GPA replaces school standing for dean's list

By Karen Williams
Staff Writer

Cal Poly's Dean Council recently standardized the procedures for awarding honors at graduation and for dean's list standing.

Honors will now be calculated according to a student's grade point average and not according to his or her standing in a school.

In the past, students who received honors at graduation had compared favorably with the previous year's graduating classes' GPA ranges, rather than their own school's graduating class.

Previously, instead of using a standardized GPA method, students were on the dean's list if their grades ranked among the top 15 percent of their school.

An alternative to Cal Poly's method was

to decide honors according to a standardized GPA method.

Wally Mark, director of institutional studies, approached the Dean's Council in August with a proposal to change the procedure. Since Cal Poly's mainframe computer, OASIS, or Online Administrative and Student Information System, has the capacity to determine honors eligibility by GPA, Mark hoped the council would agree to change procedure.

Also, OASIS's software, SIS (Student Information Systems), is not programmed to calculate honors by the old method. However, a program could have been written to do so.

By a unanimous consensus of opinion, the council approved the switch to the GPA method.

The Dean's Council is comprised of the deans for each school, the dean of the

library, dean of student affairs, associate vice president for academic programs, and the chair of academic affairs, Malcolm Wilson.

Philip S. Bailey, Jr., dean of the School of Science and Mathematics, supported the change.

"The standard for honors at graduation was different throughout the college," said Bailey.

According to Mark, there were occurrences when no one from a specific school graduated with highest honors, after being compared to last year's class.

None of the 1986-87 graduates in the School of Science and Mathematics graduated magna cum laude, according to an OASIS Implementation Team report.

Unlike many universities in the CSU system, Cal Poly did not have a set GPA requirement. Students in the top 10 per-

cent of the class who competed favorably with last year's class were awarded honors. Summa cum laude was awarded to the top 1 percent, magna cum laude to the following 3 percent and cum laude to the next 6 percent.

Under the new system, students with a GPA of 3.85 or better will graduate summa cum laude. A student with a 3.70 GPA will graduate magna cum laude, and a student with a 3.50 GPA will graduate cum laude.

Of the 19 universities in the CSU system, ten use this method to determine honors.

Kenneth Riener, associate dean of the School of Business, believes the new method will help students achieve their goals.

See HONORS, page 4

Funding shortage spells end of late-nighters at library

By Karin Holtz
Staff Writer

Frantic students searching for a place to study during the wee hours may be dismayed to find the doors of the Cal Poly library locked.

Inadequate funding has forced the library administration to close the Robert E. Kennedy Library during the hours it is least used.

The main library will open at noon on Saturdays rather than 9 a.m. The reserve room will open at 7 a.m. rather than 6 a.m., and will close at 1 a.m. rather than 2 a.m.

Also being cut are the library's extended hours on the Saturday before finals week.

David Walch, dean of library services, said a variety of time periods were considered, but observation and actual counts showed that these cuts would have the least impact on students.

Circulation director Judy Drake said typically about 50 people used the library before noon on Saturday. This is only about 10 percent of total Saturday atten-

dance, much lower than on weekdays.

Walch said the cutback in hours is a response to the minimum wage increase and a loss of funding for certain positions. Although the state raised the minimum wage, it did not increase funding to accommodate the new pay scales.

The library also lost the funding for 1.7 full-time positions which were previously used to pay some student assistant salaries, Walch said.

Position cuts are primarily a device to assist in the payment of the on-line computer catalog, which should replace the card catalogs in fall 1989.

Walch said CSU budget shortfalls have also affected the library's ability to provide services. The library's share of the Cal Poly budget cuts is about \$32,000.

"If you combine all these things together, it's just impossible to maintain the level of service that we would like," Walch said.

Four years ago the reserve room remained open 24 hours a day. When the funding which made this possible was

Biotech minor implemented
Course of study 'timely' to scienceBy Yumi Sera
Staff Writer

The School of Science and Mathematics began its biotechnology minor program along with the start of the fall quarter and the printing of a 1988-90 catalog.

"Students deserve to learn modern techniques in important fields of science," said Raul Cano, biological science professor and chairman of the biotechnology advisory committee. "Biotechnology is pertinent and timely. We needed to address a need that wasn't being addressed in technological services at Cal Poly."

According to biological science adviser Gerry Montgomery, there has been quite a bit of student interest.

"It was students who stimulated both departments (biological science and chemistry) to organize the program," Montgomery said. "There seems to be a fairly large job market, and as long as there's a job market, there will be students interested."

"My first indication that there was a need happened when most medical lab technician graduates were becoming biotechnologists because of the higher pay," Cano said.

Students receiving a biotechnology minor will be able to take living organisms and use them to make commercial products, said Cano.

For example, on a simpler level, wine, beer and bread production through fermentation, a practice that can be classified as one application of biotechnology, has been in use since man's earliest days, according to an Industrial Biotechnology Association (IBA) booklet.

Modern biotechnologists will be working at a more complex level, producing products and processes that contribute to more vigorous food crops, a cleaner environment, improved diagnosis and treatment of diseases, and much more, said the IBA.

"Biotechnology can be divided into two parts — the research and development process and the commercial large-scale production," said Cano. "Currently, our emphasis will be on research and development."

Cano hopes that with the addition of the new specialized minor, Cal Poly's science program will be recognized by industry on equal footing with agriculture, engineering and architecture.

"The new minor is definitely a move in the right direction," said Jennifer Alleman, a biochemistry senior. "The first-hand experience with the new machines will be an advantage when I'm seeking a job."

Citations issued

Crackdown targets bicyclists

By Tara Giambalvo
Staff Writer

Police have issued more than 100 citations to bicyclists in the past two weeks in a crackdown on those who ride on the wrong side of the street or run stop signs or lights, according to the San Luis Obispo Police Department.

And the crackdown will continue, coinciding with National Crime Prevention Month, said Steve Seybold, crime prevention coordinator for the police department.

"We are issuing citations left and right, with special emphasis around Cal Poly," he said. "We are encouraging officers to cite in that area."

Four motorcycle officers are focusing their patrols in the 1000 block of Foothill Boulevard, all of California Boulevard, the 900 block of Chorro Street and the 1400 block of Monterey Street, he said.

All other officers are also on the lookout for bicyclists breaking the laws, he said.

Two head-on collisions within the past two weeks spurred the action, Seybold said.

The first accident happened two weeks ago, when a cyclist, riding on the wrong side of the street, struck another cyclist pulling out of Stenner Glen at 1050 Foothill Blvd., Seybold said.

The cyclist at fault was not injured, but the other cyclist was taken to the hospital with cuts and bruises, he said.

The second accident occurred downtown when a cyclist ran a red light and broadsided a car, he said. He was unsure if anyone was injured in that accident.

"We want to avoid accidents," Seybold said. About 30 percent of bicycle accidents end in major injuries, he added.

Another reason for the crackdown is the influx of new residents in the Cal Poly area because of the new school year, Seybold said.

"We want to break them of the habit," he said, referring to bicycle violations.

In 1986, the most recent year for which statistics are available, police ticketed 325 cyclists, Seybold said. He said that number will be exceeded this year.

About one-third of that number have been cited in the past two weeks alone.

The minimum fine for riding on the wrong side of the street or running a stop sign was \$30 in 1986. Seybold was unsure of the current fine, but it is probably close to \$50, he said.

Crime Prevention Month officially began Oct. 1, with the first week devoted to awareness of domestic violence. Other weeks will cover sexual violence, safe schools and drug abuse.

LETTERS TO THE EDITOR

Harassment by females

Editor — I have read with avid interest the article and letter regarding the harassment of female students by male professors in the *Mustang Daily*. However, there is another side to the coin: the harassment of male faculty by female students. Hundreds of cases of harassment of male faculty by female students go unreported every year.

What is a vulnerable male teacher to do, confronted by a female student distraught over a 'bad' grade, late paper, or whatever, when the female suddenly breaks down in tears, weeps, cries, or otherwise carries on? Or, failing that, rushes to the bathroom all shook up. She may come back, having repaired damage to her hair and face, bat a demure eyelash, slaunch down in the chair reserved for consultations and say, "I'll do anything to get a passing grade," (or whatever). Now, for the harassed male this is the moment of truth!

I've been around Cal Poly for a score of years. I offer the following Ten B.A.'s (bits of advice) to male faculty to avoid female student harassment, and potential litigation, loss of job, and being drummed out of the Academic World in Disgrace and Misery.

1. Always keep office door open. Use discarded textbook, wastebasket, or old *Mustangs* jammed in the door jamb.

2. Keep tape recorder at the ready.

3. Do not offer a Kleenex, even if Female is weeping torrents of tears.

4. Do not touch the Female with anything that can be construed as a weapon: fly-swatter, marking pen, Cal Poly catalog.

5. Do not wear revealing clothing: open shirts showing hairy chest, tight pants. Wear a toga, or djellaba. Do not pose for a Cal Poly "Hunk" calendar.

6. Do not accept gifts: cookies, shaving lotion, a bottle of champagne, a hand-knit angora sweater, an invitation to a private hot-tub party.

7. Keep an unlisted phone

number. Even if unmarried, display a wedding ring and keep a photo of the wife and kiddies on your desk.

8. Beware of feminist literature slid under your door. This may be a ploy to seek your sympathy for the plight of women. And don't say you are gay, for heaven's sake. That gambit could backfire.

9. Leave town after posting final grades. Leave no forwarding address.

10. Always keep both feet on floor. Crossed legs are best.

I hope that I have been a help to many frustrated male teachers, who have suffered from female student harassment.

Gordon Curzon
Professor Emeritus
English Department

Getting the message

Editor — This letter regards two items in the *Mustang Daily* of Sept. 26.

First in response to the article entitled "Proposition 78 vital, says dean," I am concerned that the wrong message was sent. In her WOW week address to the faculty and staff, trustee Claudia Hampton made the same error. The claim that the new buildings that will be constructed if Proposition 78 passes is to make room for new students is, at least partly, incorrect. I have served as a representative on the School of Science and Mathematics committee that has been working for the new Faculty Office Building, and I assure you that this structure will NOT provide space for more faculty or students. Its sole purpose is to correct a 30-year injustice (for about one-half of the affected faculty) of two-person offices which are, in general, not conducive to constructive work. The result will be to free people from squashed two-person offices into more efficient one-person offices. There will not be any net gain in office spaces, only square footage. If the intent is to add more faculty to this campus, then we will have

Poly needs philosophy

I am writing this column to show a measure of student support for professor Laurence Houlgate's movement to create a philosophy major at Cal Poly, (*Mustang Daily*, Sept. 23). A university without a philosophy major seems to be "inverted," or built in reverse.

I have been taught that all disciplines have their roots in philosophy, and it is only when they become systemized and relatively clearly delineated that they then split off and stand on their own. Thus a university with no philosophy major appears to be missing its core.

There is much debate and wringing of hands these days concerning the lack of liberal arts education that college undergraduates are receiving. A flexible (one that could easily be added as a double major) philosophy major can stand stoutly on its own with regards to the liberal arts question, and it can also serve a very useful purpose when combined with any other degree. I know it is tough enough to be, say, an engineering major, but I bet even some of those folks would be willing to add philosophy as a second major if they were shown just how many more doors would be open to them by such a participation.

The issue of funding is bound to occur, but professor Laurence Houlgate's comments indicate that cost would not be substantial. I will not attack any specific area but I do see Cal Poly supporting several programs that have only localized

to bring in more trailers, double back up again, or build yet another FOB! I also believe that some of the other projects mentioned are in the same realm as "catch-up" and not in the "space for new student" category.

Secondly, in regards to Mr. Burris' letter (Sept. 26) about where his \$308 registration fee goes, I would only say that he is correct: it doesn't cover squat! NONE of any of the fees students pay is tuition. The tuition at many other state universities is up to many thousands of dollars these days. None of the money you pay goes directly to education, that is, classes, salaries, equipment, etc. In fact, all of that comes from the taxpayers who this year, in their collective wisdom, have cut Cal Poly by about \$100 per student. If Mr. Burris really wants his classes, I suggest he either a) gets every one to pay the \$5,500 per student per year that the state now covers, or b) get the legislature to adequately fund education in this state. Faculty are tired of teaching "above the normal load" when raises are zero, equipment is obsolete, and support in general is inadequate.

Anthony J. Buffa
Physics Department

Try again

Editor — I am very disappointed with your staff's "Round one: Won?" editorial of Sept. 27. It showed a great lack of journalistic technique and completeness. Beside the fact that it gave a narrow, one-sided point of view, the article failed to clarify itself.

Sure, it presented a few ac-

ceptable reasons why *not* to elect Bush. However, that was *all* it did. Who is Dukakis? Why should we elect him? What would happen if he became president? In what way would we be better off with him rather than Bush?

If at least one of these questions had been answered, the article would have improved seven-fold. I realize that it was only an opinion, but I expected more from the "editorial staff." Perhaps my expectations were too high — the media is becoming another television commercial. Yet I certainly hope this is not true, for there are few reliable sources left to gain such important information from.

Please, please redeem yourselves by writing more open opinions and possibly an in-depth article.

Race quota not answer

Editor — Much commentary has dressed the opinion page this year concerning a lack of cultural diversity on campus due to the small percentage of "minority students." Many people seem to be of the opinion that Cal Poly should recruit more minority students. I agree that a culturally diverse environment at college can better prepare us for life outside of school, but let's ask ourselves what we're really talking about here. Do we really want to establish a racial quota system? If such a system were in effect a few years ago, it is en-

Access

By Stuart L. Smith, II

or limited appeal or focus. A philosophy major is a boon to the entire student body, even if the effect is only to boost the stature of the college that each of us will graduate from.

If the issue of cost can be effectively addressed then the only other potential objection I can see would be that creation of a philosophy major would make getting general education classes more difficult than it already is. This is a legitimate concern, but it is not, in my mind, sufficient for not instituting a philosophy program. If one tries to adhere to that logic then they would have to address the fact that we have majors in English, history, political science, etc., that are all flourishing and, I believe, impacted. Why should philosophy, the root of all our programs, be singled out?

Cal Poly is a great school, and it will continue to be great without a philosophy major. But without it, I see the university as a great painting that is missing an integral piece; it is still a great painting, but also incomplete.

Stuart L. Smith, II is a Cal Poly student.

tirely possible that many of us wouldn't be here to talk about it. Some of us would actually be refused admission because we weren't the right color, rather than because we couldn't meet Cal Poly's usual high standards. I propose that rather than recruiting minority students and establishing a quota, we simply take steps to encourage more minority students to apply. Perhaps then we can enrich the cultural aspect of our campus while preserving fair practice in our admissions policy. Anything less would be a tragic injustice comparable to everything the civil rights movement fought against.

Both SLO parties upset with media images

By Jeff Blizzard
Staff Writer

Vice President George Bush and Massachusetts Gov. Michael Dukakis have failed to discuss important issues in their presidential campaigns, the president and the treasurer of the campus Young Democrats said Friday.

President Shara Peters and treasurer Marcella Newlands said Bush and Dukakis have missed out on opportunities to spell out the differences between them by not talking about important issues.

But they blame television and newspaper coverage of both campaigns, which has focused on personalities and image instead of real issues, they said.

Newlands said Bush and Dukakis have been reduced to mud slinging because the media is not forcing them to focus on the issues.

"It would be a wonderful tribute to the American people if they concentrated on the issues," Peters said.

There has been an emphasis on bits and pieces of issues, but not on the "big picture," Peters said.

Peters and Newlands have been involved in Young Democrats since November 1987, when they got the club reinstated.

About 100 people attended the first meeting this fall and club membership has doubled since spring quarter.

Beryl Reichenberg, precinct coordinator for county Democratic Headquarters, said county democrats are working with the Young Democrats and other groups on behalf of the Dukakis campaign.

"We're getting a lot of positive response, a lot of people are volunteering for the Dukakis effort," Reichenberg said.

Providing registration and election information are the most important functions of the Young Democrats, Peters said.

Peters feels part of the attraction of joining Young Democrats is that different viewpoints are tolerated.

"We're not going to be petty enough to divide ourselves over certain issues," Peters said. "We're working for the betterment of the party."

Peters and Newlands said they do not want to dictate what club members or Democrats should believe in.

However, one issue both agreed on was that Sen. Dan Quayle was a poor choice as Bush's vice-presidential running mate. Both said Quayle was unqualified to be vice president, if Bush won the election, and would be ill-prepared to step in as president if something were to happen to Bush.

"I don't think he's experienced enough and he's had everything delivered to him on a silver platter," Newlands said.

Both said Dukakis and Sen. Lloyd Bentsen have as good a chance of winning the election as do Bush and Quayle.

The election may hinge on the large number of undecided voters who could swing the vote either way, Peters said. She said both candidates need to go after this block of undecided voters by talking about issues and helping these voters decide who to vote for on Nov. 8.

Peters' advice to voters: "If people register and get out and vote it changes things. Every vote makes a difference."

Register by Oct. 11

With the election little more than a month away, students have until Tuesday, Oct. 11 to register to vote in San Luis Obispo County.

Students who want to vote by absentee ballot should request the ballots from their hometown elections office, fill them out and return them to their hometown elections office by Nov. 1, said Pam Weaver, a clerk at the county Elections Office.

If students are not registered in San Luis Obispo County, but wish to vote here, they can re-register by filling out any voter registration form by the deadline.

Weaver urged students to fill out all sections of the registration cards. Incomplete forms will be invalid.

Many students have failed to fill out the section requesting the state where they were born and many have incorrectly listed 1988 as the year they were born, Weaver said.

Voter registration forms are available on the third floor of the Robert E. Kennedy Library in the documents section, at tables set up daily in the University Union plaza or by stopping by and filling out forms at the Elections Office, 1007 Monterey St., next to Hudson's Grill.

As of Sept. 29, San Luis Obispo County has a total of 108,980 registered voters.

The breakdown is as follows: Republican Party, 50,491; Democratic Party, 45,039; declined-to-state preference, 10,652.

— Jeff Blizzard

By Jeff Blizzard
Staff Writer

College Republicans on campus are focusing their efforts on registering student voters for the Nov. 8 presidential election.

Andrea Mundorf, president of College Republicans, said the group hopes voters, after registering to vote, will learn the campaign issues thoroughly before voting.

The College Republicans are working closely with Students for Bush (an organization separate from College Republicans). John Sweeney, coordinator of

Students for Bush, however, is recruiting students for College Republicans as well as urging students to get involved in the

campaign. Mundorf believes the news media has been unfair and critical of Sen. Dan Quayle, the republican vice-presidential candidate. She feels the media has also been unfair in portraying Bush as weak and as "Reagan's

shadow."

"I disagree with that — to be a vice president you have to be strong," Mundorf said.

"Bush is trying to be his own person," she added. "He made it clear he was his own person in his convention speech."

"Bush can do it, he's shown that in the campaign."

Bush has proved he can be a good president based on his experience as vice president, she said.

The difference between George Bush and Michael Dukakis in the quest for the presidency, she said, is experience.

"He (Bush) has experience and I don't feel he would raise taxes," Mundorf said.

If taxes were increased, Mundorf said, all Americans would feel the brunt of the increase, especially students graduating from college.

In addition, Mundorf agreed with Bush's choice of Quayle as his running mate, defending his ability to be vice president.

Quayle's two terms in both the U.S. House of Representatives and the Senate, as well as his membership on defense and health affairs committees in the Senate, Mundorf said, are proof Quayle is competent to be vice president.

"I think he could do a good job as vice president," she said. "It's not always the experience."

Seventy students joined College Republicans during Week of Welcome. And group membership is expected to increase to about 150 by election time, Mundorf said.

She is also confident that the republican ticket of Bush and Quayle will win the election.

"I think Bush has pretty good voter support."

LIBRARY

From page 1

withdrawn, Walch said supplemental funding kept it open for two more years. Last year this money was no longer available and it had to close at 2 a.m.

Financial problems have also affected the number of books and periodicals the library can purchase. Walch explained that while subscription costs and book prices are continually increasing, the state budgets the same amount or only slightly more every year.

Walch said that fees and

penalties will not increase.

"We have received great assistance from our Academic Senate ... and President Baker has indicated that he will do what he can to support an increase in the budget," Walch said. "It is not a local campus problem. The problem is systemwide."

"I want to be optimistic. I'm just very hopeful that with the work we've done with the (student) senate, the administration and others on this campus, we'll find some listening ears."

HONORS

From page 1

"They will have a target they can shoot for," said Riener. "It certainly does not hurt the School of Business and I like the idea of a fixed target."

According to an analysis by Tom Zuur, manager of the Student Data Systems Office, a study was done showing the GPA for each school's dean's list recipients for a total of eight quarters.

Under the old method, some students needed to achieve more than a 3.50 to be on the dean's list for their school and a few had

a GPA slightly lower than 3.50. The overall mean was 3.49, using the old method.

Mark had prepared a study for the Dean's Council, which demonstrated the impact of a procedural change.

"The study that was done was comprehensive; it showed what the impact would be," said J. Kent Butler, associate dean of the School of Engineering.

"Where we cut it (made GPA ranges), it looked like it would not affect any school dramatically," Bailey said.

He thinks the new GPA method will cause only slight changes in the number of students who graduate with honors. "It is likely that some schools will have more honors and some less," Bailey said.

By Terry Lightfoot
Sports Editor

After losing four straight games on the road over the past two weekends, the Lady Mustangs are looking for a sweep to get them back into the thick of the conference race.

The lady spikers played San Jose State and the University of Pacific over the weekend.

Both teams were ranked above Cal Poly and came into the weekend's matchups highly regarded.

Head Coach Mike Wilton said that Friday's five-game match could have gone either way.

The inability to serve a little tougher took a toll on the Mustangs, as San Jose was able to run their quick sets.

"When we got the good serve we set up a lot better defensively," Wilton said.

The final score of the match was 13-15, 15-7, 15-8, 15-12.

The outcome at the University Of Pacific was much the same, with the Mustangs dropping the match in four games, 15-13, 15-6, 11-15, 15-5.

Wilton said that the team must now overcome the challenge.

"My goal is to sweep the next home stand and get us back into the picture," Wilton said.

Right now, the Mustangs are 11-4 overall and 0-4 in the conference.

The home stand starts with a big game against rival UCSB.

"San Diego is ranked high but UCSB is going to be just as tough," Wilton said.

Poly routs highly ranked Matadors

By Terry Lightfoot
Sports Editor

The Cal Poly Mustang football team, showing a lack of offense throughout the season, found sufficient fire-power to rout previously sixth ranked Northridge Matadors Saturday 38-7.

Head Coach Lyle Setencich said the win was a matter of Northridge not being as good a team as previous opponents this season, despite the high ranking.

"Rankings don't mean anything," Setencich said.

Looking ahead to next week's game against Sacramento, Setencich said that the Hornets are very similar to Cameron, which beat Cal Poly 20-14 in a very physical game early in the year.

"If we don't beat Sacramento on Saturday, the win over Northridge doesn't mean anything," he said.

Once again, the Cal Poly defense did a stellar job holding the Matadors to under 200-yards total offense.

Women take first spot at Stanford invitation

By Terry Lightfoot
Sports Editor

The Women's Cross Country team running without its top four runners captured a first place victory in one of the most important meets in the Western region.

Along with Cal Poly, the Stanford Invitational showcased other perennial powerhouse teams from California; UCLA, and UC Davis, and tough teams from the Southwest in Texas and Arkansas.

This was the first time that Cal Poly had ever won the invitational and the task was accomplished without their four top runners who were training for the upcoming Arizona Invitational.

Top finisher for the team was senior Pauline Stehley with a

time of 18:37.7 which was good enough for eighth place. Stehley is returning from a lower-leg muscle tear and looks like she will be hitting top form in time for the conference, regional, and national meets, said head coach Lance Harter.

Harter said that freshman Tracy Leichter ran the best race of her brief collegiate career. Of the seven top finishers for Poly five were underclassmen, which gives the Mustangs a lot of depth.

Coach Harter is now looking ahead to the meet in Tucson, Ariz. next weekend which he said will be a good rehearsal for the NCAA Nationals. The team will take its top eight runners to the meet while the remainder get ready for the Cal Poly Invitational on Oct. 15.

Take a Look at a Macy's Career

What: Information Session with Macy's Representatives

Where: BA and E (Bldg. O2), Room 101

When: Friday, October 7, 7:00 p.m.

Who: Fall Graduates

If you're looking to turn your talents into a highly rewarding career in retailing, then take a look at Macy's.

A Macy's career is diverse and challenging. It requires innovation and decisiveness in order to strengthen the relationships we've established with our customers who demand quality in their purchases. Most importantly, it's your opportunity to become a risk-taker, a strategist and above all, a success in our fast-paced, forward-thinking business environment.

To find out about the Macy's career path, one which often reaches the senior executive level in just three years, we recommend that you attend our information session. Contact your placement center for more information, including upcoming interview dates. Macy's is an equal opportunity employer.

Week honors working students, employers

By Suzy Wallace
Staff Writer

The National Association of Student Employment Administrators has deemed Oct. 3-7 National Student Employment Week.

The week is observed to recognize the hard work of students and the contributions employers make in hiring students.

"This week pays tribute to students who work their way through college," said Ellen Polinsky, coordinator of the Student Employment Office.

"There are a whole lot of students out there who work very hard to put themselves through college and wonderful employers who provide that work. The Placement Center is just the bridge that brings them together."

"I take 19 units and work at least 20 hours a week and I couldn't do it if my boss didn't let me study in between customers," said Kimberly Barbee, a Cal Poly junior. "I have to work to pay the rent, but

at least I can keep my grades up with this job."

The Placement Center plays a large role in the part-time and future full-time careers of students on campus.

"For the 1987-88 year we had 7,822 students register to use the placement center," said Polinsky.

The Student Employment Office, an extension of the Placement Center, has three programs created to serve students seeking employment. Each program has a particular job-oriented goal.

One program is the job board, which lists part-time employment on campus and in the community. More than 5,000 jobs were listed on the job board last year.

The Work Experience program places students in part-time positions in their future career fields throughout the area.

"Some of our greatest success stories come from this program," said Polinsky. "The greatest tribute is that when students graduate they replace themselves and, if they start a business in San Luis Obispo, they use the program to hire other students."

A summer job bulletin is also

offered weekly throughout the year to keep students informed about summer employment opportunities in local, regional and national markets.

One of the more noted services the placement center provides is the on-campus recruitment program which brings 500 companies to Cal Poly every year to interview graduating seniors.

"Every year we survey graduates from the previous year and from their responses we get our Employment Status Report," said Polinsky.

For the 1986-87 academic year, 59 percent of the 2,686 graduates responded to the survey. Of those responding, 83 percent had full-time employment, 3 percent had part-time employment, 11 percent were attending graduate school and 2 percent were still seeking employment.

"Those placement ratios stand up for about the last five years," Polinsky said. "They're always in that ballpark."

"This week is not to promote the placement center," she said. "It is to recognize students who work and to thank employers. We're just here to help."

Credit and checking options made easy for Poly students

By Meda Freeman
Staff Writer

For students looking to establish credit or their own checking and savings accounts, several San Luis Obispo banks offer special services for student customers.

Joyce Lundy, a customer service representative for Bank of America, said that the banks feel there is a lot of potential in the student market which hasn't been tapped yet.

Among the options available at Bank of America are student Visa and Mastercards. The credit card application requires that the student be a sophomore, junior or senior at a four-year university. No prior credit experience is needed. The card carries a 19.8 percent interest rate and an \$18 annual membership fee.

Students can open a savings account at Bank of America with as little as \$25. The account will pay the same interest rate as a regular savings account, and charge no maintenance fee until the student is 21 years old. Students also qualify for a "custom-choice" checking account, which only charges students \$2.50 a month in service charges. With this type of account, however, students can only write eight checks or fewer before being charged 50 cents for each additional check.

"We have a campaign to en-

courage students to bank with us," said Wells Fargo Branch Manager Vi Pekarek. "We really like student customers."

This bank offers students a checking account with ATM access and overdraft protection for a \$3.50-a-month service charge. However, during the summer the service charge is waived, allowing students to keep the account open until they return in fall.

Wells Fargo also offers a student Visa card. To qualify, students must be at least a sophomore, have \$200 a month or more of spending money and have a checking or savings account already established. This credit card has a 20 percent monthly interest rate and an \$18 annual fee, but the bank is offering six months of free membership for the card.

Security Pacific Bank Manager Alan Jensen said his bank also caters to student customers. Mastercards with a \$200 limit are available to freshmen and sophomores. A \$300 limit is available for juniors, a \$400 limit for seniors and a \$500 limit for graduate students. The Security Pacific Mastercard has various monthly interest rates, starting at 19 percent.

The bank also has a discount checking account. As long as students have a minimum balance of \$100 and write 10 checks or fewer, they will avoid monthly fees.

Poly Cross Country men finish eighth in close race

By Terry Lightfoot
Sports Editor

In a very close race in which the fifth through ninth teams were separated by only 18 points, the Men's cross country team finished eighth at the Stanford Invitational on Saturday.

The Mustangs were disappointed with the final results. Head Coach Tom Henderson said, "It's annoying when you don't run the type of race you have run earlier in the season. But it was our first 10,000-meter race and we will learn from our mistakes."

Cal Poly was edged by the CCAA and West Region Champions, Cal State LA by only three points. However Henderson said that if the race was scored as a dual meet the Mustangs would have won by three points.

The results show that even without running a great race the Mustangs are still in the hunt for

the CCAA and regional titles.

A bright side for Poly was Chris Craig who continues to lead the team, with an outstanding come from behind 10th place finish, which was more than 30 seconds better than his previous course best.

Henderson said that the team will be working to correct mistakes, and capitalize on the strengths of the team.

Next week the Mustangs will travel to Pomona for a dual meet with Cal Poly Pomona, currently ranked third in the West Region. The meet will give the Mustangs a taste of man-to-man competition. "The man-to-man aspect of dual meets is lost in the big invitational meets," Henderson said.

Cal Poly will also be looking forward to the Cal Poly Invitational on Oct. 15, which Henderson said may be the best meet in the country.

Patriotism high at landing site

EDWARDS AIR FORCE BASE, Calif. (AP) — American flag-festooned motor homes stretched for two miles along a dry lake bed Sunday and patriotism rippled through the crowd of nearly 300,000 viewers awaiting the thunderous return of the space shuttle Discovery.

"This is what America's all about," said Vic Failla, 61, of La Verne, a World War II veteran who brought his brother Tony to see the shuttle land at this air base in the Mojave Desert 60 miles north of downtown Los Angeles.

The landing was scheduled for Monday at 9:33 a.m.

Recreational vehicles streamed into the eastern shoreline of Rogers Dry Lake on a ribbon of heat-rippled two-lane blacktop lined by twisted Joshua trees and surrounded by rattlesnake-infested desert.

Across the dry lake bed, the Air Force Base hangars glistened in 102-degree heat.

"The flags just make you feel terrific," said Alice Brakke, who

sold small American flags for \$2 each. "Families come up and get one for each member."

A speaker on her stand, one of dozens lining the viewing area, blasted a non-stop broadcast of the late Kate Smith singing "God Bless America."

Department of Defense security spokeswoman Pat Hendrick estimated the crowd at 300,000 with up to 500,000 expected.

Skateboarders and bicyclists rolled across the cracked and buckled lake bed. Crowds wandered shirtless and in shorts, enjoying Hawaiian shaved ice and picking over souvenirs that included models of the secret Stealth bomber at \$12 each.

Hundreds of youngsters tossed footballs and teenage boys eyed young bikini-clad girls parading in small groups.

Speakers, broadcasting news from the Houston Space Center, hung along side flags on hundreds of the motor homes that mushroomed in the Mojave Desert overnight. Campers came from as far away as Alaska and

Connecticut. Big rigs from as far away as Kentucky brought truckers who spent the waiting time swilling beer and trading road yarns.

"There's some constructive patriotism shown by the masses," said Charlie Tate, 65, of Van Nuys, as he surveyed the parched landscape dotted with red, white and blue.

"It makes the heart pump faster. It's a carnival atmosphere here. And these children, I wholeheartedly agree with them staying out of school for this," he said.

Many people sat in lounge chairs beneath canvas canopies, playing cards, firing up barbecues and watching television, some hooked up to videocassette recorders. A ham radio operator stood aside his oxidized brown Ford Maverick and erected a 25-foot antenna.

"This clam bake is kind of a cross between Pismo and Zuma beach. Where's the beach?" said Philip Percival, 38, of Los Angeles.

February 27, 1989

We are a leading management consulting firm specializing in employee benefits, compensation, communication, and related human resource functions. Hewitt Associates is included in the publication "The 100 Best Companies to Work for in America."

We offer graduating seniors an exciting opportunity as an **ACTUARIAL CONSULTANT TRAINEE** in our Professional Centers across the country: Santa Ana, CA; Rowayton, CT; Atlanta, GA; Lincolnshire, IL; Boston, MA; Morristown, NJ; The Woodlands, TX.

ACTUARIES are highly respected business professionals who use mathematical skills to define, analyze, and solve financial problems.

Their future looks bright:

- Being an actuary was recently rated as one of the best jobs.
- The demand for actuaries is expected to exceed the availability for the foreseeable future.

MINOR

From page 1

Companies have shown an interest in the program, Cano said. Varian Instrument Group, United States Biochemical Co. and EC Apparatus Co. were just some of the businesses that donated equipment to the program.

"We also received about \$96,000 in grants for the implementation of the new program," said Cano.

The biotechnology minor has 14 units of core courses and 10 units of elective courses, said Montgomery.

The core courses cover levels of competency in all areas considered important by the biotechnology advisory board, Cano said. Elective courses are designed to complement biochemistry, biological science and microbiology majors.

When asked if California State University budget cuts had any effect on the minor program, Cano said he did not expect any problems.

"Because of the budget cuts, we have not been able to hire, so we just shift a professor that is experienced and qualified in the biotech area to a class that has a higher demand," Cano said. "We haven't had to cancel any classes yet."

This year, the new program will accept about 20 students maximum; however, that number can increase to 35 plus in the future, said Montgomery.

"A biotechnology minor will augment my major and give me more of an edge in the industry," said Pete Dalla-Betta, microbiology senior in the biotechnology minor program. "I'll have to stay in school longer to complete my minor, but I think it's worth the two extra quarters."

Intro. to The Short Story

When Carla told me that my date was a little short, I thought she was talking dollars and cents, not feet and inches. So there I was at the door, in my spiked heels, staring at the top of my date's head.

All I could think was, how do I get myself out of this? I could imagine how my legs would ache if I had to walk around with my knees bent all evening.

So to stall for time, while figuring out how to fake malaria, I made us some Double Dutch Chocolate.

When I brought it into the living room, I discovered that Gary was a chocolate lover too. Ahh, a man after my own heart. Okay, I decided I'd give him a chance. So we sat down and saw each other face-to-face for the first time. He had a nice smile.

After some small talk—I mean conversation—I discovered that we both love Updike, hate the winter weather, and both have miniature schnauzers. So, we made a date to introduce Shadow and Schatzi next week.
