Monday, April 11, 1988

Peters (right) speaks with a group of young Masai warriors about the progress of their newly begun community development program.

## Speaker tells of helping world

World Neighbors gives a 'hand-up, not hand-out'

By Meda Freeman  
Staff Writer

A two-time Nobel Peace Prize nominee and founder of World Neighbors, an organization that guides people in underdeveloped countries toward a better standard of living, will speak tonight at 7 in the Cal Poly Theatre.

John Peters didn't know that a sermon he gave in 1951, inspired by the suffering and need he saw while in the military, would change not only his life but the lives of more than 25 million people in 41 nations. The support and interest that Peters, then a recent Ph.D. graduate of Yale, received after his sermon led him to form World Neighbors in 1952.

The organization was one of the first to be formed with the idea that these people need a "hand-up, not a hand-out" in order to survive. It is a private, non-profit, non-sectarian organization that helps underde-

veloped nations improve their food production, health and family planning. Allowing people to keep their dignity and self-respect while teaching them to be self-sufficient is essential to the success of World Neighbors, said Peters.

"The word 'neighbor' in World Neighbor is really meaningful," said Peters. "You don't exploit neighbors. You don't use them as guinea pigs. You don't try to build on them. You work with them from the bottom up, letting them grow on their own."

"A great deal of the world doesn't recognize the strength and the power and the wisdom of their people at the bottom, like the guy on the rice paddy," said Peters. "These are not stupid people. They may not have had the opportunities others have, but they're wise. They know how to improve their lot if given a chance."

Approximately 450 full-time workers and 1,000 volunteers help communities in Asia, Africa and Central and South America utilize and manage natural resources. World Neighbors has an annual budget of \$2.8 million, which includes the salaries of all full-time employees. All the funds

## Candidates share views on issues

By Alison Skratt  
Staff Writer

The presidential and vice presidential candidates in the upcoming ASI elections were recently asked their views on several issues. Here are their responses:

**ASI presidential candidate Tom Lebens, electronic engineering senior.**

*What should be done with the dormant bowling alley space?*

Lebens believes the option that serves the most students should be chosen. His personal choice would be a "multi-use" room, housing perhaps a computer lounge, a theatre, and meeting rooms, or any feasible combination. When choosing between the two given options on the ballot, Lebens would choose the fitness center for its future flexibility (its second-generation usage as meeting and office space).

*How do you feel about the proposed ASI fee increase?*

Lebens will vote in favor of it. Without the increase, he said, there will be cutbacks for things such as the Poly Wheelmen. "The amount of money (asked for) is not a lot to make the programs fly again."

*If enrollment increases, how should we handle it?*

"We don't have a lot of control over (growth)," said Lebens, because a Chancellor's Office mandate is on the way. Although more students could be bad for the school, he said, they would mean additional faculty and therefore perhaps improve GE&B class availability.

*What would you do to increase minority enrollment?*

Cal Poly needs a widespread commitment to minorities, not so much academically, but socially. "It's very, very difficult for minority students to come to Poly and be successful, because San Luis and Poly are uncomfortable places for them" be-

cause the area is predominantly white. There's a two-fold solution to this: getting high school minority students informed about the careers Cal Poly can help with, and developing support groups with minority students and faculty once the students get here.

*How do you see relations with the city?*

Lebens is looking forward to working closely with the mayor. And after working as ASI community relations officer last year, and having monthly lunches with Mayor Dunin, he feels he already has a jump on it. He wants to look at student/community relations in a broad manner. He feels the police are focusing too much on just the Greeks, who are taking the brunt of student-city related problems, rather than looking at the whole issue of student/community relations. Lebens wants to create a Community Relations Plan that outlines protocols and lines of communication and continue the Student/Community Liaison Committee.

*Have you ever smoked marijuana?*

No. I never really thought about it, or had the urge to.

*Will having your father as an administrator (Frank Lebens, associate vice president for Academic Resources) help or hinder your position next year?*

"It's 100 percent a help," he said. "I've never felt compelled to make decisions based on my father's views. And it helps immensely with how I relate to the administration. I've known most of the administrators since before I came to Poly, so I don't have to set up the lines of communication."

*Do you think this one-candidate per office phenomenon will continue?*

Lebens doesn't think so. For

## Career expo expected to aid in job search

By Hope Hennessy  
Staff Writer

Summer internship, cooperative education and career job opportunities will be featured at Career Expo '88 today in Chumash Auditorium.

More than 60 organizations from San Luis Obispo to as far away as Alaska are scheduled to attend the job fair which is open to all majors, according to Ellen Polinsky, coordinator of student employment at the Placement Center.

The employers attending represent the managed recreation and leisure industry, the service economy, and the fields of applied arts and sciences.

Polinsky said the organizations that were invited were chosen because of input from professors in the School of Professional Studies and Education, which is sponsoring the fair in cooperation with the recreation administration program, Rec Sports and the Resident Student Development Office.

The morning session, from 10 a.m. to 1 p.m., will consist of an open forum where students can take a first-hand look at job opportunities, discuss employment options with organization representatives and schedule interviews for Monday afternoon.

Amy Frelly, Disneyland Employment interviewer, will open Career Expo '88 on Monday morning by addressing the topic of "Forecasting the Future: The Theme Park Market."

Polinsky said the primary goal for the job fair is to bring a wide diversity of organizations to campus that are not well represented through the on-campus interview and recruiting programs.

"One of the most important things for a student is not to narrow his or her focus or views of what they can do with their major," said Polinsky. "This is an opportunity to walk around and say 'I'm an English major. These are my skills. What kind of

## Computer spurs energy efficiency

By Diane Wright  
Staff Writer

Students renting a home or apartment can save on utility bills with good weather stripping and by checking their furnaces regularly, said an energy expert and former Cal Poly professor Friday.

Ronald L. Ritschard, who is conducting research at Berkeley, gave a slide show on a computer program used to predict energy efficiency in buildings.

The goals of Ritschard's research, funded by the Department of Energy, are to design buildings used by the government and for public housing

to be energy efficient.

"Energy runs the federal government \$1 billion a year," Ritschard said. He added the public pays for government energy use through taxes.

"Buildings now account for one-half of the energy used in the United States," he said.

Ritschard's research team has developed a computer program called "Pear." Several Cal Poly architecture professors are considering using "Pear" in classes.

Architects input design alternatives into "Pear" and the cost of materials is compared to the estimated amount of money saved in lower heating costs. The lifespan of materials is computed. For example, said Ritschard, most insulation lasts 20 years and pays for itself in 10.

### Student Senate

The senate will hold a special meeting concerning approval of the ballot face at 6 p.m. today in University Union Room 220.

Today's the deadline for entries in the Academy of American poets' annual college poetry contest. The best poem/poem group will get \$100. Submit poems (200 lines or less) in an envelope with your name, address and number to the English dept.

## EDITORIAL

### True colors

All Dennis Hopper, Sean Penn and Robert Duvall want to do is put out a movie. But a paranoid bunch is trying — stupidly (for want of a better word) — to prevent that.

"Colors," a film depicting gangs in Los Angeles, is directed by Hopper and stars Penn and Duvall. Scheduled to open Friday, it would come right on the heels of some of the worst gang violence in Southland history. "Colors" will fan the flames by glamorizing gangs, say some law-enforcement officials, and therefore should be banned in Los Angeles.

But kids don't join gangs because they've seen a movie. They get sucked up because of the wretched conditions surrounding them — socio-economic factors, not cinematic achievements. Gang warfare will flourish whether anyone sees "Colors" or not.

About the only thing banning the movie would do is endanger our First Amendment rights by setting a dangerous precedent. As our civics books so emphatically declare, the United States is a "marketplace of ideas." Theoretically, free expression gives us the opportunity to browse through the market until we find the ultimate truth. If everything found to be offensive or dangerous by anyone was banned, what would we be left with?

"Colors" is a critically acclaimed film that can do no worse than raise our awareness of gangs. The show must go on.

## My stab at the bowling conflict

Believe me — you've no idea how much I really hate to bring this up. Discussing the bowling alley on this page is likely to get me sent to cover a Student Senate meeting, a quagmire of confusion that surpasses only the bowling alley fiasco.

If you're still with me, congratulations. It shows that you, too, are bowled over by the avalanche of feces that is the bowling alley controversy. Courtesy of the people who brought us this disaster (ASI, U.U., Foundation, Chancellor's Office), we are graciously being given the chance to tell "them" how much we would like to see it disappear. This week we get to "guide policy" by voting in the now-annual bowling referendum.

What we're really doing is participating in a giant opinion survey. Our votes simply tell President Baker and the Student Senate what we want to use the bowling alley space for. Beyond this, the vote is meaningless. Baker and the senate can do exactly what they want with the bowling alley. Nevertheless, it is important that everyone vote. If you're irritated with this mess, please vote and give the powers that be a representative sampling. Because for all eternity, Baker and the senate will look back on this, excuse themselves, and say "We only did what you wanted." It's our job to make sure the referendum rings true.

Whatever the result, it's going to cost. The damn thing is costing us big now, and serving no purpose other than to collect the dust that our student representatives use to constipate their brains. A recent audit found that it costs \$28,637 a year to watch some bowling lanes for three years.

Since we've been paying for nothing for so long, it makes sense that we should choose the path of least expense for the future. Besides, whatever happens, we'll end up with far more than we've ever had before, and who can cry about that?

The path of least expense is to keep the bowling alley and turn Mustang Lounge into a fitness center. It will cost roughly \$33,000 to reopen the lanes, 10 times less than a new fitness center would cost in its place. Politically, many students would like to see the bowling

## A WEISER PERSPECTIVE

Matt Weiser

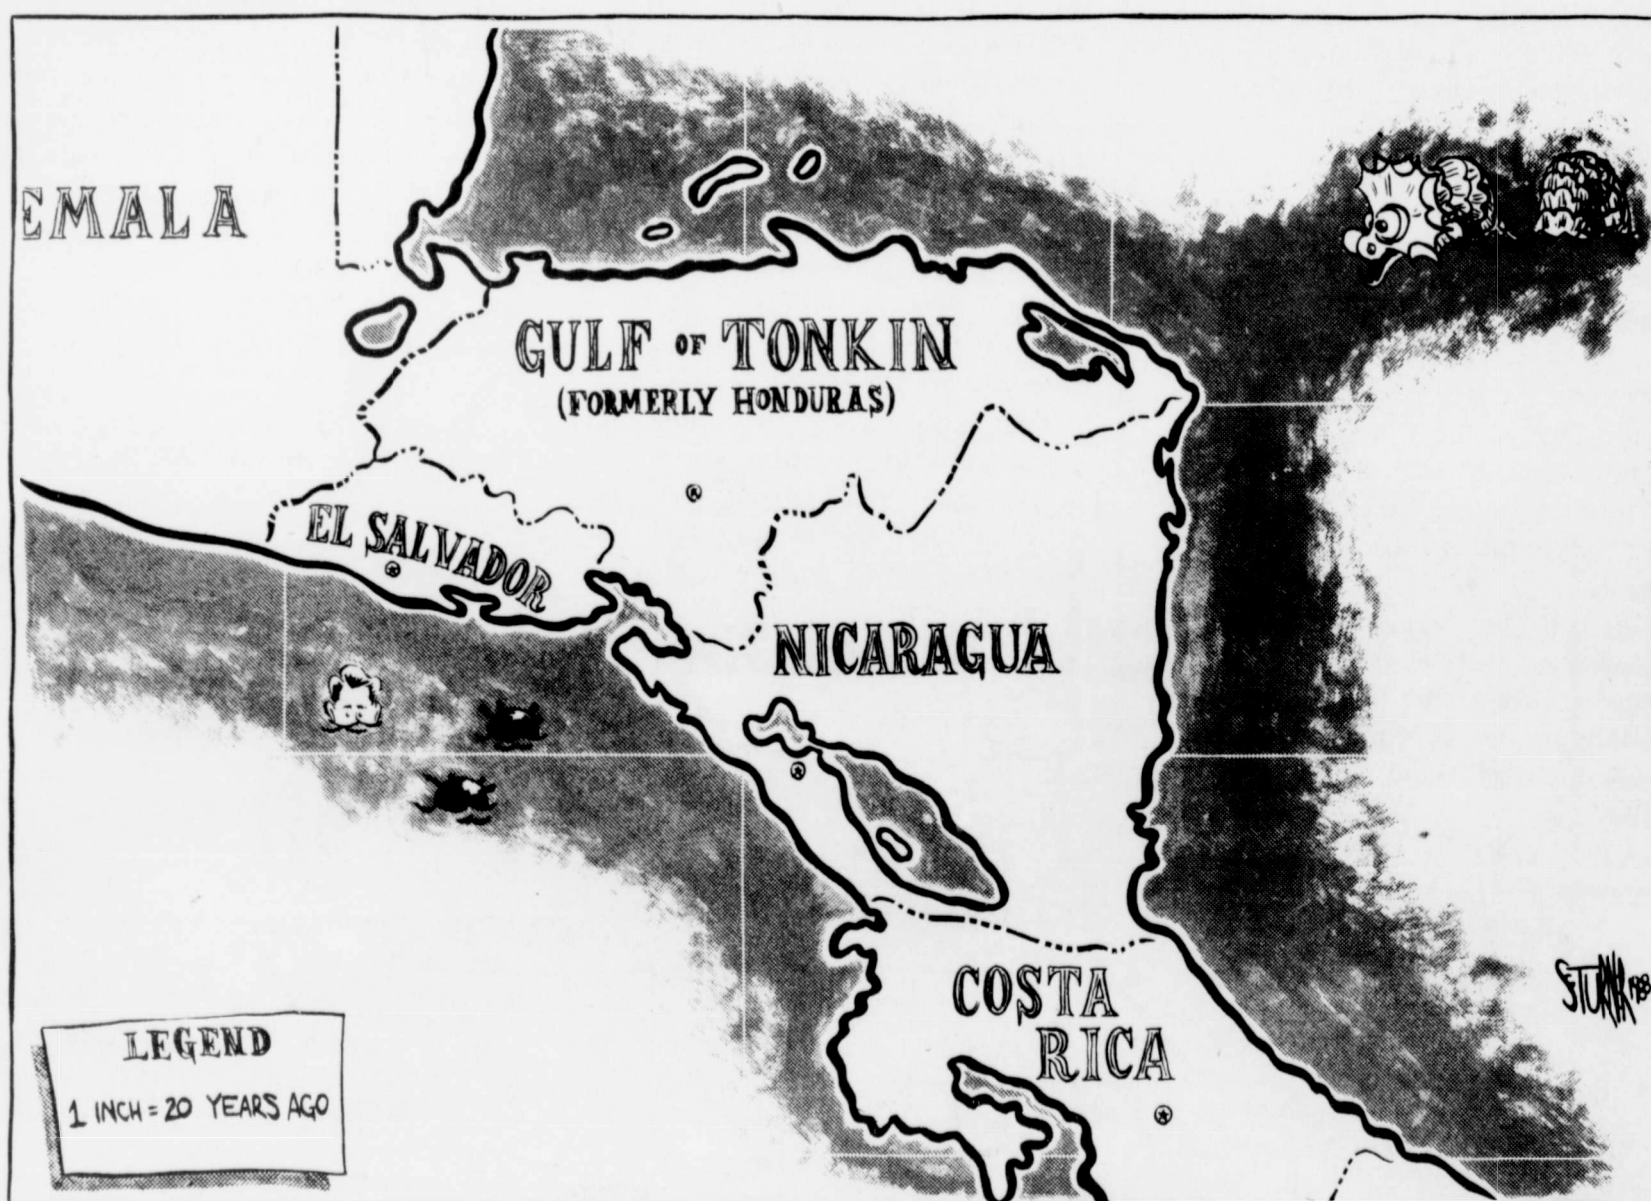

alley reopened. Financially, this is the cheapest, most attractive alternative at a school so recently addicted to fee increases. Baker and others seem to have a sick desire for a fitness center. But it would only be functional for three years, until the nearly mythological rec center raises itself like a zit, making all other forms of recreation and fitness obsolete.

Truthfully, it would be nice to have a fresh place to work out. The old bomb shelter beneath the gym is better for mass burials than weight lifting. And when the rec center does raise itself from the ashes, we'll certainly have no complaints with two sweatshops. If we ever get tired of so much exertion, we can simply go bowling. And if the rec center proves to be all we need (why wouldn't it), the Mustang Lounge/fitness center could be easily converted into a desperately needed meeting facility.

This bowling/fitness option gives the greatest versatility, and thus should satisfy the most people. A ridiculous option that does neither is the one that calls for a fitness center where the bowling alley is, and a pizza parlor where Mustang Lounge is. A pizza parlor! Who's responsible for this?

First of all, we have enough places to strap on a feed bag, all of which are becoming more expensive and less satisfying. Second, the changes necessary for a pizza parlor would make it difficult to reconvert the area again. Third, Rec Sports would lose valuable space for its popular activities. Fourth, a joint that sold only pizza would flounder. Add beer, however, and they'd make enough

## LETTERS TO THE EDITOR

### Call the mountain by its real name

Editor — I was appalled to read Marianne Biasotti's column on the Easter sunrise service (April 7). Ignorance is no excuse for a journalism major, and Marianne neglected to get the facts.

Some students may refer to it as "Madonna Mountain" because they have heard others calling it that and because it has the big white M put on its face so lovingly by Alex Madonna. He may own the mountain and the surrounding land, but it is not Madonna's mountain and never will be. He is only a temporary caretaker of the land, and not a good one at that.

Cerro San Luis Obispo was the name given this majestic mountain more than 200 years ago by the Spaniards in honor of the town nestled at its base. It is the name used on all maps, city and topographical.

Get your facts straight. Cerro San

Luis Obispo is certainly more suitable, historically and aesthetically, than "Madonna Mountain."

SALLY DAVIS

### P for pollution

Editor — Recently, I hiked with two friends from Kansas to the ugly P on that beautiful hillside. The view was magnificent, but the area below the P is a mess of cans, bottles, pipe, plastic, paper — trash. What a way to impress visitors!

Letters concerning election issues and candidates must be submitted by 2 p.m. today. They will not be published after Tuesday.

Letters must be typewritten, 200 words or less, and include the writer's name and phone number. Mustang Daily reserves the right to edit letters for brevity and style.

# Conservative Wally blasts Democrats, gays, commies

By Marianne Biasotti  
Staff Writer

A cult following of mostly college-aged males Friday night screamed and chanted as their bombastic leader preached conservatism in its truest sense, hailing Reagan as the greatest president ever, slamming communism, Democratic candidates, gays, feminists and everything that is not red, white and blue.

Wally George, the infamous host of "Hot Seat," a Los Angeles-based, ultra-conservative talk show, was received by enthusiastic fans as he stormed Cal Poly for the second year in a row.

George said he is popular with his college-aged audience because he's considered one of them.

"I say the things they'd love to say — I won't take crap from anybody and they relate to that," George said.

Not only did the Cal Poly Rugby club make George an honorary member last year, but this year he became the honorary member of the ROTC Mustang Battalion.

But despite such seeming adoration, ASI Special Events Chair Jonathon McNaull said he was disappointed in the turnout of about 300

this year, when compared to the 800 who came last year.

Still there were a few boos, but mainly cheers as George shared his philosophy:

## Democrats:

"Can you believe the losers in the Democratic party... If we elect Dukakis, (who says) maybe we should believe Russia, we could see the hammer and sickle flying over Washington D.C. ... There must have been a commie takeover plot, because Jesse Jackson won (the mock election) on this campus — some of the Democrats on this campus must have stuffed the ballot box!"

## Homosexuals:

"They say if the gays want to be gay, let them be gay. I say if they want to be gay, let them get out of the U.S.A ... They keep calling for more gay rights — the gays, these idiot animals, should have no rights ... God didn't create Adam and Steve. He created Adam and Eve ... If I were president, I'd outlaw homosexuality in America." He said homosexual males are responsible for AIDS in this country.

## The U.S.S.R.:

"Gorbachev thought Reagan would crumble when he demanded that (Re-

agan) give up Star Wars. Reagan stared that little fat slob in the face and said 'Wait a minute, Porky, you're dealing with Reagan now!' ... We're not trying to take over anybody, we're only trying to save the free world from a massive communist takeover."

## On the American Civil Liberties Union (ACLU):

"This is a perverse, dangerous, organization. They're trying to remove 'In God We Trust' from our currency, no '(one nation) under God' in our pledge, and no Christmas songs in our schools or displays in the stores ... it's an all-out war against God, which leads us one step closer to communism ..."

This showmanship, or dynamic, forceful personality as she described it, is what first attracted Janice, George's new 21-year-old wife, to him. She also thought "he was a hunk," and sent him a letter with a photo enclosed. He immediately wrote her in England, her native country.

"One of the things that attracted me to Janice was her extreme femininity — she won't try to be a man," said George. He added that he thought the feminist movement has destroyed femininity in women.

Wally George with his wife, Janice

## ENERGY

From page 1

"The most important comparison is the economic comparison of savings in money over the time period," Ritschard said. He said some materials do not give the same amount of energy savings in all future years. If materials wear out quickly, the amount of energy saved can be less two years after it is installed than the saved energy after the first year. "Pear" makes this calculation.

Ritschard said the computer program is aimed at the average, large builder planning homes in a tract.

In addition, the research could provide a labeling system to assist buyers in buying a home.

"Pear" can be used on any IBM-compatible computer and it can do calculations for 800 cities, including San Luis Obispo. Copies of the program will be available soon from the U.S. Department of Energy.

See ENERGY, back page

## EXPO

From page 1

jobs do you have and can I do these things? Or listen to what a recruiter has to say and you'll find yourself saying, 'Wow, that's something I never knew I could do with my major.'"

Polinsky said Cal Poly students limit their work options because they come into Cal Poly with a chosen major, and they think there are only certain jobs that people in their major

do. "Sometimes you find out you can do a lot more than you thought you could. I encourage students to come and talk to people. This is a great opportunity to meet with a lot of representatives from different companies in an informal situation," said Polinsky.

"The interviews are informal," she said. "You don't have to get dressed up in a three-piece suit or a dress. You don't have to sit across a desk from somebody in an isolated little room. You can be more yourself."

Last year's Expo provided more than 100 jobs for students. This year more job offers are expected with the broader spectrum of companies and more than 20 additional organizations, according to Polinsky.

She expects most organizations to offer summer jobs.

"It will be helpful for freshmen and sophomores to come. They can see who's out there and what kind of things are happening. A lot of the companies are willing to talk to them and the possibility of picking up a summer job is good," she said.

## Win streak now at 20 for women

SOUTHERN CALIFORNIA — The Cal Poly women's tennis team is on such a hot streak that even after playing four matches in three days, without its top two players, it couldn't be slowed down.

The Lady Mustangs extended their winning streak to 20 games with wins over Air Force, University of Denver, University of Northern Colorado and UC Riverside Thursday, Friday and Saturday.

The team is now 11-0 in conference and 20-2 overall.

The slew of matches was a test of depth and strength for the team, said head coach Miguel Phelps. Top singles players Wendy Elliot and Vicky Canter did not compete in the matches.

Peased with his team's performance, the coach said, "I have a lot of confidence that we can pull through in any situation."

The first three matches were in the Cal Poly Pomona Bronco Invitational. Cal Poly defeated Air Force on Thursday, 7-2, Denver on Friday, 6-3, and Northern Colorado Saturday morning, 5-0.

Phelps said Debbie Matano, in the No. 1 spot, played an exceptional game against nationally ranked Susan Wheeler. She gave Wheeler a fight, but finally lost, 5-7, 7-6, 7-5.

Cal Poly had an easy time against conference-rival Riverside Saturday afternoon. The Mustangs took the six singles matches in straight sets, and then called it win.

"We just tuned them. It was over in about an hour," said Phelps. "Our motto for the day was, 'Patiently put the balls away with power.'"

Mustangs Cici Barbe, Danica Armstrong and Tracy Matano went undefeated all weekend.

See TENNIS, page 6

## Gymnasts fail to qualify in divisionals

CORVALLIS, Ore. — Sophomore gymnasts Mimi Phene and Kim Wells didn't place in any events at the National Collegiate Athletic Association Division I gymnastics championships Saturday at Oregon State University.

Winners advance to the NCAA national championships.

The competition consisted of the top eight Division I regional teams and a few individuals selected for at-large berths. Phene and Wells qualified for the at-large spots after they finished with all-American honors at the United States Gymnastics Federation national championships two weeks ago.

Oregon State University won the competition with 188.55 points. UCLA followed with 187.20.

Other team scores were University of Washington, 186.05; Cal State Fullerton, 185.7; Stanford, 182.95; Seattle Pacific, 178.50; and Boise State, 177.30.

Mustang pitcher Keith Chura

## Baseball loses 2 in 3-game stand

Can't produce offense in final games

By Terry Lightfoot

Staff Writer

The Cal Poly Mustang baseball team began a four-weekend homestand by winning one game Friday, and then dropping a doubleheader to Cal State Los Angeles Saturday.

The conference losses drop Cal Poly's record to 18-19 overall and 7-8 in conference play.

Friday's game was a close and slow-moving, according to pitcher Erik Bratlien. Going the full nine innings, Bratlien gave up six hits.

It was not an easy win for the pitcher though, as he came close to giving up the game in the seventh.

The Mustangs were up 3-1 going into the inning. With the bases loaded and no outs, Bratlien struck out two, and the last batter flied to center.

The win brings his record to 4-3 in conference and 8-5 overall.

The Mustangs produced little offense in the first game of the doubleheader Saturday, as they generated only one run in the 6-1 loss. The Eagle pitchers held the Mustangs to five hits and fanned 10 batters.

The game stayed at 2-1 until the eighth, when Los Angeles scored four runs on bad plays and errors.

Leading hitters for the Mustangs were the Robert Hale and Edwin Fines both getting two hits in four at bats.

Mustang Lee Hancock pitched for eight innings, and Phil Crumback

went in to relieve in the final inning.

In the final game Poly fell behind early and never became a threat to Cal State. It was the fourth inning before Poly got its first hit, and by that time the score was 8-0.

Cal Poly's frustration was highlighted in the fourth when a soft fly ball was dropped in foul territory. On the very next pitch the batter powered a home run over the left field fence.

Poly scored on two hits in the fourth and added two more in the fifth to make the final score 8-3.

Leading hitters were Chris Vodanovich, who went 2-4, and Rick Nen and Billy Smith, who went 1-3.

The eight runs, including a home run, were credited to Mustang Keith Chura, who pitched into the fourth inning. Brad Hoyer and Jeff Labrado finished off the game for Cal Poly.

The loss drops Chura's record to 1-1 in league and 4-3 overall. The Mustangs will travel to Fresno State Tuesday for a nonleague game, and then will begin another home stand Friday against league-rival Cal Poly Pomona.

The Mustangs need to win six of the next eight league games if they want to have a chance at the conference championship, said Chura.

He said the team is capable, but "We're going to have to rebound from this doubleheader. The next three weeks will tell us if we have a chance."

## Top finishes, records set for track teams

Men 3rd against top powers

FRESNO — The Cal Poly men's track team posted a strong third-place finish behind Division I powerhouses Fresno State and University of Illinois in the Fresno Relays Friday and Saturday.

Cal Poly logged six first-place finishes in the 21-team competition — the team's best performance this season.

Head coach Tom Henderson said it was a tremendous showing for Cal Poly. "It sets up the end of the season beautifully. We also made the rest of the CCAA very nervous," he said. "Our performance also indicates our outstanding scoring potential at the NCAA Division II national championships."

Mustang Chris Craig won the 10,000-meters with a lifetime best time of 29:52.12. The time is the second in the CCAA this season.

behind teammate Mike Livingston's 29:48.89.

Craig led for 24 of the 25 laps, and lapped all but four runners. He won by 44 seconds.

Livingston's and Craig's times are the fastest for Cal Poly since 1983, and it's the first time since 1981 that two teammates have times below 30 minutes.

Livingston knocked 18 seconds off his lifetime best time with his second-place finish in the 5,000-meters. He leads the CCAA in both this event and the 10,000-meters, and this time ranks as one of the fastest this year in NCAA Division II.

Cal Poly's Paul Ghidossi, Michael Miner and Tim Campbell finished fifth, sixth and seventh, respectively.

See MEN'S TRACK, page 7

## Women qualify 2 more for nationals

LOS ANGELES — Two more women's track team members qualified for nationals and five set personal records at the USC Twilight Meet Saturday.

Senior Angela Lee qualified for nationals with her 20-2 1/2 long jump. The third-place finish, a personal record for Lee, leads the CCAA and ranks second in NCAA Division II.

Head coach Lance Harter said it was the performance of the meet, as the jump added a foot to her previous best.

Freshman Gina Albanese set a personal record with a 15.11 time in the 100-meter high hurdles. Her performance is fourth in the CCAA.

Albanese had a busy Saturday, as she also set a personal record in the 400-meters with a time of 57.58.

Harter said although Albanese is primarily known as a hurdler, her speed continues to improve in this event. The results will carry over to the 400-meter low hurdles, he said.

Also qualifying for nationals was freshman Aeron Arlin, in the 800-meters. Her 2:10.63 time is a personal record, and 10th on the all-time Cal Poly list.

The performance was a real breakthrough for Arlin, who has a high school best of 2:19, said Harter. "But she definitely has more in her. The next step is to get below 2:10," the coach said.

Freshman Kris Kocher began to break out of her slump as she posted a season best in the 800-meters with a time of

Sports Editor

The Hornets are probably still wondering what hit them.

The Cal Poly men's tennis team blew away Sacramento State, 8-1, at home Saturday, with every match decided in straight sets.

The win ups their overall record to 13-8, and their league record remains at 6-2.

The Mustangs had the win wrapped up after singles play. Sacramento's

### MEN'S TENNIS

fifth and sixth singles players were no trouble for the Mustangs. Dale Minney defeated Jordy Banner, 6-0, 6-2, and Alex Havrilenko had an even easier time of it, wiping out Tim Gaillard 6-0, 6-0.

Other singles matches weren't quite so simple.

After the first set went to a 7-6 tie-breaker, top player Mike Giusto pulled his act together and took the final set against Todd Stanley, 6-2. The nationally fifth-ranked Giusto was playing his last home game for Cal Poly, as he graduates in June.

In the No. 2 match, Cal Poly's Joe McDonough took the first set easily and won the match with a tie-breaker. His final score against Matt McDonald: 6-0, 7-6.

Joe McDonough

Mustang Tim Fresenius defeated Mike Norton, 6-4, 6-3, in the No. 4 match.

Sacramento's Beat Bossart took Eric Sasao, 6-3, 6-3, for his team's only win.

See TENNIS, page 7

TOM VISKOCIL/Mustang Daily

## MEN'S TENNIS

From page 5

Cal Poly was able to sweep the doubles matches. The Mustangs' top team of McDonough and Havrilenko outplayed Stanley and Banner in the 6-2, 6-4 win.

The No. 2 match was closer, as Mustangs Brendan Walsh and Minney took it, 6-4, 7-5, against Bossart and McDonald.

Neal Berryman, usually Cal Poly's top doubles player and No. 2 singles player, returned to action Saturday as he teamed with Sasao in the No. 3 match. The pair beat Norton and Darren Rojo, 6-4, 6-4.

Berryman, who missed six matches with a pulled stomach muscle, said the win could have been easier. "It's hard to get your timing back. I didn't get my serve going until the second set."

He said he will be practicing this week and hopes to be back in full swing for next weekend's matches.

The Mustangs, having just completed a slew of non-league matches, now move back into league action. The team has a busy weekend ahead, as it will face rivals Cal State Los Angeles, Chapman College and Cal

State Bakersfield Friday, Saturday and Sunday, respectively.

The team to beat will be Chapman, ranked No. 1 in the nation and leading the league. Champman also represents Cal Poly's only league losses, as the team twice beat the Mustangs 5-4 this season.

Coach Hugh Bream said the team is definitely capable of a win against Chapman. Berryman should be back to his full potential by next weekend, he said. And Chapman recently lost to UC Davis, the team the Mustangs easily defeated last Thursday.

## MEN'S TRACK

From page 5

in the event.

Mustang Steve Williams won the Friday section of the pole vault with a lifetime best effort of 16-4 3/4. The feat puts him third in the CCAA.

Mike Rodrigues finished second for Cal Poly in the other Friday pole vault event. His 15-1 1/4 vault was a season best.

In Saturday's pole vault, Steve Horvath broke his own school record and set an all-time CCAA record with his 17-8 jump. Horvath, who has gained national attention, won the event by almost 16 inches and barely missed an 18-foot attempt.

The 400-meter relay team of Mike King, Brian Streiff, Reggie Johnson and Rudy Huber posted a season-best time of 41.9 for the win. Johnson's performance put Cal Poly in the lead to stay.

The team also took the 1,600-meter relay, knocking three seconds off its season-best time. The 3:10.38 time is the fastest in the CCAA and one of the best in the NCAA Division II.

King also took first in the 400-meter hurdles, and his 52:09 time qualified him for nationals. He is currently second in the CCAA in this event.

Cal Poly will be at home for the

next two weekends. The team will host Cal State Northridge, UC Riverside and Chapman College this weekend, and will host many of the top teams in the West in the sixth Poly Royal Invitational.

## CLASSIFIED

## WOMEN

From page 5

2:16.06.

Sophomore Sherri Minkler set a personal record, but narrowly missed qualifying for nationals, with her 4:32.03 finish in the 1,500-meters. Harter said the finish was a confidence-builder that will carry through to the 3,000-meter event for Minkler.

Sophomore Sydney Thatcher also had a good showing in the 1,500-meters with a time of 4:35.06. Last year she set a personal best time of 4:35, and this season she has consis-

tently 4:36 or better.

In her only event of the meet, sophomore Teena Colebrook tied her lifetime best and took the NCAA Division II lead in the 3,000-meters with her 9:24.09 finish. Harter said the time shows her strength for the 800 and 1,500-meter events.

The team will host Cal State Northridge, UC Riverside and Chapman College in a quad-meet this weekend. Harter said Northridge will be the team to beat, and Saturday's results should be very close.

## PETERS

From page 1

are private contributions, and Peters stressed the organization doesn't accept donations from the government. "We'd rather be poor and pure," he said.

The first student chapter of World Neighbors was started at Cal Poly in March. "I think it's wonderful," Peters said. Two of the program's most successful area representatives are Cal Poly graduates. "I can't think of a more appropriate place for the first chapter to be."

Peters said his organization is different than the Peace Corps because it is more selective when recruiting its volunteers. "The Third World doesn't want to receive a little army of wellwishers to come out and dig ditches," he said. "They can do that themselves. We're like the Ma-

rines — we're looking for a few good people."

Young people don't have to travel abroad or contribute a lot of money to help needy people, Peters said. By becoming wellinformed and aware, they may have a chance in the future to help in their own way.

## CANDIDATES

From page 1

the past two years, when there's been only one candidate for ASI president, that candidate's been an old-timer in terms of ASI, he said. And this year, he had 30 endorsements before the filing period even opened. These things can scare competitors, he said. Next year, a lot of the old-timers will be graduating and hopefully that will leave space for more candidates.

**ASI Vice Presidential Candidate John Moons, agricultural management sophomore**

*What should be done with the dormant bowling alley space?*

Moons has taken the same stance all along — the bowling alley wasn't making any money and the students wanted a fitness center last year, therefore the fitness center should be in the space.

*How do you feel about the proposed ASI fee increase?*

Moons is for it. Either ASI makes more cuts in its programs, or it can restore them to their 1986-87 level; he chooses the latter.

*If enrollment increases, how should we handle it?*

The increase is inevitable, he said, and ASI will have to deal with it. ASI could voice its views, but regard-

less, the growth will happen. The added faculty will be a plus, even though there will be more students, said Moons.

*What would you do to increase minority enrollment?*

Moons said Cal Poly needs to get minority enrollment way up. And although he has no specific ideas on how, he knows steps are already being taken on the President's Cabinet. President Baker's cabinet is made up of leaders in industry and student members, of which Moons is one. Increasing minority enrollment in higher education is one of the cabinet's major goals, said Moons.

*How do you see relations with the city?*

According to Moons, the Student/Community Liaison Committee, which he is on, has "helped out" immensely with city relations. He wants to continue the body and hopefully expand it next year.

*How do you smoke marijuana?*

He doesn't think it's a valid question. "What a person does in his personal life has no bearing on what we're doing."

## ENERGY

From page 3

Ritschard was a Cal Poly biological science faculty member from 1965 to 1973 and received Cal Poly's distinguished teacher award in 1972. He has authored or co-authored more than 45 technical publications.

Ritschard's presentation was sponsored by the School of Science and Mathematics and the Sigma Chi Club, a national research society.
