discriminatory practices.

These women were former lecturers, and the employer? Cal Poly. The case stems from a 1979 class action sex discrimination complaint filed with the Department of Labor by Joanne Ruggles, an art and architecture lecturer; Sharon Stine, a child development lecturer; and Nell Langford, a psychology lecturer. Ruggles, for one, based her complaint on having worked part-time at Poly for nine years and having been refused even an interview each of the 29 times she applied for a full-time permanent position.

After a two year investigation, the Department of Labor issued findings that “the complainants had in fact been discriminated against in hiring, promotions, compensation, and retaliation.” The report concluded that “the university’s policies and practices create an environment which is not conducive to the employment and advancement of female members of the faculty” and ordered Cal Poly to resolve the matter through informal conciliation. Victory for the women seemed complete.

So what went wrong? The Department of Labor reopened its probe of Cal Poly and completely dropped Ruggles’ and Langford’s cases, without informing them of the decision, made on their behalf in meetings last August with President Warren Baker. (Baker had requested “substantial evidences and proof” of the original labor department findings.) Because the two women had also filed sex discrimination suits in federal court, the department dropped them from its re-investigation.

The whole matter is disheartening and frightening to anyone who believes in fair hiring practices. It took the three women considerable effort in the first place to have their grievances looked into, and the investigation itself dragged on for several years. Now, they find themselves back at square one for no conceivable or justifiable reason, because the new probe can revise or withdraw the prior investigation’s results. In short, every method seems to be made to prevent the procedure of justice from being carried through. If Cal Poly was found to be discriminatory, why doesn’t it abide by the findings and resolve the matter through “informal conciliation” rather than dragging the matter out?

An official with the labor department said the agency doesn’t inform complainants of their actions, including reopened investigations. But their action is in direct violation of a court order imposed by the Women’s Equity Action League, which requires such information. Campus officials at least should have informed the women of the new procedures.

While Cal Poly administrators maintain that the three women were not rehired because their area of expertise was not useful anymore, they seem to do all they can to prevent the matter from reaching a speedy and mutually satisfiable conclusion. Perhaps Cal Poly fears its federal funds will be taken away, a consequence for failing to comply with equal opportunity employment guidelines.

The *Mustang Daily* Editorial Board hopes that more judicial and appropriate practices will be undertaken in the future regarding any employment practices or discrimination investigations. Making a victim of the person — be it male or female — who feels they’ve been treated unfairly is twisting justice to fit one’s needs.

### Arms mentality

Editor:

The recent comments of Mary Hoinkes of the U. S. Arms Control and Disarmament Agency illustrate that unique mentality of the U.S. and Soviet governments which has been responsible for the continued escalation of the nuclear arms race. It is indeed ironic that anyone could believe that the introduction of new nuclear weapons systems will somehow lead to arms reduction. Threatening the Soviets with these new weapons (including Pershing II missiles and Trident II submarine missile systems) will only send them scuttling home to devise some new weapon of their own.

Considering the number of weapons in the U.S. and Soviet arsenals today, talk of nuclear ‘disparity’ is pointless. Even in the unlikely event of a completely successful Soviet first strike against all of NATO’s land-based weapons and naval surface vessels, the large portion of our strategic bomber and submarine force would remain intact. Just the submarines which are out of port at any given time have the potential of over

700 missiles. Given that a certain percentage of these are MIRVed (armed with multiple warheads capable of hitting separate targets), this alone would be more than enough to destroy the USSR as a viable civilization.

Each time new technology is added to the arsenal of either side which is more accurate or reduces the time the other side has to respond, the world moves one step closer to total nuclear destruction. Both sides are tempted to fire first to avoid having their weapons destroyed by an opposing first strike, and reduced response times open the door to desperate snap decisions based on limited information concerning a given crisis situation.

Continued arms build-up will never make us safer, it can only move us closer to total destruction and insure that we have sufficient force to ‘do a good job of it.’ It is nauseating to hear officials of the U.S. agency for ARMS CONTROL and DISARMAMENT speak out in favor of continuing the arms race.

### Foreigners as villains

Editor:

Here is yet one more in a series of letters about the cartoon “The Adventures of Captain Pig.”

This cartoon, similar to many television cartoons, casts the villains as foreigners. The “Captain Pig” villains appear to have Japanese sounding names. This practice is a carry-over from the second world war where the villains were the Germans and the

Japanese. It is about time that this type of stereotyping, which I’m sure is unintentional, would finally come to an end. If the author of the cartoon must have villains in his plot they should not have foreign accents or names but be called Smith, Jones or Davis. My apologies to the Smiths, Jones or Davises.
