Anthro class pays high price for cheaters' act

Anonymous tip forces a retesting

By April Karys
Editor

It seemed like any normal midterm-week class section.

Students from the second section of Anthropology waited in front of the lecture hall in the Agricultural Engineering Building last Thursday, Oct. 20, talking among themselves or standing alone, waiting for their Anthropology 360 professor to appear. They expected him to return the test they had taken the previous Tuesday.

What they got from professor Patrick McKim, however, was a letter explaining that cheating had taken place on the test, that the entire exam had therefore been thrown out and that both sections of the class would have to take another test the following Tuesday.

McKim had given the same letter to the first section an hour and a half earlier. As students in the second section read the letter, normal pre-class chatter died and was replaced by uneasy silence. At the front of the class, McKim finished answering a student's question, waited until he had taken a seat and then addressed the class.

"On Tuesday, I was very angry," he said. "I've now gotten past my anger and now I'm

mostly sad about what happened. I don't know the full details of what happened. What I do know is this: There were students in this class who had the test before I passed it out. That's what happened. And that ain't supposed to happen."

One among the more than 100 students asked how McKim discovered the alleged cheating.

"I was told," McKim answered. The students sighed collectively and there were groans of disgust.

McKim said in a telephone interview the day before class that he did not know the names of those who tipped him about the cheating. He did not learn of the incident until after the second section had taken the exam.

"I can understand why they

didn't immediately draw it to my attention," he said. "It can be a scary thing to expose somebody like that."

In class, he said he wished more students would decide to not condone cheating.

See related letter,
Page 2

"You don't have to come to the teacher and tattle," he said. "Just say in a loud voice, 'Why did you take those tests? Do you want them for souvenirs?'"

The class laughed uneasily. Then the questions started.

One student asked if the next test would be harder. McKim said that he would not consciously try to make the retest more

difficult. He said that one chapter which he had previously been excluded would be restored and that more stringent security methods would be taken.

Some students complained that those who hadn't cheated were being short-changed. McKim agreed. He said that was exactly his point; that those who cheat make things difficult for those who don't.

"I don't want to be a policeman," one student said.

"Then we all agree to condone," McKim replied, spreading his hands, challenging the class. Students, some of whom were visibly shaken, protested.

One tried to draw an analogy. "Are you saying that everyone

KCPR — still rockin' at 20

Station's history tells of dynamic evolution

By Ron Crawford
Staff Writer

It is only fitting that the humble beginnings of KCPR, Cal Poly's radio station that celebrates its 20th anniversary this week, be placed in a musical context.

The year was 1968. Woodstock was known as a small, farming community by a handful of people in upstate New York, Michael Jackson was singing about his A-B-C's and Jim, Jimi, and Janis were still alive.

Twenty years later, the two-watt, two-manned "lab" has blossomed into a fully functioning, 2,000-watt FM station, capable of reaching up to 120,000 listeners.

"We used to have a contest when the station first started," said Frank Calabrese, who was with the station from 1968-71 and is currently an engineer for television station KSBY.

"Whoever called from the farthest distance from the station would win an album," he said. "I

remember being surprised when we got a call from someone on South Higuera; that was a good distance."

The station began competing with local commercial stations (KCPR is entirely commercial free) when the 2,000-watt transmitter was purchased in 1975.

"We were actually getting higher ratings than some of the bigger radio stations in town," Calabrese recalled.

Throughout the past two decades, KCPR has undergone several format changes. Big band music would swing the halls of the Graphics Arts Building in the early days until a more diverse lineup of classical, rock and jazz moved in. A shift to top 40 music created controversy until the current format of "alternative sound" with special programming ranging from reggae to opera was installed.

Not many bars choose Topsy Taxi

Many still unsure of how ASI-sponsored program works

By J.W. McPhail
Staff Writer

Most managers of downtown bars and restaurants say they believe Cal Poly's Topsy Taxi concept is a good one. However, at the beginning of this Alcohol Awareness Week, many are unsure of exactly how the program works.

Topsy Taxi is an ASI-sponsored program that provides cab rides home to people who have had too much to drink. The service is free to the public and to businesses that serve alcoholic beverages.

Some of the businesses believed the service would cost them money. A manager at Spike's Place, Kurt Sjoborg, said he thought the restaurant had to pay one-third of the cost.

"We're very supportive of the program," he said, "but it just wouldn't work for us."

Topsy Taxi program director, Franklin Burris, said that before last spring, the cab service received part of its funding from

participating businesses, but that since then it's been free.

Spokesmen for the Wine Street Inn and McCarthy's also said their businesses did not subscribe to the service because of the cost.

Ron Atteberry of F. McClintock's Saloon said the program works "wonderfully" and that they call on the taxi once or twice a weekend. Tortilla Flats manager Elias Nimeh echoed Atteberry's praise.

"I feel great about it," he said. "It works very well."

Sebastian's manager Doug Kuntz said he thought the program was "nice to offer," but that "we don't have a major call for it."

The Topsy Taxi uses a voucher system. Participating businesses are given books of coupons, each good for one ride inside the city limits. If the service is needed, typically the bartender will call the cab, give a voucher to the group or individuals who need the ride and they in turn give it to the cab driver.

A few of the participants in the program said they did not know how to get more coupons. Both Nimeh and Kuntz said they were out and were uncertain about how to get more. A bartender at Brubeck's said she had been out of coupons for some time.

Owner of the newly-opened San Luis Brewing Company, Greg Shipley, said he would like to offer the Topsy Taxi service in his restaurant but didn't know how to go about it. Shipley said he had contacted anti-drunk driving groups, like Mothers Against Drunk Drivers, trying to connect with the program but had not succeeded.

Burris said M.A.D.D. should have information on Topsy Taxi.

Topsy Taxi has existed in its present form since spring of 1988, said Burris. He said the program is funded by ASI, the Summit rehabilitation program at French Hospital and by the county's three major beer distributors, All American Beverage, Pacific Beverage, and Larrabee Brothers Distributing.

Honneger maintains 'Cover-up' credibility

By Kelley Cummins
Staff Writer

A former employee under President Reagan, who is now a major force behind the questionable movie *Cover-up*, discussed the movie and attempted to give it credibility at a press conference this weekend.

Barbara Honneger, formerly on the Reagan-Bush campaign staff, is now a private research analyst and has dedicated the last two years of her life to make information in the film public knowledge.

The film was shown at Cal Poly Oct. 12 by the Young Democrats.

Cover-up is a controversial movie that alleges Vice President George Bush met with top Iranian government officials to

delay the release of 52 American hostages until inauguration day in early 1981. The movie claims Iranian officials received \$40 million and a promise of \$5 billion in U.S. arms and military parts if Reagan and Bush won.

Cover-up ties this to the Iran-Contra affair by covering 10 years of our government's history and showing clippings of congressional hearings. The movie alleges that both Reagan and Bush were aware of these dealings before the congressional hearings.

There are several questions concerning *Cover-up* that Honneger answered.

"I don't like calling this a See COVER-UP, page 3

Letters to the Editor

Cheaters might come out ahead

Editor — On Oct. 18, I gave a test to more than 200 students in my two sections of ANT 360. At the end of the second class, I learned that cheating had taken place.

I weighed my very limited alternatives and decided to throw out the entire exam. Another (different) exam will be given next week.

ANT 360 is a course in which considerations of the costs and benefits of behavior play a prominent role. I will now submit a cost/benefit analysis of cheating at Cal Poly in the modest hope that it will interest your readers.

The vast majority of the 200 students in ANT 360 accrued no real benefits from this episode, but most of them — the honest ones — certainly sustained rather high costs. The students who invested significant amounts of time and sweat in preparation for the exam are left with a payoff of practically zero. These same honest students must now spend more time and energy to prepare for a new exam on the same material.

The wasted time from the first exam and the time used by the re-exam have to be subtracted from what should have been used for lecture and discussion.

What about the students who caused all this? I think it is reasonable to assume that these mouth-breathers were cheating because they hadn't bothered to attend class and do the reading. Their actions were designed to maximize benefits (in terms of at least passing grades) while minimizing their costs. Since the exam was trashed, they failed to attain the main benefits of easy grades.

Nevertheless, they sustained no real costs at all. A retest is to be given, so now they have the benefit of more time to prepare for the same material. Chances are, they will be able to pass the retest — without actually cheating.

And, because these gastropods have the intellectual integrity of a TV evangelist, they will feel no loss of the time that otherwise would have been given to lecture and discussion.

What about the faculty's role in this? Naturally, all of us who teach at Cal Poly have our own devices for limiting cheating. For reasons of academic security, I cannot divulge what these stratagems are.

But I can reveal that none of us who teach here think our little dodges make more than a minor dent in the incidence of student dishonesty. When it comes to preventing cheating, we faculty are basically impotent.

As for the administration, the story is more or less the same. Oh yes, Cal Poly has a clear policy against cheating. The policy is that there is no real penalty for doing it!

Let me explain this by means of a hypothetical example. We have two students, Melba and Zeke. Both are in serious danger of failing ANT 360. Melba is a slugabed who cuts class often and can't seem to find time to read the assignments. But she is basically honest. She takes the exams; she doesn't cheat and she fails. The next quarter, she gets her act together. She retakes the course and passes. Her F is expunged. Now Zeke is also a slugabed, but he isn't honest. He finds a way to cheat on the exams. If he gets away with it, he ends up with a C — and possibly even a higher grade. If he gets caught, he gets an F in the course. But by retaking the class and passing, the F for cheating is expunged.

As you see, the penalty for honest failure is exactly the same as the penalty for moral turpitude. If a student is in danger of failing a course, he (or she) has everything to gain and nothing to lose by cheating.

How could such an irrational policy exist? I don't know for sure, but I think there are two possibilities: first, the administration must of necessity take a wimpy and defensive stance due to the possibility of litigation; second, this policy was designed by the Academic Senate. We might wish for teachers and administrators to do more to prevent cheating, but for the most part, they are powerless to do very much. If for no other reason, it is because neither the administration nor the faculty incur any significant costs from cheating.

This episode reminds me of my

Blow the whistle on rape

By Don Hull

When I was 11 years old a rapist broke into our house and attacked my older sister. She had the presence of mind to assertively talk him into leaving her alone. The police came, took a report and left. The rapist came back later that night, and again was driven off by my sister.

I spent the next two years not sleeping in my room, but instead sleeping on an uncomfortable couch just under the roof where the rapist had crept across to get in my sister's window. I hoped that I might be able to wake up in time if I heard the sound of anyone walking on the roof above. The rapist was never caught.

When I was 16 years old a child molester attacked my younger sister. This time, I was able to stop the attacker and protected my sister.

I grew up, went to school, became a psychiatric technician, worked at Atascadero State Hospital, and led group therapy sessions with convicted rapists and child molesters. I thought I had forgotten about what had happened when I was 11 and 16 years old. Then one morning, leading group therapy, I realized suddenly that my forgotten unresolved feelings about the attacks on my sisters had led me unerringly to that group in that place. I was trying to understand and prevent sexual assaults on my sisters in society.

Now, as a returning student to Cal Poly, some of my fellow students, my little sister's at Cal Poly, have been assaulted by an unknown sick rapist. It drives me half-mad with anguish and anger. Why can't the campus police stop him? Why aren't they doing anything? But as a former peace officer

myself, I know that the police often can do nothing, just as they were unable to protect my sisters from assault.

I know that they are doing what little they can, and I share what must be a personal frustration that all of us must feel at being so incapable of catching that sick man at this time.

•What we can do about it?

But what can we do about it? I have a suggestion, a small something that I know will help, something I learned by doing in my 13 years experience in prisons and mental hospitals. It is this: everyone on campus will buy and carry a simple plastic police whistle with him or herself at all times. A whistle should cost only a few dollars at most, bought at any sporting goods store in town. No one, at any time, will ever blow a whistle on campus as a joke or to play or for any reason whatsoever except in an emergency.

At the sound of a whistle, day or night, everyone on campus will immediately respond to the whistle sound. That way, anyone who blows a whistle will shortly find him or herself surrounded by dozens or even hundreds of people. This is what we do in maximum security mental hospitals and prisons to help staff members in sudden danger. It isn't perfect, it's a little measure, but it works. We must be eternally vigilant.

I grieve for my little sisters who have been hurt on campus. If the sick man reads this, please turn yourself in now before more people get hurt. We must stop the pain.

dear and beloved mother, who always told me that cheaters never win. My experience has taught me, however, that she was wrong. I have shown that cheaters do win. At a minimum, they don't lose — not as long as their behavior is condoned.

Cheating benefits the cheaters and is very costly to honest students. Cheating will persist — as a veritable epidemic on this campus — as long as honest students turn their faces from it. I therefore call upon you to actively create a new cultural climate at Cal Poly, one in which the cheaters are identified and shunned. I'd like to see a campus where the courage and maturity that it takes to be a whistleblower is supported, respected and applauded.

Cheating will end on this campus only when students themselves refuse to tolerate it any longer!

Patrick McKim
Social Sciences Professor

Mystery of YAF poster unveiled

Editor — I haven't seen too many exciting things on campus since I joined Cal Poly in 1970. About two weeks ago, two black students came to my office and showed me a poster depicting a former black panther who would speak on the South African revolution on Oct. 9 in the Cal Poly Theatre. They questioned the intent of the poster. I told them that I never saw the poster before and would like to find out the details about the poster and the talk. It turned out that the talk was sponsored by YAF (Young Americans for Freedom) and the motive to make such a mysterious poster was that it would draw a bigger crowd. The speaker was Anthony Bryant who described his 12-year experience in Cuban prisons. The talk was dramatic and anti-communist. Perhaps, it could be more convincing if he simply

presented the facts instead of attacking people. The general public doesn't understand communism that well. In a communist country, people are living in fear and if you raise a voice which is different from the government, you will be executed or put in prison. Few people know that after Mao took over China, more than 60 million people were executed because of class hatred.

YAF at Cal Poly comprises a group of promising students who love our country and support our Constitution. I am proud to be their adviser. We believe "with liberty and justice for all." We believe equal opportunities but not equal results. We admit that we made an error on the poster design and it won't happen again. Had the poster specified the sponsor, the speaker, the topic, the place and the admission charge, more people would have shown up.

Supervisor candidates debate local issues

By Suzy Wallace
Staff Writer

In Santa Margarita's tiny Community Hall, 5th District Supervisor candidates Carl Hysen and David Blakely squared off on issues from growth to county roads.

The candidates appeared before an audience of about 60 in a forum that also included 29th Assembly candidates Jan Bradford and write-in Neal Royer. Incumbent candidate Eric Seastrand failed to appear.

Sponsored by the Golden Valley 4-H Club of Santa Margarita, the forum gave each candidate time to speak on personal qualifications and then opened up for questions from the audience.

Blakely addressed the crowd by saying, "I'm the only candidate from Santa Margarita," and went on to talk of water, slowing growth and the Santa Margarita Ranch.

"I have never, never opposed the state water project," Blakely said. "I do think it needs to be researched first."

David Blakely

Carl Hysen

DARRELL MIHO/Mustang Daily

"We have to take the responsibility to find solutions to problems," he went on to say and spoke of the need for new leadership. "It's time for a new direction on the board of supervisors," said Blakely. "It's time for a candidate who lives in Santa Margarita."

Incumbent candidate Hysen said, "We should all be concerned with the future because we have to spend the rest of our

lives there." He pointed out his achievements in office and past personal records in answer to questions and his qualifications.

In reply to questions from the audience Hysen said:

- The county has money apportioned for a homeless shelter but its citizens suffer from "NIMBY — Not In My Back Yard," when the county tries to locate a shelter.
- The county roads are being fixed

as finances allow; last year \$2 million was spent in road maintenance.

- The county budget for Sheriff and Fire Departments has increased by 60 to 70 percent in the last three years.

- San Luis Obispo General Hospital will remain open while an additional acute care hospital may be built adjacent to the hospital.

In response to the same questions, Blakely said:

- There must be a commitment from the board to build a shelter because using the county jail as a shelter is an "ineffective" solution.

- The county should lobby CALTRANS to build a passing lane on Cuesta Grade and the board of supervisors should slow the rate of growth in the county.

- While the budget has increased, the amount of manpower to handle the increased county growth must be added. "It is a lot cheaper to deal with people before they get in the judicial system."

- We need to build a new, cost-effective hospital on the present Johnson Street site.

Candidates for the 29th Assembly were also at the forum and spoke out against absent incumbent Eric Seastrand.

Bradford listed several bills Seastrand did not approve concerning education; specifically, school funding, class size and financial aid. "I put education at the top," she said.

Also examined were bills on child care, women's issues and the environment. Bradford said she would work to clean up toxics in Casmalia and opposes offshore oil drilling. "California already supplies three quarters of the nation's domestic oil supply," Bradford said. "Let someone else discover for awhile."

Write-in candidate Neal Royer said Seastrand has not served his country in active duty and said, "He's a Dan Quayle."

Royer echoed all of Bradford's points and said in conclusion, "If you can't vote for me, vote for Jan, because Seastrand's not your man."

While the issues and inuendos flew, all candidates agreed with forum moderator Sue Molle when she said, "Voting is free; not voting can be very costly."

Calendar

Monday

- The San Luis Obispo Health Department immunization clinic will be taking place today. For information call the Health Department at 549-5500.

- The Diabetes Support Group meets today at 2 p.m. in the Health Center Conference Room.

Tuesday

- An audiovisual presentation on alternative automotive fuels will be given by Cal Poly professor, Dr. Mac Carley. The presentation will be held at 7 p.m. in the Engineering Building room 112.

- "Chilean Poetry," a reading by foreign languages lecturer Hernan Castellano-Giron will take place at 11 a.m. in room 217D of the UU.

- A National Park Service Application Technique Workshop will be held from 6:30 to 8:00 p.m. in Chumash Auditorium room 204.

- Guest artist Joan McKasson will present a watercolor demonstration at the meeting of the Central Coast Watercolor Society. The presentation and meeting will begin at 7 p.m. at the San Luis Obispo Art Center located at 1010 Broad St. For more information call 528-8499.

- In celebration of teenage sexuality month, a workshop on "How to Talk to Your Teen About Love and Sex" will be presented by Dr. Carol Cassell at Sierra Vista Hospital Auditorium. The workshop begins at 7 p.m. There is a \$10 charge per person, \$15 per couple. For more information call 544-2478.

COVER-UP

From page 1

story, because it makes it seem not real — that it didn't happen," Honegger said concerning the arms-for-hostages allegations. "It's real, and it did happen."

Many critics of the movie wonder why it took such a long time for the story to emerge. "This is old news," Honegger said. "We're talking about something that began in 1981 and really before that. Some newspapers won't publish old news."

She said the *Cover-up* story was broken by the press and still is being covered. "Awareness is growing," she said. "More stories are out in the main stream papers. I've been on more and more radio talk shows and TV spots. This isn't new."

She also said that it is possible that presidential candidate Michael Dukakis will soon use the information presented in the movie.

Honegger partially blamed the public for not pursuing the Iran-Contra affair. "You must take more responsibility to be informed," she said. "Democracy does not work unless there's an informed electorate."

With this response, Honegger said this is the greatest reason why it took the information in *Cover-up* so long to spread nationwide.

Part of the controversy lies in the question of credible sources to back-up the allegations.

Honegger said she could produce tapes and/or transcripts of interviews with former President

Carter, who had received reports of the 1980-81 dealings; the former president of Iran, Abolhassan Bani-Sadre, who "talks openly about some of the events"; and Iranian-American arms dealer Houshang Lau, who has reported meeting with Reagan and Bush campaign officials several times.

There were even two reliable eyewitnesses of the meeting between Bush and Iranian officials when they were planning the first arms for hostages deal, she said.

A Pulitzer Prize winner has written a series of articles about the Iran-Contra affair, which she said help to prove that *Cover-up* is not a facade, and Honegger said that the allegations have been confirmed in several European newspapers and a Greek newspaper as far back as 1986.

Honegger also cited sources that she said could prove *Cover-up* details by showing official payment vouchers. "Arm shipments were catalogued," Honegger said, waving a stack of documents. "There are invoices that prove many more shipments of arms. The former president of Iran, now in exile, knows this. It's a fact of history."

In addition, Honegger quotes from "official French intelligent reports," which she said help to confirm her statements.

Honegger plans to continue her struggle against officials she believes were and still are involved with the Iran-Contra affair.

"I am personally working toward having subpoena power and moving step by step toward that," Honegger said. "March 8, 1981 was a big lie. The Iran-Contra dealings were something we were not supposed to know."

TV called seductive and addictive

Writer critical of mass media's manipulation of public

By Tara Giambalvo
Staff Writer

Television is telling us how to think, according to Howard Rosenberg, Pulitzer Prize winning television critic for the *Los Angeles Times*.

"We are really being manipulated by the media all the time," he told an audience of about 100 people in the Cal Poly Theatre Wednesday night.

"I see an increasing dependence on television," he said. Television is "a medium that seduces and addicts, like a drug."

He told of a Los Angeles woman who proved the ease in gaining media coverage.

She played the piano alongside a busy freeway and ended up on the evening newscast. On another occasion, she had some one pass out \$1 bills downtown as she played the piano on the sidewalk. She again landed on the evening newscast.

"How much media time can you buy for \$1,000?" Rosenberg asked. "Quite a bit, it seems."

Rosenberg often spoke in rhetorical questions, then answered them.

Elections are another example of manipulation of both the viewers and the media, he said.

"Can you really distinguish between the media and the political process?" he asked. "Less and less."

He offered candidate photo opportunities, televised debates and polls as examples.

Viewers watched the "memorable but meaningless pictures" of Gov. Michael Dukakis riding in a tank after Vice President

TOM VISKOCIL/Mustang Daily

Howard Rosenberg

George Bush said Dukakis would cut the defense budget, he said.

Much of the fault lies with the media, he said.

Television news often shows only the catchy one-liners buried in a substantive speech because broadcasters are afraid of being boring, he said.

Televised debates are another example of the media's effect on viewers.

"They celebrate the very qualities not wanted in a candidate," he said.

Candidates are "cramming their heads full of information they should already know" for the debates, he said.

And candidates learn that one-liners net them airtime, so they answer the questions with snappy comebacks in 30-second sound bites, he said.

"I want a candidate who will take the time to consider his answers in a crisis," he said.

Likewise, "who does the deciding (of the winner)?" he asked. "The media, of course."

The media also conduct the

polls measuring a candidate's popularity.

They are presented as news by the network sponsoring the poll, though they are "merely estimates of what's happening," he said.

And some polls must be wrong if they do not all agree, he added.

But, he said, "I'm like everybody else. After awhile I begin to believe the polls."

In the end, "no one is a winner here," he said. "Not the media, not the candidates, not the voters, not the nation."

The role of news in television has changed, he said.

"The line separating news and show business ... is almost nonexistent," he said. Because news is but a small element of television, "the values of entertainment invariably slip into news."

USA Today demonstrates this superficiality.

"*USA Today* is the print version of television," he said. And the television show "*USA Today*" is the "television version of the print version of television."

"Television is the currency of communication," he said.

Rosenberg said his job as a critic "is to get you to think about what you're watching," not to tell viewers what to watch.

But if viewers do not like what they see, they should let the networks know, he said.

"Television executives do listen to viewers" because profits may be riding on their satisfaction, he said.

Rosenberg has been with the *Los Angeles Times* since 1978. His thrice-weekly column is distributed to more than 600 newspapers across the country. He won a Pulitzer Prize in 1985.

Poly blazes a trail over Pioneers

By Anthony M. Romero
Staff Writer

The Cal Poly football team started its victory bid with a scare as Hayward scored on the first drive of the game, but the Mustangs went on to stampede the Pioneers 40-6 in Saturday's Homecoming contest.

The win kept the Mustangs playoff hopes alive, and put them over the .500 mark at 4-3. The loss set Hayward back to 1-7.

The Mustang defense watched in disbelief as Hayward quarterback Tom Duarte connected with tailback Craig Roberts wide open in Poly territory. Robert's run to the end zone was uncontested as he outdistanced the nearest Poly defender by at least 10 yards. This would be Hayward's only lead of the game as they went ahead 6-0.

The early score made the 2,305 Mustang fans ill at ease, but linebacker Chris Dunn said the Mustang defense wasn't expecting Hayward to try to attack early in the game.

"We blew a man to man coverage and they scored," Dunn said. "But after that score we were able to adjust and dominate their offense."

The Mustang offense didn't need any adjustments as they responded by driving for a touchdown. Tom Sullivan led the drive completing passes to receivers Terry Cole and Travis White, while Rod Riley provided the running yardage as he rushed for 23 yards and the first Mustang touchdown on a 6-yard sweep. The extra point was good and the Mustangs led 7-6.

The Mustangs weren't satisfied with the slim lead and early in the second quarter they increased it to 14-6 on a 12-yard pass from Tom Sullivan to Rick Lineweaver.

Hayward couldn't get its offense back on track, but Poly did with a 88-yard drive which ended in a fieldgoal and put the Mustangs ahead 17-6. The half seemed over, but Poly's defense wasn't ready for a halftime break.

Hayward quarterback Eric Lutz pitched to his running back, but the ball never reached its destination as Chris Dunn recovered his first of two fumbles on the day.

The ball was spotted on the Pioneer 17 and Riley ran his way to his second score of the half

from 12 yards out. Poly led 24-6 and at this point the game held no challenge for the Mustangs except to see how many points they could score.

Poly dominated Hayward's offense allowing them only two first downs in the first half, and Poly's offense did their job as Sullivan passed for 108 yards and Riley rushed for 141.

The third quarter saw different Mustang players as Keith Jarret took over at quarterback and reached paydirt with a 77-yard drive which featured Jarret's passing ability. He completed six passes, including a 55-yard gain to receiver Claude Joseph. Riley took scoring honors, scooting in from the 1 yard line. Poly led 31-6 with 1:11 in the third quarter.

Less than a minute later linebacker Rene Oliver sounded off for the defense by intercepting a Duarte pass that looked more like a discus throw. Oliver returned the interception 53 yards for 6 making the score 38-6.

"Duarte threw the ball carelessly because he was under a lot of pressure," linebacker Tom Carey said. "The defensive line had a lot of pressure on him, so he threw the ball away."

Hayward's game started on a good note but ended on a bad one as the Mustang defense harassed Hayward punter Mike Craig into the end zone for a safety and the final points of the game as Poly won 40-6.

"We geared up to run them over," Rod Riley said. "We were up for the game, knew what we had to do, and did it."

Riley's gears were in overdrive as he rushed for 188 yards. Sullivan and Jarret split the passing yardage. Sullivan threw for 108 yards and Jarret passed for 103. Rick Lineweaver led all receivers with five catches for 69 yards and one touchdown.

The leading scorer on the defense was Rene Oliver with 6 points on his interception return. Oliver had four tackles, but Chris Dunn was the defensive leader with seven tackles and two fumble recoveries.

The Mustangs continue their playoff hopes when they travel to Davis to play in the Aggies Homecoming next Saturday. Tom Sullivan says it is a vital game because the Mustang's playoff chances will become clearer after the Davis game.

PATRICK JACKSON/Special to the Daily

Claude Joseph hauls in a Tom Sullivan pass in the Mustangs 40-6 Homecoming victory over Hayward.

Poly second in league tune-up

Coming off the Cal Poly SLO Invitational and looking ahead to the conference championships, the Mens Cross Country team got a change of pace at the Pioneer Relays at Cal State Hayward on Saturday.

Coach Tom Henderson said it was just what the Mustangs needed a week before the CCAA championships. "It was short fast and very competitive."

The race was a four man, 12-mile relay, with each man running a 3-mile leg.

Walsh by three seconds.

Henderson said that David Walsh had his best effort of the season running the lead three mile leg in 13 minutes and 48 seconds. With Walsh's effort the Mustangs finished second behind the Reebok Aggies, champions of the SLO invitational.

The Aggies were led by Carmelo Rios a Cal Poly Alumni, former NCAA II national championship and an Olympian for Puerto Rico. Rios edged out

Times for the other legs were; Scott Peterson 14:14, Erich Ackerman 14:39 and Paul Ghidossi 14:37. Total team time was 57:19 good for the second place finish.

The Mustangs will now focus their attention on next week's conference championship at Cal Poly Pomona. Teams to watch are the Mustangs, Cal State LA, Pomona and UC Riverside.

CHEATING

From page 1
who sees someone steal should
go to prison?"

"She needs to take logic,"
another replied under his breath.

McKim told the class that he
had planned to grade the test on
a curve, which prompted the
students to suggest that he
grade on a straight percentage so
that the grades of those who
cheated would not affect the
marks of those who did not. But
McKim declined.

"I cannot in good conscience
record this exam with the knowl-
edge that cheating had taken
place," he said.

Students enrolled in his second
section had varied opinions on
McKim's decision.

"I can see his point in that it's
not fair for an honest student to
have to take it over," said
Marianne Burritt, a social
sciences senior. "I personally
took a lot of time studying. The
people that cheated should be
punished for it, not the people
who didn't. But I don't know

what I can do about it."

Marty Sette, a natural
resources management junior,
also said that he could see
McKim's point, but said he feels
the problem could have been
handled differently.

"I studied hard and I know I
did well," he said. "I'll be mad if
I do worse on this (the next) test
than on the first one."

Kristine Smith supported
McKim's decision.

"It blew me away," the four-
th-year business major said. "I
had two tests that day and in the
other one, I saw this girl turn her
head and I saw she had a cheat
sheet in her backpack. I was
furious. I had a hard time con-
centrating on the quiz because I
was so mad at the girl."

She said she has tried to call
the professor but has not been
able to reach him.

"It totally ticks me off when
people cheat like that," she said.
"Because it's not like all my
classes aren't hard, but that's
why we're here — isn't it? I'm

glad (that McKim will retest the
class). Well, not glad ... it's going
to be a pain to study. But if you
knew it once, it's not going to be
much harder."

Smith said she went to a
private high school which expell-
ed students for cheating.

"He was right," she said of
McKim's decision. "I understand
people who are angry to have to
take it again, because it's not
fair. But just for the principle of
someone who cheated getting a
higher grade than me, I'm willing
to put the time in."

According to the Campus Ad-
ministrative Manual, the first
penalty for cheating is an F
course grade and prohibition
from further attendance in the
class. If further cheating occurs,
offending students may have to
go through disciplinary action
set by the Student Discipline
Procedures of the California
State University system. If stu-
dents wish to challenge accusa-
tions of cheating, they can appeal
to the department head, then to
the Fairness Board, which hears
student grievances.

But according to McKim,
cheaters incur no real cost from
being caught at cheating. All
cheaters have to do if they are
given an F in a class is to retake
that class, just as students who
got an "honest" F would, he said
in a letter to the *Mustang Daily*.
He said that ultimately it is up
to students to stop others from
cheating by creating a social at-
mosphere that would discourage
the practice.

"Either you condone cheating
or you don't," he said.

*Next week: A look at
Poly's cheating policy*

KCPR

From page 1

The next step in the evolution of the station, according to faculty adviser Ray Tippe, will be the move of the transmitter from the present location on a hill on the northwest edge of campus to the heights of Cuesta Peak.

"The major block, or should I say blockhead, in the past has been the former dean of liberal arts," Tippe said.

Tippe has assured station personnel that the new dean is more open-minded and the move of the transmitter looks better than ever.

"(With the transmitter) on top of Cuesta Peak, we could blanket the city with a good signal and have coverage from Paso Robles to Santa Maria," he said.

Currently, KCPR's signal begins to lose strength just outside of San Luis Obispo.

To celebrate the 20th anniversary, the station held a barbecue over the weekend at Cuesta Park, where current staff members intermixed with KCPR alumnus to trade stories of the past and discuss the direction of the station.

"Once you've worked in broadcasting, nothing else seems interesting," Calabrese said at the gathering.

No story about the history of KCPR would be complete, however, without a mention of the late faculty adviser to the station, Ed Zuchelli. Zuchelli, also a journalism professor, was instrumental in the conception of the station and was the key to the growth and success of KCPR until he died in the spring of 1986.

Workshop addresses renting rights

By Karin Holtz
Staff Writer

Landlords and tenants met peacefully last week night to discuss how to prevent conflicts in the future.

The San Luis Obispo Human Relations Commission held its annual Tenant-Landlord Workshop in City Hall to inform citizens of their renting rights and responsibilities.

Michael Blank, an attorney with California Rural Legal Assistance, said tenants and landlords need to concentrate on three basic areas to prevent problems from arising.

Common sense, cooperating and agreeing with the landlord or tenant should keep most people out of legal trouble, Blank said. If the issue does go to the courts, proof is important, he said.

"The bottom line is who is the judge going to believe," Blank said.

Tenants, in particular, should

be sure to document everything, he said. This begins with doing a walk-through of the rental unit with the landlord when the person moves in, Blank said. Any defect, such as stains in the carpet, should be noted so tenants cannot be blamed for it when they move out.

Blank suggested that if a landlord will not do a walk-through with the tenant, the tenant should do a walk-through with another witness who is not a wife, husband, boyfriend or roommate. If anything looks like it could be a problem later, the tenant should take pictures as proof, he said.

Proof is also very important when it comes to repair work, Blank said. If something needs to be fixed, the landlord should be called and the call should be backed with a letter, he said. The landlord needs to respond within a reasonable amount of time or the renter may take action, he added.

What a reasonable amount of time depends on what needs to be fixed. According to the law, 30 days is enough time for most repairs. If the problem requires immediate attention, as would a broken-down heating system in the winter, the landlord must respond right away.

If the landlord does not respond within reasonable time the tenant can deduct from the rent the amount the defect has diminished the value of the property.

For instance, Blank said, a leaky roof may make one room of a unit uninhabitable. If that room is one-fourth of the entire living area then one-fourth of the rent may be withheld. Tenants may also have the work done themselves and deduct the cost from the monthly rent.

Bob Van Sickle, a Human Relations Commission aide, said that more than 50 percent of problems revolve around deposits. People can protect

themselves by keeping the documentation from the initial walk-through and following up with a check-out walk-through.

Blank said renters should know that within 14 days of the check-out, the landlord must return the deposit in full or in part with an itemized list of what deductions were made. If the landlord fails to do this, the renter can take him to small-claims court.

Renters can avoid many problems by looking for a good landlord in the first place. Blank suggests making sure the landlord is respectful. Ask questions about maintenance, if rent will be raised, and how to get deposits back, he suggested.

"If they act hostile or act like it's none of your damn business, then you know you're going to have problems," Blank said.

The Human Relations Commission offers renters and landlords information, advice and arbitration services.

This is a sign of how well Commonwealth will work for you

And with Commonwealth working with you, you may suddenly see this sign all over town. Because we process mortgages fast.

We work fast. In fact, we're so fast, we've even got a 30-day loan approval guarantee - we approve it in 30 days or the origination fee is free. And, after a home buyer signs our application, we'll lock-in his rate for 60 days at no charge.

We keep you informed. We're also one of the few companies offering computerized tracking. So your Commonwealth loan officer can tell you - at anytime - what stage the approval is in.

Call us - you'll be sold, too. The next time your client needs a mortgage, take a look at the services, the products and the people of Commonwealth Mortgage. You'll be sold, too.

Two remaining whales balk at following escape route

BARROW, Alaska (AP) — Two young whales trapped by ice balked Sunday at following a narrow escape route to open water that was being carved with chain saws by Eskimos who ordinarily hunt whales.

A National Guard helicopter hammered at the ice with a five-ton chunk of concrete, but the whales were more than three miles from open water, with a massive ice ridge in between and a wind shift threatening to push ice around them and trap them further.

Rescuers said that even if everything went as planned, it

would be at least Wednesday night before they could get the whales as far as the ridge.

While high-technology equipment poured into Barrow during the weekend, Eskimos using chain saws and strong backs made the most progress at freeing the California gray whales from a tiny breathing hole.

About two dozen natives hacked 34 breathing holes Saturday, for a total of about 60 holes extending more than one and a half miles from where three whales were stranded by moving ice about two weeks ago before they could migrate south.

The smallest and youngest of the whales, named Bone, disappeared Friday night and was presumed dead.

Just as the tedious hole-cutting hit its stride, the whales balked, advancing only a few hundred feet past a large opening where they spent Friday night and most of Saturday.

Rescuers said they feared the whales were spooked by an underwater shoal. North Slope Borough biologist Geoff Carroll said most of the water in the area is about 20 feet deep, compared to only 12 or 13 feet of water in the shoal.

"You figure two feet of ice and five feet of whale, and that doesn't leave them too much room to swim," Carroll said. "I don't blame them for not wanting to go through there."

Whaling captain Arnold Brower, whose crew used donated chain saws to help free the animals, was frustrated by the whales' reluctance.

"If we move them, then I'll call it progress," Brower said, leaning down to push the snout of a

surfacing whale in the direction he wanted it to go.

Ron Morris, a biologist with the National Oceanic and Atmospheric Administration, said sonar would be used to see if there is an easy way around the shoal.

The surviving whales appeared to be healthy, immature whales estimated at 27 to 35 feet long, said David Withrow of the Marine Mammal Institute in Seattle. He said one apparently was a yearling and the other was 2 to 3 years old.

Rescuers worked in the dark using portable lights, snowmobile headlights and de-icing equipment dubbed "the bubblers" to keep the holes open ahead of the whales.

The Skycrane helicopter on Saturday used its concrete plunger to probe the ridge, a jumble of ice blocks as big as a house, but the battering ram seldom penetrated. The ridge formed by colliding ice masses is several hundred yards wide.

Of additional concern was a shift in the wind, which Eskimo

hunters said could turn the area where the whales were trapped into an impassable jumble of ice rubble.

While marine biologists called the whales Bone, Crossbeak and Bonnet, the Eskimos have named the two survivors Siku, or ice, and Putu, ice hole.

The vanished whale they named Knik, one of 28 Eskimo words for snowflake.

The young whales' lack of experience apparently led them farther north than the endangered California gray whales normally go, and caused them to stay too long before starting their annual migration to the warm water off Mexico's Baja California, Withrow said.

The rescue effort had attracted so many spectators and news teams that a police officer was stationed out on the ice to direct traffic.

A giant Air Force C-5A cargo plane sent in with fresh equipment took up so much ground space at Barrow's airport that a commercial flight didn't have room to land.

Net-trapped whale freed in Long Beach

LONG BEACH, Calif. (AP) — A 25-foot gray whale that became trapped in a weighted gill net off Alamitos Bay Channel was cut free by two lifeguards and continued its southward migration during the weekend, authorities said.

The whale was reported just before 5 p.m. Saturday and lifeguards Jason Hudson and Alan Powder found it three miles offshore in a net weighted with eight small anchors, said Capt. Randall Davis of the Bureau of Marine Safety.

The lifeguards hacked away at the net for 45 minutes and were able to clear all but a small portion of the net fouling one of the whale's flukes.

The whale began to swim south and whale experts at Sea World in San Diego were alerted to be on the lookout for it, Davis said.

Alamitos Bay is on the east side of Long Beach Harbor and the rescue site was east of the harbor breakwater.

California gray whales migrate along the Pacific coast of North America from the arctic region to Baja California for spawning. Marine and wildlife officers occasionally are called to attempt rescues of snared whales because they are air-breathing mammals and can drown when fouled in nets.

In-store recording device lets consumers pick songs

LOS ANGELES (AP) — A device being introduced in record stores Monday crosses a jukebox with digital technology for a service that allows consumers to custom-make their own music cassettes from a variety of artists and labels.

The new gadget has drawn mixed reviews from some major record companies, which fear it may cut into album sales, and some are not participating.

Customers can select from up to 2,500 songs. A store clerk punches in the buyer's selections, in the order chosen, and the customer gets a 90-minute tape with up to 25 songs. The cost is 50 cents to \$1.25 a song.

The store's copy of the music is recorded on an optical disk, allowing all those songs to be copied onto the tape in just five minutes.

Personics System Co. of Menlo Park, Calif., hopes to have as many as 15,000 songs available eventually in its monthly catalogue.

Personics is introducing 25 systems at record stores in California and hopes to expand to other areas of the country.

"Personics from day one will offer a vast constellation of musical artists ... You will be able to personalize music like never before," said Charles Garvin, founder and president of Personics.

The Personics system will give smaller record stores pressed for space a deeper offering of songs.

The price includes fees and royalties for artists and their labels, who otherwise wouldn't get a penny if consumers made their own tapes from radio or friends' records.

Personics has attracted at least 30 labels, including Polygram, MCA, Warner-Elektra-Atlantic, Chrysalis and others.

Personics has not yet been able to attract giant CBS Records, home of Bruce Springsteen and Michael Jackson, or the BMG group, formerly RCA Records. A&M Records, with such artists as Sting and Janet Jackson, is not interested, spokeswoman Diana Baron said Friday.

Record companies are cautious about Personics because sales of

single songs could cut into album sales, said Michael Greene, president of the National Academy of Recording Arts and Sciences.

"For the most part the idea is a good one," said Greene, who praised "any system that would cut into (illegal) home taping and give artists their royalties." Billions of dollars a year are lost worldwide through record pirating and home recording, industry experts have estimated.

"The problem I'm concerned with is what happens when people go into a record store and start doing compilation tapes of hits?" Greene said. "The artist may have other material in the album they consider necessary for a listener to understand what they are doing musically."

Garvin said Personics' test marketing in two stores showed it brought royalties from "new consumers who would not have been album buyers, and people who would not have bought the music at all, but probably would have home-taped it."

Growing record companies like 6-year-old Enigma are making available their entire catalogue.

"It's another way to sell songs, like K-Tel compilations," said Enigma co-founder William Hein, who said Personics could be a way to rekindle the dying market for single releases.

Other companies are more cautious about the system, which took \$8 million and five years to develop and market.

Capitol Records, one of Personics principal owners, has made available its current single releases and older albums, for instance, but not material from its current albums unreleased as singles.

And while the Capitol Beach Boy catalogue will be available, the legal tangle surrounding the Beatles' music means they won't immediately be in the Personics catalogue, said Personics board member Elliot Goldman.

"The industry has a right to be skeptical," Garvin said.

"But I think we have convinced everyone this is an effort of, by and for the music business for continued control over its product."

Bush commercials overshadow Dukakis

WASHINGTON (AP) — Republican George Bush is running an advertising campaign so successful that it has overshadowed news events and swayed voters in a near-vacuum that Democrat Michael Dukakis only now is moving to fill.

With the Nov. 8 election little more than two weeks away, Dukakis went on the air during the weekend with strong counterpunches to a months-old Bush offensive that raked him over the coals — often inaccurately — and obliterated any momentum the Massachusetts governor had leaving the Democratic convention in July.

From the first commercials filled with children and warmth, balloons and adulation, to stinging ads attacking Dukakis to a series of foreign affairs spots stressing the vice president's experience, Bush's ad people sought to transform his image from wimp to strong yet sensitive leader.

At the same time, Bush's ads

have battered Dukakis to the point that voters who once viewed him as a competent, innovative governor or — at worst — an unknown, tend to see the Democratic nominee as soft on crime, weak on defense and the environment.

Dukakis' own advertising got off to a late and shaky start, which was an unexpected bonus for Bush and his highly experienced media team led by Roger Ailes.

"If Roger Ailes was working for Dukakis, he would be the front-runner," said Kathleen Hall Jamieson, a University of Texas professor specializing in political communication.

Jamieson and other experts say that, in contrast to Bush, the Dukakis media campaign has been damagingly out of sync. Television viewers saw nothing that countered Bush's attacks on crime and the environment.

Instead, they say, there were celebratory Atlanta convention scenes a month later, and

obscure "packaging of George Bush" commercials when voters needed to know more about Dukakis and his record.

In lengthy television appearances between now and Election Day, Dukakis hopes to publicize his record and persuade voters to take one more look at him — and Bush — before they make up their minds.

On Friday, Dukakis came out slugging. He began airing a series of blistering TV ads during the weekend in which he appears in shirtsleeves to accuse Bush of broadcasting claims that are "full of lies" and "dragging the truth into the gutter" about the Democratic nominee's positions on crime and defense.

He personally goes on the attack against Bush and his running mate, Dan Quayle, mentioning both by name. One TV ad savages the vice president's anti-drug leadership, showing scenes of children buying drugs and Bush meeting with Panamanian leader Manuel Noriega.

Study finds Hispanics, American Indians less prepared for college than other groups

LOS ANGELES (AP) — Hispanics and American Indians are less prepared for college than other minority groups in Los Angeles County while Asian and Filipino students figured well above white students, a study found.

Of 1987 public high school graduates, only 13 percent of American Indians and 16 percent of Hispanics completed courses required for entrance into the University of California, said county demographer Angel A. Sanchez.

Nearly 23 percent of black

students completed the required courses, a 4.5 percent increase since 1985, according to the study published in the October issue of Trends, published by the County Office of Education.

"Blacks are closing the gap," said a spokesman for the State Department of Education.

Of white graduates, 31.7 percent completed the UC required courses, well below Filipinos at 39.7 percent and Asians at 54.4 percent, the study found.

Last year Asians had the highest percentage representation in advanced math,

physics and chemistry courses, followed by Filipinos and whites.

Hispanics and American Indians had the lowest representation in physics and chemistry and were marginally ahead of blacks in advanced math courses.

"We've got to get these kids started early or they are not going to be able to go to college," state Superintendent Bill Honig said in response to the study.

The state noted, however, that more minority students are taking the standardized Scholastic Aptitude Test, often required for college admission.

Engineering Majors

Baxter Healthcare Corporation, Medical Specialty Devices Group is a bold, dynamic organization made up of Edwards Divisions, Bentley Laboratories, Inc., and Technology & Ventures. We are a vital part of the nation's largest supplier of quality medical products and devices for hospital and surgical use. Now is your chance to highlight your future...at Baxter.

Your excellent academic background and desire to attain your professional goals are just what we're looking for to consider you as a member of the highly-successful Baxter Healthcare Corporation team. We have ongoing needs for Graduating Seniors in the following disciplines:

Electrical Engineering Biomedical Engineering
Mechanical Engineering Physics (with emphasis in Optics)

Come and meet our Representatives to discuss career opportunities available. We'll be on campus the following dates and times:

Information Session: Wednesday, October 26
On-Campus Interviews: Thursday, October 27

Highlight a great future for yourself at Baxter, Medical Specialty Devices Group. Contact the Placement Office for more information about how you can schedule an interview. We are an equal opportunity employer m/f/h.

MACARTHUR

JAMES? SNAP OUT OF IT, JAMES. I NEED YOUR ADVICE. JACK, JIM COOTS, AND PAUL HAVE NOT YET RETURNED FROM THEIR JOURNEY THROUGH TIME.

SLEEP? WHAT'S THAT?

I FOUND THIS RECOVERY DEVICE ON PAUL'S WORKBENCH. ONCE ACTIVATED, IT WILL BRING THEM BACK TO OUR PRESENT TIME.

SO WHAT DO YOU WANT FROM ME?

SHOULD I BRING THEM BACK OR NOT?

OH. AH - WELL, DON'T BRING THEM BACK YET. IF THEY'VE BEEN GONE THIS LONG, IT PROBABLY MEANS THEY'RE HAVING FUN.

FUN?! DID YOU SAY WE'RE HAVING FUN?!?

NO!! I SAID, I THINK WE SHOULD RUN!!

MACARTHUR

WE'RE SURROUNDED BY TERMINATORS!! WE'RE DONE FOR!!!

HUH? WHAT? YOU WERE ASLEEP, GUY. DR. HAIRBRAIN JUST ANNOUNCED OUR PROJECT FOR THERMODYNAMICS

YEAH. I KNOW. A TIME MACHINE.

TIME MACHINE? YOU MUST'VE BEEN DREAMING GUY. HE WANTS TO MAKE A BRIDGE OUT OF PUNCHED CARDS.

PUNCHED CARDS?? WHW! IT WAS ONLY A DREAM.

CLASS IS OVER. GET OUT.

Hurricane toll at 50 in Nicaragua

MANAGUA, Nicaragua (AP) — Hurricane Joan killed at least 50 people and left 300,000 homeless in its rampage across Nicaragua, officials said Sunday. Rain drenched the country while the government tried to organize rescue efforts and restore communications.

The storm left another 21 people dead in Costa Rica and four dead in Panama, bringing the death toll for its six-day trip across the Caribbean to at least

111. More than 150 people were missing.

Joan slowly weakened into a tropical storm over land but strengthened again when it reached the Pacific. No longer an Atlantic hurricane, it was given a new name in the sequence of this year's Pacific storms — Tropical Storm Miriam.

At 2 p.m. EDT Sunday, Miriam was about 95 miles southeast of San Salvador, with maximum sustained winds of about 50 mph, according to the National Hurricane Center in Miami.

Hurricane Joan blasted into the east coast city of Bluefields with 125 mph winds early Saturday and marched across the country of 3 million, leaving a trail of death and destruction before reaching Managua about 10 p.m. Saturday.

Bluefields, Corn Island and the southeastern Atlantic coast region "practically disappeared from the map," the Managua daily *El Nuevo Diario* said Sunday.

The storm felled trees, electrical towers and telephone lines as it came through the capital.

Throughout the city Sunday,

people were cleaning mud-covered homes while others cut up fallen trees for fuel. Soldiers carrying picks and axes joined to clear the streets.

One death was reported in Managua, a man electrocuted by a downed power line.

Officials said there were nine dead in Bluefields, 180 miles east of Managua. The city of about 60,000 was reported 90 percent destroyed.

President Daniel Ortega said Cuban planes were expected to bring medicine, clothes and tents to Bluefields. The city's mayor, Henningston Omeir, appealed for urgent aid during a visit to London.

"We are sending out an SOS to governments, agencies, to the people in general for urgently needed help ... in whatever area, health, food, clothing, construction materials and practically everything," said Omeir, part of a Nicaraguan delegation on an official European visit.

Ortega, after touring the capital city of 1 million, reported that at least 50 people had died across Nicaragua and 300,000 others had been left homeless. He gave no details.

FOR PEOPLE WHO CARE ABOUT THEIR STUDIES!

Escape from your noisy neighbors in your own quiet, PRIVATE Studio. Furnished (from \$390/mo.) or unfurnished (from \$340/mo.), these beautiful units offer you microwaves, reserved parking, excellent security, and a pool, within a 5-minute walk to Cal Poly. Call 543-4950 for more information.

"I don't want a lot of hype. I just want something I can count on."

Greg Riley·University of North Carolina·Class of 1989

Some long distance companies promise you the moon, but what you really want is dependable, high-quality service. That's just what you'll get when you choose AT&T Long Distance Service, at a cost that's a lot less than you think. You can expect low long distance rates, 24-hour operator assistance, clear connections and immediate credit for wrong numbers. And the assurance that virtually all of your calls will go through the first time. That's the genius of the AT&T Worldwide Intelligent Network.

When it's time to choose, forget the gimmicks and make the intelligent choice—AT&T.

If you'd like to know more about our products or services, like International Calling and the AT&T Card, call us at 1 800 222-0300.

AT&T

The right choice.
