Revival of hobby garage planned

By Sally Kinsell

Staff Writer
New management has taken over the campus Hobby Garage in an attempt to revive the facility.

Roger Bowman, a junior in agriculture engineering, stepped in as the new manager at the beginning of spring quarter. The Hobby Garage, located near the entrance of Poly Canyon, serves as a place for students to work on their cars.

See GARAGE, page 12

Time has run out on ASI, UU insurance

By Dawn J. Jackson

Staff Writer

The ASI and University Union insurance policy no longer includes general liability coverage, which means that for general claims of up to \$1 million, they are not insured.

"The reality is that the assets of ASI, as of (Wednesday), are not protected at all," said Roger Conway, ASI executive director.

Fireman's Fund Insurance Company gave ASI a 90-day trial policy which was to be revoked March 15, but then allowed two extensions in order to give time to find another carrier. The final day of coverage was Tuesday.

Conway said the time element is especially distressing because of the closeness of Poly Royal, which features the rodeo.

Cal Poly, under its own insurance policy, will provide coverage for Poly Royal rodeo participants, who will have to sign waivers which state they will not sue Cal Poly in case of an accident. ASI had to buy a separate policy from the National Intercollegiate Rodeo Association to insure the spectators of the event.

ASI and the U.U. are covered for claims ranging from \$1

million to \$5 million under their "commercial umbrella," which will expire July 1.

In addition to the commercial coverage, ASI has insurance for its directors and officers. This ensures that members of the board of directors as individuals are free from litigation which may result from decisions they have made.

Conway called this coverage "miraculous," as it is almost unobtainable. It will expire in October.

Fireman's Fund decided to cover parts of the original 90-day policy. It now covers fire and theft as well as protecting objects in the University Union Art Gallerie, sailboats operated by the sailing club and anything in the care or custody of ASI or the U.U.

ASI and U.U. automobiles are covered by assigned risk, which includes liability of up to \$2 million, but which excludes collision insurance. Conway said ASI and the U.U. are paying about \$1,500 per vehicle for liability insurance.

Conway said they are paying

Mendes and Sweeney lobby against cuts in student aid

By Jonathon Volzke

Special to the Daily

WASHINGTON — ASI President Mike Mendes and Vice President John Sweeney continued a weeklong lobbying effort Tuesday for CSU students on behalf of the California State Students Association.

The pair joined 13 other student leaders from 12 CSU campuses in attempts to prevent \$244 million in cuts from federal student aid programs.

The group, backed by the California State Students Association, is scheduled to meet

with 41 representatives from Congress before returning home on Saturday.

The programs hardest hit by the cuts, which come as a result of the Gramm-Rudman-Hollings reduction law, are most likely to be Pell Grants and Guaranteed Student Loans.

While federal department officials decide how to implement the cuts, the Pell Grant and GSL programs will be reduced according to the specific guidelines in the law.

In the GSL program the

Poly Royal weekend kick-off

Businesses open Sundays

By Stacie Errico

Staff Writer

A majority of downtown stores and restaurants in San Luis Obispo, which previously have been closed on Sundays, will kick off new weekend hours on Sunday of Poly Royal weekend.

The Business Improvement Association, consisting of businesses from the streets of Nipomo to Santa Rosa and Palm to Pacific, is sponsoring Royal Sunday on April 27.

Surveys were sent on March 10 to all BIA retail members to see their response to remaining open on Sundays. Dodie Williams, administrator for the BIA, said the response was great.

editorial

It's good to be a part of Good Neighbor Day

Students are doing wonderful things for the community. This Saturday is Good Neighbor Day. Organized by ASI and Student Community Services, an expected 600 students or more will turn out at the Cal Poly Theatre lawn ready to work.

Students will be given projects to enhance the community and help individuals and the local government. Primarily the elderly, the handicapped and single parent families have requested services from Good Neighbor Day crews to do yard work, painting and fix-its. Students will also do some clean-up work for the city in the parks and creeks in the area.

The goal of the work day, says Nick Athanasakos, ASI Greek relations officer, is to "give students the opportunity to give something back to the community." Athanasakos expects at least 50 members of each sorority and fraternity to get involved, and hopes for students from campus clubs as well as individuals to help.

We commend ASI and Student Community Services for arranging such a philanthropic activity to improve relations with our local community. After all, we're really a good bunch of kids. We just have to let them know it.

'Tis the season ...

Posters, billboards, fliers everywhere. It's got to be that time again. Elections. Though we don't have the *coolest* cowboy ever to star in a spaghetti western running for office, this year's ASI presidential election is important as well. Six candidates for ASI president and two for ASI vice president are hitting the happy trail campaigning for office.

With so many candidates, a decision may be difficult to make. We encourage students to keep an eye out for men in suits and ties and realize they're not heading for an interview. Talk to them, choose one, and vote for him.

Point of order

Steve Dunton

Rec Center election compares to Marcos

Information disclosed last week in Mustang Daily confirmed what many had previously suspected: the recent Rec Facility proposal was bought and paid for by the Cal Poly Administration.

Thomas Duggan, president of the athletic fund-raising group SUMAT, said he was assured by the Administration that the Cal Poly Foundation would give athletics \$250,000 a year if in return student athletes would support the Rec Facility proposal. Duggan and SUMAT Vice President Robin Bagget recently resigned in protest of the Administration's actions.

Ironically, the two attorneys resigned not because the Administration attempted to manipulate a student election, but because it failed to pay off on the bribe. Although the Foundation loaned athletics \$250,000, it refused to fund the program on an annual basis.

One of the selling points of the Rec Facility was that the students would get it for half price. (State funding would pick up the other half.) Conversely, Cal Poly would also get the facility for half price. In a time when money is scarce and space even scarcer this was an opportunity the Administration could not resist.

Although the desire to see this new building at Cal Poly is understandable, the tactics used are not. When the Administration cut a backroom deal with SUMAT, when it made promises it would not (or could not) keep, when it in effect bribed student athletes to vote a certain way, it clearly overstepped its bounds.

wonders what role the Administration will play in future student elections. If students are asked to pay for athletics, will the Administration sit on its hands and allow a fair election to occur? Or will it adopt the tactics of Nixon and Marcos? What about a student paid for Center for the Performing Arts? Or a

When the Administration cut a backroom deal with SUMAT ... when it in effect bribed student athletes to vote a certain way ... it clearly overstepped its bounds.

Student government was equally out of line for allowing this to happen. Through either ineptness or design the ASI failed to adequately police the Rec Facility special election. Although there are campaign spending limits in general ASI elections, none were established for this special election. Financial disclosure statements, required by the ASI in its general elections (and by law in most off-campus elections) were waived for this special election.

Based on this precedent, one

new Children's Center? What role will the Administration play when the faculty votes on its next contract?

A majority of students may very well have supported the Rec Facility in a fair election, but we will never know. Sadly, what was a victory for some partisans was an affront to the rights of all Cal Poly students.

Steve Dunton is a senior electronic engineering major and a regular contributor to Mustang Daily.

LETTERS TO THE EDITOR

Reader responds to environment column

Editor — Professor Bob Wolfe's article in Monday's Mustang Daily made me damn mad. It was printed under the eye-catching heading, "Environmental problems are alarming." I don't know about you, but as I proceeded to read the article, I told myself, "OK, get ready for another environmentalist to flood you with discouraging facts that will make you embarrassed to be a member of those who walk erect, use tools, and 'think rationally.'"

What I'm getting at here is that I have heard about all of those problems before! And what makes me so mad is that they are not new

concerns that popped up without warning. No. They have been in front of us for a long time. It's just that 10 years ago they were predictions instead of actual problems. Listen! If we (yes, you and I) ignore the problems today like we did the predictions yesterday, perhaps tomorrow, the solution will not be waiting.

So here it is — BANG — 1986 and we know about all of these problems that we have made for our world so we can't give our grandchildren the excuse that we were ignorant. But I don't think I'm alone when I say that I would hate to tell the poor things that we (yes, you and I) were just plain stupid.

I thank Wolf for making me mad

because "anger is energy." Let's all get mad and change this world for the better!

CHARLES CURTIS

Athletics benefits the whole university

Editor — Regarding Ken Stroud's letter to the editor (April 7), I agree that he has a right to express his point of view about the loan to athletics from the Foundation. However, not only did he not have the facts clear, but his letter showed that he has some built up hostility toward athletes on scholarship. Unfortunately, I feel he made those statements because he is not aware of the benefits a funded athletic program can offer our school.

First, the loan is exactly that — a loan. He is not going to be charged more at the book store or in the Snack Bar to help raise money for the loan. The loan will take care of next year's immediate needs. Next year the students will most likely vote on a fee increase to help support athletics.

Second, recognition of achievement at this school does not only come about through academics. In fact, did he know that our men's basketball team was repeatedly acknowledged in both southern and northern California papers? Our football team won the national championship in 1980 and is still considered a powerhouse. Both women's track and cross-country

have been phenomenal in gaining speed as well as national championships. The important factor is the recognition that athletics has brought to us on a local, state and national level.

Newsbriefs

Wednesday, April 9, 1986

Investigators find more remains

SAN FRANCISCO (AP) — Investigators pulled at least three more bodies from the charred ruins of an industrial complex on Tuesday and said they now believe nine people died in the spectacular explosion and fire.

Trained dogs were brought in to help search for other victims in the rubble of the two-story Bay View Industrial Park, the square-block structure destroyed in Friday's inferno.

"We believe we have found nine bodies, but its uncertain because they were charred so badly," said Lt. Gary Meltzer of the county arson task force. "We think the death toll could go beyond nine."

Meltzer said authorities still are receiving calls from people who think someone they know may have been caught in the blaze.

Weinberger near bomb explosion

BANGKOK, Thailand (AP) — Defense Secretary Caspar Weinberger drew cheers on a border tour and protest in the capital Tuesday, then had his dinner plans changed by a bomb explosion in a hotel parking lot.

The bomb, which wounded three people, went off about 15 feet from where Weinberger was to have passed 90 minutes later on his way to a state dinner at the government-owned Erawan Hotel given by Prime Minister Prem Tinsulanonda.

Officials moved the reception and dinner to the Hilton Hotel, where the defense secretary was staying.

The U.S. Embassy said Weinberger's delegation had no comment on the explosion. Foreign Minister Siddhi Savetsila told reporters that the secretary shrugged it off with this comment at thinner: "Thailand is one of the safest places in the world. It's safer than New York."

Bush speaks about US warships

MANAMA, Bahrain (AP) — Vice President George Bush said Tuesday that U.S. warships patrolling the oil-rich Persian Gulf are a signal to potential troublemakers that "they'd better think twice" and blunt Soviet influence in the region.

Bush visited the USS LaSalle, the command ship for a U.S. naval task force in the gulf, to stress American military power in the region. The white-painted flagship, docked at a Bahrainian port, is known as "the Great White Ghost of the Arabian Coast."

Standing under a canopy on the sun-drenched flight-deck, Bush told sailors the task force helps blunt Soviet influence in the gulf.

"The fact that you're here helps friendly countries resist Soviet attempts to gain influence, gain dominance in this area," Bush said.

Possible PCB accident reported

By Taffy Renkowitz
Staff Writer

The second possible PCB chemical leak from light fixtures in less than one month was reported to the Cal Poly Public Safety Department during finals week of winter quarter.

On March 17, after aeronautical engineering major Russell Miller completed his final, he reported to Public Safety that he saw two lights in Engineering West Building Room 237 leaking a black substance.

The Cal Poly Fire Department responded at 6:20 p.m. to Miller's call.

Because it was after-hours, they locked the door and posted a warning sign, as is routinely done when chemical leaks are reported, said Plant Operations Director Ed Naretto.

The next morning, a Plant Operations crew repaired the lights and cleaned up the area, Naretto said.

Miller said he was aware of

problems with leaks from the ballasts of some light fixtures on campus because he had read an article about it in Mustang Daily. In that March 10 story it was reported that a classroom in Engineering West had to be evacuated after a possible PCB leak on March 5.

Naretto said the problem lies in some of the older ballasts, which function as a light interface between the electrical source and the fluorescent light tube. They contain oil which has PCB, or polychlorinated biphenol, a cancer-causing chemical, in it.

The ballasts have a poor design, he said, which causes the tar that encapsulates the oil and PCB to melt.

The ballasts are just getting old, he said, and every summer Plant Operations personnel go through the buildings and replace those ballast they suspect need changing.

He added, "We'll probably go through Engineering West this summer and attack as many fixtures as we can. Fifty percent of

that building hasn't been done yet."

The ballasts have only small amounts of PCB and therefore there are no regulations on how to handle them, Naretto said.

However, Plant Operations came up with a chemical spill procedure for Cal Poly in 1981, which calls for evacuating all chemical spill areas. Naretto said they always assume that PCB is involved, just to be on the safe side.

Environmental Health and Safety Officer Don Van Acker said it costs \$20 to replace each ballast and there are more than 20,000 ballasts at Cal Poly.

Naretto said he believes the leak poses no major problem to students.

The danger is very remote, he said, because when the tar melts, people see and smell it. In addition, the light would go out.

If anyone should see a leaking or hot light fixture on campus, they should report it immediately to Public Safety, Naretto said.

German diplomat at Poly tomorrow

Dr. Klaus Rupprecht, deputy consul general in Los Angeles for the Federal Republic of Germany, will discuss "Some Current Problems of West Germany as a Post-Industrial Society" Thursday morning in the University Union.

Rupprecht will also explore

aspects of German-American relationships. He previously held posts in China, NATO-Europe and Latin America.

Sponsored by the foreign languages department, the talk will be free and held at 11 a.m. in University Union Room 220.

Correction

In an April 8 article in Mustang Daily, Chancellor W. Ann Reynolds was incorrectly quoted on the front page as saying that faculty salaries have been raised 23 percent. The actual figure is 27 percent, as was stated in the story.

Submersibles make shuttle search possible

By Anna Cekola
Special to the Daily

Picking up the pieces of the space shuttle Challenger would not be possible without inner space deep sea submersibles.

"Submersibles have proven to be feasible in salvaging Challenger wreckage," said E.G. Barham, a submersible expert.

Barham, 67, received a bachelor's degree from what is now San Diego State University and earned a doctorate in biology at Stanford University. He taught for one quarter in the natural resources management department here at Cal Poly.

Recent retrieval of Challenger's crew cabin, in-

cluding flight computers and data recorders, should give submersibles a tremendous boost in the role of search and salvage, Barham said.

Submersibles were also instrumental in locating the Titanic and recovering an atomic bomb that was accidentally dropped in waters off Spain.

Submersibles, also known as bathyscaphes, differ from submarines in that they usually man one to four people and can reach the ocean depths of more than 35,000 feet.

A Los Osos resident, Barham served in the U.S. Marine Corps and has published 40 scientific

papers on subjects ranging from marine biology to bio-electrics.

Deep sea exploration for Barham fulfills a basic drive to go places where man has never been.

"Man must, wants to, and should know the world around him," Barham said. "Understanding the world is my basic motivation."

With more than 25 years of diving experience, Barham has become an expert on marine scattering layers. The scattering layer is like a living net stretched across mid-depth zones of the world's oceans. Consisting mainly of jelly fish, the layer is effective in reflecting sonic waves.

The future of submersibles, Barham said, lies in search and salvage operations and furthering understanding of deep sea biology and plate tectonics.

A hydrothermal vent located in the western Pacific is the latest scientific find by a submersible. A completely new ecosystem which lives on energy from the earth's center rather than sunlight has been found around the vent. All previously known organisms relied directly or indirectly on sunlight for energy.

New scientific finds and the boost of public recognition from the Challenger disaster, Barham said, will increase incentives to extend the submersible field.

Student tracks alleged thief with help from text buyback

By Rebecca Hanner
Staff Writer

After discovering his backpack and books had been stolen while studying in the Robert E. Kennedy Library during finals week, a Cal Poly student successfully managed to track down the suspect and his stolen property with the assistance of a buy-back book dealer, according to police.

Floyd F. Harrell, 19, was arrested for possession of stolen property on March 20 at approximately 11 a.m. by campus police after Scott Douglass discovered his backpack had been stolen and then had given a list of missing textbooks to one of the book buy-back dealers in front of El Corral Bookstore, said Wayne Carmack, public safety investigator.

According to Douglass, a senior civil engineering major, he immediately got the idea to give the book dealers a list of his missing books because they were for upper division classes and finals were later on in the week, so they wouldn't be turning them back in so soon.

When the suspect tried to sell back the books, which had a new book value of about \$90, the dealer notified employees at the bookstore, who in turn called the Cal Poly police and made the arrest, said Carmack.

In addition to recovering Douglass' backpack and books, Carmack said, two additional textbooks were found in Harrell's possession.

Harrell is scheduled to appear in San Luis Obispo Municipal Court for arraignment on April 21.

Scooters

*No longer just a trend,
motor scooters prove both
convenient and cheap*

By Rebecca Hanner

Left: Cal Poly student and motor scooter owner Sue Harris has her scooter ready for a spin around town. Above: Alice Pastor locates her scooter amid a packed parking pen.

Where motorcycles and mopeds used to be the preferred two-wheeled forms of transportation, motor scooters have become an increasingly popular alternative for many college students.

Whether it be the classic older Vespa scooters or the more sleek, futuristic-looking scooters recently introduced to the market, the sales and use of motor scooters has increased at a phenomenal rate.

In 1983 the major scooter manufacturing companies entered the market, selling about 30,000 scooters. New motor scooter sales since have increased more than 250 percent, with last year's sales climbing to more than 125,000 purchases.

According to local dealerships, sales in the San Luis Obispo area have been extremely brisk during the past three years. Sales have increased by several hundred percent each year and most dealers say there is no end in sight to the scooter's popularity. But then scooter sales, they add, are always good in college towns.

Two years ago, senior journalism major Sue Harris, who bought one of the first Honda Spree scooters in San Luis Obispo, found people at stoplights looking at her scooter and asking her what she was driving. Today, Harris complains that during peak school hours, she has trouble finding a parking space for her scooter in the designated parking pens throughout campus.

Are motor scooters just another trendy fad in transportation as mopeds were, or will they become an established option to cars and motorcycles? Many student scooter owners seem to think their chosen form of transportation is a practical, convenient and fun option rather than just a temporary fad.

Kelly Walsh, a senior recreation administration major, bought a Honda Spree last year as her sole form of motorized transportation, not only because it is economical, but because it looks better and goes faster than a moped. She also said she can get around easier on a scooter

than on a bike.

Convenient parking and easy traffic driving are other benefits Walsh found as a scooter owner.

"When traffic is really bad downtown, I can just go around it easily," she said.

Walsh doesn't believe the recent increase in scooter use is just a trend, instead she credits their recent popularity to people being more aware of them.

Third year architecture major and Honda Aero owner Jon Jaeger agrees that scooter use isn't a temporary fad, but rather a cheap and convenient alternative form of transportation.

Jaeger gave up driving his car and bought his scooter last year. He now spends about 75 cents a week to fill the scooter's gas tank and a mere \$5 yearly for a Cal Poly parking permit.

Local scooter dealers say economic benefits such as these, in addition to the scooter's convenience and appealing modern look make them popular two-wheeled transportation options with customers.

"People don't see scooters as motorcycles and they're not as intimidated by them as they would be with motorcycles," said salesman Mark Williamson of

San Luis Obispo Cyclery.

"They're cheap, stylish, flashy, easy and fun to ride, have lots of features and are a lot better than pedaling up a hill," he added.

New scooter prices range from \$400 to \$1,800 depending on style, with Department of Motor Vehicle registration fees beginning at about \$32 a year for new scooters and yearly insurance rates, which vary from company to company, at approximately \$150, said Williamson. In addition, scooter drivers must have a Class 4 driver's license.

Most customers, with the exception of those who are already licensed, see LIFESTYLE, page 6

LIFESTYLE

From page 5

ception of some college students, Williamson said, do not purchase scooters as their only form of transportation, but rather as an additional form to take on quick trips around town or for other recreational purposes.

Not everything about owning a scooter is pleasant, however, as evidenced by looking at the empty parking pens on campus during a rain storm. In bad weather conditions, riding a scooter can have its definite disadvantages and bus transportation becomes that much more appealing.

Another disadvantage scooter owners complain about is the

vehicle's speed — or lack of it — making long distance scooter excursions lengthy and freeway trips illegal. The fastest scooter currently manufactured can travel only at 45 mph. However, dealers say that soon a larger more powerful scooter will be available which can travel legally on freeways.

Because scooters can keep up with the speed of vehicle traffic in the city, scooter drivers are required to obey standard traffic rules and regulations, foremost among them, driving in the marked lanes rather than staying to the side of the road.

Because scooters are so much smaller than other traffic and

tend not to be noticed by car drivers, scooter drivers have to be very careful to watch out for themselves in traffic, Jaeger said.

"People don't look out for you on a motor scooter, so you have to look out for them," Walsh said.

Obedient the traffic rules and wearing protective gear such as a helmet are some safety precautions Public Safety Investigator Wayne Carmack advocates people follow when driving a motor scooter. He adds a final warning to scooter drivers: "Don't drive like you're immortal."

Freeze-drying process preserves pet remains

NISSWA, Minn. (AP) — Fido or Fluffy can lie by the hearth forever thanks to the wonders of freeze-drying, says a man whose company offers pet owners a way to preserve the remains of their four-legged loved ones in lifelike fashion.

"The natural thing for a human being to do is to hang on to that animal, to want to keep it," said Roger Saatzer, president of Preserv-A-Pet. "The next best thing to bringing it back to life is to have it freeze-dried."

Saatzer said that though some people find the idea unattractive, others "are very open-minded,

and it has been taken very, very positively."

"We've done everything from rabbits to turtles, dogs, cats, snakes and gerbils," said Saatzer. He has even freeze-dried a lion.

Freeze-drying gives the animal a far more realistic appearance than traditional taxidermy, he said.

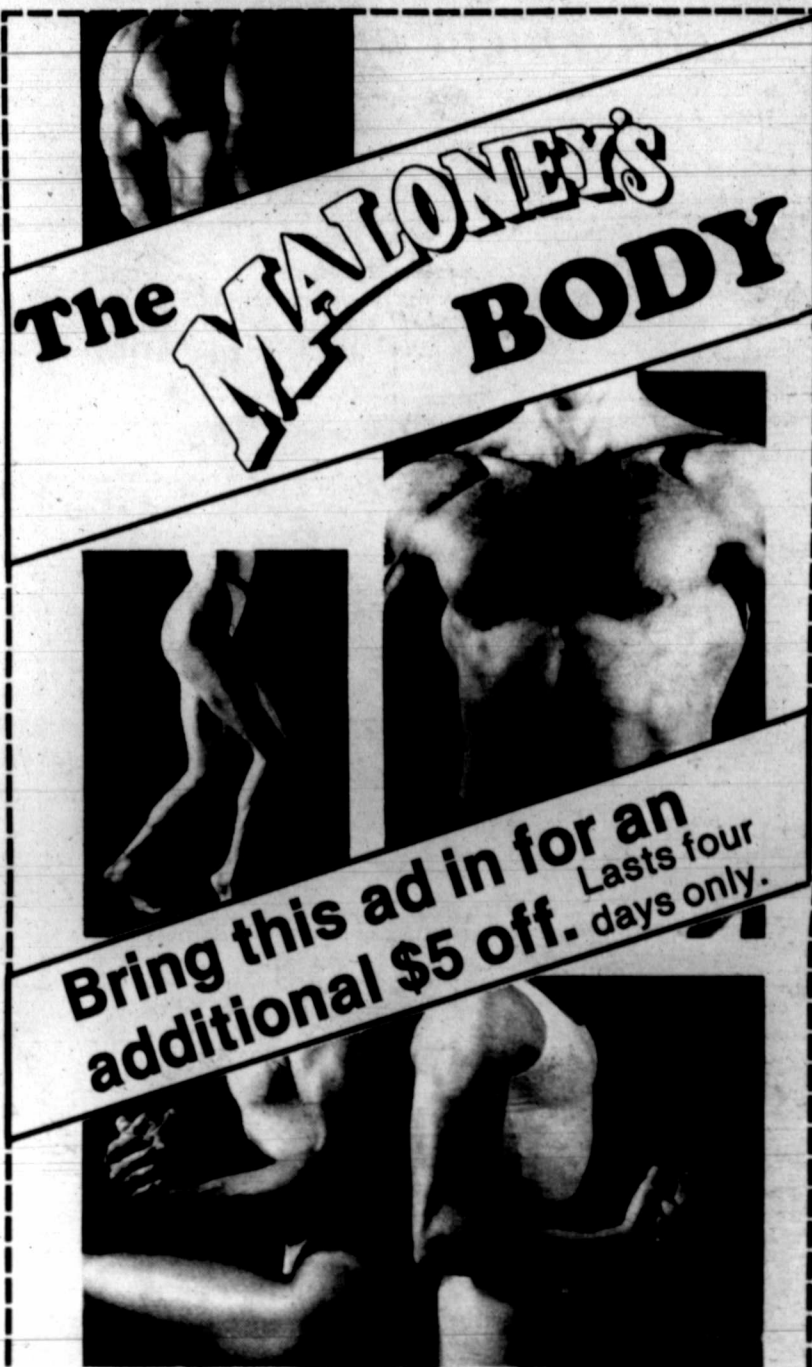

"Everything remains intact," Saatzer said. "The color, the size, even the texture of the hair is the same."

Saatzer, who also owns a company that manufactures freeze-drying equipment, said the idea came to him a couple of years ago when a taxidermist said he wasn't sure he could afford a freeze-drying machine he wanted.

"Just off the top of my head I suggested he advertise doing pets," Saatzer said. "He tried it and it worked."

Pet owners ship their deceased pets to the company frozen. They also send photographs so the company can get an idea of how the owner wants the pet to look, Saatzer said. The animal is then thawed and shaped into position.

Once the animal's body is shaped it is freeze dried — placed in a vacuum chamber at a temperature of 5 degrees below zero. The process extracts all water from the body without altering its size or shape, so that decomposition is halted. The animal's remains thus will not shrink and will have no odor.

Rating of textbooks might be possible

By Kim Holweger
Staff Writer

A resolution to allow students to rate the usefulness of textbooks is being reviewed by the Student Senate and the Academic Senate. ASI Resolution 86-22 was written by Tom Randall, a student senator from the School of Engineering. It calls for a student-initiated textbook evaluation that would give statistical data to enable departments to determine the effectiveness of certain textbooks.

The resolution stresses student desire for textbooks with "educational durability," the ability to withstand the test of time and be useful to students both in and out of the classroom. The only problem, said Randall, is the method of implementation.

Ideally, Randall would like a universitywide standardized set of questions in a format similar to that used for teacher and course evaluations. Answers recorded on Scantron forms could be fed through a machine, saving the time and money it takes for department personnel to view the evaluations. However, Randall is concerned that the proposed rating system will put words into students' mouths.

The suggested method includes questions regarding material presentation, subject matter, examples and formulas, explanatory material and diagrams. Students would rate each area on its effectiveness — choosing excellent, acceptable, inconsistent or inadequate. Department personnel would then assign numerical values from one to four for those ratings, with four being the highest score and one being the lowest. If the sum of the averages of these values is between zero and seven, the proposal suggests re-evaluation of the textbook.

The department, however, is not required to re-evaluate the textbook, nor are teachers required to find an alternate textbook if the department finds the current text is ineffective.

"It's just a big flag that says, 'Hey, there's something wrong with me,'" Randall said. "We feel that responsible departments will include the evaluation along with their teacher and course evaluations. It's just one more tool available to help them improve the quality of education."

Instructors can also use the evaluations to determine areas of the text that are lacking so they may prepare information in the form of handouts to supplement those parts.

The resolution was reviewed by the Student Senate and is now before the Academic Senate for review. Randall expects the resolution will appear before both the student and academic senates to be voted on within the next month. If it is passed, it could be implemented in some classes as soon as next fall.

Sale of alcohol is subject of vote

By Jennifer Smagala
Staff Writer

The Student Senate will vote tonight on whether to allow the sale of alcohol at outdoor athletic events in an effort to raise funds for the financially-strapped athletic program.

John Watson, senator for the School of Business, said resolution 86-26 is a request that the Administration consider the sale of beer and wine at on-campus outdoor athletic events to increase revenues for athletics. The resolution includes a two-year trial period to assess the program.

According to the resolution, 50 percent of the income from alcohol sales would be used by athletic teams to cover items such as scholarships, travel and insurance. The other 50 percent would cover the costs of selling the beer and wine and hiring security guards, Watson said.

"The sale of beer and wine is a vehicle to help athletics support itself," he said. Watson estimated that \$20,000 to \$100,000 could be generated through alcohol sales. Attendance, the number of athletic events, the age of people atten-

'The sale of beer and wine is a vehicle to help athletics support itself'

— John Watson

ding events and how much they drink are factors that could affect the amount of revenue generated.

Current policy allows Mustang Boosters to serve alcohol to other booster members before football games at tailgate parties in Poly Grove. "This resolution is a logical extension of drinking

before games. By moving the drinking into the stadium we can also control the illicit alcohol consumption, which is currently a problem," said Watson.

"Students like the idea because it's not trying to turn the campus into a bar. Our main concern is that alcohol sales are done in a responsible fashion."

TRW is accused of price fixing

CLEVELAND (AP) — TRW Inc. is denying allegations that it has conspired with other defense contractors to fix prices and restrict competition on parts for U.S. bombers and jet fighters.

The denial came Monday as the U.S. Attorney's office indicated it would review the allegations made against the Cleveland-based company by three former company employees in a lawsuit filed last week.

The lawsuit alleges TRW engaged in the conspiracy between 1982 and 1984 and that it dealt with components made by TRW for engines fitting into the B-1 bomber and F-4, F-15 and F-16 fighters. The allegations include charges that TRW overcharged the government for engine parts and conspired to

restrict competition for defense contracts.

"These claims come as no surprise to us, and we believe they are totally without merit," TRW spokesman Michael L. Johnson

The lawsuit seeks \$1.2 billion on behalf of the government

said. "The plaintiffs, former TRW employees, were terminated for perpetrating improper practices in violation of TRW's policy of legal and ethical conduct."

Johnson said the claims relate to an internal investigation initi-

ated by TRW in 1984 after which the plaintiffs were dismissed.

"TRW voluntarily disclosed to the government the results of TRW's investigation and has cooperated fully in the government's investigation since that time," he said.

The lawsuit, though filed by private citizens, seeks \$1.2 billion on behalf of the federal government against TRW; General Electric Co., based in Fairfield, Conn.; United Technologies Corp., of Hartford, Conn.; and Iscar Blades Ltd., an Israel-based defense contractor.

The government has less than 60 days in which to decide whether it will join in the lawsuit, filed late Friday in U.S. District Court, assistant U.S. Attorney Alan J. Ross said Monday. Ross refused comment on what the government may already know about the case.

The allegations were made under the False Claims Act.

SUNDAY

From page 1

"This is the best reply we've ever received from any mailing response ever," said Williams. There are currently many businesses in the downtown area that are open on Sundays, she said, but a majority that aren't said they would consider it. The retailers which are open on Sundays said their business improved because of it, said Williams.

Royal Sunday is a campaign the BIA will be promoting with posters, ads and radio spots. Williams said that because Poly Royal ends on Saturday, there will still be a lot of visitors in town and this special event would give them a place to go on Sunday. There will be street displays and entertainment, she said.

Posters will be distributed on April 14 and a banner will run across Higuera Street. A double-deck English bus will travel to Madonna Inn from 10

a.m. to 4:30 p.m. and there will be a strolling mariachi band and store displays.

The majority of stores and restaurants will be using Royal Sunday to kick off their Sunday openings. John Bushnell, general manager of F. McLintock's Saloon on Higuera Street and a BIA board member, said they have never been open on Sunday before and they will have a special ranch breakfast on Royal Sunday. The restaurant will be open on Sundays thereafter, he said.

Larry Fritz, owner of Rocky Mountain Chocolate Factory on Higuera Street, said the store has always been open on Sundays but he will have cookie demonstrations on Royal Sunday. He said he hopes everyone will start opening on Sundays.

Williams said she would like to see entertainment every Sunday, and the majority of retail businesses agreed. The BIA will have mobile groups such as a barber shop quartet because crowds follow these groups, she said. Automobile traffic will not be restricted as it is at the weekly Farmers Market.

Williams said in the future the BIA would like to see San Luis Obispo become a destination for tourists, not just a place to pass through, and also a place for business conferences. Opening on Sundays ensures extra business because it has a rippling effect, she said.

For example, the money which restaurants make distributes to retail and service. The new shopping centers are taking business away from downtown, Williams said. "We would like to capitalize on the uniqueness of downtown San Luis Obispo."

APPLICATIONS are now being accepted for editor of Mustang Daily for the 1986-87 school year. For more information call Donald at 546-1143. The deadline for applications is April 11.

Agricultural engineering professor Charles M. Burt shows senior Hung Le the new campus weather station. The device records air and soil temperature, wind speed and direction, solar radiation, relative humidity and rainfall.

TOM ANDERSON/Mustang Daily

New weather station will allow estimation of crop water use

By Nowa Condley

Staff Writer

Students enrolled in irrigation theory classes will now be able to better estimate crop water use with the installation of a new weather station at the irrigation field laboratory north of campus.

The station, installed two weeks ago, records maximum, minimum and average air temperature; soil temperature; wind speed and direction; incoming solar radiation; relative humidity; and rainfall.

The weather station is one of 52 units in a statewide network which is part of the California Irrigation Management Information System, said Charles Burt, agricultural engineering professor.

The weather data is used to calculate the passage of water vapor from the leaves of a reference crop, which at Cal Poly will be grass. With this information it can be determined how much water the crop will use daily.

Burt said the grass will finish growing in about three weeks and by then all the problems should be worked out of the system.

The Cal Poly station is connected by telephone to the main campus so students and faculty can use up-to-the-minute data. They are also able to obtain telephone transmission of daily summaries for the campus station at any other CIMIS station from the central unit of the network in Sacramento.

The station was financed by a combination of money from the agriculture engineering department and the Office of Water Conservation of the California Department of Water Resources.

Graduate students working on crop water requirements and undergraduate students studying general irrigation will benefit from the new station.

California now the spot for drugs

LOS ANGELES (AP) — Mammoth hauls by West Coast narcotics agents, including more than two tons of cocaine seized last week, demonstrate the ex-

tent to which drug smuggling is shifting from Florida to California, officials say.

"Law enforcement in Miami has done their best to cut off the trail into Miami, but a great deal

of it is now coming into the Los Angeles area," police Lt. Dan Cooke said Monday.

"Last year we had the biggest seizures in our history — a billion dollars worth of drugs," Cooke said. "We've already had that this year and we're not even halfway through the year."

Authorities seized 1,700 pounds of Colombian cocaine in Orange County last week and 2,597 pounds in the Mexican border town of Tijuana. An additional 90 pounds was found stashed in a car at the San Ysidro, Calif., border crossing.

Seizures at the California-Mexico border have risen from four pounds of cocaine in fiscal 1983 to 221 pounds in the first six months of fiscal 1986, said Allan Rappoport, district director of Customs for the San Diego sector.

Figures for fiscal year 1985, ending Sept. 30, show Florida still leads California in cocaine seizures, said Cornelius Dougherty of the Drug Enforcement Administration headquarters in Washington.

In Miami, 16,752 pounds of cocaine were seized during the 1985 fiscal year, compared to 2,147 pounds of cocaine confiscated in California for the same period, Dougherty said.

However, he noted, "In terms of cocaine seizures this year, they are most definitely rising in California."

Despite the huge seizures, authorities say they're blocking just a fraction of the drug flood.

"We seize about 10 percent of all the drugs coming into Los Angeles," Cooke said. "We obviously are making a dent, but there is such profit-making that nothing is going to deter people from smuggling in narcotics."

LOBBY

From page 1

reduction must be accomplished through an increase in the loan originator fee, expected to climb about 5 percent, according to the Chronicle of Higher Education.

In the Pell Grant program the most disadvantaged students are protected and students from middle-income families, which generally receive \$200, will not receive any grants this fall.

The U.S. Department of Education expects to award 68,000 fewer grants this fall, while Education Secretary William J. Bennett has announced to schools that they can "live with these cuts."

It is the impending threat of heavier cuts that forced Mendes and Sweeney to make the trip to the nation's capital.

On Tuesday the pair, flanked by Cal State Fullerton Associated Students President Tracey Stotz and CSSA Vice Chair John Burick, met with Rep. Jack Kemp, (R-NY); Rep. George Brown, (D-Calif.); Rep.

Dan Lundgren, (D-Calif.); and the legislative aid for Sen. Alan Cranston.

During these half-hour meetings the group stressed to the congressmen the dangers of further cuts in education spending and urged them to support equal across-the-board cuts to reduce the deficit.

Approximately 60 percent of the national budget is shielded from Gramm-Rudman-Hollings cuts and is in President Reagan's proposed budget.

Although the prevailing view on Capitol Hill is that the president's budget is dead, many senators are embracing parts of the budget and using them as a guideline for a new budget proposal.

Mendes and Sweeney will take part in a press conference Friday for Washington media to discuss Pell Grants. Until then, CSSA lobbyists will continue their efforts to round up the support of congressmen before returning to California on Saturday.

South African dance troupe seeks political refuge in US

SAN FRANCISCO (AP) —

Members of a black South African dance troupe who have repeatedly decried their government's racial policies during six years of performances in the United States requested political asylum here Tuesday.

The performers, who are facing deportation proceedings, are members of the Uzulwazi Dance Theatre. Their attorney, Bill May, told an immigration judge at a hearing Tuesday the performers will face persecution if sent home.

"I'm not a politician. I'm a musician. But what's happening in South Africa makes me political," said Dingane Lelokoane, one performer seeking asylum from what he called the "unpredictable" actions of his government.

"I know they'll visit me. They'll take me. You know, there is that law that they can hold me for 18 months without a trial," Lelokoane said in an interview with The Associated Press. "I'd love to see my family. On the other hand, I have to make a decision I can live with."

Terrorist groups rise in Western Europe

WIESBADEN, West Germany (AP) — The "armies" of Western Europe's terrorist left are rising up again in a lethal new generation, waging an anti-NATO campaign that may enlist more and more dissident youth, say police and other security experts.

A decade of police successes, tough anti-terrorist laws and damaging defections has not stopped — let alone crushed — the continent's urban guerrilla movement.

"Time and again, they have come back," acknowledged Heinz Doehla, an anti-terrorist specialist with the West German federal police.

And this time West Germany's Red Army Faction and other European terrorist groups are coming back together, in an "anti-imperialist" brotherhood of bombers and assassins that some authorities now trace to a 1981 terrorist gathering in Paris.

In a barrage of attacks over the past 14 months, West German, French and Belgian radicals have assassinated prominent members of the European defense establishment and set off bombs at a U.S. air base, military pipelines and other North Atlantic Treaty Organization installations.

By narrowing their focus to NATO, the extremists may actually broaden their appeal, since they are aligning themselves with millions of young West Europeans who have demonstrated against U.S.-NATO missile deployment plans.

"From the Red Army Faction point of view, the only opportunity to fight NATO suppression around the world is to organize a kind of illegal guerrilla war and get in contact with more and more people," said a source close to the German underground group, speaking with a reporter on condition of anonymity.

Unlike such nationalist movements as the Irish Republican

Army and Spain's Basque separatists, the "ideological" terror groups born in the late 1960s — notably West Germany's Baader-Meinhof band and successor Red Army Faction, and Italy's Red Brigades — were driven by a far-left creed that drew little popular support.

By the late 1970s, these groups were under heavy pressure.

In Italy, where the Red Brigades assassinated judges, police officials and former Premier Aldo Moro, authorities say their key tools were new laws allowing plea bargaining for "repentant" terrorists who informed against comrades. About 1,250 Red Brigades members and other leftist terrorists are now in jail.

In West Germany, advanced police work paid off. The Federal Criminal Office, which has headquarters in this gray Rhine River city, put special anti-terrorist detectives into the field and developed impressive computer files tying together incidents, people, weapons and methods.

"The computer has a huge memory. It is an absolutely important tool," said Hans-Werner Kuehn, deputy chief of the anti-terrorist unit.

Today, more than 30 members of the Red Army Faction hard core, which never numbered more than a few dozen, are imprisoned. Others have fled abroad.

Despite the law-enforcement victories, however, new generations of militants are taking the field.

Ferdinando Imposimato, an Italian magistrate long involved in the anti-terrorist fight, dates the current wave to 1981.

GARAGE

From page 1

The garage provides space to work, a wide variety of tools and supervision, said Bowman. Although the garage has been on campus for about 25 years, he adds that not enough people are aware of all it provides. "The facility has been taken for granted by a lot of people — ASI, students and even the management," he said.

Before Bowman became manager he had been working at the garage as assistant manager under Manuel Campo. "I saw lots of things I didn't like and thought needed to be improved," he said. "It's falling apart and we were losing our ability to serve our clientele — the students."

Bowman has already made some changes in the short time since taking over his new post. He and three supervisors spent an entire day cleaning up the place, said Bowman. "Its appearance has changed radically, it's lost in its aura or griminess."

Part of the reason the Hobby Garage has suffered so much is because of serious budget problems, said Bowman. The total cost of running the garage is about \$6,000 a year, he said. Only about \$2,500 is allotted to the garage by ASI.

"The rest we're responsible

for raising. If we can't raise it then we have to cut something," he said.

Plans for raising money in the future include selling supplies, said Bowman. "We'll buy something like 50 gallons of motor oil, mark it up and sell it, making a profit. It'll help us improve the facility — mainly (to) buy more equipment."

Bowman said the biggest budget shortfall last year was the low number of quarter passes sold. These passes provide use of the garage and its supplies virtually free for the entire quarter, he said. They also sell day passes for \$1.50. Previously, the garage depended on selling quarter passes for income, but they never sold enough, he said. This quarter he will be working on promoting the benefits of buying a quarter pass, said Bowman.

Another plan for this quarter is the creation of what Bowman refers to as "recipes." These are pieces of paper that have step-by-step instructions on how to do something to a car, such as change the oil, he said. "Hopefully we'll be able to explain the procedure well enough so the student can take that knowledge and use it in the future."

Bowman said that his staff is not there to do the work. Rather, they are available to supervise.

"The idea is to have the student do it," he said, adding that the staff will give advice, but is hesitant to actually work on the cars because they can't afford the responsibility if something goes wrong.

Bowman said he will also be starting up clinics to teach students how to perform such minor tasks as oil changes, tune-ups and brake inspection. The clinics will be free to members, he said.

"Basically I want to show students what needs to be done, why it needs to be done and how often. If they know how to do it they will realize how much cheaper it is to do it themselves than take it to a garage. It's such a minimal investment of time and money to keep your vehicle maintained," he said.

Bowman said he is working on a promotion plan to make students more aware of the Hobby Garage so it can overcome some of its past problems. Part of plan includes promoting the garage through the KCPR public affairs program to attract more people, he said. "It's that initial information that's hard to get out," Bowman said.

Part of the problem is the location, he said. "It's hard to tell people where we are ... we're not even on the campus map and we don't have an address."

Softballers win 17 in row, beat Northridge

When a team can win 17 games in a row and beat the number one team in the nation twice, the quality of play reaches a peak higher than any player or coach can imagine.

"Just when I thought my players have shown me their best, they show me something better," said Becky Heidesch, head coach of the Cal Poly women's softball team.

The Lady Mustangs have been on a constant climb to the top of the California Collegiate Athletic Association, and after knocking off number one Cal State Northridge 4-0 and 5-2 Friday, the Matadors became just another rung on the ladder. These two important conference victories should give Poly an edge in the upcoming national rankings, as Northridge was slated as the number one ranked Division II team in the nation in a March 25 poll. The Mustangs were ranked number four in the poll.

"The rankings really don't matter to us, in fact, we would rather just remain in the top three and keep playing our game," said Heidesch. "Right now it's important to keep our winning streak alive and take league."

The Lady Mustangs collected a total of 23 hits in the twinbill, but more importantly Cal Poly rallied 13 hits off Kathy Slaten, the NCAA Division II player of the year in 1985. A dejected Slaten watched as the Mustangs picked away one run in the third inning and one run in the fifth and saw the final curtain drawn as two more Poly runners crossed the plate in the seventh.

Mustang pitcher Randie Hill, who has captured nine of Poly's last 17 victories, went the entire distance against Northridge, allowing just six hits in the opener. By hurling a solid 14 innings, Hill shot the Matador's league record down to 3-2, while Poly's league mark rose to 7-1.

The Mustangs' offense has become a consistent hitting machine, and Slaten will have trouble forgetting about Poly hitters such as Kecia Gorman and Jill Hancock, who each went three-for-four in the opening game. In the nightcap, the Mustangs combined for 10 hits to come from behind to score three runs in the fifth inning and two more in the sixth to clinch yet another victory. Mustangs Lisa "J.J." Johnson and Lisa Houk collected two hits each in the second round to send the Matadors down for the count.

"Our offense has shown its strength and maturity in the last few weeks," Heidesch said. "Even if we get behind 2-0 or 3-0, the confidence level remains high and this is what wins games."

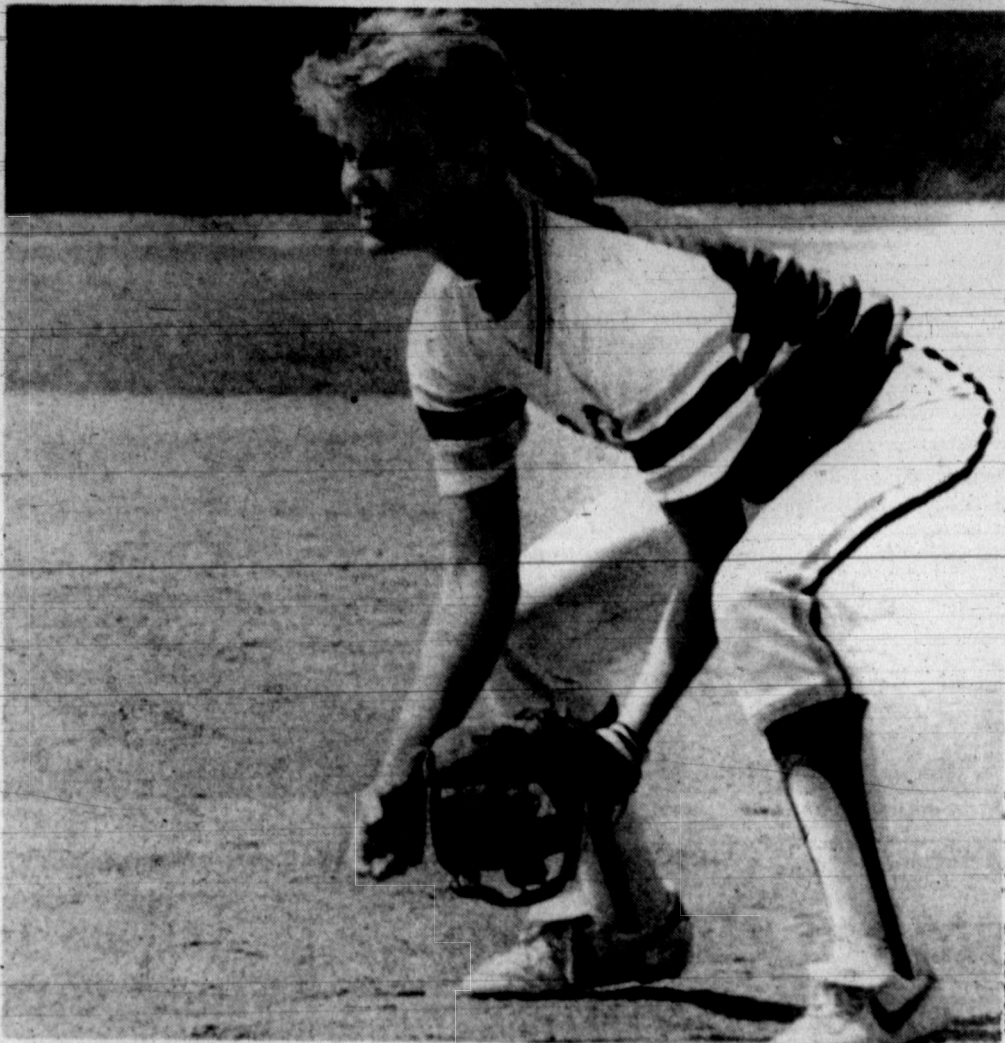

Tired and drained, Cal Poly pulled together again Saturday to squeak by Cal State Dominguez Hills 1-0 in both games. Thewin increased the Mustangs' winning streak to 17.

Mustang hurler Patty Zoll, who has gained seven of Poly's last 17 wins, held off the Toros in the opener, while Hill tossed a three-hitter in the nightcap to increase Poly's league record to 9-1 and its overall mark to 21-8-1.

In the first game, the Mustangs scored their winning run on a Lisa Johnson and Shirley "Skippy" Tuttle squeeze play combination in the fifth inning. Gorman sparked the offense by going two-for-three, while Houk collected two hits and Lorie Norcia and Donna Sterling each had singles.

Poly leftfielder Hancock came through with a clutch hit through the leftside to score Houk for the lone run in the second game. Mustang center-fielder Norcia was two-for-three in the nightcap, while Houk added two more hits and Gorman and Ellen Frank each collected singles.

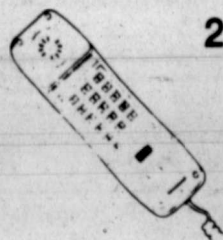

"The Dominguez game was a hard one to get up for, but we pushed ourselves and once again we came out on top," said Heidesch. "Now we just have to keep the winning feeling and stay on top."

Lady Mustang first baseman Ellen Frank gets set as she waits for the pitch during Friday's doubleheader with Cal State Northridge.

Lesley White strides to a 9:56.15 finish in the 3,000 meters during the Fresno Bee Games in Fresno Saturday.

Mustangs drop two on road to Pomona

By John Grennan
Staff Writer

The Mustangs came up short in both games of their doubleheader last weekend with Cal Poly Pomona. They lost the first game 3-1 and the second game 7-6.

John Berringer pitched a strong game for the Mustangs in the opener going the distance. He gave up only six hits, walked four and struck out two, but he didn't receive much support from the offense.

Coach Steve McFarland said, "In both games it was a case of us not getting key hits in key situations. We had the tying or winning runs on in both games but we couldn't come up with the clutch hit."

In the nightcap Lee Hancock started for the Mustangs, but had to come out in the fourth inning with a sore shoulder after giving up three runs. Twice in the game Mustang base runners were thrown out at the plate,

which along with mental errors cost the Mustangs the game, according to McFarland.

Bobby Wright led the Mustang offense with a three-run homer in the seventh to make the score 6-5, but each team scored once more to finish out the contest.

The Mustangs have lost their last seven games on the road, four of them by 1 run, two by 2 runs and one by 3 runs. The Mustangs began the road trip ranked 13th in the nation among Division II schools.

The two losses dropped the Mustangs' league record to 2-8 and their overall record to 11-12. The Mustangs travel to Northridge Thursday for a make-up game and then on to league leader Dominguez Hills (7-2) this weekend for a three game series.

"We're much better than 2-8," says McFarland, but if we want a shot at the title we're going to have to start playing with more confidence and take three of these next four games."

Sailors to have first meeting

The Cal Poly Sailing Club returned from Ensenada, Mexico, last week after a week of fun and excitement on the open ocean.

Fifty-eight students chartered three 100-foot schooners to make the journey from Long Beach Harbor to the Port of Ensenada during spring break.

Once in Ensenada, the boats linked up in the harbor to form a floating dance floor with festivities including dancing, fireworks and a pinata-bashing.

The group spent a night in Avalon on Catalina Island during the return trip to do some more swimming and snorkeling.

The Sailing Club will be having its first meeting of the quarter Wednesday at 8 p.m. in Room E-46 of the Science Building.

Lady Mustangs run well despite rain

Despite bad weather and a wet track the Cal Poly women's track team was a dominant factor Saturday at the Fresno Bee Games.

The 1,500-meters continues to be one of the Mustangs' strong points.

Gladys Prieur, in her first 1,500-meter race of the season, established a new meet record as well as a new stadium record, running a first-place 4:24.14 in the event.

Jill Ellingson and Lori Lopez both recorded season bests in the 1,500-meters. Ellingson finished in third place with a 4:29.18 and Lopez took fourth place in a time of 4:30.0.

Freshman Celeste Paquette is already developing into one of the top athletes in the country. In the discus competition, Paquette set a new personal-best in the shot put with a put of 44'5." She then came back to throw the discus 160'5," which was also a personal-best for her and a new Cal Poly record.

"Celeste is quickly proving to be one of the nation's young potential stars," said Mustang coach Lance Harter. "She has the mental and physical tools to be a future great."

Patrice Carpenter also continues to dominate the sprint events. At Fresno she ran away

with both the 100-meters in a time of 11.76 and the 200-meters in 23.95.

Carpenter also ran a 54.8 leg on the winning 4 X 400 relay team. Laurie Hagan led off for the team with a 57.4 leg, followed by Carpenter. Felicia Saville ran the third leg in 55.6 and Sharon Hansen anchored the team with a 55.8 lap.

Hagan also made her first season appearance in the 800-meters with a win in a time of 2:12.48, missing the national qualifying standard by only .28 seconds. She has already qualified for nationals in the 400-meter low hurdles and in the 1,600-meter relay.

Saville also ran a season-best 56.86 in the 400-meters to take second place, followed by her teammate Karen Dowell in third with a 57.98.

Also, to add to the depth of the Lady Mustangs, is transfer Vivian Riley, who was the California State Junior College Champion in the long jump with a mark of 20'3" and has also been clocked in the 100-meters at 11.7 and in the 200-meters at 24.2.

The Lady Mustangs will travel to Cal State Northridge Saturday for the Northridge Relays, with 35 teams entered including UCLA, USC and UC Berkeley.

Langer tired but confident about second Masters win

AUGUSTA, Ga. (AP) — Tradition says that a Masters champion does not make a successful defense of his title.

Bernhard Langer disagrees.

"If you can do something once, you should be able to do it again, two or three times," said the West German.

In the 49 previous Masters, only Jack Nicklaus made a successful defense, and that was 20 years ago.

"There always are exceptions to the rules. Someone will do it. Hopefully, I can be the exception," said Langer, who scored his first American triumph in

this storied old event a year ago.

"It will help that I've won it before. I know I can play here and can shoot under par."

"I've proven I can do it, so that will help," Langer said Tuesday before a practice round over the flower-bedecked hills of the Augusta National Golf Club course.

In addition to the usual foes — the demands of famed old course and the pressures of the elite, invitational, international field of 88 of the world's best shot-makers — Langer faces another problem.

"I'm tired," he said.

INSURANCE

From page 1

about twice the amount for their coverage than they paid last year.

To deal with the problem of no general liability, ASI plans to

put \$100,000 of ASI corporate reserves in retention, which will serve as a self-insurance policy. They will contract with a claims management firm and retain an attorney for defense.

"This will protect us from people making spurious claims," Conway said.

Conway is trying to find a company to cover claims from \$100,000 to \$1 million, and will

probably not know for 30 days whether he will be able to find this type of coverage.

He has two ideas for longer term solutions.

He is setting up a risk

management group at Cal. Poly to look into the possibility of combining ASI, the U.U. and the Foundation into one group. Fireman's Fund gave the Foundation a trial policy at the same time as ASI and the U.U., but it decided to maintain coverage of the Foundation. Conway said the Foundation is a much more conservative risk.

Conway is a member of the CSU Auxiliary Organizations Association, and is one of four people looking into the possibility of pooling the resources of the 63 auxiliaries in the CSU and forming a captive or a joint power agreement. They would be insuring themselves as a group. As a group, the auxiliaries have between \$1.5 million and \$2 million to use for insurance.

Conway said a group of colleges in the Midwest, the Educational and Institutional Insurance Administrators, Inc., set up something like this in which the group got together and insured itself. He said the savings to the schools could be compared to the savings of average college students if they had to pay only \$50 per year for automobile insurance.

He said that along with the monetary savings, they are getting the coverage that they need.

Colleges are not the only state entities that are having trouble getting insurance coverage. According to Marsh & McLennan, an insurance company, 60 percent of California public entities do not carry insurance. They predict that by July 1, 90 percent won't have any coverage, Conway said.

This is especially pertinent to Cal Poly, Conway said, because the university is not a theoretical institution; it's a "doing" kind of institution. The nature of Cal Poly is to give the students opportunities to try new things.

"For me, the gut-wrencher is not to say we can't do anything about the problems, we just will have to find new ways to deal with them," Conway said.

He does not want to have to drop any activities because "there would be something lost when you look at the flavor of this place."

Study shows that seat belt usage is up after laws

DETROIT (AP) — States that require motorists to wear seat belts are reporting usage rates as high as 81 percent in Hawaii and as low as 29 percent in Illinois, according to a study compiled by a national traffic safety group.

"There's an upward trend in states that shows that not only do seat belts work, but people believe they work," said Barbara Tucker, a spokeswoman for Traffic Safety Now Inc., a non-profit organization funded by automobile manufacturers.

In California, where a seat belt law took effect this year, the study says that in cities seat belt usage has more than doubled to 45 percent. And on California freeways, an estimated 70 percent of motorists now buckle up.

Your Resume

Introducing the **PDO** Resume from Tintype Graphic Arts

What the experts say about preparing and duplicating

A most important point:

A resume can get you an *interview* but it cannot get you a job. Your resume is a sales tool, and will get results only from interested "buyers."

In the following paragraphs we present some basic ideas for getting these "buyers" to take a good look at you. While these are not hard-and-fast rules, they represent the best advice of experts who interview and hire new employees often. Here is what they say:

Who are you?

First and foremost, give your name, address and telephone number. Include your current address as well as a "permanent" address (if necessary) where mail and phone messages will be kept for you.

What position do you seek?

You should state your desired position in a separate cover letter which addresses the individual employer. In that cover letter, tell the potential employer specifically what you are seeking and what you can offer that company.

Propose some benefit to your potential employer

The most important point to get across to potential employers is that you can provide them with a *real benefit*. Make this statement not on the basis of what the job will do for you, but what you can do for the employer. Your resume should show the qualifications which make your value immediately evident.

By explaining exactly what you can do for a potential employer, you will get your message across with the least interference. Employers appreciate clarity and brevity; one sentence is usually adequate.

Saying that you'll "do anything" isn't assertive enough. "Do anything" jobs seldom come along, and when they do, they don't pay very well.

Your employment and educational background

Next, determine which is more marketable: your employment history or your education. If you've gone to school for the last ten years, make that the more prominent of the two. If, by contrast, you have an impressive list of jobs and employers, put employment first.

Under either education or professional experience we recommend no more than four items, listed chronologically with the *most recent first*. If you list professional experience, list prominently those jobs which relate to your desired field of employment. And, if you have worked outside your field during college, you can list this experience under a separate heading called Other Employment since it isn't necessarily in your specialty.

When listing employment experience, always put the job title or function *first*, followed by the employer's name; a potential employer is more interested in *what you did* than who paid you to do it.

After the above, make the secondary listing (Education—if you've already listed employment experience).

Sure, we all took English!

On the subject of education, *if you list classes* don't list all of your classes. Everyone has to take English, so unless English is your major, leave it out. List only those classes which will make you stand out from the crowd. If you did three quarters of advanced study in quantum physics, say so! Present your credentials to show potential benefit to the employer.

If you did special study in any subject, be sure to mention it in your resume. Practical experience such as this separates Cal Poly from other universities, and employers want to know about it.

Photos are "out" this season

It used to be popular to include a photograph on a resume. Recently this has become unimportant, and has caused the rejection of resumes because of anti-discrimination laws. It is legally safer for an employer to evaluate candidates *only by the information in their resumes*, not by their appearance.

your resume

What else interests you?

Another block of information you can include in your resume is a statement about your extra-curricular activities, interests and hobbies. An employer can learn a lot about a candidate by the things they do *away from the office or classroom*.

Outgoing, active people have a distinct advantage in certain occupations (sales, public relations) while more "studious" people are often favored for research and other more "academic" positions. Weigh the value of your activities against what you believe the employer is seeking, and emphasize those that make you more desirable in your chosen profession.

Important people know me!

While most resumes *do not* include references, you may choose to. If you do, provide the names of qualified professionals or educators who know you well. *Be sure to ask them in advance*; the additional courtesy reflects positively on you.

It is essential that you provide each person given as a reference with a copy of your resume to facilitate their discussion with potential employers.

How much to say

Inside this folder is a block form for what we consider to be an excellent resume. You can fill out the blanks to get an idea of how much you need to say to fill a page, and most employers agree that a page and a cover letter are all you need. Attachments, such as letters of recommendation, can be added to better present a resume to a specific employer.

What not to say

Never exaggerate the facts in your resume; background checks will uncover exaggeration, and this will probably disqualify you for *any* position. Another bit of advice – write your own resume, and use simple language at all times.

One copy is never enough

Once you have composed your resume, you'll need to get a number of copies prepared:

\$39.95 for our PDQ Resume— includes typesetting and Xeroxing! It's a steal of a deal

Most people choose to get a typeset resume, and we have a special program called *PDQ Resumes*. For \$39.95 plus tax, we'll typeset and Xerox 25 copies of your resume (black on any of ten business paper stocks) and we'll include 25 matching letterhead sheets and blank business envelopes. Offset printing, colored inks, extra copies, and borders are all available at a small extra charge.

In order to qualify for this low-price PDQ special, we have a couple of requests: one, *your resume must fit one of our formats*, and two, *you must select from the choice of typestyles we present* on the last page of this booklet. We have over 2,500 other styles, but there is a small extra charge for their use.

We don't sell you a resume then just let you walk away

One of the best reasons to use the PDQ Resume program is that we'll sell you "resume insurance."

For an additional \$3.00 we'll provide you with a data disk with your resume safely stored on it.

If, a year (or five years) from now you want to revise your resume and hit the job market again, simply send us this special disk, your revisions, and a check for half the original price, and we'll make a new set of resumes and mail them to you.

Who we are and what we do

Tintype Graphic Arts is a locally-owned graphic arts firm, started in 1973 by a Cal Poly graduate in Graphic Communication. Since most of Tintype's employees are Cal Poly graduates, we strive to provide *value* for Cal Poly students. We believe you won't find a better combination of quality, price and speed.

In addition to PDQ Resumes, we provide typesetting, design, camera work for printing and photography.

Tintype Graphic Arts
2226 Beebe Street
San Luis Obispo, California 93401
(805) 544-9789

► This resume produced for Joanie Wilder uses a double-rule, copy spread right and left in the same line, and bullets to highlight addresses and major courses. A border also makes this one stand out from the crowd. We have a selection of borders you may add to any resume at a nominal extra charge.

has included 2 years of experience as a crew leader at Wendy's restaurant in San Luis Obispo, California.
Dean's Honor List (1982 to 1983)
President's Honor List (1984)
CPA Exam (to be taken in May, 1986)
Available upon request

CERTIFICATES AND ACTIVITIES
REFERENCES

◀ Linda Johnson's resume uses strong contrast between headings and text. The body is set in a condensed style, allowing more information to fit on the page without crowding. Note that the four major headings are arranged flush-right within their column.

Format: Two

Typestyles:

Headings: Harry Obese, #2010

Body Copy: Helvetica Condensed, #98

Italics: Helvetica Condensed Italic, #99

Emphasis: Helvetica Bold Condensed, #100

RESUME

from **Tintype Graphic Arts**

2226 Beebee Street, San Luis Obispo, California 93401
(805) 544-9789

INSTRUCTIONS: Use this form to prepare your PDQ Resume copy. You can have a maximum of 40 - 42 vertical lines. The PDQ Resume system is very flexible; you may use as many as seven headings and copy blocks (or none at all) and (in this format) copy may cross over from one copy area to the next, skipping a heading.

Within each copy block you may put copy in paragraphs, two columns for a list or text, or a single column listing with "bullets" to identify each item. See the samples in our booklet for ideas on how to format your resume.

Type or print clearly. Use capital and lower case letters as you want them to

Format 1

This form is larger than normal to accommodate your original copy.
Your typeset resume will be 8½ x 11 inches in size.

appear in your resume. Underline any copy you want *italicized*, and double-underline copy that is to be set in **bold face** type (you can also highlight in color those elements of your copy to be emphasized). You may use as many as four different type styles in your resume — choose from those shown in our booklet. Additional type styles are available at a small extra charge.

Your copy may be set centered, flush-left, or flush-right within any copy area; simply mark off to the side how you want the copy handled (we assume normal flush left if you don't specify anything).

Remember – simple, clear language is best for all readers.

Yvonne Dunham

Post Office Box 1234, San Luis Obispo, California 93401
(805) 543-0908

Objective

High School Science Teacher in a progressive school district. My ability to work with students of all cultural backgrounds is enhanced by impressive on-the-job experience. Teaching is a privilege for me, and I am excited by the opportunity to practice my trade.

Teaching Experience

Science Teacher Yorba Linda High School, Yorba Linda, California. At this school I managed to improve the overall science scores of students by two percentage points. The classes were diverse, attended by a wide mix of students — from those with an acute desire to learn to the delinquent. Throughout my tenure at Yorba Linda, I excelled in getting the students' attention.

Work Experience

I am exhilarated by the enthusiasm of students when they understand scientific ideas — it encourages me to work even harder.
Assistant Youth Tour Director Museum of Science and Nature, Santa Barbara, California. At this job, I worked with touring student groups to familiarize them with the museum's many exhibits. Under the direction of the museum director, I worked with tour groups as large as 45 students, having ample opportunity to improve my public speaking, diction, and practice of teaching larger group.
Youth Tour Trainee Museum of Science and Nature, Santa Barbara, California. In this position I was trained to develop displays, protect artifacts, and make public presentations of the museum's science and nature exhibits. Working with the director, I developed study materials for many of the displays, and arranged to distribute these materials to secondary school teachers in the local school districts.
Food Server Arby's Roast Beef, Santa Barbara, California. I worked at this job after high school while preparing to move to college. It was a good job; it gave me experience with the public, and helped me get started in college with the "nest egg" of money I saved.

Education

Bachelor of Arts Biochemistry, Cal Poly, San Luis Obispo, California. Graduated June, 1985. Major concentration included entomology, ornithology, biology, and some earth sciences. Grade point average 3.6 overall (possible 4.0).
My other skills include relative fluency in French and Spanish, which I studied for five years each at the high school and college level. I also studied music — specifically the recorder, which I play in a small trio of wind instruments.
Born in 1960, in Santa Barbara County, California. Traveled extensively as a student in both the United States and Asia with my family.

Other Facts

► Yvonne Dunham's resume falls into a category often called a "qualifications summary." It uses prose rather than itemized or chronological data. For some people this type of resume is superior to the conventional style. Notice the strong contrast between the headlines and the text. Good contrast is always important, and can be accomplished with bold-light, roman-italic or style changes within a resume.

Format: Two

Typestyles:

Headings: Haas Floreal Black, #8479

Body Copy: Kennerley, #118

Italics: none

Emphasis: Kennerley Bold, #120

► Mark Glasser used bold typographic ornaments to substitute for headings on his resume. A graphic designer, Glasser used the PDQ Format Two resume to meet his needs. As with most successful resumes, this uses strong light-bold contrast to get attention. We printed 25 of these in two colors, and the second one he used landed him a job!

Format: Two

Typstyles:

Headings: Ornamental Characters

Body Copy: Helvetica Condensed, #98

Italics: Helvetica Condensed Italic, #99

Emphasis: Helvetica Black Condensed, #102

2134 Saratoga Avenue
San Luis Obispo, California 93401
(805) 544-9797

EDUCATION:
Bachelor of Arts degree in Applied Art and Design
California Polytechnic State University, San Luis Obispo, California
June, 1980 through December, 1985

MAJOR COURSES:
Packaging Design
Typography
Presentation Graphics
Three Dimensional Design
Calligraphy

DESIGN EXPERIENCE AND ACCOMPLISHMENTS:
Design Club
Graphic Design Show entrant 1981, 1982, 1983
Graphic Design Show finalist 1982, 1983
Award of Merit, Design Show, 1983
Finalist, Architecture Poster Competition, 1984

EMPLOYMENT EXPERIENCE:
January, 1983 to September, 1985
Counter Salesperson
The Art Bin
1985 Monterey Street
San Luis Obispo, California 93401
This position involved contact with the public in sales, customer service, training, and special order merchandise. As a function of my position, it was my responsibility to develop and implement a special order system. The system is in effect now, and it has resulted in fewer problems with customer notification, invoicing, and unwanted merchandise.

February, 1982 to December, 1982
Floor Manager
McDonald's Restaurant
788 Footwall Boulevard
San Luis Obispo, California 93401
This position required me to work various shifts, often with employees unfamiliar to me. My responsibilities included training all employees in the use of a new cash registering system.

September, 1981 to February, 1982
Cashier
McDonald's Restaurant
788 Footwall Boulevard
San Luis Obispo, California 93401
This was my first job in college. The position required contact with the public, order taking, operation of the cash register, change-making, and ordering food.

EXTRA-CURRICULAR ACTIVITIES:
Cal Poly Cycling Club
Cal Poly Daring Club
Sierra Club, Santa Lucia Chapter
Boy Scouts of America, Troop 413
Cal Poly Rose Fisk Committee

EXPERIENCE

SHELTERED HILL ALFALFA FARM
Production Manager
Assist with operation and maintenance of alfalfa tree farm on part-time basis.
Perform duties including: Retail sales, irrigation, planting, weed control, harvest.

UNITED STATES FOREST SERVICE
Forestry Technician
Technician for California Region Grasslands Improvement Program
Duties consisted of: field measurements, tree climbing for cone and scion collection, seed processing, progeny data collection.

UNITED STATES FOREST SERVICE
Lead Forestry Technician
Foreman for district grassland sale preparation crew.
Performed duties including: marking, traversing, unit layout, appraisal map construction, small sales preparation.

UNITED STATES FOREST SERVICE
Forestry Aide - Crew Foreman
Foreman for district crew.
Duties consisted of: measurements, marking, traversing, planting, herbicide application, plantation monitoring, map reading, assisting sale administration.

UNITED STATES FOREST SERVICE
Forestry Aide - Fire Engine Crewmember
Operation and maintenance of U.S.F.S. model 92 fire engine.
Performed duties including: Initial attack, hose laying, fireline construction, engine purring, mechanics, hand tool use, fire behavior, helicopter safety.

PERSONAL

Member, American Grasslands Association and Society of American Ecologists
Leisure interests include bluegrass music, cycling, hiking and singing

► George Garrett took advantage of Format One, adding a double-rule for separation, and spreading copy for address and job locations in his resume. His major courses and activities are indented slightly, while being placed into two columns, to set them off from the adjacent copy. Bullets are used to identify job responsibilities.

Format: One

Typstyles:

Headings: Helvetica Bold, #88

Body Copy: Helvetica Roman, #85

Italics: none

Emphasis: Helvetica Bold, #88

Type Style Selection

Choose up to four faces from this list of popular type styles.

While you can select variations in weight and use italics within a family (faces with the same *family* name), we recommend mixing no more than two families of type.

Write the style names you have chosen on the order form, and be sure to indicate those phrases in your resume to be set with emphasis or in italics.
