Poly club holds memorial for victims of Holocaust

■ The Jewish club, Haverim, recited names of hundreds of Jews killed during W.W. II.

By Gabrielle Friedly
Staff Writer

The mood was earnest as six candles were slowly lit with care. Each candle represented one million Jews who died during World War II.

Members of the campus Jewish club Haverim held a memorial for the Jews persecuted during the Holocaust in Nazi-occupied Europe from 1933-1945. For 24 hours,

beginning Monday at noon, names of those Jews who died during the Holocaust were read upstairs in the University Union.

"We want to give the message," said Warren Lieber, Haverim president. "We hope it (history) never repeats itself."

"One million Jews inhabited Warsaw before the Holocaust and after 2,000 were left," he said. "The Holocaust was a very deep blow to the Jewish

State budget crisis costs CSU \$402 million in cuts

■ Interim chancellor says cutbacks are the worst in 30 years and may affect faculty, staff, libraries, classes and enrollment.

By Karen Travis
Staff Writer

Reduced enrollment, fewer classes and a decrease in staff and faculty members may result from recent state budget cuts, says the chancellor of the California State University system.

Ellis McCune, who has served as interim chancellor since May 1990, said Monday at a press conference that this may be his toughest challenge yet.

"The CSU system is facing its worst budget problem in 30 years," McCune said. "We will survive it, but with great difficulties."

McCune said the CSU Board of Trustees requested a \$2.1 billion budget for 1991. The California Legislature, however, only

gave the CSU system \$1.7 billion. "This resulted in a \$402 million shortfall," McCune said.

The legislature gave the CSU system specific reductions totaling \$257 million, leaving the CSU to make the remaining \$145 million in cuts.

McCune said this will have long-term impacts on the CSU system. One area that may be affected seriously by the budget cuts is faculty and staff members.

"We have 330 new faculty positions open, but we won't be filling any of them," McCune said. He also said 800 non-faculty positions, including administrative, technical and clerical jobs, may be cut.

"With fewer faculty members, enrollment will also have to be reduced," McCune said. "You

can't serve more students with fewer staff people."

McCune said this may be difficult because of increased population in California.

"We are becoming a majority/minority state now," he said. "The minority are fast becoming the majority of the population."

Because of this change, universities and colleges are challenged to educate these students, who often come from different cultural backgrounds and speak limited English.

"We have to be able to continue educating people through this change in population, because these are the people who will eventually run our state," McCune said.

Other places that will experience these changes will be

Good Neighbor Day takes a new approach to community service

By Tracy Condon
Staff Writer

"Students Working With The Community" is this year's theme for the eighth annual Good Neighbor Day to be held Saturday, beginning at 7 a.m.

Good Neighbor Day is a community service event hosted by Associated Students, Inc. to help strengthen relations between students and the community.

Last year, Good Neighbor Day attracted more than 800 students. Organizers hope to see more than 1,200 students, as well as community leaders and

citizens, turn out for this year's activities.

The event will have more emphasis on the students working with the community rather than for the community, said David Kopic, chairman of Good Neighbor Day.

"This year we tried to change the whole concept around," Kopic said.

Students will be paired with community groups to work on projects. Kopic said this effort will provide a chance for improved communication.

The projects to be accomplished on Good Neighbor

Day are bigger than they have been in the past and they will have longer lasting effects, Kopic said.

Kopic said that this year's Good Neighbor Day will include projects with people in the community as opposed to last year where events focused on small-group cleaning tasks.

"The true benefits of the format changes won't be felt as much this year as in years to come," Kopic said.

One of this year's projects is the cleaning and beautification of the downtown area by "SLO

Forum discusses ethnic issues

■ Panel and audience agree that Cal Poly needs more cultural diversity.

By Shirley Meissner
Staff Writer

No time was wasted for panelists and audience members at the First Annual Ethnic Issues Open Forum in reaching a consensus — Cal Poly is in serious need of cultural diversity.

Nearly 50 people attended the open forum, held Monday in the University Union room 207. The audience, seated around the nine-member panel, was made of primarily black

and Hispanic students.

"This room is the problem. It is not representative of Cal Poly," said Willi Coleman, coordinator for the Committee for Women and Ethnic Issues, commenting on the disproportion of ethnic minorities at the forum. She said that white students just do not attend events which involve minority issues.

The forum was sponsored by the ASI Ethnic Relations Committee. It was the committee's first event and was held as part of ASI's "Pride of the Union"

week. It consisted of a panel of students, faculty and staff members.

Two major issues surfaced throughout the two-hour discussion. The first concern for Cal Poly was a need for "cultural pluralism," student exposure to the four dominant minority groups in the United States: African American, Asian American, Native American and Hispanic/Chicano/Latino. The panel said they want an ethnic

GLBU says stop discrimination

Today is a national day of protest against the Department of Defense's policy that keeps gays, lesbians and bisexuals from joining the military. On campus that means gays, lesbians and bisexuals can't join the Reserve Officers Training Corps.

The DOD says that homosexuality is incompatible with military service, yet it offers no proof to back up this statement. In an effort to find evidence, the DOD paid for two reports that studied homosexuality and suitability for military service. The findings of these reports stated that gay and lesbian soldiers perform their jobs as well as their heterosexual counterparts and they do not pose a national security risk. Even with this knowledge, the DOD refuses to change its policies of discrimination.

The DOD's policy is in direct conflict with the CSU's policy stating "the CSU does not discriminate in the basis of sex, handicap, race, color, national origin, age, marital status, religion or sexual preference." On March 1, the CSU Academic Senate voted unanimously to urge all campus senates and presidents to terminate or allow to expire all contracts to offer ROTC programs at each university. On April 16 Cal Poly's Academic Senate will vote on a similar resolution to eliminate the ROTC program from Poly until the DOD changes its policy and allows gays, lesbians

and bisexuals to serve.

The Gays, Lesbians, Bisexuals United agree with the resolution currently in front of Cal Poly's Academic Senate and hope they will pass it.

It is time to force the DOD's policy to change.

Jan E. Perez

GLBU vice president

Bus system aids Poly, students

Instead of languishing on the problems of parking or the walk from parking lots to class, we offer a solution.

SLO Transit will pick you up near home and take you to class. The service is free and is paid with parking fines, not student fees or academic budgets.

SLO Transit carries nearly 500,000 students a year in a safe, economical way and reduces the need for parking.

SLO Transit has short-term plans to meet the demand for service and reduces route times. SLO Transit will soon meet with Poly representatives to determine the level of service wanted in the upcoming years.

We value your ridership and want to continue to play a part in solving commuting and parking problems. Together we can make a real difference.

Harry Watson
Transit Manager

COMMENTARY

History, politics shouldn't mix

By Lynne Cheney

So much of what has happened in the world during the past few years has demonstrated the long-term wisdom of being what is called "politically incorrect." One of the tenets of that position, I think most people would agree, is an affirmation of the importance of western civilization.

Now, of course, the history of the West is not a narrative of unbroken progress. We have monumental failures to our credit, and indeed, bringing these failures to light, holding them up and looking at them this way and that, is one of our finest traditions. The West is not perfect, but we do have on our record some glorious accomplishments. In 1989, before Tiananmen Square, Fang Lizhi, scientist and dissident, spoke of the aims of China's democracy movement. "What we are calling for is extremely basic," he said, "namely, freedom of speech, press, assembly and travel. Concepts of human rights and democracy," he went on, "although the founding principles of the U.S. government, should not be viewed as something exclusively Western. Actually, they are a legacy to the world."

These ideas are no small gift to have brought to humankind. They are gifts of such worth that people go into exile and prison for them. They are gifts of such great worth that people die for them, as they did less than two years ago in Tiananmen Square, as they did last month in Vilnius and Riga. But concepts of human rights and democracy, though they embody longings buried deep in every soul, can be suppressed.

As Charles Krauthammer has observed, the will to freedom is a constant of human nature, but so is the will to power. Tyrants have risen up before and they will again, ruthless despots bent on substituting their ambitions for the rule of law. There were brave Americans in the Persian Gulf, joined by courageous men and women from more than two dozen nations, engaged in battle with such a despot, demonstrating to history and the world that while freedom may not be inevitable, free societies can organize themselves to turn back tyranny.

We live in remarkable times, times that our grandchildren and great-grandchildren will ask us about. Surely they will want to know about the hundreds of thousands in the Lebi Shipyard in Gdansk, at the Berlin Wall, in Wencesles Square and when we explain what motivated these people to come together and defy dictatorship, we shall have to speak not only of the horrors of Communist oppression, but also of the promise offered by freedom, of the alternative vision offered by countries where elections and economies are free.

Our grandchildren will ask us about the Soviet Union, too, and who can say how the story we tell them will end? I was in the Soviet Union about three months ago, and it was a place amazingly changed from the last time I had been there, seven years before. St. Basil's, the onion-domed cathedral in Red Square, has been consecrated. Danilov Monastery, in ruins when I visited before, has been restored. Masses were being held their every Sunday, and Saturdays as well.

Another striking change is that it is now possible to have frank conversation with Soviet citizens. When I visited Leningrad and Moscow several years ago, I seldom had the sense that anyone was speaking candidly. But now Soviets young and old are willing to talk about the challenges they face. For scholars in the Soviet Union, the biggest challenge is depoliticizing —

or deideologizing as they often say — both the teaching and learning of history.

Perhaps the most reticent scholarly group with which I met, at least initially, were historians at the Military History Institute in Moscow. You have to understand that I bring a little baggage with me to a meeting like that. No one is unaware of my spouse's occupation as Secretary of Defense. So there was some reticence. And when the subject of depoliticizing the study of history came up, the first statement was very curious. "We can never completely remove politics from the study of history," one colonel said, "because we cannot remove ourselves from politics." "True enough," I agreed, "but shouldn't we try to minimize the effect of politics on our scholarship?" There were some careful nods around the table. "If we don't work to minimize it," I asked, "don't we become horses wearing blinders?"

This was not a particularly imaginative metaphor, but it had astonishing cross-cultural resonance. It changed the tone of the meeting. Hardly was it translated when it elicited the most positive response, not just careful nods, but enthusiastic stories about projects it was now possible to work on that it hadn't been possible to pursue before. One colonel — one scholar, I should say — was working on the question of how many people were killed in the Bolshevik Revolution — hardly a politically correct problem to pursue. Another scholar, the head of the Institute, is writing a biography of Trotsky and using Trotsky's papers to do so — a project that would have been unheard of a few years ago.

There is no neat conclusion to this story, no nice happy ending. In fact one has to wonder, to worry about the course of events in the Soviet Union. How long can the effort to deideologize scholarship continue when the President Gorbachev is seeking to limit freedom of the press? Still, what I observed in the Soviet Union does prompt some important questions. Shouldn't the goal of scholars everywhere be to make art and inquiry as free as possible of political bias and influence? Of course, we are political creatures. Not understanding that, shouldn't we try to raise ourselves up and acquire a broader perspective? If we insist that all literature, all art, be run through any single political prism, whether it be Marxist or Capitalist or feminist or European or Third World, aren't we creatures of diminished vision? Indeed, if we insist, as has become fashionable in some quarters, that culture and all its creations are everywhere congruent with political struggle, isn't that the most diminished and diminishing perspective of all?

There was an inescapable irony about being in the Soviet Union and hearing again and again about the importance of depoliticizing and deideologizing the study of culture when so often in the United States I read or heard about the importance of using the arts and the humanities as instruments of politics. I understand that the people advocating this view believe fervently that the political agendas they want to advance are good ones, but however well-intentioned, using the arts and the humanities in this way limits vision. It is putting on blinders, and what a tragedy for us to do that as intellectuals in other parts of the world are struggling to take them off.

Lynne Cheney is the Chairman of the National Endowment for the Humanities.

WORLD

Power plant accidents cut electricity sources

TOKYO (AP) — A run of nuclear plant accidents and shutdowns has left Japan's power industry nervous about the prospects of supplying electricity this summer.

Japan's nine electric power companies have made emergency revisions to their supply plans for the year because of the shutdowns, an official at the Resource and Energy Agency said. And some utilities have decided to reopen old thermoelectric power plants to help meet the electric load.

"We are somehow managing right now ... but the situation is going to be pretty tough by summertime," said Norio Kuzuyama, a spokesman for Chubu Electric Power Co.

The nation barely endured an unusually hot summer last year, when electricity demand soared to just less than maximum output. Although there were no brownouts, the government was forced to ask industry to take conservation steps.

It urged companies and households not to cool rooms below 82 degrees and to turn off lights in rooms not in use.

Because Japan is a resource-poor island nation with virtually no oil of its own, more than one-quarter of its electricity is generated by nuclear power.

Proposed budget may alter Bush's priorities

WASHINGTON (AP) — The House Budget Committee moved toward passage Tuesday of a \$1.46 trillion Democratic budget for 1992, that would reshuffle some of President Bush's domestic priorities and could set the tone for a year of confrontation between the White House and Congress.

Work on the budget came as lawmakers returned from their holiday recess and as Democrats and Republicans girded to battle over a host of contentious domestic issues, including civil rights, crime legislation and parental leave.

On Wednesday, a House Judiciary subcommittee will consider the so-called Brady Bill, named for former White House press secretary Jim Brady. The legislation would impose a seven-day waiting period on people seeking to buy a handgun. The administration has criticized the bill.

The budget proposed by Democrats neither raises nor cuts taxes but reverses multi-billion dollar cuts Bush would make in Medicare, veterans' pensions and other benefit programs.

Shoemaker in serious condition after crash

COVINA, Calif. (AP) — Bill Shoemaker, racing's winningest jockey, was in serious condition and partially paralyzed Tuesday following a car accident in which authorities said he was under the influence of alcohol.

Shoemaker, whose career as a rider ended with his retirement last year, suffered a fracture dislocation of his neck and paralysis to undisclosed parts of his body in the Monday night accident, said Inter-Community Medical Center spokesman Dennis Richards, reading from a statement by Shoemaker's wife, Cindy.

Shoemaker, who earlier was listed in critical condition, was transferred Tuesday afternoon to Centinela Hospital Medical Center, a facility known for its expertise in sports medicine and orthopedic surgery. Richards said Shoemaker's family and personal physician requested the transfer but refused to release any further information about his injuries.

Ticket revenue could aid local governments

SAN JOSE, Calif. (AP) — If Santa Clara County had a better way to collect unpaid traffic tickets, the city of San Jose could be up to \$17 million richer, according to City Auditor Gerald Silva.

Silva estimated Tuesday that there are more than \$58 million worth of unpaid traffic tickets in San Jose alone, and possibly as much as \$100 million countywide.

But the county hasn't created an efficient system to collect fines, he said, and it doesn't

Winds are biggest hurdle for men's track at Fresno Relays

By Jeff Krump
Staff Writer

Strong winds pounded the Cal Poly men's track team during its meet last Saturday at the Fresno Relays in what Mustang Head Coach Tom Henderson described as "not a particularly good weekend."

"It was like riding a 'motorcycle from here to New York without a helmet on," Henderson said.

Henderson said some teams had runners "going down left and right" with muscle pulls due to the cool winds, but Cal Poly escaped with no wind-related injuries.

Cal Poly's Tom Halaszynski went down to the ground during the 4x800-meter relays, but not because he pulled a muscle. "It

(the baton) just jumped right out of his hand," said Henderson.

The baton slipped out of Halaszynski's hand 50 yards from the finish line as the Mustangs were in third place behind the Brazilian national team and Adams State College.

Halaszynski stumbled while attempting to retrieve the baton, making matters worse.

"He looked like a Ninja Turtle break dancing on his back," joked Henderson. "It put us back 200 years in recruiting."

Five minutes after Halaszynski's debacle, Brian Strieff fell while running the open 800-meter race.

A bright spot during the meet was when Jeff Yale scored a personal season best time in the 100-meter sprint. Unfortunately Yale broke his leg in a physical

education class on Monday.

Kevin Rankin, last year's NCAA Division II pole-vaulting champion, sliced through the wind to clear 16-0 in the pole vault.

Mike Parrott and Matt Hemmel placed second and third, respectively, in the 5,000-meter race.

Henderson said these were good performances considering the blustery conditions.

"All of our distance races were hammered by the wind," he said.

Tom McGuirk also ran a season-best 53.8 seconds in the 400-meter intermediate hurdles.

Cal Poly's next meet is at home this weekend against conference rivals Cal State Los Angeles and Cal State Bakersfield. The meet begins at 1 p.m. on Saturday at the Cal Poly track.

SCIENCE

From page 3
development of the High Resolution Imaging Spectrometer (HIRIS). The instrument was not selected for flight on EOS-A1 because of unresolved technical issues, but will be a candidate for flight on subsequent EOS satellites.

A team led by JPL's Dr. Richard Willson also will develop the Active Cavity Radiometer Irradiance Monitor (ACRIM), another instrument targeted for flight on a platform of opportunity.

EOS is the centerpiece of NASA's "Mission to Planet Earth," a global-scale research program that will study the Earth as an integrated environmental system, focusing of the interactions of the atmosphere, oceans, land surfaces and biosphere.

"Mission to Planet Earth" is NASA's contribution to the U.S. Global Change Research Program, a multi-agency federal program to observe the Earth, improve understanding of natural human-induced global change and develop better models and predictive capabilities for interpreting environment changes.

"The primary goal of the EOS-A satellites is to study the effects of potential global warming by conducting long-term research into the key parameters of the Earth's surface and atmosphere," said Dr. Charles Elachi, assistant laboratory director for JPL's Office of Space and Science Instruments.

"Global changes are very complicated and require long-term monitoring," he said. "The EOS-A series will help determine the extent and causes of global climate changes through a program of long-term observations."

Launch of the first satellite, tentatively scheduled for 1998, will mark the beginning of a 15-year-long program of observations of the Earth system, which

includes the oceans, land surface, and lower and upper atmospheres.

Specific observations from EOS-A1 will include measurements of the balance of radiation that is absorbed from the sun and emitted by Earth. This radiation balance heats and cools Earth's atmosphere and drives the circulation of the oceans.

Other measurements will include atmospheric circulation, air-sea interactions and the measurement of biological processes, such as the production of phytoplankton, a factor in helping regulate the flow of carbon in the sea.

The exchange of carbon between the oceans, surface and atmosphere is essential to understanding potential global warming and the increase of carbon dioxide in Earth's atmosphere.

Nine of the 11 instruments will conduct simultaneous observations of related environmental variables, such as the role of clouds and water vapor on temperature and humidity, or the impact of surface winds on oceanic gas exchange.

"These atmospheric interactions are very important in understanding global warming," Elachi said. "It is critical that we monitor temperature fluctuations, atmospheric and surface patterns simultaneously to understand how they combine to produce certain environmental conditions."

Global views of the Earth system, possible only through use of the space-borne instruments, will enable scientists to make integrated measurements of these environmental patterns without interruptions from rapid atmospheric changes or sudden shifts of sunlight, Elachi said.

JPL's Atmospheric Infrared Sounder (AIRS) will measure atmospheric temperature profiles with an accuracy of 1 degree Centigrade and provide data on atmospheric water vapor, cloud cover, and sea- and land-surface

temperatures.

The Multi-Angle Imaging Spectro-Radiometer (MISR) will obtain global observations of the amount of light that is reflected from the Earth's surface and atmosphere at multiple view angles.

MISR will help characterize the optical properties of atmospheric hazes, clouds and the Earth's surface to monitor environmental changes and predict climatic effects.

The Stick Scatterometer (STIKSCAT) is a microwave radar to measure surface wind speeds and directions over the oceans to study atmosphere-ocean interactions and improve global weather predictions.

The Active Cavity Radiometer Irradiance Monitor (ACRIM), which does not require the polar orbit of the EOS-A series, will make long-term measurements of the amount of sunlight reaching Earth's upper atmosphere and help determine the influence of variations in solar output on climate change.

The High-Resolution Imaging Spectrometer (HIRIS) will use its high imaging resolution of 30 meters to study biological and geophysical processes. HIRIS will be able to study complex interactions along the borders of different marine ecosystems, for instance, and determine the annual cycle of phytoplankton in the open sea and along the coastal waters.

The JPL EOS-A satellite instruments are being developed under the auspices of the laboratory's Office of Space Science and Instruments.

The EOS project is managed by the Goddard Space Flight Center in Greenbelt, Md., for NASA's Office of Space Science and Applications.

Overall program management is an international effort involving NASA, the European Space Agency, Japan and Canada.

Story and art by
Karen Travis

Eric Miller was an ambitious, sharp-looking 20-year-old working as a supermarket checker in Sacramento before he enlisted in the United States Air Force.

Back in 1971, young men who weren't in college, like Eric, could almost expect to be drafted to fight in Vietnam. Eric enlisted in hopes of getting an office job and avoiding the war, particularly to avoid direct ground combat.

Eric received his first choice of location, George Air Force Base near San Bernardino, almost immediately. He packed the few items he was allowed to take with him and left wondering if he would ever return.

When he was assigned to fly F-4 Phantom jets, unfavorably dubbed the "hot ticket to war" by the military for its frequent combat use, Eric knew he would be going to fight in Vietnam.

He dutifully served his country and tried to accept the fact that "life dealt me a bum card." And in April 1972, exactly one year from the day he left the United States, Eric came home.

"I returned with no sense of pride at all," said Eric, who currently works at a Lucky supermarket in Sacramento. "Not only did I leave Vietnam with an empty feeling and no satisfaction, I was spit on and considered trash when I returned. My own country, the country I fought for, hated me and every other Vietnam veteran."

For some soldiers, like Eric, the battlefield did not end overseas ... it continued at home. Some soldiers returning from Vietnam faced an enduring battle of confusion, trying to justify their actions when the rest of America would not.

Now, however, since the war in the Persian Gulf has ended, veterans of Vietnam will finally witness what they had hoped to experience themselves almost 20 years ago ... soldiers returning as heroes.

After almost nine months, the dream of reuniting with family and friends is finally real for Desert Storm troops who, unlike many Vietnam veterans, are being congratulated for their services in the war. From the time they stepped off the plane, sol-

diers who have returned from the Gulf War have been showered with hugs and tears and celebrated with marching bands and parades.

But just because the war is over and troops are beginning to return home does not mean they have put the experience behind them. Many will feel the aftershocks common after war.

Being tagged a "war hero" might help to justify the deaths of thousands of Iraqi soldiers and civilians. But the trauma of any war can leave permanent psychological scars on veterans. And eventually Gulf veterans' sadness about the war might return. Problems such as depression, isolation, rage, guilt and nightmares one day may surface.

In the book "Post-Traumatic Stress Disorders: A Handbook for Clinicians," author R. Langer told how these symptoms were first clinically recognized after World War I and found to be spurred by the high air-pressure of exploding shells. Langer wrote that the illness was later called Post-Traumatic Stress Disorder, or PTSD, and currently afflicts at least 500,000 Vietnam veterans.

In most cases of PTSD, combat was the setting for traumatic incidents. However, Jerry Nolan, Sacramento Army Depot family services counselor, said other areas also brought on signs of PTSDs. For example, doctors and other medical personnel who treated the wounded might have felt that errors in their judgment cost American lives. Technical repair troops might suffer from feeling responsible for machinery breakdowns which caused American casualties.

Eric Miller said that for years after he left Vietnam he would wake up in the morning on the floor. "I guess I was so conditioned to 'hitting the deck'

during air-raids or bombs, I must have done it in my sleep," he said.

Miller, who lived near a freeway after the Vietnam war said the loud noises would cause him to jump or bring back visions of war. "Even now, 20 years later, I still wince at loud noises," he said.

Gulf veterans may not have experienced the same type of combat fighting as did Vietnam or other war veterans, but some soldiers who fought in the Gulf War witnessed many deaths, saw and smelt remains of charred bodies or watched as innocent women and children were killed.

Nolan said some veterans from the Gulf War will try to jump back into life in the United States as if nothing has happened, only to discover that things

See INSIGHT, page 6

INSIGHT

From page 5

are not the same as when they left. He said some may even find it uncomfortable to be out in the open or to have someone stand behind them.

Nolan said feelings of depression, sometimes accompanied with sleep disturbances and feelings of unworthiness are common PTSDs, as well as guilt for surviving when others did not.

He said some Gulf veterans might ask, "Why did I survive when others who deserved to live, died?" They might experience dreams about being shot at or being pursued and unable to run or escape or even dreams of seeing a friend die.

Vietnam veteran Ellesworth Weaver of Arroyo Grande said he sprayed Agent Orange and dropped Napalm on North Vietnam to destroy foliage.

"I didn't think anyone wanted to hear about Vietnam, and this left me with a feeling of anguish and despair when I came home," Weaver said.

"I think anyone returning from a war needs some sort of counseling to help prepare for what to expect," he said. "We never got that. Even people in earthquake situations are given counseling. Why weren't we?"

Like so many Vietnam veterans, Weaver said his transition from Vietnam to civilian life was sudden.

"We flew for one whole day with two brief stops before landing at the Seattle/Tacoma Airport," Weaver said. After 48 hours of processing, Weaver was given a steak dinner, his back-pay and a quick physical exam. He was then booked on a flight home. "We weren't prepared for what to expect at all," Weaver said.

Nolan said, "I think soldiers returning from the Persian Gulf definitely need counseling ... not because they're crazy but because a lot of things have happened since their deployment."

"Many soldiers have cruised through life with superficial communication skills. They have been taught not to scrape too deep at their emotions and think they don't need to explore any scarred feelings," he said. "These people simply do not want to be vulnerable."

Nolan said that if Gulf veterans are not prepared or counseled early, they might experience some of the same stress-disorder symptoms seen in other war veterans.

Kent Cox, a project platoon

commander in Saudi Arabia, arrived home to Port Hueneme in Oxnard in mid-March. "So far, I haven't experienced any major difficulties," Cox said. "But loud noises still make me jump."

Langer wrote that recovery for some war veterans necessitates a spiritual or moral healing, as well as an emotional healing.

Spiritually, veterans are seeking forgiveness for their actions. Emotionally, they need to reintegrate back into normal life and be able to function in a family or career. Therapy can help veterans express their emotions more effectively, as well as reduce their sense of guilt, he wrote.

Langer also told how counseling won't promise an absence of pain or rage but will draw a closeness to oneself and to others.

Nolan said many soldiers left for the Gulf with healthy relationships with family, friends and spouses. He said, however, trying to resume these relationships after the war could be a problem if not done gently and carefully.

One strategy to reunify families is being performed by the Sacramento Army Depot

Public Affairs Department. Its reunification program is structured after the original program conducted by the Navy Family Services in Hampton Roads, Va., and is aimed at helping Gulf soldiers and their family members complete the mission successfully and minimize personal loss.

A program at Port Hueneme will provide counseling for returning Persian Gulf veterans at the Family Services Center. "The program will offer individual as well as group and family counseling," said Port Hueneme Command Master Chief Carl Maxwell. "We planned this to help Persian Gulf veterans adjust to home-life."

Military institutions along the Central Coast, however, are not offering any reunification programs at this time. The San Luis Obispo Air Force Department, Army Department, ROTC, Camp San Luis Obispo and Camp Roberts in Paso Robles have not formed special programs for local Persian Gulf veterans. They do, however, have a general counseling program for individuals who need help in adjusting to life after war.

Reunion is the period of time of adjustment following the

return of the soldier from short- or long-term deployment. Nolan said that reunion and homecoming are often more stressful than the initial pre-deployment and deployment phases. "The reunification program at the Sacramento Army Depot helps with the readjustment period," Nolan said. This period usually last from six to eight weeks.

Nolan said many veterans wonder if relationships with family and friends will be different when they return. They may ask, "What will it be like for us to be together again?" and "How has this whole ordeal changed our relationship?"

Nolan said this reunification program begins with the education of both the spouse or family member and the soldier. Information on the potential difficulties involved with the homecoming is prepared and sent to units in the Gulf region as well as to support groups and schools back in the United States.

Nolan said veterans will be able to attend presentations on topics such as reunion, re-establishing intimacy, returning to children, new parents of infants, single parents and single soldiers.

The program facilitates discussion therapy groups for veterans as needed. The program also has prepared a list of businesses to whom military families can go to for help with finances and re-employment services. It provides liaison with Vietnam veterans and ways to get information on PTSDs as well.

Almost 200 veteran centers throughout the United States offer individual and group therapy, vocational guidance, financial assistance and help in obtaining veterans' benefits.

As a result of counseling, veterans can renew commitment to family and friends on a deep and meaningful level, not only in marriages but in their everyday lives. With therapy, Gulf soldiers can make more positive use of the frustration and pain they may have experienced in Desert Storm.

WORLD

From page 3

The premier tried Tuesday to brush the matter aside.

"That's a small incident and it's not worth mentioning," he said with a slightly embarrassed smile at a news conference. Li holds a news conference for foreign and Chinese reporters once a year, after the closing of the legislature's two-week session.

"It comes as no surprise that some individuals oppose the current policies of the Communist Party and the government," he added. "I don't think that the people who wrote the poem could represent the will of the general public."

He said he expected to finish serving his five-year term, which ends in 1993.

But China's State Security Ministry has taken the poem very seriously. Sources said

Tuesday the ministry sent a team to the People's Daily, the Communist Party newspaper, which published the poem March 20 in its overseas edition.

The team has failed to track down the author, but has decided that People's Daily editors were merely negligent in publishing the poem and did not know about its hidden message, the sources said.

The sources, who work at the People's Daily, spoke on condition of anonymity.

The poem, written in a florid style, ostensibly is about the coming of spring.

But readers noticed that the words "Li Peng, step down, assuage the people's anger" ran diagonally through the poem from top right to bottom left. The words could not have been juxtaposed by coincidence.

The poem's final line also is regarded as having political sig-

nificance: "Wait, sacred land, spring is everywhere." Many Chinese refer to the crushed 1989 democracy movement as the "Beijing spring."

Although relatively few ordinary Chinese subscribe to the overseas People's Daily, news of the poem spread rapidly through Beijing by word of mouth. Many Chinese said they and co-workers rushed to reading rooms at their workplaces to find the paper and copy the poem. Copies passed from hand to hand.

The sources at the People's Daily said authorities attempted, too late, to recall the edition. They said the paper's director, Gao Di, was away at the time the edition was published.

Investigators from the State Security Ministry broke into the desk of the editor who handled the poem, looking for information on how it was received and who approved it, the sources

said.

The poem was signed Zhu Haihong, who was identified in the paper as a Chinese student in the United States. The investigators determined it was a pen name.

The State Education Commission regularly solicits essays and poems from Chinese students abroad and submits them to newspapers for publication.

THE NAVY
NUCLEAR TEAM

Get your start in nuclear power where nuclear power got started. In the U.S. Navy. The Navy operates more than half of all the nuclear reactors in the United States. Being on the Navy Nuclear Team puts you in an elite group.

If you qualify, you can start in the Navy Nuclear Propulsion Officer Candidate Program and earn up to \$30,000 before you graduate. The Navy will pay you as much as \$1,100 a month plus bonuses.

To qualify you must meet these requirements:

- Have completed sophomore year, majoring in engineering, chemistry, science or math, with a minimum 3.0 GPA.
- Have completed a mathematics sequence through integral calculus, and one year of calculus-based physics.
- Meet the Navy's physical standards.
- Be no more than 26 1/2 years old at the time of commissioning, and a United States citizen.

Teachers from near and far learn ABCs of agriculture at Cal Poly

■ Agricultural education department works to promote the profession.

By Lori Cheeseman
 Staff Writer

Cal Poly's agricultural education department is promoting its profession by educating teachers from near and far about agriculture.

The department is involved in two federally-funded projects that prepare California high school and community college teachers for jobs in agricultural education.

The projects provide technical and professional training through workshops, seminars and conferences that apply Cal Poly's philosophy of hands-on learning.

Another project, sponsored by the California Department of Education, provides resources for an agricultural education consultant.

The consultant, Paul Stark, is based on campus and provides technical assistance to high school vocational agriculture programs between Los Angeles and San Jose.

Glen Casey, agricultural education department head and program director, said, "We take new knowledge and new methods directly out to the agriculture teachers."

"It's like an outreach program for the dissemination of new technology," he said.

Another program, an undergraduate teacher training program sponsored by the U.S. Agency for International Development, is designed to educate Nigerian teachers about agriculture.

Folu Otunuga is a high school teacher from Nigeria who has spent the last two years learning about agriculture at Cal Poly. He is part of the third group of teachers that have come from Nigeria to participate in the

JON ROGERS/Mustang Daily

Glen Casey is the agricultural education department head and oversees Poly's programs that teach teachers about agriculture.

program. Otunuga and three other teachers from Nigeria have received basic teacher training at Cal Poly as well as farming experience from an internship at Swanton Ranch, located near Santa Cruz.

Otunuga, who is specializing in agricultural business, believes his training at Cal Poly will help him serve as a role model for teachers in his country. He said that the agriculture industry in Nigeria is not as technical as America's agriculture.

"I want to change things," Otunuga said. "I hope to go beyond teaching when I go back to Nigeria and become a policy maker (for education)."

After his graduation in June, Otunuga will return to Nigeria

with Cal Poly's hands-on experience.

He said he would like to see Nigerian teachers offer office hours and spend more time with their students one-on-one.

"I believe the interaction between student and teacher is the essence of education here," Otunuga said.

Otunuga is also planning on introducing a program similar to Future Farmers of America that would promote leadership and agriculture among the youth of his country.

"I got more than I ever expected from Cal Poly," Otunuga said. "I am looking forward to going home and improving my country."

Casey said projects such as
 See AG ED, page 10

NATION

From page 3
 chapter of Queer Nation, a militant gay-rights group located in several major U.S. cities, showed up at church headquarters downtown to personally sever ties with the faith.

Another 20 people sent letters to that effect, but church policies required notarized statements and some identification, said Nancy Perez, a member of QUTAH and one of those seeking excommunication.

A member of the church's Membership Department greeted the group and explained the requirements for being taken off the rolls of The Church of Jesus Christ of Latter-day Saints were changed in 1989.

"The usual method is that you write a letter to your bishop and

document why it is you don't want to be in the LDS Church," Perez said.

"The new system is really abbreviated. We write a letter to the Membership Department explaining why we wish to be excommunicated. At that point the information will be forwarded to our local bishop, who will take care of it. We don't have to go in person.

"About a month later, you'll get a letter back saying you have been officially deleted from the rolls of the Mormon Church and that it's as though the rites have never happened. It also will detail what obligations you have and no longer have," she said.

Those who showed up in person had their documents accepted, she said.

Perez said the meeting was cordial, but in some instances members of her group with grievances tried to discuss their differences with the church officials.

"There are a lot of people who have some very, very strong feelings. It was an emotional moment for them, especially those members who are culturally LDS," she said.

The church official told them the faith accepts homosexuals and that a gay member can hold good standing in the church. But he said like heterosexuals, gays must follow the church's call for celibacy out of marriage.

Since gays cannot marry in the church, Perez said, they cannot hope to express their sexuality in it.

STATE

From page 3
 provide the information the city needs to begin its own enforcement.

"We went to (the county) and asked them how many outstanding tickets there were for San Jose ... and they couldn't tell us," Silva said.

But based on estimates obtained from the county's microfiche records, there are more than \$58 million worth of unpaid traffic tickets in San Jose alone, Silva said. The city's cut would be \$17 million, although Silva conceded it would be impossible to collect the full

amount. The county and state also get a percentage of every fine paid.

Currently, county courts collect fees for unpaid traffic tickets. The county suggested in its audit that minor computer changes could give city officials a list of major traffic scofflaws broken down by area to help police track them down.

Vehicle registration holds are done for those who have outstanding parking tickets, but it's harder to catch those who have outstanding traffic tickets, Silva said.

Those who don't pay traffic

tickets are sent a notice, but the addresses on people's licenses aren't always valid, he said.

If tickets aren't paid, the Department of Motor Vehicles is notified and issues a hold on the driver's renewal license. But drivers often continue to drive with the old license once they learn they'd have to pay up to renew, Silva said.

And, he said, when arrest warrants are issued for violators, police often don't enforce them. If someone gets another ticket, the outstanding ones aren't heard in court at the same time.

CHANCELLOR FORUM

From page 1

perience the budget decrease include CSU libraries, which will have a limited number of new books to offer, and student services. "There might be larger and fewer classes, as well as a smaller number of courses in the future," McCune said. "Our system will be affected in both big and little ways."

Despite these difficulties, McCune believes it is possible for the CSU system to be a model for other universities across the country. "In the future, I see the CSU system as the finest undergrad system in the country," he said.

In order to do this, however, McCune said new ways to develop and allocate the budget need to be put together.

"Previously, we went by formulas to determine budget numbers," McCune said. "But the state has been unable to fund these formulas for six years now. Since the system is deteriorating, we need to try to adjust and relocate money," he said.

McCune recommended re-examining the budget as a whole, and looking at how budgets have been handled over the last several years.

"The CSU system will continue to have problems until the state system solves its problems," McCune said. "If this doesn't happen, the richness of our current program will be decreased."

HAVERIM

From page 1
religion."

A card, with the quotation "For the dead and the living we must bear no one forgets" was displayed at the event.

Susy Heiman, a human development junior, said, "Many people want to forget what happened in the past. We want to show everyone that we will never forget."

Lieber, a landscape architecture sophomore, said the Holocaust changed world views of Jews. Before World War II, anti-Semitism was very common, he said, but people's attitudes toward Jews changed after the war.

"Unfortunately the cost was a devastating one," Lieber said.

In conjunction with the week's activities, this year photos and paintings depicting the tragedy were added to provide education to students. "U.U. week has given a better opportunity to get the word across," Lieber said.

The mood was serious as names were read and students examined the tragic photos. One photo caption read, "Forgetfulness leads to exile, while remembrance is the secret of redemption."

Paintings were loaned by local artist Don Klopfer. The art depicted decomposing bodies stacked one on top of each other. Klopfer, a World War II veteran, was inspired to create the art because of his remembrance of cruelty.

"I remember how inhumane it was and automatically wanted to express my feelings," Klopfer said.

From page 1

studies program at Cal Poly, an undergraduate ethnic studies course requirement and an ethnically diverse faculty.

The second issue was the education of the white student community on minority issues.

"Education did not happen by chance, but it happened by design," said panelist David Sanchez, an ethnic studies associate professor who teaches Racism in American Culture.

Sanchez stressed that every student should be exposed to ethnic minority issues.

"Every department must be an ethnic studies department,"

he said.

Robert F. Gish, a visiting scholar, agreed. Gish is a consultant who is working on a recommendation for a "cultural pluralism requirement" for undergraduates at Cal Poly.

One course objective under Gish's recommendation would help students appreciate differing cultural values and assumptions.

Despite the panel's general consensus, Coleman cautioned the panel about misinterpretations surrounding the term "cultural pluralism."

"Campus is comfortable with cultural pluralism," she said.

Coleman said students often think that the term "cultural pluralism" implies learning about all cultures instead of the four dominant ethnic minority groups.

About an hour into the forum, one black student shouted that efforts should not be wasted on those who are not sensitive to ethnic minority issues.

Affirmative Action Director and panelist Anna McDonald confronted the student's comment.

"We have to make the environment supportive for ethnic minorities," she said.

McDonald said the vehicle for

her goal is education and exposure of ethnic minorities issues.

The forum was timely, considering ASI will vote on a resolution at its meeting tonight that, if accepted, would establish an ethnic studies department "in a most expeditious manner."

This is the first year that the four-member ASI Ethnic Relations Committee has been in existence.

Committee member Adriana Mutolo said that anyone wishing to participate in the committee should contact the committee's coordinator, ASI Ethnic Relations Chair Monet Parham.

OFFICE WITH A VIEW

The Peace Corps is an exhilarating two year experience that will last a lifetime.

Working at a professional level that ordinarily might take years of apprenticeship back home, volunteers find the career growth they're looking for and enjoy a unique experience in the developing world.

International firms and government agencies value the skills and knowledge mastered during Peace Corps service.

AG ED

From page 8
this one will continue after June.

In the meantime, the department is expecting a California Department of Education contract of \$410,000 that will fund four other projects through September.

These other projects include holding three-day agricultural education institutes for schoolteachers and conducting high school and community college

curriculum-planning projects that will be subcontracted to UC Davis.

The contract will also fund the continuing pre-service program, which provides training for new teachers.

It will also pay for the continuing in-service program, which provides training for teachers already in the field.

"We hope to keep the agriculture teachers (we teach) on the cutting edge," Casey said.

GWR test given to Poly students

The final opportunity before June graduation to meet the Graduating Writing Requirement by passing the Writing Proficiency Examination will be on Saturday, April 20.

The Writing Proficiency Examination will not be offered summer quarter, and the next testing is scheduled for October.

Deadline for sign-ups for the April 20 examination is Friday, April 12 at the Cashier's Office. A \$15 fee is required.

The Writing Skills Program will offer workshops on the evenings of April 10, 11, 15, 16, 17 and 18 to help students prepare for the writing exam. The free workshop will be held in the University Writing Lab in room 138 of the Agriculture Building from 7 to 9 p.m.

The graduation requirement must be met before bachelor's and master's degrees are conferred. All students who have earned more than 90 units are eligible to take the examination.

Students who plan to graduate in June and who have

not yet met the Graduation Writing Requirement should take this test. Students who have not yet met the requirement are allowed to go through graduation ceremonies, but the diploma is withheld until the requirement is fulfilled.

Investors club holds meeting

Financial Education Clubs Inc., a nonprofit corporation, is pleased to announce the April meeting of the Morro Bay Chapter of the Women's Investor's Club.

April's meeting topic is how to start a "mock investment portfolio." As part of the meeting, the Morro Bay Chapter will be making investments of \$100,000 worth of play money to see if their investment strategies will be profitable. Come join the fun. All are invited to bring a guest.

The meeting will be held at the Morro Bay Library, which is located at 625 Harbor in Morro Bay.

The meeting is today and it will last from 2:30 p.m. until 4:30 p.m.

For more information about local meeting information and times, please contact Financial Education Clubs, Inc. at 528-7352.

SLO church holds religious course

Celebrate the resurrection life in the Byzantine tradition on April 27 with the monks of Mt. Tabor Monastery. Father Michael and fellow monks will explain Byzantine tradition of prayer and liturgy. Participants will have the opportunity to participate in a Byzantine Rite Liturgy which differs widely with the familiar Roman Rite Mass. The beauty of the music and the richness of the symbolism in the Eastern Ritual will bless all who attend.

The session will be held at Nativity of Our Lady Church located at 221 Daly Ave. in San Luis Obispo from 10 a.m. to 4 p.m. A \$10 donation is requested at the door. Bring a sack lunch or eat out. Drinks will be provided. In the interest of ecology, please bring a cup or mug.

For further information, call 528-6104.

Thought For Food

It's about time.
Healthy food in a hurry.
KONA CAFE has come up with a new idea that is really innovative - a KONA CANOE. This health conscious meal is prepared right before your eyes! Delicious, fast, and hot; you get more than you can eat for only three dollars!

Picture this...
Nine freshly chopped vegetables, turkey, ham, two eggs, and cheese steamed to mouth-watering perfection in a twelve-inch pita! Each meal is prepared individually to your liking in a special pan that cooks with steam, so no oils or fat are added to your food.

We've invented it; now it's your chance to savor it! And the only place in the world to try one is at KONA CAFE! It is served from 7am - 11:30am, and then from 2pm - 10pm!

Plan a canoe trip to KONA's today!

KONA CAFE is conveniently located near campus at 977 Foothill, SLO (between Burger King and Kinko's). Give them a call ahead of time for group or party orders at 546-0369.

Fast food with a difference - healthy, plentiful, and inexpensive!

Remembering the past...

Chris McKim (left), a graphic communication senior and Walter Salame, a physics graduate student, play songs in the U.U. Plaza as part of a memorial for the victims of the Holocaust.

NEIGHBOR

From page 1
Sweep," a united effort with downtown merchants. Other projects include constructing compost bins with ECOSLO, maintenance and cleaning of the Santa Rosa Street divider, Reservoir Creek Road clean up, Laguna Lake clean up and assisting at the homeless shelter.

In years past, the day has focused on small projects to help the elderly and disabled. This year these projects are only a part of the total effort.

"Our purpose this year is to provide something lasting for the community," Kapic said.

The City of San Luis Obispo, San Luis Obispo County and Kiwanis Club are some of the organizations committing themselves to the event.

Good Neighbor Day in the past has had support from Cal Poly fraternities and sororities, as well as campus clubs and dorm residents.

Alpha Gamma Rho President Mike Gomes said, "Good Neighbor Day is a great opportunity for campus organizations to improve their relations with the

community."

Gomes said Good Neighbor Day sheds a different light on the greek system as far as the community is concerned. "Greeks are usually the 'bad guy,' but in this instance we come out like a hero," Gomes said.

ASI is also providing a barbecue at 4 p.m. open to all event participants.

Good Neighbor Day has had increased popularity each year and ASI organizers hope that — with the additions incorporated in this year's event — students interested in community service and improved relations will attend.

Good Neighbor Day is the last event of ASI Week. The goal of the week is to promote involvement and pride in ASI. The theme of the week is "All Roads Lead to the Union." Organizers hope to promote cultural awareness throughout the week.

Today's theme is "It's Your Union Day."

For information to participate in Good Neighbor Day, call the ASI Executive Office at 756-1291.
