Baker resisting classroom capacity changes

BY SUSAN DETHLEFSEN
Staff Writer

Once new buildings are built and old ones renovated it should be easier for students to add classes, Cal Poly President Warren Baker told student senators Wednesday night.

In a talk to the Student Senate at the first meeting of the year, Baker discussed, among other things, the building improvements that are planned for Cal Poly and how these will solve many classroom overcrowding problems.

Baker said there is definitely an instructional space deficit on campus causing many of the classes to

be overcrowded, especially between 10 a.m. and 3 p.m. One way to solve this problem is to make room for larger classrooms and offer larger classes.

However, Baker does not like this idea. He said he likes the way Cal Poly is now, because by the end of the term the instructors know the students by name. "I don't want it to get to the point where it's impersonal," he said.

He pointed out that besides the new engineering building that is presently under construction, funding has been received for plans for a new agriculture building and he hopes to get construction funds

soon.

These two buildings along with the renovation of Dexter Library will help ease overcrowding problems, he said, since there will be more space to schedule classes in.

Baker also said a new recreation facility is still being researched, especially ways to cut down on its cost. Students last year rejected a recreation building because it would be too much money.

Baker also told the student senators that their role in the decision making process at Cal Poly was important.

He encouraged the senators to get involved in the new and ex-

panded student affairs council. Here, students can make sure that important parts of the campus, such as the health center and counseling center, continue to get the funds to operate.

He also told the senators not to lose touch with their constituents. "Not only is it important to have a student representative on committees, but it is important that your constituents are kept informed and their views represented here," he said.

Baker also spoke briefly about his objectives for the reorganization of schools at Cal Poly.

He stated that he did not think it was a major reorganization and that the administration followed the recommendations of the faculty in the different departments as best they could. He said the decisions were made so that various programs would be strengthened.

In creating the theatre and dance department he said he hoped to strengthen the performing arts programs, thereby increasing private and state support for them.

He pointed out that there are still no majors in performing arts. This is so students in other majors will be encouraged to participate.

"We need to have all students in

various majors have a well-rounded education," he said. He explained with a performing arts major these students would be excluded.

The last topic of Baker's speech was on Cal Poly's development program, which includes raising money from the private sector.

"We cannot get the quality we hope to achieve without private support," he said. One main problem, he cited, is that to raise money, money needs to be invested. The state does not provide the school with money to be used for such investments.

"A lot of money is earmarked when people donate it. They don't give money to raise money. They want it for a specific thing," he said.

Students play an important role in the development program by participating in phone-a-thons. Although this does not earn much money for the campus, it does remind people that they can donate money to Cal Poly in the future.

After ending his talk, Baker answered questions from the student senators.

The Student Senate meets every Wednesday night at 7 p.m. in room 220 of the University Union.

Fall graduates may be offered ceremony

By LEANNE ALBERTA
Staff Writer

Students who complete graduation requirements at the end of this quarter may be offered the chance to participate in a Fall Quarter commencement ceremony.

The possibility of having another graduation ceremony in addition to the one held on June 15 is currently being reviewed by a Commencement Committee.

Donald Coats, Associate Dean of Educational Services and a member of the Commencement Committee, said that the tentative dates for the ceremony are Dec. 14 and Dec. 16.

"We sent surveys to all 536 students who are eligible for graduation this fall and received 201 responses," Coats explained. "These surveys were aimed at finding out whether these students were in favor of a fall commencement, and many replied that they were."

Coats said that although 511 students completed graduation requirements last fall, only 158 of these students participated in the graduation ceremony last June.

"Many students who finish in the fall cannot come back to San Luis Obispo in June because they are working all over the country and have other commitments," Coats said. "The June ceremony can also be anti-climactic for some because these people have been out of school for six months."

The Commencement Committee is comprised of two student and seven faculty representatives, one representative from both the Academic Senate and Student Affairs and the registrar. Coats is also a member and said that the committee primarily focuses on suggestions made in the surveys.

In one survey a student (names

were not revealed in the surveys) wrote that "adding another commencement at the end of Fall Quarter is a great idea — June is just too far away to even be interested in coming back for the spring commencement."

Another student wrote, "Two commencements means many friends can't share the same day. Also, December is usually cold and rainy — it would have to be inside. December 14 or 16 is so close to the holidays that people are busy and not usually thinking about going to graduation."

Coats agrees that there are pros and cons to the issue and many problems to work out before a fall commencement ceremony can occur.

One problem is deciding what restrictions should or should not be placed on students.

Will a students graduating in the fall be required to attend the fall ceremony and not be allowed to choose the ceremony in June? Should they be allowed to participate in both ceremonies?

Another problem deals with the time element. If there is a chance of having a commencement ceremony this December, then the committee must finalize the plans, recommend the plans to Cal Poly President Warren Baker and he must approve them in a short time span of a little over a month.

"The speed at which everything will have to be done will mean extra work for me," Coats said, "but I think that having a fall commencement would be a good thing for students and this university alike."

The Commencement Committee will decide whether or not to recommend the fall commencement proposal to President Baker at their next meeting on Wednesday, Oct. 10.

The graphics communications department receives a Helio-Klischograph through the doors of the Graphic Arts Building Thursday. The machine, which electronically engraves gravure cylinders for high quality printing, was

donated by General Foods of Battle Creek, Mich. The graphic communications department is one of six university gravure resource centers in the United States.

Counselors offer helping hand

By KEVIN H. FOX
Staff Writer

The members of the Cal Poly Counseling Services Department don't want to analyze dreams, talk about Freud or ask about childhood experiences.

Career Planning Services, headed by Joe Diaz, offers students the chance to look to themselves to make decisions related to career planning.

"I would impress on students that they are and should be in control of their career decision," said Diaz "we find that most people are passive in that area."

The CPS works with students to determine their needs and then

develop a process to help them make accurate career decisions.

Through the use of tests such as personality profiles, value assessments and aptitude appraisals, the staff of the center helps students to move in the right direction. Problems students face range from being in the wrong major to being unsure where the jobs are.

"We would like to see students earlier in their career at Cal Poly," Diaz said. "Students lack career information. All they have is a title with no career information to go with it. That's what we're here to do."

Diaz said that while his department is part of the Counseling

Services Program he is trying to establish an autonomy of its own.

Jill Hayden, a para-professional career specialist with the center, said that many students are afraid to go in to see someone. "Students have a stigma about counseling services. They think counseling is only for the sick. We are trying to change the image of the department," she said. "I'm not an analyst."

"Students need someone to tell them it is alright to change a major or go to a different school," Hayden said.

Determining the proper career goal can aid students in finding a

Please see CAREER, page 3

The population challenge

As I write and you read these lines, 800 million people on this planet are starving or close to starvation. This is 3.5 times the entire population of the United States. It is more than one human being out of six. These are the figures for serious malnutrition and starvation. Hundreds of millions more live in degrading poverty.

Over much of our planet, a precarious balance exists between food and people. Abnormal weather can affect the food supply of whole continents. Breakdowns of government or transportation—or wars—can plunge nations into famine almost overnight. Then, the more prosperous countries (such as the U.S.) are called upon to send in food.

How did the world get to this point?

World population is now 4.7 billion. By year 2000, it will probably reach 6.1 billion; by 2020, 7.8 billion. Some demographers hope it may level off there; most doubt it.

There will not be enough cropland to produce the food all these people need. There is hardly enough now—as 800 million starving or near-starving people attest. People have been streaming into sprawling urban centers of the poor countries. They come in search of jobs, because there is not enough land to support them in rural areas. They swell the armies of unemployed and survive in squalid shanty towns.

Not so many years ago, there was almost universal hope that industrial development would soon provide jobs for all who needed them in the less developed countries. It was argued that this would lead to a rise in living standard which, in turn, would lead to smaller families. There was also hope that new agricultural research and technology would produce enough food for all the world's people.

Such hopes proved unrealistic. Each agricultural or industrial advance has been overwhelmed by ever increasing numbers of people in many less developed countries. There seems to be no "catching up" with the world's soaring rate of population.

About 40 years ago, this dilemma began to alarm some influential

people. They believed that food and economic aid should continue but it would be only a stopgap until developing countries got their population growth under control. This meant cutting the birth rate. And the best way to do that, they reasoned, was to educate as many people as possible in the use of contraceptives and other methods of limiting fertility. Private foundations funded educational programs to persuade people that planned parenthood, birth control, and small families were desirable. Many governments began giving out contraceptives at little or no cost.

Despite such efforts, populations kept climbing in places that could least support more people. In fact, as medical-aid and food-relief programs grew in generosity, populations shot up as never before. People still wanted large families.

Already controversial, population-control programs tried a new approach. Some countries offered various incentives—called "bribes" or "penalties" by critics—to get couples to limit their families to two children or less. The reasoning is that more than two children will mean a net increase in population.

I believe we, as Americans, have both an unselfish and a selfish reason to face up to the challenge of population. The unselfish reason is that we should not tolerate a billion or more people living at the brink of starvation or in abject poverty. The selfish reason is that the effects of overpopulation can drag us down, too. Our economic prosperity could not long survive in a world that could not buy our products, or pay its debts.

Facing up to the challenge of population means considering a great variety of deeply held personal, moral, ethnic, cultural, national and religious convictions.

Granted all the difficulties and others, the truth is that in spite of earnest efforts we have thus far failed to solve this problem. And time is running out for constructive solutions.

Anthony Wayne Smith is a Washington-based attorney who writes for The National Forum.

ION

Voter Registration

With a month remaining until the November 6 general election, the San Luis Obispo County Democratic Central Committee is bolstering its campaign efforts for presidential nominee Walter F. Mondale.

Wrapping up its voter registration drive with the approaching Oct. 8 deadline, the committee plans to now focus its concentration on two other campaign fronts, phone banks and canvassing county precincts.

Any person interested in volunteering to work for the Mondale-Ferraro campaign should call either the Democratic Central Committee office at 546-8499 or Lorie L. Smith at 541-0799.

Computers offer fair deal

by LISA MCKINNON
Staff Writer

The south wing of Chumash auditorium was filled with the glow of computer display terminals and the clicking sound of soft-touch keyboards during the Computer Fair on Thursday from 9 a.m. to 3 p.m.

Representatives from eight major computer companies displayed their wares to a steady stream of interested Cal Poly students and faculty who began to congregate anxiously outside the auditorium before the doors were unlocked a few minutes after 9 a.m.

The purpose of the Computer Fair, sponsored by the El Corral Bookstore, was to give the stu-

dents, and faculty of Cal Poly a chance to learn about the various computer systems which will be available in the bookstore.

AT&T, Apple, Hewlett-Packard, IBM, Leading Edge, Sanyo and Tandy (Radio Shack) have agreed to sell personal computers to university people through the bookstore at prices discounted 20 to 50 percent below the manufacturers' listed price. Tele-Video, which also participated in the Computer Fair, is expected to sign a discount agreement soon.

The promise of a discount was a strong draw for many of the students and faculty who attended the fair. "It's definitely a good incentive," said third year industrial

technology major Debra Hertig.

Hertig, who spent her summer working with computers, said that she was now interested in buying one for her own use. She added that the choice of discounted models now being offered by the bookstore is better than the Macintosh Apple deal that Cal Poly President Warren Baker turned down earlier this year.

"With the wider choice you can choose the computer that meets your needs," she commented.

The old Cal Poly Apple proposal was also on the mind of Bob Braverman, Apple's representative at the fair. Rather than harm business, however, Braverman said that the Macintosh was extremely successful, "especially here, because of all the pent up desire," brought on by the controversy.

During the Computer Fair each company displayed some of the fancier aspects of their products. Sanyo had a program called "French Curves," which drew and then colored in intricate pictures. AT&T showed off their fancy "Microsoft Flight Simulator," which filled the screen with all the dials and gauges of a pilot's cabin, and Hewlett-Packard had a special hook-up between screen and printer to produce line drawings of the space shuttle.

Mustang Daily — Stephanie Pingel

electronic engineering Professor Ray Harmon checks out the computers he has to offer at the Computer Fair in the University Union on Thursday.

CAREER

from page 1

when they graduate. "It gets people out of the trap of saying 'I've got a degree in civil engineering, but it doesn't tell a prospective employer anything,'" said Hayden.

A student should know about the jobs they are going for and what they personally have to offer.

Diaz said there are plans to hold a seminar titled "Whole Life Work Planning" on Nov. 17 in Room 220 of the University Union. "As our main goal for the year, we want to market our services to the students. By holding seminars around campus we hope to reach more students and make them aware of what Career Planning Services has to offer," he said.

For more information about the center or to make an appointment, stop by the Counseling Services Center in Jespersen Hall next to Mustang Stadium or call 546-2511.

\$21 million marijuana plantation seized

SANTA YNEZ, Calif. (AP) — Some 6,700 marijuana plants worth an estimated \$21.4 million on the street were seized Wednesday and Thursday by Santa Barbara County sheriff's deputies who also arrested three men in rugged back country.

Five other people fled the plantation discovered Wednesday which deputies estimated to be worth more than \$18 million on the street.

"They were running in shorts and T-shirts, and it gets pretty cold up there," sheriff's Lt. Jim Thomas said.

He said no further arrests were expected Thursday, but "if they're smart, they'll give up so they don't freeze to death."

Thomas said that helicopters hovering Thursday morning found another field with an estimated 1,000 plants, bringing the total value to an estimated \$21.4 million.

"This raid is at least triple our largest seizure marijuana ever in Santa Barbara County," he said, noting that the previous record was some 2,000 plants seized last year near Cuyama that were valued at an estimated \$6.4 million.

This week's raids brought the total seized this year to \$24 million. Thomas said 800 plants with an estimated value of \$2.56 million were seized three weeks ago.

Two hunters stumbled onto the fields earlier this week in the Cachuma Saddle portion of the San Rafael back country 15 miles north of Lake Cachuma and 110 miles

northwest of Los Angeles.

About 3,000 of the plants were airlifted out of the area Wednesday. The rest were being removed Thursday after law enforcement officials guarded the fields overnight.

The three arrested Wednesday

were identified Thursday by Thomas as Darryl Faccio, 27, of Laguna Beach; Karl Marvin, 29, San Diego; Michael Dickman, 26, Sacramento. They were held in lieu of \$50,000 bail, booked for investigation of cultivating and possessing marijuana for sale.

Technology's Leading Edge

Challenging opportunities in the U.S. Air Force are offered to motivated young men and women in the following categories:

- Program Management
- Weather Officer
- Physicist
- Chemical Research
- Behavioral Scientist
- Satellite Operations

If in the next 12 months you will earn a college degree in any of these areas, or an undergraduate specialization in mathematics, physics, computer science, engineering or industrial technology, you may qualify for a rewarding career as an Air Force officer. You must be under the age of 35 and a U.S. citizen. For more information, contact your Air Force Science and Technology Team. Contact

Two bikes stolen from dormitory

Two bicycles were stolen this week from a bicycle rack at Sierra Madre residence hall.

The bicycles were reported stolen Tuesday night, said Cal Poly Investigator Ray Berrett. Both were locked with cable locks to the Tower Zero bike rack.

One bicycle was a 12-speed, bright red Biscayne with a chrome front fork, quick release tires and gold pinstriping. It was valued at \$350, said Berrett.

The other bicycle was a 10-speed, black Azuki with a book rack, toe clips and red cables; its value was \$150.

In both cases, the cables holding the bikes to the rack were cut, said Berrett.

People should contact the Cal Poly Police if they are approached by someone offering to sell cheap bicycles or bicycle parts, or if they see people loitering around bike racks on campus, said Berrett.

Then get in on the ground floor in our undergraduate officer commissioning program. You could start planning on a career like the men in this ad have. And also have some great advantages like:

■ Earning \$100 a month during the school year

■ As a freshman or sophomore, you could complete your basic training during two six-week summer sessions and earn more than \$1100 during each session

■ Juniors earn more than \$1900 during one ten-week summer session

■ You can take free civilian flying lessons

■ You're commissioned upon graduation

If you're looking to move up quickly, look into the Marine Corps undergraduate officer commissioning program. You could start off making more than \$17,000 a year.

We're looking for a few good men.

New schools of thought

A Dutchman in America finds education less structured here

MICHAEL MARTER

Staff Writer

Visiting Dutch geography professor Cees Eyesberg began teaching this fall as a blank spot on his students' CAR forms.

He didn't know what classes he would teach until a few days before they began, nor did he even have time to order textbooks.

As a new professor in a foreign country, Eyesberg found the somewhat informal atmosphere of American universities a bit disconcerting.

In Holland, he explained, the educational system is more standardized. Students attend high schools catering to scientific, professional or vocational interests and, if they are chosen to attend a university, must select a major before entering and have all their classes planned for them. "It's not an educational supermarket. I think there are pluses and minuses

on both sides. When I was in Holland I had a light preference for the American system, but now that I have met the add and drop system I am not so sure!" said Eyesberg, jokingly.

Eyesberg's office isn't much different than any other faculty office. There is the usual selection of books and the slight clutter that seems to come with academia. His bicycle and pipe dutifully wait for more relaxing times. The accent of the tan and trim Dutchman is noticeable but not difficult to understand. His speech is not as fast as an American's, but his vocabulary reveals a learned man. Eyesberg will be teach at Cal Poly through Spring Quarter.

He said the uniform policies of Dutch education make teaching in Holland somewhat easier because instructors knew the approximate backgrounds of their students. With American students coming

from diverse educational backgrounds, he said, the range of knowledge between students can be considerable. "It is difficult to figure out where to start," he said.

Although Eyesberg was somewhat critical of the American "supermarket" approach, he said the disciplined student can plan a responsible curriculum while maintaining educational variety, although he is not sure if all students are capable of such planning.

On the other hand, Eyesberg said, the Dutch rigidity of curriculum can be confining to students. But, things are slowly changing. "There is more differentiation now than when I was in high school," said Eyesberg.

Eyesberg finds the level of formality at Cal Poly to be about the same as that of Utrecht University in Holland, where he dresses largely as he does here. A university elsewhere in Europe, say in Ger-

many or France, or even in the eastern United States would probably be more formal in both dress and student/instructor relationships, he said.

He finds Holland and the U.S. similar in many respects, often more similar than Holland and the rest of Europe. "Americans I have talked to in Holland have found it easy to integrate." More so than the rest of Europe, he said. Eyesberg finds Dutch society largely the same as American society—very open, democratic, and sociable. "If you visit a campground in Europe you will find the Dutch people gathered around talking."

But there are some fundamental differences between the two countries. Holland does not enjoy the economic self-sufficiency of the United States and therefore must be adept at dealing with other economies. "Basically we are a

very commercial people—the largest foreign investor in the U.S. It explains why we have to learn a lot of foreign languages and geography," said Eyesberg.

Though Dutch education does employ a certain degree of pragmatism, he believes American

education is still more job-oriented. "In Europe and Holland people are more interested in education for itself—not just to get a job. In the U.S. the culture is more pragmatic."

Eyesberg has visited the U.S. twice before and will soon publish a book on American geography. He enjoys speedskating, bicycling and listening to jazz. With a strong interest in architecture, Eyesberg designed his own home and built part of it himself. He has a wife and two children aged 18 and 20. His daughter attends Cal Poly.

Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions—more functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed

to perform complex calculations—like definite integrals, linear regression and hyperbolic—at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included is the *Calculator Decision-Making Sourcebook*. It makes the process of using

the TI-55-II even simpler, and shows you how to use all the power of the calculator.

Rodeo week begins

Daniels concert, rodeo end week

The Cal Poly Rodeo Club and the business club SAM (Society for the Advancement of Management) will coordinate "Fall Rodeo Week" Oct. 8-14. Activities are planned by ASI Concerts, ASI Films, ASI Outings and the agricultural fraternity

Alpha Sigma, and will culminate with a rodeo and a concert by the Charlie Daniels Band.

The collaboration hopes to bring the agricultural and academic facets of Cal Poly closer together.

The Mustang Daily will preview "Rodeo Week" with stories on the events and the Cal Poly rodeo team Monday.

Teams playing at home this week

Saturday, the women's volleyball will play Arizona State at 7:30 p.m. in the Main Gym. Also at 7:30 p.m. Saturday night, the men's soccer team will play a match against Loyola in Mustang Stadium.

The women's soccer team will move into Mustang Stadium on Sunday, 1 p.m., for a match with Fresno.

All three teams are in the running for a league championship. The games are free to students.

Mustang Daily — Daryl Shoptaugh

SF looking for manager

SAN FRANCISCO (AP) — Felipe Alou, a former San Francisco Giants player who now manages in the minor leagues, will be interviewed for the Giants' vacant managing job, it was reported Thursday.

Tom Haller, the Giants' general manager, told the San Francisco Chronicle that he had received permission from the Montreal Expos to interview Alou, who is a manager in the Expos' farm system.

"I'll be calling him in the next couple of days," Haller said in Scottsdale, Ariz., where he was attending a Giants' organizational meeting.

Jim Davenport, a coach with the Giants, has been interviewed for the job. Others reportedly interested include Jim Fregosi and Hal Lanier.

Federals bought; team may move

ORLANDO, Fla. (AP) — Businessman Don Dizney has signed a \$5 million deal to buy the Washington Federals and intends to bring the team here for the 1985 United States Football League season, according to a published report.

Dizney and his embryo ownership group signed a revised purchase agreement for the Federals last night and the deal will be announced at a news conference today, sources told the Orlando Sentinel.

"The deal is as good as you'll ever see. I don't think you'll ever again see a pro football franchise bought at this price," Robert Fraley, an attorney for Dizney, told the newspaper.

When asked if all that was needed to complete the deal was to obtain letters of credit from an Orlando bank and formal approval from USFL owners, Fraley said, "That's about it," the newspaper reported.

The negotiations concluded a month-long attempt by Dizney, chairman of the board of Orlando-based United Medical Corporation, to buy the Washington team.

Poly tries to get on winning road

After two losses Mustangs travel to Santa Clara

By ROSEMARY COSTANZO

Sports writer

Western Football Conference play begins this weekend as Cal Poly travels to Santa Clara to battle the undefeated Broncos.

"I think score-wise they (Santa Clara) are favored because they beat Davis and we didn't", said head Mustang coach Jim Sanderson.

Despite the fact that Cal Poly dominated almost every statistical category last week they lost to the Davis Aggies, 10-6.

"Our problems are pretty evident", said Sanderson, "when we get into scoring position we self-destruct. We made too many mistakes and Davis was able to capitalize on them."

One mistake that hurt the Mustangs early in the game was when right cornerback Keenan Stanley returned a punt 68 yards for an apparent touchdown in the

Football...

from page 10
first quarter. A clipping penalty wiped out the runback.

The Mustangs failed to score from the one-yard line in the third quarter and Cal Poly outgained Davis 311 yards to 219. The Mustangs recorded 15 first downs to the Aggie's 9.

And the Mustangs ran off 72 plays and had the ball for 34 minutes while in the Aggie's 26 minutes of possession they got off 60 plays.

"We have to get our offense cranked up," said Sanderson. Starting quarterback against Santa Clara will be Yale Keckin. Keckin has completed 30 of 71 attempts with four interceptions and one touchdown.

The top receiver for Poly has been tight end Damone Johnson with 12 catches for 173 yards. Johnson is followed by wide receiver Clarence Martin who has 7 catches for 126 yards.

Top ground gainer is running back Gary Myers. Myers has picked up 322 yards on 70 carries including two touchdowns. Myers is ranked number two in total yards rushed in the Western Football Conference. He chalked up his second 100 yard game of the season against Davis.

Mustang Daily—John Bachman

Umpires still out on strike

Richie Phillips, the attorney for major league baseball's striking umpires, resumed talks Thursday with Chub Feeney, president of the National League, and Bobby Brown, president of the American League.

Meanwhile, the scene of the NL playoffs shifted to San Diego for Game 3 in the best-of-five series, with a new set of umpires selected to replace the four-man crew that worked the first two games at Chicago, both won by the Cubs.

After Chicago's 4-2 victory Wednesday pushed San Diego within one loss of elimination, Jack McKeon, the Padres' general manager, assailed the two league presidents for what he saw as their failure to head off the strike.

"Why don't they get off their rear ends?" McKeon said. "They were slow at the switch. They've been dragging their feet on this."

Phillips, who met with Brown at the AL playoffs between the Detroit Tigers and the Royals at Kansas City and then with Feeney in Chicago, was back in his Philadelphia office Thursday and on the telephone with both league presidents.

Phillips' office declined to characterize the talks or say if there was any progress.

But upon returning from Chicago late Wednesday, Phillips said: "I don't want to say we're close. The meetings ... helped give us a clearer understanding of each other's problems. But I wouldn't say we're close."

The key issues in the umpires' dispute involve pay and job security, two areas covered for only two years in the four-year agreement reached in 1982. Those parts of the contract expired Sunday, when the regular season ended.

In the first four playoff games, only two minor controversies involving the substitute umpires arose, both in Wednesday's games.

Generally, the umpires have received passing grades for their work.

"I don't think you're going to find any better umpiring than they've done," Detroit Manager Sparky Anderson said. And Dick Howser, manager of the Royals, said, "I thought the umpiring was good."
