## TAKE A TOUR

By Mark Armstrong  
Daily Managing Editor

Chair of the Central Coast Performing Arts Center Commission Warren Sinsheimer stood in the lobby waiting to begin his umpteenth guided tour of the new center.

But this is not just any lobby, he is quick to point out, but the only actual "lobby" of an arts complex in San Luis Obispo. It's a minor detail and possibly even a frill for most people, but Sinsheimer highlighted this and many other details as he showed off the community's new baby to the world Friday.

Important-looking people all around the building hustled to prepare for the opening night just eight hours away. They stacked programs, set up tables and ran around looking busy.

Sinsheimer looked pleased. Pleased, that is, except for that noise. He asked around a little bit to find out what exactly was causing the shrill, annoying tweet that squealed for the next 45 minutes.

"I don't know what that's supposed to be," Sinsheimer said. His only guess was a fire alarm. "It's a

Actors, actresses, musicians and patrons alike will be able take a posh potty break during intermissions of their favorite performances in restrooms like these found in the Performing Arts Center. / Daily photo by Joe Johnston

false alarm, we know."

Sinsheimer has been an integral part of bringing the Performing Arts Center (PAC) to life, and it was only fitting he give tours of the complex. He has been involved with the Foundation for

the Performing Arts Center since it was established in 1986.

The idea to build a new arts complex has been a part of the Cal Poly master plan since 1962,

## Activism week begins today with mayoral, city council candidate forum

By Rachel Brady  
Daily Staff Writer

Today marks the beginning of political activism week, a series of ASI-sponsored political forums, a hearing on Proposition 209 and voter registration opportunities.

Gail Batac, ASI executive staff member, said these events will inform students about issues which will affect them.

"Cal Poly has never had an event like this before," Batac said. "I wanted to see something to make (students) wake up to the types of issues that they will be voting on."

Batac said that students need to know about the controversial Proposition 209 which, if passed, would end affirmative action. She also said the forums will help students know more about candidates for city, county, state and federal positions.

Batac added that the events will be totally nonpartisan in

order to include as many people as they can.

Different forums will be held from 11 a.m. to noon in University Union Plaza on Monday, Tuesday and Wednesday.

Today's forum will include the two San Luis Obispo mayoral candidates and the four candidates for city council.

Mayoral incumbent and Poly political science professor Allen Settle said all forums will help students make educated choices when they go to cast their ballots in November.

"This is the year of the big ballot," Settle said. "I think that (these forums) will stimulate students to look into the issues."

On Tuesday, the forum will include members of the State Assembly and Superior Court judges. Wednesday's forum will focus on candidates for the county's Board of Supervisors.

The conclusion to political activism week will be a Congressional forum and a hearing on Proposition 209 on Thursday in Chumash Auditorium from 6 p.m. to 9 p.m.

Congressional candidates or representatives will be speaking

## Wrestler stabbed at Thursday frat party

By Stacey L. Johnston  
Daily Staff Writer

A Cal Poly wrestler was stabbed at a Phi Kappa Psi party Thursday night.

During an outbreak of fights, Tyson Rondeau, 22, was stabbed twice in his upper right leg while at the fraternity located at 1439 Phillips Lane, said Detective Steve Tolley of the San Luis Obispo Police Department.

Tolley said there are some possible descriptions of Rondeau's attacker, but no suspects. He received some potential leads on Friday, but no charges have been filed.

Rondeau, the police and the president of Phi Kappa Psi, Dave Vieler, said they do not know why the argument that lead to the stabbing started.

Rondeau said he became involved when he saw his friends arguing.

"I went to stop the fight or help my friends," Rondeau said. "Somehow I just got caught in the middle."

Vieler said the stabbing was "a random occurrence," and that the party, which was originally intended for members and their friends only, "escalated beyond our control."

"None of the (Phi Kappa Psi)

brothers were involved— except to try to break things up," the biology senior said.

Twice at past parties, Rondeau had been asked to leave the Phi Kappa Psi house because he was being "rowdy," Vieler said.

Rondeau denied having been asked to leave.

"That is not true," said Rondeau. "The fraternity is going to say anything they have to so they don't get in trouble."

Rondeau had not been invited to the party which began Thursday afternoon with a barbecue, Vieler said.

According to Rondeau, an industrial technology senior, he arrived at the fraternity at about 8:30 p.m. He said he "had a couple beers" and was "having a good night."

At about 10:40 p.m. a fight broke out on the back deck of the fraternity house, police said.

"I was trying to break up the initial pushing and shoving and someone from behind hit me (in the jaw)," said Vieler, whose injury will require jaw surgery.

Rondeau said he was trying to help his friends who were involved in the argument, which turned into a brawl.

Michael French, a social sci-

# New biotech center first of its kind

By Jessica Yamada  
Daily Staff Writer

What do deer dung, soil and milk all have in common?

They are all part of ground-breaking research at the new environmental biotechnology institute at Cal Poly, the first of its kind in the California State University System.

Seven Cal Poly faculty members founded the institute, designed to involve students in research, during the summer.

Through the institute, professors and students from the environmental engineering, agricultural engineering, soil sciences and chemistry departments, will be working together to explore various approaches to problem-solving through the use of microorganisms.

Microbiology professor Raul Cano is heading the institute's studies of microorganisms and expects that the innovative biotechnological research will aid developmental measures to clean up environmental pollution.

Biotechnology has been used to measure the well-being of ecosystems, transform pollutants into harmless by-products, generate biodegradable materials from renewable sources and develop environmentally safe manufacturing and disposal processes.

"The more recent environmental biotechnology is more efficient and cost effective," Cano said.

He described the process as the use of microorganisms to break down pollutants into harmless substances such as water and carbon dioxide.

Cano said that although the institute deals with environmental problems, its main focus is on research and development.

"Our mission is not to go out and clean the environment, but to develop new methods so others can go out and apply them," Cano said.

According to Christopher Kitts, microbiology professor who helped start the institute, biotechnology such as composting, has been around for years, however not much is known about it.

"Eventually, we hope to be directly solving pol-

lution problems in the areas, such as an oil spill at a local beach or contaminated areas at Fort Ord," Kitts said.

However, Kitts said their first hurdle is securing funds for the program.

According to Cano, the institute was put together with undergraduate research in mind.

He said students will be active in all aspects of the research and activities.

[www.idn.calpoly.edu/ecb](http://www.idn.calpoly.edu/ecb)

**Free one-year Apple warranty.**

Offer expires October 11, 1996. No payment of interest or principal will be required for 90 days. Interest accruing during this 90-day period will be added to the principal and will bear interest, which will be included in the repayment schedule. For example, the month of May 1996 had an interest rate of 12.15% and an Annual Percentage Rate (APR) of 13.93%. A monthly payment of \$83.11 for the Power Mac 8500 system is an estimate based on a total loan amount of \$4,840.43, which includes a sample purchase price of \$4,467 and a 6% loan origination fee. Interest is variable based on the Prime Rate as reported on the 5th business day of the month in The Wall Street Journal, plus a spread of 3.5%. Monthly payment and APR shown assumes deferment of principal and does not include state or local sales tax. The Apple Computer Loan has an 8-year loan term with no prepayment penalty and is subject to credit approval. Monthly payments may vary depending on actual computer system prices, total loan amounts, state and local sales taxes and a change in the monthly variable interest rate. © 1996 Apple Computer, Inc. ## COLUMN

### Step right up, take the maturity quiz

By Dawn Pillsbury

It has come to my attention that many people at this institution are mature adults. I say this despite the WOWies who are infesting San Luis Obispo. They are a throwback and soon they'll settle down and be mildly disturbed that gum impregnated with their saliva adorns the walls of Bubble Gum Alley.

It all happens so quickly. One day you're a perfectly normal kid, getting into minor trouble with local law enforcement, giving your parents premature wrinkles and staying up all night doing strange things like listening to Blue Oyster Cult and drinking that bottle of orange liqueur you found in the pantry. And suddenly you wake up and you are a grown up. You own at least one business suit. You worry about dietary fiber and the depletion of the ozone layer, while just yesterday you were eating Hostess Snowballs and chasing after insects with a little bottle of aerosol hairspray. What happened?

While how it happened is a question for those with far more spare time than I, such as human development majors, I can help you determine how far this affliction has gotten in your case:

**1. When you come across a sprinkler watering a lawn, you:**

- a) Carefully circumnavigate the water, making a mental note to call maintenance and tell them it is sounder ecological practice to irrigate at night.
- b) If the weather is hot, allow the water to hit a lightly-clad limb.
- c) Throw up your arms and run shrieking through.
- d) Repeat c until you fall on your butt then make mud pies to fling at passersby.

**2. You clean your room:**

- a) Twice a week and as needed.
- b) Every couple weeks.
- c) Before the Health and Safety Inspector or your mom visits.
- d) Before a newly-evolved life form lashes a tentacle out from under your bed, looking for nourishment other than old socks.

**3. You know you will graduate:**

- a) In one year and three quarters, plus or minus one quarter depending on class availability and senior project status.
- b) In a year and a half, or near enough.
- c) Before your money runs out.
- d) When your adviser, whoever he/she is, tells you when and where the ceremony will be.

**4. Your computer is:**

- a) A Cray.
- b) Mostly loaded with word processing, spread sheets and other useful programs.
- c) Great fun. All sorts of games and access to MUDDing and such.
- d) Under a pile of clothes.

**5. Costumes are:**

- a) A children's diversion.
- b) Fine for theme parties.
- c) Wonderful. Halloween should be more than just once a year.
- d) A major component of your wardrobe. And you're not a theater major.

Give yourself one point for every **a**, two for every **b** and so on.

**5-8 points:** First, check your pulse. Are you sure you're alive? This maturity thing has gotten far with you. Consider a career in accounting. No treatment will restore your youth.

**9-12 points:** You're fairly mature. But don't despair, you can be cured. Throw away your oat bran and non-fat milk and start your mornings with Pee Wee Herman's Playhouse and some sugar-laden mockery of a breakfast cereal. Listen to silly music, like Anthrax's "State of Euphoria" or anything by Weird Al.

**13-16:** You've managed to keep your youth well. Be wary of signs of maturity, such as an interest in golf, politics or getting a corner office with huge windows.

**17-20:** What are you doing Saturday? I know some great sprinklers.

*Dawn Pillsbury is a journalism senior and knew she was in trouble when she found she had bought a bottle of prune juice ("A warrior's drink!" says Worf).*

## COMMENTARY

### Who do you love?

By Justine Frederiksen

I recently asked my best friend Mechele why she married her husband Michael. She took a long time in answering. Finally, she said there were several reasons.

First, she said she loved him and wanted to spend the rest of her life with him. Second, she said the financial benefits and official status of being legally joined were convenient. But lastly, and most importantly, she said she married Michael because she wanted to show her family, her friends and the rest of the world how important he was to her. It was a way to say, "We are together, we love each other and we are a couple."

I believe that is the reason why most people get married and why there is even such a thing as a wedding ceremony. I also believe that marriage and the wedding ceremony should not be exclusively the privilege of heterosexual couples, but that homosexual couples should be allowed to marry.

However, our government does not agree. This month, the Defense of Marriage Act passed Congress and the last I heard Clinton was expected to sign it into law. It defines marriage solely as a union between one man and one woman. Individual states, such as Hawaii, may define it otherwise, but the federal government will recognize no other marriage and deny Social Security, Medicare and other benefits to any other couple.

I do not agree with the passage of this act; I do not understand the reasoning behind it. I can understand that a lot of animosity toward homosexuals exists and that this stems mostly from fear, but I do not share that fear. I am not afraid of homosexuals; they do not threaten my sexuality and I do not think they are depraved.

On the contrary, I believe that homosexuality is a naturally-occurring human characteristic. Lesbians and gay men have been a part of the human experience for as long as there have been humans and they will continue to be. They will continue to contribute to society in each and every way, and yes, pay their taxes like everyone else. The

only difference between being a heterosexual and being a homosexual is who you have sex with.

Personally, I do not care who others want to have sex with, how they have sex, where they have sex or when they have sex. As long as my neighbor is not sleeping with me, my husband, my child or my cat, I really don't care who he sleeps with. And, as long as his sex acts do not involve him — or anyone or anything else — being on my lawn, I really do not care what he does.

I do not think the government should care, either. I do not think the government should automatically exclude all homosexuals from the joys and benefits of legal couplehood. Two consenting adults that are not blood-related or otherwise family members should be allowed to marry, or at least not excluded across the board because of their sexuality.

This is not to say that everyone should marry, only that homosexuality does not mean that you cannot agree to love, honor and respect another human being. It does not mean that you cannot build your life and home around another person and have your neighbors and your government respect your union.

That is what it boils down to — respect. I respect all human beings' rights to live their lives as they chose. I may not chose it for myself, but it is not my life. But if I wanted to marry another woman and share my life with her, I would expect my government to respect that.

In this country, I already have the constitutionally-protected rights to freely speak, congregate and practice religion. But I assert that there are far more important freedoms — like who I love, who I have sex with, when I give birth, and who I marry. The government, my neighbor and anyone else simply has no say in the matter. Period.

## Clinton calls Mideast summit to cool down 'Out of control' tensions

By Barry Schweid  
Associated Press

WASHINGTON — Gambling that he can defuse tensions and revitalize moribund peace talks, President Clinton is bringing feuding Israeli and Palestinians leaders to the White House for up to two days of talks after they flatly refused to meet on their own in the Middle East.

Clinton will participate directly in the sessions beginning Tuesday between Israeli Prime Minister Benjamin Netanyahu and Palestinian leader Yasser Arafat. He will meet both with them individually and together, senior administration officials said Sunday.

King Hussein of Jordan is joining the summit while Egyptian President Hosni Mubarak is weighing the president's invitation to come here, as well. Hussein has proposed appointing a commission of inquiry to delve into disputes surrounding the Temple Mount in Jerusalem, with its Muslim and Jewish holy sites.

Netanyahu's unilateral decision last Tuesday to open a second entrance to a tunnel for tourists ignited a Palestinian uprising that led to exchanges between Israeli troops and Palestinian

police and exacted scores of casualties.

Then, despite a flurry of telephone calls from Secretary of State Warren Christopher and other senior U.S. officials, Netanyahu and Arafat could not agree on terms for a meeting that was supposed to be held Saturday night or Sunday at a border crossing between Israel and Gaza.

The Washington talks are to be held at the White House and also Blair House, the presidential guest house across Pennsylvania Avenue.

A senior U.S. official, speaking on condition of anonymity, acknowledged Clinton was taking a political risk in intervening in a volatile dispute just five weeks before the presidential election. But, the official said, "the consequences of a breakdown in the peace process were evident."

"The President made the decision after weighing the risks of inaction against other risks," the official said. "And, basically, the two leaders wanted to get into negotiations even though they differed on how to get there."

Netanyahu's tough stand — the entrance was reopened after a temporary closing for the Muslim and Jewish Sabbaths — could put Clinton in a position of having to

## TOUR: The PAC has more women's bathrooms than any other performance facility in the state

From page 1

Sinsheimer said, as he led a group of reporters through the maze of stairs and doorways, with a new-car smell permeating the entire building.

"This building can be a bit of a labyrinth at times," he said, yet he led the tour as if he had been living in the place for the past year.

Sinsheimer knows every inch of the center, and every inch has been completely thought out, starting with the bathrooms.

"(The PAC) contains more women's restrooms than any other performance facility in the state," Sinsheimer said proudly. This will eliminate the ever-present lines flowing out the door.

Sinsheimer admitted not everything originally planned for the center made it past the budget axe.

Take the bathrooms once again. Those little infrared, flush-it-for-you devices were cut from the plans in favor of the old-fashioned, cost-efficient handles. The savings? Sinsheimer said that revision alone saved \$85,000.

"It's not water-efficient," Sinsheimer said, "but when we were balancing out all the other things that could've been cut, it made a lot of sense."

Sinsheimer said the new building is by no means an extravagant example of excess.

"This building is nevertheless what I'd call spare," Sinsheimer said. "The main focus of this building is to provide for the performers and the audience. Where

we've had to trim, we've trimmed in finishes."

The acoustic capabilities built into the new center were definitely not stripped bare.

The building is cut into pieces, allowing the center to hold events in two separate sections on the same night. "Almost every room is a separate room acoustically," Sinsheimer said. "There's about four inches of airspace in the wall (separating the two performance chambers)."

The sound system for the complex will continue to remain the best for many years to come, Sinsheimer said, thanks to a gift of one million dollars worth of equipment from Harmon Industries, the makers of JBL sound systems.

"They took an interest in this facility," Sinsheimer said. "JBL agreed to donate (the gift) and use this as a designated test site."

Sinsheimer said the move by Harmon Industries will allow Cal Poly engineering students to have the chance to see some of the best sound equipment — and on their own campus.

Entrances to the main hall from the lobby resembled some sort of space airlock. No one could get through to the concert hall without first going through two doors. After walking through the second door, the voices could finally be heard loud and clear from the back end of the 1,350-seat hall.

It was all in French, however, as members of the Canadian Circus Eloize were busy getting the stage and lighting prepared

for their performance on the Carnegie Hall Jazz Ensemble are also going quickly.

Standing in the dark as the troupe fiddled with purple and green stage spotlights, Sinsheimer looked over to the walls of the concert hall.

"There is no accidental surface in this room," he said. "The walls actually tilt inward. Everything is designed to reflect sound back in a particular way."

The acoustics, along with the dressing rooms, the stage, and the overall comfort of the new complex, Sinsheimer said, will attract artists in droves.

"It had people in a rave," Sinsheimer said, referring to a summer test-spin of the center by various artists. "We'll have artists asking if they can play here."

Sinsheimer is expecting a packed season of events at the center, and if initial ticket sales are any clue, it will be a very prosperous one as well.

Over in the PAC's new administration offices, ticketing services manager Terri Hopson said tickets are selling fast. She said the two opening nights were sold out along with country singer Chris LeDoux's upcoming performance on Saturday.

Hopson said upcoming performances from Capitol Steps and

Warren Sinsheimer knows every inch of the PAC. / Daily photo by Joe Johnston

## Jackson stumps against Prop 209

By Dara Akiko Tom  
Associated Press

LOS ANGELES — Invoking memories of the 1960s civil rights freedom rides, the Rev. Jesse Jackson and NOW President Patricia Ireland on Sunday began a two-week bus tour campaign to oppose Proposition 209.

"California must be to the equal opportunity movement in 1996 what Birmingham was to the public accommodations struggle in '64 and Selma was in '65 to the voting rights movement," Jackson said.

Californians will vote in November on Proposition 209, which would prohibit racial or gender preferences in public hiring and education.

Supporters of the measure say it is intended to eliminate all forms of discrimination while opponents say it will abolish affirmative action.

"Affirmative action is a conservative remedy to open up closed doors and to make this a one, big-tent America. The fact is, it's working. It's working for the majority of citizens," Jackson

# Clinton prepares to cram for debates, but business first

By Terence Hunt  
Associated Press

WASHINGTON — A three-day escape from White House pressures and a three-ringed binder crammed with notes are key ingredients in President Clinton's preparations for Sunday's leadoff debate with Bob Dole.

Already, though, Clinton's plans have been thrown off by the worst violence between Palestinians and Israelis since the 1967 Mideast war.

The president was to have had a light schedule this week, with

Sunday and Monday off, to allow time for debate study. That changed, though, when Clinton invited Mideast leaders to an emergency White House meeting on Tuesday to try to restore peace.

"The president has to order his priorities as he sees fit and this is his priority, right now," presidential spokesman Mike McCurry said.

Even so, Clinton is expected to go into seclusion Thursday through Saturday at the Lake Chautauqua Institute in New York to cram and practice for the first 90-minute debate, beginning

at 9 p.m. EDT in Hartford, Conn., on Sunday, according to his campaign.

"It's important to get his head into this and that he's not tired," a senior adviser said. "It's important that we get him down."

After some last-minute squabbles over the debate format, an agreement was signed Saturday locking in the details of two presidential debates — Oct. 6 and Oct. 16 — and one vice presidential debate, Oct. 9.

Dole, the Republican nominee, already has spent several days this past week preparing at his

seaside condominium at Bal Harbour, Fla. His schedule calls for him to return there for three days this week for the final polish on what the campaign hopes will be a breakthrough debate performance.

"The debates are very important. It's the one opportunity that a lot of people have to listen to both candidates," Dole said Saturday.

Historically, debates have been important in some — but not all — elections. In 1960, they provided a defining advantage for John F. Kennedy over Richard M.

Nixon. In 1976, Gerald Ford's pardoning of Nixon and his debate gaffe about Soviet domination of Poland gave an edge to Jimmy Carter.

If nothing else, debates give candidates their largest television audiences of the campaign season, up to 100 million viewers, and help voters make closure about their choice for the White House.

"If you look over the elections of the last quarter century, voters have largely made their minds up

See CLINTON page 8

## MIDEAST: Clinton called the violence a shocking development

From page 5

apply pressure on the Israeli leader. That could irritate some of Israel's supporters among the American electorate.

On the other hand, Netanyahu may be ready to offer a concession, such as redeploying Israeli troops in the West Bank town of Hebron to keep them away from the Arab majority, and that could make Clinton look persuasive.

Even before the outbreak, Israeli-Palestinian negotiations that opened in May were making slow headway. Clinton has no expectation of solving the key issues, such as the future of Jerusalem, in the time allotted for the Washington talks, the official said. "But he wants to get them started," the official said.

Netanyahu, Arafat and King Hussein all are due to arrive here late Monday or early Tuesday.

"I think they're both concerned about the way events spun out of control, about the loss of life, the injury, the eruption of old tensions and bitterness," Clinton said Sunday of the Israeli and Palestinian leaders. "I believe they want to try to get beyond that. I don't think they would be coming here if they didn't."

Clinton spoke by telephone for about 10 minutes each Sunday afternoon with Arafat, Netanyahu, Mubarak and

Hussein. White House spokesman Mike McCurry said Clinton particularly wanted to thank Netanyahu and Arafat for accepting his invitation and to "encourage them to come to Washington in a frame of mind that allows progress to be made."

Palestinians were hoping that Mubarak would attend. "Egypt's role is important, and we don't like to think of being there without President Mubarak," Nabil Shaath, the Palestinian minister of planning, said on CBS' "Face the Nation."

Mubarak tentatively sent word of a scheduling conflict. But his foreign minister, Amr Moussa said Mubarak also is annoyed that the situation in Israel "reached that level of insensitivity to the Arab people and the Arab feelings."

"President Mubarak is definitely upset at the negative developments that have occurred and that the peace process, as it is, is really teetering. It is not in good shape at all," Moussa said on CBS.

Netanyahu, appearing on ABC's "This Week with David Brinkley" and "CNN's Late Edition," said he would not close the tunnel, a condition Arafat has said must be met before Palestinians would meet with Israeli leaders. The prime minis-

ter demanded an end to violence as a precursor to a meeting.

"I am prepared to negotiate the peace," Netanyahu said on ABC. "I think Chairman Arafat has to be prepared to shoulder his responsibility not to engage in violence and not to allow his armed police to shoot at Israeli soldiers."

Clinton called the violence a shocking development, considering the "giant steps toward peace" that the region has taken in recent years.

"There has been some progress towards ending the confrontation, but not enough," Clinton said. "It is our responsibility to do whatever we can to protect the peace process and move it forward. This is such a moment."

Chief Palestinian negotiator Saeb Erekat said Israel should close the tunnel. He said Netanyahu is "putting tanks in front of each village and refugee camp. It seems to me that he's calling for more violence."

But Eliahu Ben-Elissar, Israel's ambassador to the United States, said Arafat is using the tunnel issue as a screen to undermine the peace. "It's as if somebody was looking for some reason, for some excuse ... because somebody maybe still believes violence can be used as a political tool," he told NBC's "Meet the Press."

## STABBING: Police said party-goers were covered in their own blood

From page 1

ences sophomore and Cal Poly wrestler who came to the party with Rondeau, said he tried to help when the fight erupted.

"There were about four or five different fights going on at one time," French said. "I went over there to help Tyson — this guy was like three times the size of him."

French said he then began to fight the person who Rondeau had been fighting with. Just afterwards, someone stabbed Rondeau.

"All of a sudden I got a tingly feeling in my leg and I just grabbed it," said Rondeau. He said it felt like his leg "fell asleep."

Neither Rondeau nor French said they saw who stabbed him.

Zack Kardon, architectural engineering sophomore said he heard his friend Rondeau say he was stabbed and went to his aid.

"(Rondeau) said he couldn't walk; he couldn't feel his leg," said Kardon. "I took him through the house and by (the time we got to) the door (Rondeau) passed out."

According to Kardon, he carried Rondeau down the street until he could no longer carry him. He left Rondeau with some girls and ran to the California Highway Patrol building on California Street to get help.

Kardon found no one in the building and called 911 from a pay phone outside.

French said the girls flagged down a friend who happened to be driving by and he took Rondeau to French Hospital.

Rondeau said the next thing he knew he was in the hospital and they were cutting off his jeans.

"They took x-rays," Rondeau said. "The way the cuts were, the doctors said it had to be a knife."

Rondeau said he lost 33 percent of his blood.

"The patient (Rondeau) was observed overnight in our emergency department," said Deborah Nicklas, Director of Business Development at French Hospital. "He was discharged from the emergency department the next day in stable condition."

Meanwhile, about 10 police officers responded to Kardon's 911 call.

Tolley estimated that about 300 people were at the party and said that many had blood on them.

Police questioned several dozen people at the scene.

"Most of the people we talked to had been drinking," Tolley said.

Tolley will begin the follow-up investigation today. Phi Kappa Psi fraternity members will meet this morning with Assistant Director of Greek Affairs Walt Lambert to discuss the ramifications of the incident.

At this time, Rondeau is uncertain of exactly how the injury will affect his wrestling for which he has been training, but remains optimistic.

"It should all be fine in two weeks," Rondeau said.

Joe Dansby, Cal Poly's assistant wrestling coach, did not have enough information to predict how it would affect Rondeau's season.

Rondeau is a returning varsity senior on the team. He placed sixth in the PAC-10 in 1993 and fifth in 1994 and 1996. He was a three time Arizona state champion in high school.

## Environmentalists: pact protecting redwoods doesn't go far enough

By John Howard  
Associated Press

ARCATA — Some 400 environmentalists gathered in a chilly mist Sunday to denounce a cash-for-land pact aimed at protecting 7,500 acres of the last privately owned stand of virgin redwood forest.

"No deal! No deal!" protesters shouted.

Their major complaint is that the tentative agreement protects only part of the more than 60,000-acre forest and allows continued logging in the remainder.

They say it's a sweetheart deal for Texas financier Charles Hurwitz, whose Pacific Lumber Co. owns the land covered in the agreement and is one of several owners of the rest of the forest 300 miles north of San Francisco.

"This deal can best be described in three words: 'smoke and mirrors,'" said Daryl Cherney, who helped organize an anti-logging protest two weeks ago that resulted in more than 1,000 arrests, including singers Bonnie Raitt and Don Henley.

The agreement is "slimy, an unmitigated sellout," added Kurt Newman, one of the first outsiders to hike extensively through the Headwaters in the 1980s.

The \$380 million pact reached Friday between Hurwitz, the Clinton administration and state officials would turn 7,500 acres of Pacific Lumber land over to the public.

The land includes the 3,000-acre parcel on which Pacific Lumber had planned to begin salvage logging Monday. That's the

See REDWOODS page 9

## CLINTON: Dole not playing expectations game

From page 7

ical director Doug Sosnik said. "The debates tend to be the final event in most of these campaigns in which the voters make a final, last definitive decision about whom they're going to vote for. And their final choice tends to be the same choices they had made by Labor Day."

In 1992, Clinton went off the campaign trail, rested, studied and turned in a stronger performance than his main rival, George Bush.

In one debate, Bush was seen on television glancing at his watch, as if in a hurry to get it over with. In another debate, Bush gave a wooden answer when a woman asked about the impact of the national debt on the lives of average Americans. Clinton seized the moment to talk compassionately about voters' economic anxieties. He got off his debate stool, microphone in hand, to be closer with the audience — a

move that earned more debating points.

While insisting they are not taking the debates for granted, Clinton's team appears a little cocky. Spokesman McCurry sarcastically referred to the debates as "a very important encounter with the Titanic juggernaut of debaters" — the 73-year-old Dole.

On the other side, the Dole campaign seems to be trying to lower expectations for their candidate and even Dole himself has quipped that "Bill Clinton's gonna clean my clock, so if I show up we win."

"No, we're not playing the expectations game," Dole campaign manager Scott Reed insisted Sunday on CNN's "Inside Politics." But then he added, "We all know Bill Clinton's a great debater. He's capable of charming the birds out of the trees every day."

## Hearing starts on bombing suspects' severance motions

By Sandy Shore  
Associated Press

DENVER — Timothy McVeigh and Terry Nichols, who forged a friendship on a shared distrust of the government, return to court this week as enemies blaming each other for the Oklahoma City bombing.

McVeigh's attorneys argue Nichols was the primary figure behind the bombing that killed 168 people and that McVeigh ingenuously trusted him. Nichols' attorneys say McVeigh's "violent extremism" appalled Nichols.

They hope to convince a judge that they should be tried separately, arguing that jurors will be unable to distinguish between the evidence admitted against each man and fairly judge them individually.

The cases against Mr. McVeigh and Mr. Nichols differ dramatically in every relevant respect: the quantity and quality of the evidence against each, the degree of culpability for the crime demonstrated, and the character of each defendant for sentencing purposes," said Nichols' attorney, Michael Tigar.

Prosecutors will push for a joint trial at the hearing that begins Wednesday, arguing that most evidence will be used against both defendants and that jurors will be able to sort it out. They also believe a joint trial will be more economical and less traumatic for bombing survivors and victims' families.

U.S. District Judge Richard Matsch could proceed with a joint trial and instruct the jury to weigh the evidence individually, order separate trials, or seat two juries — one to hear evidence against each defendant.

The defendants face an uphill battle since few severance motions are granted and dual juries are rare, said David Kaplan, a criminal defense attorney and a former president of the Colorado Criminal Defense Bar.

Separate trials are "a fairly large inconvenience to the prosecution and to the court," Kaplan said.

However, he added, "Severance motions in these kinds of situations are not so unique that he won't take a strong look at it."

## REDWOODS: Logging on hold for 10 months

From page 8

removal of dead, dying and diseased timber that has already fallen.

In return for relinquishing the property, Hurwitz would receive \$250 million from the federal government and \$130 million from the state in cash, land or other assets.

The salvage logging is now on hold for at least 10 months awaiting Congressional and state legislative approval of the package. The protesters argue that wait

gives Hurwitz a chance to veto the deal.

"It's a very good deal," Hurwitz said after the deal was announced. "It shows we can preserve old trees and continue to log in an environmentally sound manner."

Protesters planned another rally Monday at Pacific Lumber's headquarters in Scotia, 30 miles to the south. They say they won't give up the fight to save the forest, which contains some trees 1,000 years old.

## BIOTECH

From page 2

working on microbial research that started out as her senior project.

"I'm excited about it because we're doing things that no one has done before," DeBord said.

DeBord said she hopes her experience will make her more employable after she graduates in December.

"I'm learning lots of skills that I couldn't have learned in a regular classroom or lab situation," DeBord said. "Now, a lot more students are wanting to get involved."

## Hewlett-Packard and Cal Poly... A winning partnership

Hewlett-Packard hired more than 60 grads from Cal Poly last year. We expect this year to be as good or better and we'd like to talk to you about the exciting opportunities we have at HP.

We are interviewing for December, March and June BS/BA and MS/MBA grads in the EE/EL, CPE, CSC, ME, IE and BUS/MIS fields for career positions throughout HP in the U.S.

### On Campus

October 23rd & 24th

## JACKSON: Is on an anti-Prop 209 tour bus

From page 6  
said.

Ireland, leader of the National Organization for Women, emphasized that Prop. 209 is not an issue of blacks against whites or women against men.

"It's a question of fairness and justice. It's a question of keeping those doors of opportunity open," she said.

Assemblywoman Marguerite Archie-Hudson said the nation's eyes were on California in anticipation of the outcome of Proposition 209.

"If we are not able to defeat 209 and send a message to the nation, we won't have a state that is fit to live in," she said.

The "Save the Dream" tour was scheduled to hold a rally in San Diego later Sunday and will continue traveling across California until Oct. 10. Stops include Humboldt State University, Santa Rosa, Sacramento, Oakland, Long Beach and Santa Monica. Other stops feature Ellie Smeal and Anita Hill.

On Sunday, the tour stopped at several Los Angeles area churches.

"When it's dark, we need each other," Jackson told the congregation at Mt. Moriah Baptist Church.

"When it's dark, it's not so much black and white as it is wrong and right. It's dark, y'all. ... When it is dark you begin to define your brothers and sisters by their behavior not their skin color."

Earlier, at the First AME Church in Pasadena, Jackson likened the potential effects of Proposition 209 to people living in a tent, protected from harsh weather while many others lived outside.

"Either you fight to get into the tent or you settle for living in the margins," he said. "It is our moral obligation to open up that tent."

Jackson also made his push to get people registered to vote. At each stop his staff distributed voter registration cards.

Gloria Moseid, 51, came to see Jackson because she was part of the 1960s protests in Birmingham, Ala., and the march on Washington and says there is still much work to be done.

"I went through segregation, integration. 209 leaves a question in my mind, how far have we really come?" Moseid said.

"We're back to the hate and bombings and killings," she said. "We're all going to have to get on our feet and pull together. We can't give up."

## ACTIVISM: Prop. 209 forum on Thursday

From page 1

and answering questions from the audience from 6 p.m. to 7:30 p.m.

More speakers and questions from the audience pertaining to Proposition 209 will follow from 7:30 p.m. to 9 p.m.

"(The students) have a chance to ask these people what they stand for (on different issues)," Batac said.

Political science sophomore,

Carrie Barkley, believes that all events will be beneficial for students to attend.

"It's a great opportunity this year for students to get involved in politics," Barkley said. "The issues affect the students."

The week's events will be moderated by local media personalities from KSBY, the Telegram-Tribune, New Times and Mustang Daily.

## VICTORY: Mustangs held the Wildcats offense to just 14 points

From page 12

sessions. The first three Cal Poly drives started within the Wildcats end of the field and led to two Mustang touchdowns.

"We felt we had to establish our running game in order to take some of the pressure off the quarterback and the passing game," Patterson added. "We did a good job of that early in the ball game and that gave us more time to be able to throw the ball."

The Mustangs gained 296 yards on the ground and 218 yards in the air.

Mustang quarterback Alli Abrew was 11 for 19 passing, and threw for 185 yards. Running back Mike Allhouse ran for 128 yards on 22 runs. Wide receiver Kamil Loud had four catches for 185 yards and two touchdowns.

For Abrew, the win means the Mustangs can get back to having fun.

"We came out real tight at the beginning of the game," Abrew said. "We needed a win. Being around a ball club when you're 0-3, you can't have the kind of fun that you'd like to have out there."

Abrew is still ailing from an injured left wrist suffered in last week's loss to Weber State. He said the wrist was sore, but that it didn't bother him during the game.

On the defensive end, Cal Poly kept Central Washington's offense in check allowing only two touchdowns.

"The line and the linebackers were taking care of business up front so that took a lot of pressure off the defensive backs," said corner back Kaaron Conwright. "The whole defense did its job and that's why we came out victorious."

Running back Mike Allhouse ran for 128 yards on 22 carries in Saturday's 49-14 victory over Central Washington / Daily photo by Dawn Kalmar

Conwright had one of three Cal Poly interceptions and also blocked a punt.

The Mustangs took control of the game from the opening kickoff.

On the Mustangs first possession, wide receiver Kamil Loud set up Cal Poly's first touchdown with a 29-yard pass that put the Mustangs at the Wildcats two-yard line. Three plays later, Abrew found wide receiver Ryan Thomas in the right side of the end zone for a touchdown.

The Wildcats were shutdown by Cal Poly on their next possession. Conwright's blocked punt set up Cal Poly at the Wildcats' six-yard line. Fullback Keith Washington then took the ball in for the first of two touchdowns of the day. The touchdown gave Cal Poly a 14-0 lead.

Central Washington did

respond though.

After a Cal Poly fumble, the Wildcats carried the ball all the way down field just short of a score. From the one-yard line running back Dan Murphy powered the ball into the end zone bringing the score to 14-7 with only four minutes remaining in the quarter.

Cal Poly's offense took just over a minute to strike back. Abrew found Loud for a 37-yard touchdown pass to give the Mustangs a 21-7 advantage. That score held through the first half.

In the second half it was more of the same for the Mustangs as the offense added four more touchdowns, and the defense only allowed one Central Washington score.

The Mustangs go on the road this weekend to face Idaho.

## PECK: Holds Cal Poly record for career catches

From Page 12

catches for 58 yards in the game. "I knew going in I only needed four catches, but it happened in the middle of a drive so it was kinda anti-climatic."

Peck, a modest athlete and All-American candidate, is the fifth Mustang to record 100 career catches, and his 62 catches last season set a Cal Poly record.

"It's a credit to the players I've played with in the past, the quarterbacks, running backs and offensive lineman," Peck said.

In addition to the career recep-

tion record, Peck is close to breaking the receiving yards record this season.

"That was great," said Cal Poly Head Football Coach Andre Patterson of Peck's achievement. "He broke a players record who played in the NFL, and Jon's a great player and a great person."

"He didn't want any fanfare when he broke the record, he doesn't say much, he just goes out and plays hard and competes," Patterson added. "I wish I had 100 guys like him, he's a real good guy."

## Galaxy beat Clash in MLS playoff

Associated Press

Thursday night.

PASADENA, Calif. (AP) — Robin Fraser scored in the 84th minute and Eduardo Hurtado added a goal in the final minute Sunday as the Los Angeles Galaxy beat the San Jose Clash 2-0 to tie the best-of-3 series.

The deciding match of the Major League Soccer first-round series will be Wednesday night at the Rose Bowl. The Clash won the opener 1-0 in San Jose on

Fraser's shot from just outside the penalty area hit the back of Clash midfielder Eddie Lewis' head and ricocheted into the unguarded goal.

Hurtado took Jorge Campos' pass, drew goalkeeper Dave Salzedel toward him, then shot into the net, delighting the crowd of 27,833.

The Office of the President, The College of Liberal Arts, and the Cal Poly Humanities Program are pleased to announce

**Humanities X490**  
**The President's Seminar:**  
Science, Society, and the University

**Taught by**

**Cal Poly President Warren Baker,**  
Prof. John Culver, Political Science,  
Prof. David Henry, Speech Communication  
Winter Quarter 1997

The class will address a number of issues in science and society as they involve higher education in California and the nation as we enter a new century. Guest speakers from politics and higher education in the State of California will be invited to participate. Students who are selected to take the seminar will be active participants in all discussions. Enrollment will be limited to 20 students. Because the Humanities Program anticipates high demand for this class, students must have senior standing, and at least a 3.0 gpa in all university course work to be considered. If you meet these criteria, and are interested in enrolling please pick up a more detailed course description, and a short application form from the Humanities Program Office, Room 28 of the Faculty Office Building or from the Office of the Dean of the College of Liberal Arts, Room 31 of the Faculty Office Building.

Applications are due to the Humanities Office or the CLA Dean's Office by **October 11 at 4pm**. You will be notified promptly if you have been admitted or not. The telephone number of the Humanities Program is 756-1206. The e-mail address of Prof. Richard Simon, the Chair of the Humanities Program, is Rsimon. Humanities X490 is a new 4 unit class for Winter quarter 1997 which will meet each Thursday from 4pm to 7pm in the Alumni House on campus. The course has been approved for GE&B Area C.3 credit, but even if you have already satisfied this GE&B area you might want to take the class.

## SOCCER: Midfielder Amy Earle scored two goals over the weekend

From Page 12

one of many problems with the calls.

An extremely physical Washington State took advantage of the lack of foul calling, which didn't help the Mustangs.

"It was a very physical game. He (the center referee) was consistent, I'll say that," Crozier said. "That's one thing we talked about (during halftime). There were a lot of things we thought were fouls. We were waiting for the whistle and it wasn't there."

Bad officiating aside, freshman forward Michelle George and senior forward Patty Geesman, got the ball rolling for Cal Poly at the 72 minute mark in the second half.

In a hectic frenzy in front of Washington's goal, George put the Mustangs on the board. Off a pass from senior forward Geesman, George shot on goal, but the ball was deflected by Cougar goalie Jessica Glazer.

Luckily for Cal Poly, the ball didn't go far and ended up rolling along the goal line. A Washington

defender tried to clear the ball, but wasn't quick enough and George found her way to the back of the net.

George was one of three freshmen who started the game.

Crozier said George, Sievers, and forward Karrie Layton were put in because they earned "the spot."

"We had a couple of true freshman in there who played 90 minutes and they did a great job," Crozier said. "They weren't starting the first few games, but as they got in the games, it became clear that they were players who could help us right now."

Cal Poly capped the victory 13 minutes later with a goal from junior midfielder Amy Earle.

Overall, Crozier was pleased with how the team performed.

"We played well defensively. We didn't get many chances (offensively)," he said. "It was a tough, tough game and we took advantage of the few chances that we had."

Although the team won, Tobias said Cal Poly still has some things

to work on.

"Offensively it seems like, in the last couple of games, the thing we have been struggling with is picking out our options early, playing the ball early, in particular to the opposite side of the field," Tobias said. "Do that, and often we have a lot more chances, so it seems like that keeps getting better."

"As long as that is part of the focus and as long as we keep moving in that direction and that aspect gets sharper and sharper, we are going to see ourselves getting more and more chances (to score)."

In Sunday's afternoon game against the Loyola Marymount Lions, neither team could get on the board in the first half.

The Mustangs came out shooting in the second half, getting several good scoring opportunities. It wasn't until 15 minutes into the half that Earle got the Mustangs on the board. It was enough to give Cal Poly the 1-0 win.

Cal Poly faces University of Portland at Washington Oct. 4.

## Tony Gwynn captures his seventh NL batting title

Associated Press

LOS ANGELES — Tony Gwynn considered it such a wonderful day that winning his seventh NL batting title seemed almost a footnote.

His team, the long-suffering San Diego Padres, won the NL West for the first time in 12 years with a three-game sweep Los Angeles to end the regular season.

His brother, Chris, who had a mostly disappointing year, capped the Padres' dramatic comeback with a pinch, two-run double in the 11th inning Sunday to beat the Dodgers 2-0 and clinch the division title.

"I'm more happy with Chris getting the big hit than I am winning the batting title," Tony, soaked with champagne and beaming, said of his younger brother. "I hate to say it, but I've won it six times, so it's kind of

old hat.

"Something like this day, when we won the division and my brother got the big hit, that will probably never happen again."

Gwynn, who went 0-for-4 and finished at .353, officially won the batting title despite falling four plate appearances short of the 502 required.

The rules require an average of 3.1 appearances per game to qualify, but because of an injury that sidelined him for 31 games, Gwynn finished with 498.

However, there is an exception to the rules that allows players who fall short of qualifying to be credited with enough hitless at-bats to reach the minimum if it still leaves them above the highest qualifier.

With an extra 0-for-4, Gwynn would be at .349. That tops Ellis Burks of the Colorado Rockies, who led qualifiers at .344.

### Brady Anderson reaches 50 homerun plateau

TORONTO — Brady Anderson hit his 50th home run Sunday, joining Mark McGwire in the 50-homer club this season and making it only the fourth time that two players have hit 50 homers in a season.

Anderson hit a 2-2 pitch from Pat Hentgen into the right-field seats. The homer was his 12th this season leading off a game, breaking the major-league record set by Bobby Bonds in 1973.

Hank Greenberg (58 homers) and Jimmy Foxx (50) both reached the 50-homer plateau in 1938; Ralph Kiner (51) and Johnny Mize (51) did it in 1947; and Roger Maris (61) and Mickey Mantle (54) performed the feat in 1961.

# Volleyball splits weekend matches

By Megan Lehtonen  
Daily Staff Writer

After celebrating its first conference win of the year over New Mexico State Thursday night, Cal Poly's women's volleyball team lost in three straight sets Saturday, falling to the fifteenth ranked rival Gauchos of U.C. Santa Barbara (UCSB).

### • Women's Volleyball

The Mustangs now have an 8-4 record overall, and are 1-1 in the Big West.

Playing before an enthusiastic 497 fans, the largest crowd this season in Mott Gym, the Mustangs fought hard as UCSB jumped to an early 6-1 lead in the first game.

Cal Poly was able to rally behind middle blocker Kari DeSoto's kill, bringing the team within one point of its opponents. But Santa Barbara held onto its lead throughout the entire game. Cal Poly held tough at 14-8, holding the Gauchos off for five game points, until Gauchos' freshman Roberta Gehlke ended the game with a kill, boosting UCSB to a 1-0 lead.

The Mustangs turned things around in the second game, jumping out with an early 7-4 lead. But once again, the Gauchos responded, tallying 10 straight points that helped them to a 15-12 win.

The story was the same in the third game as Cal Poly fell 15-8. UCSB head

coach Kathy Gregory, who gained her 526th career win with the Gauchos victory, said Cal Poly came out with a good game plan.

"Poly has a good team," she stated after the match, "and we are fortunate to get out of here with a 3-0 win."

Despite the disappointing loss to the long time rival Gauchos, Cal Poly coach Steve Shlick remained positive throughout the entire match. He said that the Mustangs' had the courage to go in hard, which is something that they have been working on.

"We gave a very good effort tonight," Shlick commented after the match. "We competed hard against a strong Top 20 program."

Cal Poly out blocked the Gauchos 15-9 with help from sophomore middle blocker Trisha Jenssen, who led the Mustangs with 12 kills and 6 blocks. Also effective for the Mustangs was senior outside hitter Colleen Moro, one of Poly's offensive leaders this season, who ended the match with 11 kills and 13 digs.

Although disappointed after the match, Moro still felt that Poly played well. "We learned a great deal tonight," Moro stated after the game, "and we can walk away knowing that we played hard."

Conference play continues this weekend as the Mustangs host U.C. Irvine on Friday and Cal State Fullerton on Saturday. Both matches are at 7pm.

### • Football

The Mustangs first victory of the season, in front of 4,215 people at Mustang Stadium, improved Cal Poly's record to 1-3.

"The difference in the ball game was our special teams against their special teams," said Cal Poly head coach Andre Patterson. "Our special teams played a big part in helping set our offense up with a short field."

The Mustangs had great field position on the start of their pos

## Jon Peck sets receiving mark

By Melissa M. Geisler  
Daily Assistant Managing Editor

In the excitement of Cal Poly winning its first game this season against Central Washington, 49-14, one player's highest achievement went slightly unnoticed by fans.

Senior wide receiver Jon Peck entered Saturday's matchup with only four catches shy of owning the Cal Poly All-time career reception record set by Robbie Martin (1977-80) at 117.

"I just wanted to get it over with," said Peck, who had five

# Women's soccer gets two needed wins

By Melissa M. Geisler  
Daily Assistant Managing Editor

### Getting back on track.

That's what the Cal Poly women's soccer team did over the weekend when it hosted Washington State Cougars Friday and the Loyola Marymount Lions Sunday.

### • Women's Soccer

After a disappointing home loss to Big West opponent U.C. Santa Barbara early last week, 1-0, the Mustangs (6-4, 0-2 Big West) knew they had to redeem themselves at Mustang Stadium.

They did just that, winning both games and not giving up a goal in either match.

Friday night's matchup was exactly what the doctor ordered with Cal Poly shutting out Washington State, 2-0 although it had to work a little for the win. The Mustangs had to move out of a slow start in the first half to find the back of the net in the second.

The Cougars' quick style of one-touch play had them running around the field and after the ball throughout most of the first half.

Assistant Head Coach Dan Tobias said the Mustangs had to realize that to win, they couldn't let Washington State dictate "the physical aspect of the game."

"It was a matter of playing a team which was very physical, and first of all realizing that that's the way the game is going to go," Tobias said. "In the first half it seemed like they dictated quite a bit. They were winning a lot of head balls — stepping in front — which is what we have been doing the past couple of games."

"We just didn't do it for whatever reason in the first half," Tobias added.

Head Coach Alex Crozier said it took Cal Poly the first half to get adjusted to Washington State.

"They are a very good, solid offensive team," Crozier said. "They win a lot of balls early and it was getting us a little frustrated."

What also contributed to the first-half frustration was the lack of good officiating.

An early yellow card awarded to Cal Poly freshman defender Andrea Sievers was just
